**PRESIDENTIAL REMARKS: SMALL BUSINESS WEEK**  
Tuesday, May 7, 1991  
Rose Garden

I'm delighted to be with all of you representing small businesses. Welcome to the White House -- America's ultimate Mom and Pop operation. You know, we have something in common. I don't operate a business anymore -- but I still live above the shop.

You know, there's an extraordinary force at work inside America. A force that does the good work of this country. A force that embodies America's can-do spirit.

The force is small business. Made up of over 20 million men and women across this land who have taken control of their own lives. Made their own choices and decisions. Twenty million who stake out their goals and pursue them with determination, grit, vision. Twenty million who believe in themselves, their neighbors, their country. We're here today to celebrate these 20 million pieces of the American dream.

And we're going to meet five of them. You know, the Small Business Person of the Year is one of the most important awards there is, because it's an award for the American Spirit. A spirit that doesn't understand the word "no."

Joann Schulz wouldn't take "no" for an answer. When an accident totally disabled her for more than three years, she refused to put her life on hold -- she earned two degrees in that time. When she couldn't afford to continue with her education,

she found a job in the ophthalmic business. When she came up with an idea for making products for ophthalmic surgeons, she wouldn't listen to "no" -- she started her own business.

Joann wouldn't give up on life when her husband died suddenly. Instead, she poured her energy into her work. The results: Sales have climbed from virtually nothing to \$5 million in just five years. Her staff has grown from three employees to 75. What once was virtually a neighborhood operation, now sells products in 22 nations around the world.

Joann has conquered adversity and built a future. For that, we proudly name her the 1991 Small Business Person of the Year.

Leo LeBlanc wouldn't say "no" to life, either. Just when his wife developed a life-threatening illness, this corporate vice president was fired. Leo didn't give up. He said "yes." Yes to starting over, and yes to finding and pursuing his own dream. He took over Enterprise Brass Works, making equipment for the petroleum industry. He instituted innovative reforms, and showed faith in his workers and himself by purchasing the company -- putting every asset he owned on the line.

Now, Leo says yes to success. In the last decade his company has increased sales 525 percent and added more than 100 jobs. Leo LeBlanc is the Small Business Person of the Year 1st runner-up.

A mother's hastily improvised toy for a bored five-year-old became Caren Eilrich's ticket to the American dream. In 1984 she, her husband Mark, and friends produced the first "Space

Tubes" in their laundry room. Soon, the toys were so successful that the couple risked everything to go into the business.

Then tragedy struck. Caren died in an accident just 2 years after starting the company. Mark picked up the pieces and through hard and loving labor created a lasting memorial to his wife -- and a model for this country. Last year Wildewood Creative Products won a Parent's Choice Award. Its sales approached \$3 million, and its staff exceeded 80, with all supervisors and managers promoted from the production line. We remember Caren's determination, and salute Mark, our 2nd runner-up.

While Mark embodies determination, Paul Hsu [[S00]] embodies courage. He left Taiwan in search of freedom and opportunity. He found them in America. The company he started, Manufacturing Technology, Inc., designs and manufactures sophisticated electronics products. Paul is our National Small Business Prime Contractor of the Year. And the National Small Business Subcontractor Award goes to a full-service engineering firm with over 250 professionals. A firm that has performed engineering design work for such clients as the Los Alamos National Laboratory and the Department of Agriculture -- Merrick & Company.

Our five honorees today illustrate the kind of grit and enterprise that has made our land great. You'll notice that many of them conduct business throughout not only here in the world. Our administration is committed to encouraging free trade, so that all our entrepreneurs may compete around the world.

As you know, we have asked Congress to extend the fast-track trade procedures that have been in effect since 1974. Fast track really means good faith. It assures our trading partners that we will not alter trade agreements that we have settled with them. Congress simply will vote yes-or-no on these agreements as they were written by our negotiators and their counterparts. It also encourages close cooperation between administration negotiators and Congress. After all, we don't want to submit agreements that Congress will not pass.

Fast track does not take away Congress' power to accept or reject trade agreements. Nor does not railroad the American public into unwise deals. Fast track simply smooths the way for the kind of agreements that American businessmen and women -- people like today's honorees -- to spread their goods and ideas throughout the world.

We salute our five winners, as well as the state winners here today. We also want to honor the agency founded to help them make their dreams become reality: the Small Business Administration. And we want to pay tribute to its dynamic new Administrator, Pat Saiki. Pat's a good friend, and a feisty and outspoken leader who for her constituency.

The SBA will play an increasingly vigorous role in this nation's life as we enter the 21st century. Small business has become the chief supplier of new American jobs and opportunities. Many of the great innovations that will change our lives will spring from small business. It really is the place where the

future takes shape. Small businesses reward innovation -- create jobs -- and give people the means by which to claim their piece of the American dream.

Small businesses of America -- we salute you. And we offer you our admiration, our respect, and our gratitude. Thank you for your example, and may God bless you all.

I'm delighted to be with all of you representing small businesses. Welcome to the White House -- America's ultimate Mom and Pop operation. You know, we have something in common. I don't operate a business anymore -- but I still live above the shop.

she found a job in the ophthalmic business. When she came up with an idea for making products for ophthalmic surgeons, she wouldn't listen to "no" -- she started her own business.

Joann wouldn't give up on life when her husband died suddenly. Instead, she poured her energy into her work. The results: Sales have climbed from virtually nothing to \$5 million in just five years. Her staff has grown from three employees to 75. What once was virtually a neighborhood operation, now sells products in 22 nations around the world.

Joann has conquered adversity and built a future. For that, we proudly name her the 1991 Small Business Person of the Year.

Leo LeBlanc wouldn't say "no" to life, either. Just when his wife developed a life-threatening illness, this corporate vice president was fired. Leo didn't give up. He said "yes." Yes to starting over, and yes to finding and pursuing his own dream. He took over Enterprise Brass Works, making equipment for the petroleum industry. He instituted innovative reforms, and showed faith in his workers and himself by purchasing the company -- putting every asset he owned on the line.

Now, Leo says yes to success. In the last decade his company has increased sales 525 percent and added more than 100 jobs. Leo LeBlanc is the Small Business Person of the Year 1st runner-up.

A mother's hastily improvised toy for a bored five-year-old became Caren Eilrich's ticket to the American dream. In 1984 she, her husband Mark, and friends produced the first "Space

Tubes" in their laundry room. Soon, the toys were so successful that the couple risked everything to go into the business.

Then tragedy struck. Caren died in an accident just 2 years after starting the company. Mark picked up the pieces and through hard and loving labor created a lasting memorial to his wife -- and a model for this country. Last year Wildewood Creative Products won a Parent's Choice Award. Its sales approached \$3 million, and its staff exceeded 80, with all supervisors and managers promoted from the production line. We remember Caren's determination, and salute Mark, our 2nd runner-up.

While Mark embodies determination, Paul Hsu [[SOO]] embodies courage. He left Taiwan in search of freedom and opportunity. He found them in America. The company he started, Manufacturing Technology, Inc., designs and manufactures sophisticated electronics products. Paul is our National Small Business Prime Contractor of the Year. And the National Small Business Subcontractor Award goes to a full-service engineering firm with over 250 professionals. A firm that has performed engineering design work for such clients as the Los Alamos National Laboratory and the Department of Agriculture -- Merrick & Company.

Our five honorees today illustrate the kind of grit and enterprise that has made our land great. You'll notice that many of them conduct business throughout ~~not only here~~ in the world. Our administration is committed to encouraging free trade, so that all our entrepreneurs may compete ~~around the world~~.

*globally*

*redo*

As you know, we have asked Congress to extend the fast-track trade procedures that have been in effect since 1974. Fast track really means good faith. It assures our trading partners that we will not alter trade agreements that we have settled with them. Congress simply will vote yes-or-no on these agreements as they were written by our negotiators and their counterparts. It also encourages close cooperation between administration negotiators and Congress. After all, we don't want to submit agreements that Congress will not pass.

Fast track does not take away Congress' power to accept or reject trade agreements. Nor does it railroad the American public into unwise deals. Fast track simply smooths the way for the kind of agreements that American businessmen and women -- people like today's honorees -- to spread their goods and ideas throughout the world.

We salute our five winners, as well as the state winners here today. We also want to honor the agency founded to help them make their dreams become reality: the Small Business Administration. And we want to pay tribute to its dynamic new Administrator, Pat Saiki. Pat's a good friend, and a feisty and outspoken leader ~~who~~ for her constituency. *Unfortunately, she couldn't be with us today...*

The SBA will play an increasingly vigorous role in this nation's life as we enter the 21st century. Small business has become the chief supplier of new American jobs and opportunities. Many of the great innovations that will change our lives will spring from small business. It really is the place where the

future takes shape. Small businesses reward innovation, ~~+~~ create jobs, ~~+~~ and give people the means by which to claim their piece of the American dream.

Small businesses of America -- we salute you. And we offer you our admiration, our respect, and our gratitude. Thank you for your example, and may God bless you all.

There's an extraordinary force at work inside America. A force that does the good work of this country. A force that embodies America's can-do spirit.

The force is small business. Made up of nearly 20 million men and women across this land who have taken control of their own lives. Made their own choices and decisions. Last year Wildewood Creative Products won a Parent's Choice Award -- its sales approached \$3 million -- and its staff exceeded 80, with all supervisors and managers promoted from the production line. We salute Mark and Carol, our Small Business Person of the Year 2nd runner-up.

While Mark embodies determination, Paul Hsu embodies courage. He left Taiwan in search of freedom and opportunity. He found them in America. The company he started, Manufactured Technology Inc, designs and manufactures sophisticated electronics products for clients including the Air Force. Paul is National Prime Subcontractor of the Year. And the National Small Business Subcontractor Award goes to a full-service engineering firm with over 250 professionals. A firm that has performed engineering design work for such clients as the Los Alamos National Laboratory and the Department of Agriculture -- Merrick & Co.

We salute all of these people, as well as the state winners here today, and the small business people across this nation. We salute the agency founded to help them make their dreams become reality -- the SBA and its dynamic new Administrator, Pat Saiki. Pat's a good friend, and a feisty and outspoken leader who fights tenaciously for the needs of her constituency.

The SBA will play an increasingly vigorous role in this nation's life as we enter the 21st century. Small business has become the chief supplier of new American jobs and opportunities. Many of the great innovations that will change our lives will spring from small business. It really is the place where the

future takes shape. Small businesses reward innovation -- create jobs -- and give people the means by which to claim their piece of the American dream.

Small businesses of America -- we salute you. And we offer you our admiration, our respect, and our gratitude. Thank you for your example, and may God bless you all.

**PRESIDENTIAL REMARKS: SMALL BUSINESS WEEK**  
Tuesday, May 7, 1991

There's an extraordinary force at work inside America. A force that does the good work of this country. A force that embodies America's can-do spirit.

The force is small business. Made up of nearly 20 million men and women across this land who have taken control of their own lives. Made their own choices and decisions. Twenty million who stake out their goals and pursue them with determination, grit, vision. Twenty million who believe in themselves, their neighbors, their country. We're here today to celebrate these 20 million pieces of the American dream.

And we're going to meet five of them -- the 1991 Small Business Persons of the Year. You know, these are some of the most important awards there are. Because they're awards for the American Spirit. A spirit that doesn't understand the word "no."

Joann Schulz wouldn't take "no" for an answer. She refused to put her life on hold when, after an accident, she was totally disabled for more than three years. She earned two college degrees during her convalescence.

She wouldn't ask for help when she became a single parent - - she found a job in an the ophthalmic business. She wouldn't stand still when she came up with an idea for manufacturing products for ophthalmic surgeons -- she started her own business.

Joann wouldn't give up on life when her new husband died

suddenly. Instead, she poured her energy into her work. The results: Sales have climbed from virtually nothing to \$5 million in just five years. Her staff has grown from three employees to seventy-five. What once was virtually a neighborhood operation now sells products in 22 nations around the world. Joann has conquered adversity and built a future. For that, we proudly declare her the 1991 Small Business Person of the Year.

Leo LeBlanc wouldn't say "no" to life, either. Just when his wife developed a life-threatening illness, this corporate v.p. was fired. But Leo didn't give up. He said "yes." Yes to starting over, to finding and pursuing his own dream. He took over Enterprise Brass Works, making valves for the petroleum equipment industry. He instituted innovative reforms. And showed faith in his workers and himself by purchasing the company -- putting every asset he owned on the line.

Now, Leo says yes to success. In the last decade his company has increased sales 525 percent and added more than 100 jobs. And he's the Small Business Person of the Year 1st runner-up.

A mother's hastily improvised toy for a bored five-year-old became Caren Eilrich's ticket to the American dream. In 1984 she, her husband Mark, and friends produced the first "Space Tubes" in their laundry room. Soon the toys were so successful that the couple risked everything to go into the business.

Then tragedy struck. Carol died in an accident just two years after starting the company. Mark picked up the pieces, and through hard and loving labor created a lasting memorial to his

wife -- and a model for this country. Last year Wildewood Creative Products won a Parent's Choice Award -- its sales approached \$3 million -- and its staff exceeded 80, with all supervisors and managers promoted from the production line. We salute Mark and Carol, our Small Business Person of the Year 2nd runner-up.
