PRESIDENTIAL REMARKS: NRSC SENATORIAL TRUST MEETING
Thursday May 9, 1991

[[ACKNOWLEDGEMENTS]] It's great to see so many friends here -- I go back quite a few years with a lot of you. And I want to tell you -- you're the ones who keep this party going. [[JOKES]]

We're all thinking a lot about America's future. About the vision of this country that we can forge together. About an America that's strong, optimistic, and prosperous. About people who are eager about -- and prepared for -- the 21st century.

I want to talk to you today about a crucial element in our future -- a crucial element in some danger. I'm talking about free trade.

America's ability to negotiate with our trading partners -- and therefore our ability to participate in the global marketplace -- is at risk right now. Because Congress will very soon decide whether to extend Fast Track trade procedures.

Fast Track creates the basis of good faith between the President and Congress, and between the United States and its trading partners. It ensures that the executive branch of our government will consult with the legislative branch during trade negotiations. It also assures trading partners that we will not alter trade agreements once our negotiators and their negotiators have struck a bargain.

It does this very simply. It guarantees that the vote on implementing trade legislation will be taken within a fixed

period of time. And it guarantees that no amendments will be tacked onto that bill.

It's simple, it's fair, and it makes sense.

What will it mean to extend Fast Track? Well, in practical terms it will let us continue working to open markets through the GATT and other trade agreements. And, after all, we have so very much to gain from free and fair trade.

It will let us pursue the trade objectives of the Enterprise for the Americas Initiative. It will mean we can negotiate the North American Free Trade Agreement with Mexico and Canada -- and therefore come closer to the remarkable concept of a free trading hemisphere. If we lose Fast Track procedures, the Uruguay Round, the North American Free Trade Agreement and the Enterprise for the Americas Initiative will be in jeopardy.

Extending Fast Track is absolutely essential to securing our economic gains -- because trade is a vital source of strength to our economy. Last year, the nearly 8.5 percent growth in U.S. exports accounted for 88 percent of our economic growth. It's obvious that in order to sustain this growth, we must continue our active leadership role in trying to open the world market. A unified North American market, which now includes 360 million people, who produce \$6 trillion worth of goods each year, would be just the start.

The world of the new century will be one where competition is in the economic arena. A world in which defeatism produces de-feat. But where confidence and self-reliance produce

greatness.

With Fast Track, we define the America we want to build -- one where we believe in ourselves and in tomorrow. An America ready to seize the opportunities the new world economy offers.

Without Fast Track, we lose jobs. We jeopardize growth. A vote against Fast Track is a vote against trade. Against our own best interests. Against our economic future.

And so today we face an urgent demand. We must speak out for what we believe. We must show members of Congress how strongly we support Fast-Track negotiating authority and the prosperous future it will bring to this nation. We must stand tall and be counted for our principles. For when Americans believe in ourselves and work together, there is no future too bright -- no goal too high.

Thank you all for your support of the NRSC and, above all, for your belief in the ideals that will shape this nation in the century to come. God bless you all.

We're all thinking a lot about America's future. About the vision of this country that we can forge together. About an America that's strong, optimistic, and prosperous. About people who are eager about -- and prepared for -- the 21st century.

I want to talk to you today about a crucial element in our future -- a crucial element in some danger. I'm talking about free trade.

America's ability to negotiate with our trading partners -- and therefore our ability to participate in the global marketplace -- is at risk right now. Because Congress will very soon decide whether to extend Fast Track trade procedures.

Fast Track creates the basis of good faith between the President and Congress, and between the United States and its trading partners. It ensures that the executive branch of our government will consult with the legislative branch during trade negotiations. It also assures trading partners that we will not alter trade agreements once our negotiators and their negotiators have struck a bargain.

It does this very simply. It guarantees that the vote on implementing trade legislation will be taken within a fixed

period of time. And it guarantees that no amendments will be tacked onto that bill.

It's simple, it's fair, and it makes sense.

What will it mean to extend Fast Track? Well, in practical terms it will let us continue working to open markets through the GATT and other trade agreements. And, after all, we have so very much to gain from free and fair trade.

It will let us pursue the trade objectives of the Enterprise for the Americas Initiative. It will mean we can negotiate the North American Free Trade Agreement with Mexico and Canada -- and therefore come closer to the remarkable concept of a free trading hemisphere. If we lose Fast Track procedures, the Uruguay Round, the North American Free Trade Agreement and the Enterprise for the Americas Initiative will be in jeopardy.

Extending Fast Track is absolutely essential to securing our economic gains -- because trade is a vital source of strength to our economy. Last year, the nearly 8.5 percent growth in U.S. exports accounted for 88 percent of our economic growth. It's obvious that in order to sustain this growth, we must continue our active leadership role in trying to open the world market. A unified North American market, which now includes 360 million people, who produce \$6 trillion worth of goods each year, would be just the start.

The world of the new century will be one where competition is in the economic arena. A world in which defeatism produces de-feat. But where confidence and self-reliance produce

greatness.

With Fast Track, we define the America we want to build -- one where we believe in ourselves and in tomorrow. An America ready to seize the opportunities the new world economy offers.

Without Fast Track, we lose jobs. We jeopardize growth. A vote against Fast Track is a vote against trade. Against our own best interests. Against our economic future.

And so today we face an urgent demand. We must speak out for what we believe. We must show members of Congress how strongly we support Fast-Track negotiating authority and the prosperous future it will bring to this nation. We must stand tall and be counted for our principles. For when Americans believe in ourselves and work together, there is no future too bright -- no goal too high.

Thank you all for your support of the NRSC and, above all, for your belief in the ideals that will shape this nation in the century to come. God bless you all.
