Presidential Remarks
Service Clubs Picnic
Jackson Hole, Wyoming
17 July 1992
Draft

JUL 14 P6:18

Good afternoon everybody ... and thanks for that warm Wyoming welcome.

I can't think of a better way to spend a Friday afternoon. Big sky. Hot sun. A stunning view. And a lunch that includes baked beans ... cole slaw ... and not a single piece of broccoli in sight.

Our friends in the press corps are kind of hoping I'll be the proverbial rattlesnake at this picnic ... by talking a little bit about politics.

They want to know if I'd comment on this week's big event ... the one that captured the attention of millions of TV viewers all across this country.

To be brutally honest ... I think the (National League) should have won the All-Star game.

While all that madness was going on in Manhattan ... I did a little fishing up in the woods. With Secretary of State Jim Baker ... and my son and his son.

I'll confess ... while some people prefer go to libraries to exercise their mind ... I do my best thinking with a pole in my hand ... and a tackle box by my side.

I did some thinking about America ... and where we stand these days.

If you look at it one way ... our future is as bright as this Wyoming sunshine.

The Cold War's over. We won. Wasn't even close. For the other side ... it was like trying to take on The Elks Club Little League team.

Remember a couple years ago ... all that hoopla about that TV movie ... "The Day After." Teachers saying that kids went to bed with nightmares ... worrying about war and eapons.

Today ... our kids can worry about scraped knees ... the big game ... and whether their first crush will figure out they sent the silly love letter. I think you'll agree ... that is very good news.

But we're in no mood for popping corks ... I know that. The question on everyone's mind is ... where do we go next?

I'm running for four more years in the White House ... because I believe I have the answer.

I believe that with the same values that won the Cold War ... we can forge an America with good, secure jobs for all our people. A nation where family and faith bring us together ... and where our streets are safe and secure.

If you listened to that meeting in New York this week ... you heard a lot of talk about what's wrong with America. In fact ... if pessimism were an Olympic event ... those guys just won a Gold Medal.

In the coming months ... I'm going to talk about something different. Straight talk about our problems ... and our opportunities.

Cause you see ... when it comes to America ... count me among those who say ... our future is as vast as this Big Sky above us.

There's an old Wyoming saying ... that I'm just making up now.
"The only way to ruin a view of the Grand Tetons ... is to give a
political speech."

Don't worry ... I won't ruin the view today.

Let me just say thanks for the lunch. Thanks for the
hospitality. Next time just throw a couple more trout in the
river.

Thank you very much.

I just came down from a little fishing up in the woods. With
Secretary of State Jim Baker and our sons.

I heard what went on in Madison Square Garden. All the clamor. All the criticism. If you don't mind ... I'd like to take a few minutes ... and give you a slightly different view of America.

Talk a little bit about why I'm running for four more years ... rather than spending more of my time fishing in magnificent places like this.

I had the good fortune of growing up in what is known as the American century. A time when opportunity was as vast as this sky above.

But the great thing about America ... is that we wanted everyone to enjoy our sunshine. We shared our good fortune. More than that ... we sacrificed for it.

Sometimes in blood. Sometimes in tears. Always in taxes. So that other people wouldn't just yearn to breath free.

In the past four years ... we saw our efforts pay off. Change of almost Biblical proportions. Captive nations set free. The dark corners of our world bathed in the sunshine of freedom and free enterprise.

Today ... as we sit down for this picnic ... the specter of nuclear war has receded. While the world can still be uncertain and dangerous ... we've been able to slow defense spending by a thousand dollars for every American family.

American products ... our cars, computers ... even our colas ... are now sold in more nations than ever before. Despite a sluggish world economy ... American companies have created almost two million export jobs over the past five years.

We've tamed inflation. The last time interest rates were this low ... Dick Cheney was a cub Congressman. (Believe me ... that's a long time ago.)

My guess is you didn't hear a lot of this kind of talk in New York City. I'm pretty sure America was described as second rate ... second-class.

It probably wasn't mentioned that we have the world's largest economy ... the most productive workers ... that we sell more of our products from Hong Kong to Honduras ... than the Japanese, the Germans ... anyone else.

The speeches all probably sounded like a Bruce Springsteen song ... tales of factories closed and mills shuttered. No one mentioned that the percent of the world's manufactured goods we produce today ... is higher than it was 20 years ago.

Or how about this. An American worker can produce in four days ... what a Japanese worker can produce in five.

Now don't get me wrong. We have our problems. We have our challenges. But let's keep things in perspective.

Our mission ... very simply ... is to finish the job we started four decades ago ... and made so much progress on the past four years.

This is not the mission described below.

Think about why we sacrificed all those decades. For selflessness ... and self-interest.

We understood that if we could eliminate the specter of nuclear war ... if we could win more of the world's people to freedom and free enterprise ... our children would live more secure and prosperous.

We've worked miracles across the world ... now it's time to work a miracle in America.

First ... we must create more opportunity for more people. That means slashing the budget deficit ... and reducing the size of government.

Second ... it's time for a moral revival in this country ... a return to the solid values that have carried us for 200 years.

Third ... peace in the world means nothing ... if we are not secure in our own backyards. Government must guarantee the security of all people.

These are the three principles I will use to lead this nation the next four years.

*not growth?
not compassion?*

Our economy is growing today ... but it must grow faster.

Too many people have worked for a company for 20 years ... only to worry that the next mail run will bring a pink slip. Too many parents have saved to send kids to college ... only to find that the graduates can't get a good job.

I used to run a business ... meet a payroll. I know that the only way to create jobs ... is to support the people who create the jobs.

That means cutting the deficit. It means giving people incentives to save and invest in our future.

With the help of Congress ... or without the help of Congress ... I'm going to get the job done!

My second priority: Restore traditional American values.

I'm not talking slogans here. I'm talking the fundamental moral and ethical underpinnings of our country. Knowing the difference between right and wrong. Helping out neighbors. Understanding that you don't sue somebody at every drop of a lawyer's name.

A couple months ago ... I happened to be in San Antonio, meeting with some of the front-line soldiers in the war on drugs. I saw a story in the newspaper. A cab driver had been murdered ... another act of random, senseless violence.

But what stopped me in my tracks was that the murderer was a 12-year-old boy. And as he left the courtroom ... his handcuffs clanged to the floor ... because the child's wrists were too thin. (*small?*)

Just one story ... I'm sure you can tell many more ... about the consequences of families breaking down in America.

For an answer ... I turn to a certain silver haired philosopher. Her name is Barbara Bush. She says that what happens in your house ... is far more important than what happens in the White House.

I happen to agree.

The first thing government can do is to take its own Hippocratic Oath: "Do no harm." Stop encouraging single moms from having children ... and start discouraging them.

*Don't
start out
with
Murphy
Brown!*

Then we've got to help pull families together. By reforming welfare. Providing better schools.

My third priority ... very simple. Restore respect for the law.

What do you say ... to an elderly woman ... who watches the Berlin Wall fall on television ... but is afraid to walk to her grocery store?

What do you say ... to a ten-year-old kid ... who hears of the Russians reducing nuclear weapons ... then has to walk through a metal detector at school every morning?

You say. Enough is enough. Let's put an end to the lawlessness. Let's put an end to the illegal behavior.

These are my principles ... the things I believe in. I hope you do too.

You might be thinking ... why haven't you acted on them already? The truth is we have made some progress ... in education, welfare reform and child care ... we're building solid foundations for the 21st century.

But it's also true that these changes aren't popular in some places. They threaten the usual way of doing things. They get under the skin of special interests.

But I'm not backing off ... and I don't believe you want me to. Americans have a burr under their saddle. They don't want talk ... they want leadership. And I'm going to provide it.

Despite everything you might have heard this week ... I believe America's potential is still vast ... still as big and blue as this sky above.

I've seen this nation climb mountains much taller... and my faith is as strong as ever.

If we can topple the Berlin Wall ... we can build a sturdy economy. If we can lift the iron curtain ... we can bring the curtain down on "new age" values. If we can help people walk the streets free in Eastern Europe ... we can take back the streets of America.

This is our mission ... to complete the dream. To renew America.

Four years from now ... when I return for a little more trout fishing ... I look forward to standing before you again and saying: "mission accomplished."

God bless you and God bless America.

Good afternoon everybody ... and thanks for that warm Wyoming
welcome. (Acknowledgements)

I can't think of a better way to spend a Friday afternoon. Big
sky. Hot sun. A stunning view. And a heaping plate of baked
beans ... cole slaw ... with not a single piece of broccoli in
sight.

Our friends in the press corps are kind of hoping I'll be the

But it's also true that these changes aren't popular in some places. They threaten the usual way of doing things. They get under the skin of special interests.

But I'm not backing off ... and I don't believe you want me to. Americans have a burr under their saddle. They don't want talk ... they want leadership. And I'm going to provide it.

Despite everything you might have heard this week ... I believe America's potential is still vast ... still as big and blue as this sky above.

I've seen this nation climb mountains much taller... and my faith is as strong as ever.

If we can topple the Berlin Wall ... we can build a sturdy economy. If we can lift the iron curtain ... we can bring the curtain down on "new age" values. If we can help people walk the streets free in Eastern Europe ... we can take back the streets of America.

This is our mission ... to complete the dream. To renew America. Four years from now ... when I return for a little more trout fishing ... I look forward to standing before you again and saying: "mission accomplished."

God bless you and God bless America.

MEMORANDUM FOR DAN MCGROARTY

FROM: JAY LEFKOWITZ *JL*

SUBJECT: Wyoming Speech

Just a thought for the Wyoming speech. On July 5, the New York Times reported (see attachment) that "more people were working in America in June than in any month since the end of 1990."

On page 3 of the revised draft of the Wyoming speech, when the President talks about how America was described by the Democrats as second rate, the President could add a paragraph like this:

Although the economy is not doing as well as some statistics earlier this year had indicated, it is also not doing nearly as poorly as the Democratic prophets of doom would have us believe. The fact is that more Americans had jobs in June of 1992 than in any month since the end of 1990. Now, if only the Democratic Congress could enact our economic growth package, we could add at least 500,000 new jobs to the economy in very short order.

→ [The 500,000 figure comes from CEA's Economic Report to the President.
