OFFICE OF THE VICE PRESIDENT
WASHINGTON

April 22, 1992

MEMORANDUM FOR THE VICE PRESIDENT

FROM: ZELDA J. NOVAK *ZM*
SPECIAL ASSISTANT TO THE VICE PRESIDENT FOR
POLITICAL AFFAIRS

BARBARA J. SCHLEIBAUM
SPECIAL ASSISTANT TO THE VICE PRESIDENT FOR
POLITICAL AFFAIRS

SUBJECT: ROUNDTABLE/PHOTO OPPORTUNITY WITH RNC EAGLES

Date of Event: Wednesday, April 22, 1992

Location: Union Club
Cleveland, Ohio

Time: 12:05 p.m.

I. Purpose

To participate in a roundtable (16 attendees) with
Republican National Committee Eagles and prospective Eagles.

II. Background

Eagles contribute \$15,000 annually to the Republican
National Committee.

The host of the event is Eagle **Ed Lozick**, President of
Nerts, Inc., a machine shop in Highland Heights, Ohio.
Lozick served as a Finance Committee Co-Chairman for
Reagan/Bush 1984 and Reagan/Bush 1980. He is the son-in-
law of Eagle **Fred Lennon**, who will also be in attendance.
His biography is attached.

Ohio GOP Chairman **Bob Bennett** will be in attendance.
Bennett serves as full-time paid Chairman and is a member of
the RNC Rules Committee. In January of 1991 he was
appointed to the RNC Executive Council. He is a successful
Cleveland developer, a CPA and an attorney (biography
attached).

NOTE: Eagle **Tom Hannon** was interested in an ambassadorship
to the Netherlands. According to the White House, he will
not get the appointment.

BUSH/QUAYLE '92:

The Ohio presidential primary date is June 2, 1992. Ohio has 21 electoral votes, and will send 83 delegates to the Republican convention. Pat Buchanan will appear on the primary ballot.

The Ohio Bush/Quayle '92 Chairman is Governor George Voinovich. The Finance Chairman is John Berry.

According to the State GOP, the campaign to draft H. Ross Perot is doing well, and he is expected to be on the November ballot.

In 1988, the Bush/Quayle ticket received 55% of the vote.

1992 -- OHIO STATE HOUSE:

The top priority for the state party is winning a majority in the State House. The Democrats control the State House 61 to 38, and the Republicans control the State Senate 21 to 12. The Democrats have controlled the State House for the last twenty years.

The State GOP reports that a Republican takeover is possible because of this year's state legislative redistricting plan that favors Republicans. In a 3 to 2 vote, the Republican controlled Apportionment Board adopted a plan that created a number of open seats where Republicans can win, and a large number of minority districts. The Board included Governor Voinovich, Secretary of State Bob Taft, Republican State Senate President Stanley Aranoff, Democrat State House member Barney Quilter, and Democrat State Auditor Tom Ferguson.

In a victory for Republicans, the U.S. Supreme Court upheld the legislative map drawn by the Republican majority Apportionment board. The Court issued an order on April 20 to block a U.S. District Court ruling that would require a redrawing of the maps by a special master and a September 8 primary. While the Supreme Court did not rule in favor of the GOP plan, it did rule that elections will be held on June 2 under the GOP lines. The Ohio Republican party is confident that Republicans will win a majority in the State House.

DEWINE FOR U.S. SENATE:

In 1992, Senator **John Glenn**, a member of the Keating Five, is running for re-election. Lt. Governor **Mike DeWine** is the leading Republican candidate.

DeWine took office as Lieutenant Governor in January of 1991. Prior to this, he served four terms in the U.S. House of Representatives, from 1982 through 1990. In Congress, he served as a member of the House Judiciary, Foreign Affairs, and Select Iran-Contra Committees. DeWine earned a reputation for himself as a leader in the fight against drunk driving and violent crime. His political career includes serving in the Ohio State Senate and General Assembly, where he was active in passing drunk driving legislation. Prior to this, he served as Greene County Prosecuting Attorney.

DeWine and his wife **Fran** reside in Greene County with their eight children. His youngest child, **Anna**, was born on Friday, April 17, 1992. His eldest son, **Patrick**, is 24, and attends the University of Michigan School of Law. DeWine's complete biography is attached.

DeWine will face unknown businessman **George Rhodes** in the Republican primary on June 2. According to DeWine's campaign, DeWine is behind Glenn by about 20 points in the polls, and has a 50% name i.d.

Since DeWine announced his candidacy in February, the campaign has focused primarily on the personal finances of the candidates. The DeWine campaign has tried to make an issue of Glenn's \$3.06 million debt from his 1984 presidential bid. Both Glenn and DeWine released their financial statements. Glenn revealed his net worth to be about \$9 million. DeWine revealed his net worth to be about \$1.5 million.

Before the U.S. House of Representatives voted to disclose Congressional check-kickers, DeWine revealed that he bounced 31 checks during his 8 years in Congress (only 9 during the 39 month period designated for disclosure). The DeWine campaign reports that Glenn campaign is hesitant to engage DeWine on the check-bouncing issue, because of Glenn's \$3 million unpaid debt.

DeWine's Issues:

In addition to releasing his personal financial records to raise the issue of "new standards for disclosure for elected officials," DeWine has proposed a congressional reform program. The campaign's main theme is "time for a change." They hope to demonstrate that Glenn is the consummate entrenched politician. His proposal includes extending the application of laws to Congress, which granted itself immunity from them; reducing the size of congressional staffs; reforming the committee structure in Congress; and enacting term limits.

DeWine will release his anti-crime package later this week. In addition, the campaign hopes to focus on family issues, jobs, and education.

Glenn's Issues:

The political consulting firm of Doak and Shrum are running Glenn's campaign. They are expected to run a "populist" campaign, focusing on DeWine's congressional votes against unions, the minimum wage, and plant closing legislation.

Fundraising:

DeWine's campaign has raised \$450,000, and hopes to raise \$4 million (including funding from the NRSC) by November. Barbara Bush will attend a fundraiser for DeWine on May 12.

CONGRESSIONAL REAPPORTIONMENT AND ELECTIONS:

Ohio will lose two congressional seats due to reapportionment. Retirements, redistricting, and check-kiting scandals are expected to result in the election of 5 or 6 new Congressmen from Ohio. The Ohio delegation is currently made up of 11 Democrats to 10 Republicans. The State GOP expects the 1992 elections to result in a delegation of 10 Republicans, and 9 Democrats.

Four Congressmen have announced their intentions to retire. Rep. Dennis Eckart (D-11) and Rep. Don Pease (D-13) both retired in October because of unfavorable redistricting. Congressmen Chalmers Wylie (R-15) and Edward Feighan (D-19) are guilty of check-kiting, and announced their plans to retire as well.

Congressmen Clarence Miller (R-10) and Bob McEwen (R-6) will face each other in the primary.

In addition, Congresswoman **Mary Rose Oakar** (D-20) is expected to have a very tough primary battle against Cuyahoga County Commissioner **Tim Hagan**. **Oakar** was listed among the top House check-bouncers, bouncing 217 checks, overdrawing her salary 21 of 39 months.

TERM LIMITS:

Governor Voinovich and **Lt. Governor DeWine** have publicly stated their support for term limitations for legislators. Several bills have been introduced in the state legislature addressing term limitations.

In addition, two citizens' groups are circulating petitions in an effort to place a term limit proposal on the statewide ballot next November. The State GOP expects they will receive the necessary number of signatures.

NOTE: This event will take place in Rep. Mary Rose Oakar's (D-20) congressional district. The Mayor of Cleveland is Democrat Michael White.

III. Participants

The Vice President
Ed Lozick, Host of Event
Bob Bennett, GOP Chairman
(List of attendees is attached).

IV. Follow-Up

Notes and photos will be sent to participants.

V. Press Plan

Official and political photographer only.

Please meet...

JAMES E. BETTS

Jim Betts is a partner and member of the management committee of Walter, Haverfield, Buescher & Chockley and co-chairman of its Client Service and Business Development Committee.

A former member of the Ohio General Assembly and Republican candidate for Lt. Governor and U.S. Senator, Mr. Betts heads the firm's Columbus office. From both Columbus and Cleveland, he directs a staff responsible for state government relations and lobbying programs in behalf of clients including corporations, health care providers, professional services firms, school superintendents and trade associations.

Among the areas in which he has been active are anti-takeover legislation, hazardous materials transportation, pesticide regulation, hospital certification, awarding of state contracts and insurance regulation. He is a registered lobbyist in the State of Ohio, maintains extensive political contacts and is active at local, state and national levels of the Republican Party.

His law practice also involves the representation of clients in litigation. He successfully represented a major bank before the Ohio Supreme Court in a "golden parachute" employment case and has managed ongoing litigation for a major hospital client.

Mr. Betts, who spent 20 years in business before becoming an attorney, has been in practice since 1976. He is Co-Chairman of the Cuyahoga County Republican Party, Chairman of the Ohio High Speed Rail Authority and a former Trustee of the New Stadium Corporation in Cleveland. Mr. Betts and his wife reside in the Cleveland suburb of Rocky River.

Education:

Ohio University, B.S., 1954

Cleveland State University School of Law, J.D., 1976

Licensed to Practice:

All Ohio courts

DAVID L. BRENNAN

CHAIRMAN and CHIEF EXECUTIVE OFFICER, THE BRENLIN GROUP

A graduate of Ohio State University and recipient of a Juris Doctor Degree from Case Western Reserve Law School, David L. Brennan has been an attorney for thirty-five years. In 1985, he received an honorary Doctor of Laws degree from the University of Akron. He is a founding partner and member of the Akron-based Amer Cunningham Brennan law firm.

In 1975, Brennan, Richard M. Hamlin and James P. McCready co-founded The Brenlin Group. Today, this parent holding company operates seventeen industrial/manufacturing companies with twenty-six locations in fourteen states and Mexico. In 1991, *Forbes*¹ Magazine ranked The Brenlin Group the 299th largest private company in the country. With sales approaching \$640 million, it is the sixteenth largest privately-held company in Ohio². Richard M. Hamlin is Vice Chairman and James P. McCready is President and Chief Operating Officer of Brenlin.

Brennan, a leader in local, state and national Republican activities, is one of the party's outstanding fund-raisers. In the fall of 1988, he addressed the National Conference of Republican Governors. He is a member of both the Ohio and Summit County Republican Party Finance Committees and has been a Republican Team 100 member since 1988. He was an Ohio delegate to the 1988 Republican National Convention and cast one of Ohio's electoral votes for George Bush.

On September 25, 1990, the Brennans hosted a \$25,000 a couple fund-raiser for gubernatorial candidate George Voinovich with President George Bush as special guest. The Brennans have also hosted receptions in their home for John Sununu, Dan Quayle, Robert Taft, Robert Mosbacher and Congressman Robert Michel.

Brennan's strong belief in Akron is demonstrated in key support to the area's cultural, educational and social service organizations. It has also resulted in his creation of a unique plan to attract new, out-of-state businesses called "NOW IS THE TIME FOR AKRON." In keeping with his commitment toward the revitalization of downtown, Brennan and associates are developing a new multi-million dollar center-city complex. Construction has begun on Phase I of the Main Place project, which consists of an eight story office building.

David and his wife, Ann, who is also an attorney, have developed aggressive plans to deal with the problem of workplace literacy. Along with Brenlin partners, McCready and Hamlin, Ann and David have established Learning Resource Centers for Brenlin employees and their families with on-site learning facilities.

Brennan is a leading advocate for Schools of Choice and has initiated the Ohio Scholarship Plan which endorses parental choice throughout the public and private schools of Ohio. In 1989, he served on a blue-ribbon panel charged with studying the structure, management and curriculum of the Akron Public Schools.

In June, 1991, Brennan was named Chairman of the Board of Trustees of the Western Reserve Economic Development Council. He is a trustee of Case Western Reserve University and The National Invention Center, Inc., a director of the All-American Soap Box Derby, Boys Hope, and a commissioner of the Akron Metro Parks serving Summit County. Brennan is a Director and Executive Committee member of the Akron Regional Development Board. He is Vice Chairman of Akron Tomorrow, a group of major CEO's he recently helped organize. He has received numerous community awards, including, in 1990, Ohio Ballet's prestigious BRAVO award for outstanding commitment to the arts.

David L. Brennan

Page 2

In 1989, Brennan initiated the first Akron chapter of United Way's Alexis de Tocqueville Society with 20 inaugural members. He chaired the 1991 Summit County United Way Campaign, which raised a record \$10.4 million.

Committed to the superior training of individuals entering the law field, he has established law chairs at both Case Western Reserve and The University of Akron. His legal affiliations include the Akron, Ohio and American Bar Associations.

The parents of four grown children, David and Ann Brennan reside in west Akron.

Society

ROBERT W. GILLESPIE

Chairman, President, and Chief Executive Officer,
Society Corporation

Chairman and Chief Executive Officer,
Society National Bank

ROBERT W. GILLESPIE was elected Chairman of Society Corporation and Society National Bank in 1988 and continues as president and chief executive officer of the corporation, a position he has held since 1987, and the bank, a position he has held since 1985. He previously served as executive vice president and then vice chairman and chief operating officer of Society Bank, executive vice president of the corporation, and president and chief operating officer of the corporation and the bank.

Gillespie began his association with Society on a part-time basis while completing his graduate studies at Case Western Reserve University. After receiving his M.B.A. degree in 1968, he began work at the bank on a full-time basis as a credit analyst. He also holds a B.A. degree in economics from Ohio Wesleyan University and is a graduate of Harvard Business School's Advanced Management Program.

Gillespie has extensive experience over a broad range of financial activities. He has been responsible for Society's corporate, retail, and operations departments.

Gillespie serves on the boards of trustees of Case Western Reserve University, Ohio Wesleyan University, University Hospitals of Cleveland, and the Musical Arts Association of Cleveland. He also sits on the Board of Directors of Greater Cleveland Growth Association. He is chairman of Greater Cleveland Roundtable and a member of Cleveland Tomorrow and North Coast Harbor.

With more than \$25 billion in assets, Society Corporation ranks nationally as the 26th largest commercial banking organization, with more than \$1.7 billion in equity capital and more than 500 banking offices in Ohio, Michigan and Indiana. The trust business of Society ranks in the top 15 nationally in terms of revenues and managed assets and has offices in Ohio, Indiana, Michigan, Texas, Florida, New York, Colorado and Missouri. Through its affiliates, Society engages in commercial banking, consumer banking, mortgage banking and leasing, and provides trust and investment management services.

- Bush Quayle '92 National Finance Committeeman
- Bush-Quayle '92 Ohio Vice Chairman For Finance

Repository Final

From modest beginnings

Hannon: Manufacturer, farmer, world traveler

By DAVID HAGELIN
Repository business writer

NIMISHILLEN TWP. — "I've been blessed with an awful lot," says Thomas W. Hannon — business owner, inventor, horse fancier, world traveler and acquaintance of presidents and royalty.

Hannon, who was thrust headlong into the business world at age 19 after the death of his father, Frank, said last week that he "never had any desire to achieve an extremely high level of wealth. I've tried to make a comfortable life for my family, and maintain the highest level of honesty, loyalty, decency and fairness with all of my associates, whether they're customers or friends."

It is a philosophy that has helped lead to Hannon's success — and more importantly, says the Hannon Co. chairman, to his enjoyment of life.

Hannon, 58, his wife, Theresa, and their son Timothy and his family live on a sprawling 100-acre estate in the 8000-block of Ravenna Avenue NE. It is there that Hannon has a small dairy operation and oversees a seven-member staff that performs bovine embryo transplants through a company called Hall of Fame Genetics.

The estate also is where Hannon keeps his 11 Friesian horses — among only 400 nationwide — that sometimes sport Hannon's friends around his property in one of his 30 antique carriages.

Hannon's agricultural enterprises in Nimishillen Township are subsidiaries of the Hannon Co., whose largest division is Hannon Electric Co. at 1605 Waynesburg Dr. SE in Canton Township. That office, which has undergone renovation and expansion in the past year, also is headquarters for the Hannon Co., which has branches in other parts of Ohio as well as in Arizona and Australia.

Thomas Hannon's father started Hannon Electric Co. in the basement of the family home on Fourth Street SW in Canton 62 years ago. Hannon, whose ancestors came to America from Ireland during the famine of 1849, said his "beginnings were modest." Starting at age 8, when he peddled magazines door-to-door, he held a succession of jobs after school and during holidays, including stints as a hired hand at the Enos Stewart farm in Lawrence Township and the Leroy Frank farm in Harrisburg.

Those experiences kindled his love of the land and interest in animals. Working for the Frank family also resulted in Hannon's marriage to the former Theresa Frank 38 years ago.

At 18, young Hannon began working for his father's

Thomas Hannon enjoys a rare moment

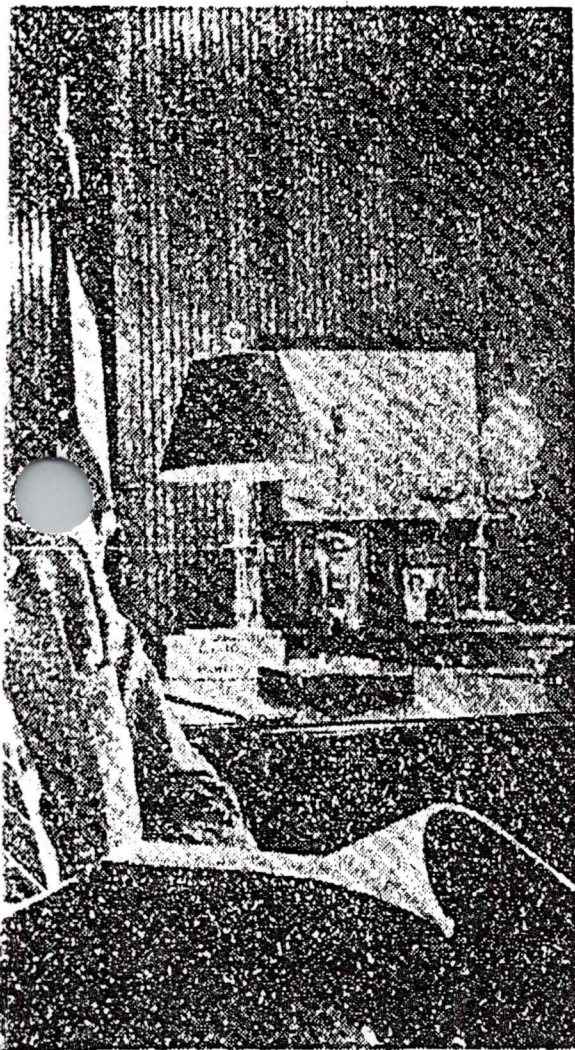

with his mother, Ruth, became president and Hannon took over as vice president and general manager. He became president in 1968, a post now held by Timothy Hannon.

Hannon Electric has grown from an electrical contractor serving area businesses to a company that does business worldwide. Today, the company manufactures and rebuilds electromechanical equipment used mainly in the power generation, mining and aircraft industries, including motors, transformers, electric controls and hydraulic and precision-inspection devices.

After his father died, Hannon enrolled in a five-year

Hannons, an empire grows

Repository staff photo by Bob Rossiter

ent of relaxation at his farm office

for his first patent for electromechanical equipment at age 20, and he estimates that over the years he has been awarded several dozen patents in a handful of countries.

Along the way, Hannon and his wife have made contacts throughout the world — particularly in Europe — have fueled their interest in the people and cultures of other lands. "We have friends all over the world," he said.

Hannon made his first trip to Europe in the early 1950s in an effort to expand the family's business abroad. Since then, he said, he and his wife have come to feel at home in many of the nations of Western Europe. He has lived with families in "coal mining

and steel mill towns" in Europe, he said, besides gaining the acquaintance of prominent foreign business people and leaders of countries.

Hannon's fascination with things European was furthered by his membership in the Electrical Apparatus Service Association, an international trade association of some 3,000 companies. Hannon was president of the organization in 1969.

He also has served as president of the Carriage Association of America, which represents a few thousand families worldwide who have an interest in restoring and driving antique carriages. The British royal family has hosted the group at Buckingham Palace, he said.

Within the past several years, he has been involved in a number of cultural and trade exchanges. He served on the Netherlands Bicentennial Commission, whose charge was to commemorate 200 years of diplomatic relations between the United States and the Netherlands, and President Reagan appointed him to the German-American Tricentennial Commission, which was formed to recognize 300 years of emigration by Germans to the United States.

The latter commission currently is installing a German-American "friendship garden" near the White House, said Hannon, who also serves as vice president of the Netherlands-American Amity Trust cultural exchange organization.

Hannon nearly was appointed U. S. ambassador to the Netherlands in 1986. The post went instead to John Shad, who had been chairman of the Securities and Exchange Commission.

"That was something I actively pursued," Hannon said of the ambassadorship. "The White House has told me, if people ask why I didn't get it (the appointment), to tell them it was very, very close."

While he said he enjoys politics, Hannon — who recently was named to the Center for Strategic International Studies, an economics-oriented "think tank" — asserts he has no desire to run for any office. He has been an active supporter of Vice President and Republican presidential candidate George Bush, serving as Bush's campaign co-chairman for the 16th Congressional District and as Ohio's vice chairman for finance for the Bush campaign.

Civic and community service activities also vie for Hannon's time. He is on the board of the Central Trust Co. of Northeastern Ohio, Walsh College and the Cleveland State University Foundation, and has served on the Stark County Historical Society Board.

Hannon, who describes himself as a devout Catholic, also was instrumental in organizing the student exchange program for Rotary District 665 and served as president of the Louisville Rotary Club.

In addition to their son, the Hannons have three daughters and seven grandchildren. Many of the family members hold positions with the Hannon Co. and its subsidiaries.

DOMINIC LAURANT OZANNE

Advisory Committee

Role

Dominic Laurant Ozanne, as President of Ozanne Construction Company, will be responsible for the day-to-day construction operations at the site, particularly with respect to Cleveland employment and minority issues. Ozanne Construction is a Cleveland-based minority firm that is involved in public sector works and is thoroughly familiar with local public works processes and regulatory requirements.

Relevant Experience

Mr. Ozanne has more than 14 years professional construction experience, with 12 as president of Ozanne Construction Company (a minority firm). His company successfully constructed a variety of educational, commercial, industrial, government, and residential facilities in the Cleveland area. He is a member of the National Association of American Minority Contractors, the Ohio State Bar, and a Special Counsel to the Ohio State Attorney General.

Specific project experience includes the following:

- Harvard Yard Service Facility, Phase I, Division of Water, City of Cleveland, OH — Construction of a 22,000-SF building, and related parking lots and roadways.
- Division Avenue Water Treatment Plant, City of Cleveland, OH — A \$5.1-million conversion of the treatment plant's chemical building from a powdered to liquid alum system. The facility required design and construction of an earth retention system, with continuous site dewatering during construction.
- W.O. Walker Rehabilitation Center, Ohio Industrial Commission, Cleveland, OH — Interior finishing of the \$75-million project, including a four-story atrium; installation of electronic hardware; and construction of a gymnasium, auditorium, and swimming pool.
- Central Chemical Storage Facility, NASA Lewis Research Center, Cleveland, OH — Construction of a 15,000-SF chemical storage building.
- Optical Systems Lab, Wright Patterson Air Force Base, Dayton, OH — Construction of a \$4-million Corps of Engineers research laboratory, with connections to two existing buildings.

Education and Professional Affiliations

- Doctor of Jurisprudence — Harvard University Law School
- Bachelor of Arts — Boston University
- Mr. Ozanne is a member and immediate past president of the National Association of Minority Contractors, and a member of the Construction Contracts Committee of the American Bar Association.

BIOGRAPHY

WILLIAM J. WILLIAMS

William J. Williams was elected chairman of the board of The Huntington National Bank in September, 1986. He also served as chief executive officer from September, 1986 to November, 1991. He joined the Bank in February, 1985 as president of the Northeast Ohio Region and also served as executive vice president of the Bank's parent company, Huntington Bancshares Incorporated. He is also on the board of directors of the Bank and the Corporation.

Prior to joining Huntington, Mr. Williams was president and chief operating officer of Republic Steel Corporation, which was merged with The LTV Corporation in the summer of 1984.

Born in Penn Yan, New York, he received his early education there and was graduated from the University of Richmond (Virginia) where he received his law degree in 1955. Williams practiced law in Richmond, Virginia with the firm of Hunton & Williams until he joined Republic Steel in 1963.

He is a director of Centerior Energy Corporation, Republic Engineered Steels, Inc. and UNR Industries, Inc, a trustee of University Hospitals of Cleveland and Cleveland Tomorrow and served as chairman of the Greater Cleveland Growth Association during 1989 and 1990. Mr. Williams is chairman of Youth Opportunities Unlimited, a comprehensive employment program for Cleveland students providing summer and entry-level job opportunities.

He and his wife, Sara, reside in Chagrin Falls, Ohio. They have four children.

BRIEFING MEMORANDUM FOR THE VICE PRESIDENT
PHOTO-OPPORTUNITY WITH NATIONAL ASSOCIATION OF HOMEBUILDERS

Date: April 23, 1992

Time: 5:15 p.m.

Location: Glenview Naval Air Station

From: Dave Juday

I. PURPOSE

A photo-opportunity with local Chicago area members of the National Association of Homebuilders.

II. BACKGROUND

Before Mayor Daley invited you to tour the flood damage, you were scheduled to meet with local representatives of the National Association of Homebuilders (NAHB) as you did on Las Vegas.

The area homebuilders are not pleased with Daley's performance, and believe that he should work more closely with Governor Edgar.

You have met with NAHB members on Jacksonville, Florida on March 6; you address the NAHB Annual Legislative Conference in Washington on March 8; and you met with homebuilders in Las Vegas on March 16, at the "Bravo!" development.

The latest good news is that housing starts increased for the fourth consecutive month in March, rising 6.4 percent. Private analysts had expected a decline in the rate of new housing starts. New starts have increased 22 percent over the past three months and 49 percent over the last year. Building permits, however, usually an indicators of future housing starts, fell off 6.5 percent in March (so maybe the private analysts were right, but just ahead of themselves).

The Veterans' Administration reports that activity in VA's loan guaranty program is up 34 percent for the first quarter of 1992 over the same period in 1991.

III. PARTICIPANTS

James Berg	builder
Richard Brown	builder
Bruce Deason	builder
Marsha Elliot	President, local homebuilders assn
Robert Gatewood	1st VP, local homebuilders assn
Jim Hemphill	past President, local homebuilders assn
Dave Hill	Build-PAC Trustee
"Buzz" Hoffman	builder
Bob Johnson	Executive Officer
Chester Moskal	Build-PAC Trustee
Mark Moskal	Builder
Susan Nawrocki	Chairwoman, Affordable Housing Cmte.

OFFICE OF THE VICE PRESIDENT
WASHINGTON

April 22, 1992

MEMORANDUM FOR THE VICE PRESIDENT

FROM: ZELDA J. NOVAK *Zn*
SPECIAL ASSISTANT TO THE VICE PRESIDENT FOR
POLITICAL AFFAIRS

BARBARA J. SCHLEIBAUM
SPECIAL ASSISTANT TO THE VICE PRESIDENT FOR
POLITICAL AFFAIRS

SUBJECT: RICH WILLIAMSON FOR SENATE FUNDRAISER

Date of Event: Thursday, April 23, 1992
Location: Robert and Anne Krebs Residence
Lake Forest, Illinois
Time: 6:00 p.m.

I. Purpose

To participate in a fundraising photo opportunity/receiving line (75-100 people @ \$1,000 per person) for U.S. Senate candidate Rich Williamson. You will make remarks.

II. Background

This event will take place at the residence of Robert and Anne Krebs. Krebs is the Chairman, President and Chief Executive Officer of the Santa Fe Pacific Corporation, a railway company. He earned a Bachelor of Arts degree at Stanford University in 1964, and a Masters in Business Administration at the Harvard School of Business in 1966. He and his wife Anne have three children, Robert, Elisabeth, and Duncan.

U.S. SENATE '92:

Republican attorney Rich Williamson will face Democrat Carol Moseley Braun, Cook County Recorder of Deeds, in the November general election.

MEMORANDUM FOR THE RECORD

8. [Illegible]

Williamson is a partner in the law firm of Mayer, Brown & Platt. He began his political career as an aide to President Ronald Reagan for intergovernmental affairs from 1981-83. He later served as U.S. Ambassador to the United Nations offices in Vienna, Austria, and as Assistant Secretary of State for International Organizations. Williamson worked as a Senior Vice-President of Beatrice Companies. He currently serves as a member of President Bush's General Advisory Committee on Arms control, as a Chairman of the Federal Home Loan bank of Chicago.

He and his wife Jane have three children. His complete biography is attached.

In the March 17 Democrat primary, Braun defeated Democrat U.S. Senator Alan Dixon and Chicago attorney Al Hofeld, 38%, 35%, and 28% respectively.

Braun was handpicked by Democrat women's groups, angry with Dixon for voting to confirm Clarence Thomas.

Hofeld reportedly spent \$5 million in the primary, \$4 million of which was his own money. Hofeld aired highly negative television ads criticizing Dixon for his record on the Savings and Loan issue, and for his tenure in office. Braun managed to reap the benefits of this negative advertising, while staying above the fray.

Fundraising:

As of March 30, the Williamson campaign had \$485,000 in their campaign coffers, while Braun had \$35,000. The Williamson campaign is confident they will be able to outspend Braun. The following individuals will participate in upcoming fundraisers for Williamson: President Bush, Jack Kemp, Carla Hills, Rich Bond, and Ronald Reagan.

Issues:

Williamson will try to prove to voters that Braun is too liberal for the state of Illinois. Braun was tied to former Mayor Harold Washington, and is part of the Cook County Democrat establishment. A Jesse Jackson delegate in 1988, Braun served in the Illinois State House for ten years, where according to the RNC, she was the chief sponsor of bills to reform education, ban discrimination in housing and private clubs, and establish minority and female set asides in contracts for state business.

1. The first part of the report deals with the general situation of the country and the progress of the work during the year. It is a summary of the work done and the results achieved. It is a general overview of the work done and the results achieved.

2. The second part of the report deals with the specific work done during the year. It is a detailed account of the work done and the results achieved. It is a detailed account of the work done and the results achieved.

3. The third part of the report deals with the financial statement of the year. It is a summary of the financial statement of the year. It is a summary of the financial statement of the year.

4. The fourth part of the report deals with the conclusions and recommendations. It is a summary of the conclusions and recommendations. It is a summary of the conclusions and recommendations.

5. The fifth part of the report deals with the appendix. It is a summary of the appendix. It is a summary of the appendix.

According to the Williamson campaign, while in the State House, Braun voted to increase taxes 14 times, and sponsored two bills to overturn the death penalty in Illinois. In addition, she introduced a resolution to commend **Gus Savage** for being a "wonderful, decent human being."

In addition, the Williamson campaign, will try to refute Braun's claim that she is an outsider.

Williamson plans to run on the positive themes of jobs, the economy, and the need for change. They will also focus on the crime issue, as their polling shows that it is important to Illinois voters.

Williamson has been accused of flip-flopping on the abortion issue. Following the primary, Williamson announced that he was pro-choice, angering pro-life groups who thought he was pro-life. Last year he had signed a pro-life petition sponsored by **Phyllis Schlafly's** Eagle Forum. Williamson's defense is that he signed the petition as a private citizen who abhors abortion. However, as a public servant he would not have the government involved in this issue. According to the RNC, the right, feeling betrayed, formed a third party known as God, Family and Country, and recruited Kane County businessman Chad Koppie to run under a third-party banner. The Illinois Board of Elections ruled that a third party could run one candidate for one office, instead of an entire slate of candidates as required by statute.

ILLINOIS BUSH/QUAYLE '92:

The Illinois Presidential primary date was Tuesday, March 17, 1992. Illinois has 22 electoral votes. The results of the primaries are as follows:

Bush/Quayle	77%	75 Delegates
Buchanan	22%	0 Delegates
Other	1%	0 Delegates

Clinton	53%	108 Delegates
Tsongas	45%	45 Delegates
Brown	15%	11 Delegates

Governor **Jim Edgar** is the Illinois Bush/Quayle '92 Chairman. The four Finance Co-Chairmen are **Bill Cellini**, President of the New Frontier real estate company; **Jim Kenny**, President of Kenny Construction; **John Walter**, President of R.R. Donnolly Printing; and **Bill Weiss**, CEO of Ameritech. In 1988 Bush/Quayle won 51% of the vote in Illinois.

CONGRESSIONAL REDISTRICTING:

Illinois will lose two congressional districts as a result of reapportionment. On November 6, 1991, the Federal Court ruled in favor of the Legislature's Republican plan. The map includes the creation of a Hispanic district and three black districts. It adds Republican McHenry County to the 16th congressional district.

Congressman **Frank Annunzio** (D-11) announced he will retire at the end of his term rather than face Democrat Congressman **Dan Rostenkowski** (D-8) in the primary.

The creation of a Hispanic congressional seat in Chicago forced Democrat Congressmen **Marty Russo** (D-3) and **William Lipinski** (D-5) to face each other in the primary. Lipinski emerged the victor, 56% to 38%.

According to the RNC, the redrawn 16th congressional district provides an excellent opportunity to recapture the seat. Democratic Congressman **John Cox** (D-16) will face the winner of a Republican primary battle between moderate State Senator **Jack Schaeffer**.

LEGISLATIVE REDISTRICTING:

On January 10, 1992, the Illinois State Supreme Court adopted the plan submitted by the Republican majority on the legislative redistricting commission. The plan gives Republicans an advantage in 30 Senate Districts and in 51 House Districts. Democrats will have an advantage in 27 Districts and 54 House Districts.

Democrats currently control the State Senate 31 to 28; and the State House 72 to 46.

GOVERNOR EDGAR:

In his State of the State address on January 8, 1992, Republican Governor **Jim Edgar** asked the Legislature to trim \$350 million from the budget and for authority to borrow \$500 million to balance the budget.

According to the State GOP, Governor **Jim Edgar** has a 65%-75% approval rating.

According to the RNC, Edgar was the big winner following the adoption of the State Budget this year. The legislature made permanent the portion of the Income Tax Surcharge that goes to education and extended for two years the portion used by local government. They also approved property tax caps for the collar counties. The Governor campaigned hard for both of these items during the gubernatorial campaign last year.

NOTE: This event will take place in Rep. John Porter's (R-10) congressional district. The Mayor of Lake Forest is Charles Clarke, Jr. He has no political party affiliation.

III. Participants

The Vice President
Rich and Jane Williamson
Robert and Ann Krebs
Harold Smith, National Committeeman

IV. Follow-Up

Photos will be sent to participants.

V. Press Plan

Official and political photographer only.

Rich Williamson for U.S. Senate

BIOGRAPHY

Rich Williamson is the Republican candidate for the United States Senate.

An Illinois native, Williamson was born in Evanston in 1949 and grew up in Winnetka where he was an Eagle Scout and captained the New Trier High School football and wrestling teams.

Williamson majored in religion at Princeton University where he graduated with honors, played varsity football and was East Coast Plebe Tournament wrestling champion.

He attended law school at the University of Virginia where he was Executive Editor of the International Law Journal.

A close aide to Ronald Reagan, he was on the President's senior White House staff in charge of intergovernmental affairs from 1981-83. Williamson later served as United States Ambassador to the United Nations offices in Vienna, Austria and as Assistant Secretary of State for International Organizations.

Williamson worked as a Senior Vice-President of Beatrice Companies, Inc., when it was a diversified consumer products company with annual sales of \$13 billion a year. He also was a partner at Winston & Strawn.

In 1988, Williamson was a senior advisor to George Bush's presidential campaign. And Williamson currently serves as a member of President Bush's General Advisory Committee on Arms Control. The Bush Administration also appointed Williamson to serve as Chairman of the Federal Home Loan Bank of Chicago with the mission to help strengthen the bank after the problems of the 1980's.

Williamson is a partner in the law firm of Mayer, Brown & Platt.

His wife Jane grew up in Hinsdale, Illinois. She is a member of their local school board and the Illinois Board of Higher Education. Their children Lisa, Craig and Ricky attend the local grammar school in Kenilworth, where they live.

ROBERT D. KREBS

Chairman, President and Chief Executive Officer and Director

SANTA FE PACIFIC CORPORATION

A native of Sacramento, California, Mr. Krebs began his career in the railroad industry when he joined The Southern Pacific in June of 1966 on special duty in the Executive Department at San Francisco. He subsequently held a number of positions in the operating departments of Southern Pacific Transportation Company and the St. Louis Southwestern Railway Company, becoming Vice President-Operations of Southern Pacific Transportation Company in 1980, a Director of Southern Pacific Transportation in 1981, President of Southern Pacific Transportation Company and St. Louis Southwestern Railway Company in 1982, President and Chief Operating Officer of Santa Fe Southern Pacific Corporation in 1983, President and Chief Executive Officer of Santa Fe Southern Pacific in 1987; Chairman, President and Chief Executive Officer on May 24, 1988; Chairman and Chief Executive Officer of The Atchison, Topeka and Santa Fe Railway Company on June 1, 1989; and Chairman, President and Chief Executive Officer of the Railway on June 4, 1991.

He is a Director of Santa Fe Pacific Corporation, The Atchison, Topeka and Santa Fe Railway Company, Phelps Dodge Corporation, Northern Trust Corporation, Catellus Development Corporation, and Santa Fe Energy Resources Inc.

Mr. Krebs is a Trustee for the John G. Shedd Aquarium, Ravinia Festival Association and Lake Forest College, a member of Stanford Alumni Association and Northwestern University Associates and is Chairman and Trustee at Northwestern Memorial Hospital.

Mr. Krebs earned a Bachelor of Arts degree at Stanford University in 1964. He graduated with distinction and was elected to Phi Beta Kappa. He earned a Masters in Business Administration at the Harvard School of Business in 1966.

He and his wife Anne have three children, Robert, Elisabeth, and Duncan.

OFFICE OF THE VICE PRESIDENT

WASHINGTON

BRIEFING MEMORANDUM FOR THE VICE PRESIDENT
TOUR OF FLOOD DAMAGE IN CHICAGO, ILLINOIS

Date: Thursday, April 23, 1992

Time: 2:30 p.m.

Location: Kinsey Street Bridge area
Chicago, Illinois

From: Dave Juday 

I. PURPOSE

To tour the flood damage with Mayor Daley and with Wallace Stickney, Director of the Federal Emergency Management Agency.

II. BACKGROUND

On April 13, a construction incident in the early morning created a hole in the roof of an old underground freight railroad tunnel that extends around the downtown area for some 50 miles. Water from the Chicago River is pouring through the hole causing flooding throughout the downtown area. The City estimates the need to pump \$250 million gallons of water; total costs of this disaster are projected to reach as high as \$1 billion.

The impacted area includes the downtown, better known as the "Loop." Wallace Stickney, the Director of FEMA has visited Chicago already.

The tunnel is currently used to link buildings with fiber optic cables and it connects numerous buildings throughout downtown. Several basements have been flooded including those at City Hall, the Board of Trade (CBOT), and Marshall Fields department store; City Hall, the CBOT, and most downtown businesses were forced to close. City Hall and Marshall Fields re-opened on Monday, April 20. About one-third of downtown Chicago lost power in the early afternoon on the 13th. Much of downtown was evacuated; the Chicago regional FEMA office was cleared at noon on that day.

The President declared Chicago a major disaster area on April 15th in response to the Governor's request on the 14th. Chicago is eligible for federal aid to supplement the recovery of the residents and local governments. This assistance is coordinated by FEMA, and can include temporary housing, grants, loans to cover uninsured private and business property losses, and various relief programs for individuals and families.

A summary of federal agency activities follows:

- FEMA** -- damage survey reports are being processed for public assistance; for individual assistance no requests for housing or shelter have been made
- SBA** -- 250 walk-in applicants for assistance; 85 percent of whom are requesting assistance for property damage; the rest are requesting economic injury assistance, i.e. loans for working capital
- IRS** -- 200 walk-ins and referrals for assistance in dealing with property and administrative losses
- LABOR** -- 100 calls on hotline regarding disaster unemployment assistance; OSHA is on the scene as well

The Red Cross, Salvation Army, and others are on scene too.

ARMY CORP OF ENGINEERS --

FEMA tasked the Army Corp of Engineers to provide technical, construction, and other assistance to stop river water from entering into the freight tunnels at the point of collapse and to drain the tunnel system.

To date, the Corp, in coordination with the City of Chicago, has developed and executed a plan to install concrete plugs at three locations near where the tunnel was breached; the initial construction to stop the water flow was completed on April 19. Dewatering operations have begun just after midnight on April 20, and continue. As of April 22, pumping was continuing at three locations with a draw down rate of 4 inches per hour. Standby provisions have been made to respond to contingencies such as tunnel collapses as the dewatering proceeds. The Corp has committed 98 people; obligations to date are 3.75 million.

Dewatering activities are projected to be completed soon (in five to eight days). Corp of Engineers teams will remain on 24-hour operation as long as necessary.

Under the disaster declaration, the federal government will provide funding to cover 75 percent of the approved costs for restoring damaged public facilities. A local controversy has erupted with Mayor Daley and Governor Edgar disagreeing publicly about funding the 25 percent remaining costs. Governor Edgar has provided \$3 million to Chicago; Mayor Daley has characterized this as "unfair" and has stated that the State should commit to split the non-federal 25 percent.

Daley claims that all other disasters in the state have had a 50/50 split between the state and the locality; Edgar states that there is no such set policy to determine the share of funding on the part of the state and points out that the \$3 million already committed is nearly three times greater than for any other disaster in the state (previously the largest disaster was flooding in Du Page and suburban Cook County for which the state paid \$1.2 million). Governor Edgar claims that the \$3 million represents the entire 25 percent of the Corp of Engineers work in the city.

Local politicians are hoping that the clout of Sam Skinner and Dan Rostenkowski, and the electoral votes held in Illinois will lead the federal government to pick up more than the 75 percent share.

FEMA maintains that of an average of 29 disasters per year over the last seven years, only six times has the federal share been greater than 75 percent. Those cases have all been since 1985 and include 100% funding for flooding in West Virginia, 97% for Hurricane Hugo in South Carolina (North Carolina was denied a request for more funding) and Puerto Rico and the Virgin Islands after Hurricane Hugo, and twice after typhoons in American Samoa.

III. PARTICIPANTS

Mayor Richard Daley
Wallace Stickney, Director, FEMA

IV. SEQUENCE OF EVENTS

Upon arrival, THE VICE PRESIDENT will participate in a 20 minute meeting with Mayor Daley. At the conclusion of the meeting, THE VICE PRESIDENT, accompanied by Mayor Daley and Mr. Stickney, will deliver brief remarks to volunteers and tour the area to view the damage. Upon completion of the tour, THE VICE PRESIDENT will meet with Governor Edgar at his Chicago office.

V. PRESS PLAN

Open press.

VI. FOLLOW-UP

Correspondence

(Mr. Mayor.) (Wally Stickney.)

o I've just met with the Mayor; and momentarily we will tour some of the damaged area. Shortly after that I'll be visiting Governor Edgar to discuss what I've seen.

o But I wanted to stop here and congratulate you -- and the many others like you -- who have volunteered their time and hard work to this clean-up effort.

o I hope it is O.K. to use the word "outpouring" in this situation,

Because "outpouring" -- despite any other connotations it might have in this case -- is certainly the best way to describe the support from the community.

o I understand that there have been more offers of help than could be accomodated. Offers from religious groups, community groups, engineers, and individulas who just want to help.

o Carl Sanburg once described Chicago as: "The City of Broad Shoulders"

And meeting you here today, and the work that you are doing to get your city back up and running, I'd have to say that is an apt description.

o Chicagoans are proud of their town -- and rightfully so.

o From sports teams to the restaurants, museums, and the waterfront, ...

From the weather, to your rough and tumble brand of politics -- all have earned Chicago notice around the world!

And all have earned Chicago many nicknames! but one in particular comes to mind today:

The Land of Neighborhoods.

o It's the neighborhood spirit -- the civic pride -- that's made Chicago the town that it is.

o Too often we forget that neighbors are not just the people on the other side of the hedges, or the family that lives in the house on the corner.

o A real neighbor is someone who is willing to lend a hand, who works to better the community, ...

o Thank you Chicago for reminding us who neighbors really are.

- UNITED STATES VICE PRESIDENT DAN QUAYLE;
- RMD;
- BRIGADIER GENERAL RUSSELL L. FUHRMAN, COMMANDER AND DIVISION ENGINEER OF THE NORTH CENTRAL DIVISION OF THE UNITED STATES ARMY CORPS OF ENGINEERS;
- LIEUTENANT COLONEL RANDELL INOUE, COMMANDER AND DIVISION ENGINEER FOR THE CHICAGO DISTRICT OF THE NORTH CENTRAL DIVISION OF THE UNITED STATES ARMY CORPS OF ENGINEERS;
- COMMISSIONER RAY OROZCO, CITY OF CHICAGO, FIRE DEPARTMENT;
- JOHN KENNY, VICE PRESIDENT, KENNY CONSTRUCTION;
- UNITED STATES CONGRESSMAN DAN ROSTENKOWSKI;
- WALLACE STICKNEY, DIRECTOR, FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA);
- ARLY BROWER, REGIONAL DIRECTOR, FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA);
- ED BEDORE, CHIEF FINANCIAL OFFICER, CITY OF CHICAGO, OFFICE OF BUDGET AND MANAGEMENT;
- GERY CHICO, DEPUTY CHIEF-OF-STAFF, CITY OF CHICAGO;
- 1 TO 4 STAFF TO UNITED STATES VICE PRESIDENT QUAYLE (TO BE DETERMINED).

HUMAN SERVICES

American Red Cross
Salvation Army

The City of Chicago was deluged with offers of assistance and donations from the general public and private industry.

The outpouring of offers from community groups, churches, business organizations, professional experts, etc., was so overwhelming that we could not even return all the phone calls, let alone respond to the donations.

Engineers called with advice on how to plug the leaks. Many restaurants called to offer food. Other delivered food and beverages without asking. City employees worked long hours with little sleep and few complaints. Some businesses offered help even as they were losing customers or suffering financial losses of their own.

When the Mayor moved to establish a Command Center close to the project site, office space, office equipment, even parking space was readily donated. Heavy equipment suppliers that were under contract at nearby job sites were released from their obligations to assist in the repair project. Contractors were helped by offers of equipment, machinery and expertise. Free tetanus shots and warm clothing were provided to relief workers. Nearly every facet of society reached out to embrace those participating in the relief effort.

The bright side of this period of disruption is that the "City That Works" learned that in times of trouble, we all work together.

Incident Report # 1
As of 1:50 pm, EST, April 13, 1992

Situation: Flooding in Chicago

A construction incident early this morning (7:00 to 7:30 am) in the area adjacent to the Chicago River in the vicinity of Kingsbury and Kinsey Avenues in downtown Chicago has created a hole in the roof of an old underground railroad tunnel that extends around the downtown area for some fifty miles. Water from the Chicago River is pouring through the hole flooding the tunnel.

The tunnel is currently used to link buildings with fiber optic cables and connects with numerous buildings throughout the downtown area. Several basements have been flooded including those of the City Hall, the Chicago Board of Trade and the Marshall Fields Department Store. As of 1:15 EST, it was reported by Region V that more than 1/3 of downtown Chicago was without power and that the outages were being extended due to continued flooding. Region V reported that the city Fire Marshall has recommended evacuation of the entire downtown area. The FEMA Building was ordered closed at about noon, Chicago time.

The Chicago District of the Corps of Engineers were contacted by the Chicago Fire commissioner for technical assistance in determining measures that could stop the flooding. Region V reports that the Corps is considering trying to plug the hole with various types of debris. The hole is reportedly "the size of an automobile". The speed of the water rushing into the hole is causing a whirlpool effect that will hamper attempts to plug

Staff of the Federal Response Division have been in touch with the Army Corps of Engineers and Department of Energy Headquarters. Region V reports that the City of Chicago is currently handling the situation and have not requested any State assistance. As noted above, the Corps of Engineers is providing technical assistance.

Region V reported that there is no imminent threat to lives or public safety at the current time. Region staff will continue to monitor the situation. Region V has not yet established an alternate operating facility but is in the process of doing so. Further information will be provided as it becomes available.

1961-1962
1961-1962

1. The first part of the report deals with the general situation of the country. It is a very interesting and informative study of the country's development and progress. The author has done a very good job of summarizing the country's situation and progress. The report is very well written and is a very good example of a country's development and progress.

2. The second part of the report deals with the country's economic situation. It is a very interesting and informative study of the country's economic development and progress. The author has done a very good job of summarizing the country's economic situation and progress. The report is very well written and is a very good example of a country's economic development and progress.

3. The third part of the report deals with the country's social situation. It is a very interesting and informative study of the country's social development and progress. The author has done a very good job of summarizing the country's social situation and progress. The report is very well written and is a very good example of a country's social development and progress.

4. The fourth part of the report deals with the country's political situation. It is a very interesting and informative study of the country's political development and progress. The author has done a very good job of summarizing the country's political situation and progress. The report is very well written and is a very good example of a country's political development and progress.

5. The fifth part of the report deals with the country's cultural situation. It is a very interesting and informative study of the country's cultural development and progress. The author has done a very good job of summarizing the country's cultural situation and progress. The report is very well written and is a very good example of a country's cultural development and progress.

Incident Report # 2
As of 3:50 pm, EST, April 13, 1992

Situation: Flooding in Chicago

A construction incident early this morning (7:00 to 7:30 am) in the area adjacent to the Chicago River in the vicinity of Kingsbury and Kinsey Avenues in downtown Chicago has created a hole in the roof of an old underground railroad tunnel that extends around the downtown area for some fifty miles. Water from the Chicago River is pouring through the hole flooding the tunnel.

The tunnel is currently used to link buildings with fiber optic cables and connects with numerous buildings throughout the downtown area. Several basements have been flooded including those of the City Hall, the Chicago Board of Trade and the Marshall Fields Department Store. As of 1:15 EST, it was reported by Region V that more than 1/3 of downtown Chicago was without power and that the outages were being extended due to continued flooding. Region V reported that the city Fire Marshall has recommended evacuation of the entire downtown area. The FEMA Building was ordered closed at about noon, Chicago time.

The Chicago District of the Corps of Engineers is currently providing technical assistance to the City Department of Streets and Sanitation. The Corps of Engineers reports that stone is being dumped into the breach to slow the velocity of water. The hole is reportedly "the size of an automobile".

Staff of the Federal Response Division have been in touch with the Army Corps of Engineers and Department of Energy Headquarters. Region V reports that the City of Chicago is currently handling the situation and has not requested State assistance.

Region V reported that there is no imminent threat to lives or public safety and Region staff will continue to monitor the situation. Region V has established an alternate operating facility at O'Hare Airport in space provided by the Air Force. Region V reports that the American Red Cross and Public Health Service are providing support under their own authorities. Further information will be provided as it becomes available.

4. SEVERITY AND IMPACT ON POLITICAL JURISDICTIONS:

City Hall reopens today. Essential services were never interrupted. The City Command Post at 400 N. Franklin remains open as the primary city operations center.

5. STATUS OF DECLARATIONS:

State/Federal agreement signed over the weekend.

6. STATUS OF RESPONSE OPERATIONS AND FACILITIES:

The Regional Operation Center will stand down at 1200 CDT 20 April 1992. For additional information, contact Mr. Jim Duncan, FSN 555-5592 or Mr. Jim Opoka, 555-5584. This is the last regular situation report. Other SITREPs will be submitted as needed.

7. STATUS OF RECOVERY ACTIVITIES:

Federal Coordinating Officer Digest Reports will be providing information on this status for the remainder of the period of operation of the Disaster Field Office.

Incident Report #4
Flooding in Chicago
As of 1100 EDT, April 14, 1992

Update of Federal Response Actions:

At 10 a.m. FEMA Regional Director Arlyn F. Brower is meeting with officials from the Mayor's office and the State of Illinois to discuss the situation and identify requirements for possible State and Federal assistance.

The power has been restored in the area where the FEMA Regional Office is located and staff will return to the office beginning at noon CDT (1 p.m. EDT) today. The Regional Operations Center at O'Hare Airport will provide coverage until the Regional Office is functional again. The contact numbers for the ROC are as follows:

Tel: 312-825-6696/6697
FAX: 312-825-6676

Larry Zensinger, Chief, Public Assistance Division, SL-DA, is going to Chicago this afternoon to provide support to the region. Gregg Chappell and Bruce Baughman are returning to FEMA headquarters from a meeting at Ft. Belvoir to monitor the situation at the national level.

Incident Report #5
Flooding in Chicago
As of 1400 EDT, April 14, 1992

Requirements for Federal Assistance:

The Governor has indicated that he intends to request Federal assistance. It is anticipated that the State will request a preliminary damage assessment in anticipation of a request for a major disaster or emergency declaration. Potential assistance includes Public assistance for emergency repair work, SBA loan programs and Disaster Unemployment Assistance.

FEMA Response Actions:

The power has been restored today in the area where the FEMA Regional Office is located and staff began returning to the office at noon CDT (1 p.m. EDT). The Regional Operations Center at O'Hare Airport is providing coverage until the Regional Office is functional again. The **correct** contact numbers for the ROC are as follows:

Tel: 312-825-6696/6697; FAX: 312-825-6676

At 10:30 a.m. CDT FEMA Regional Director Arlyn F. Brower and staff met with officials from the Mayor's office and the Illinois Emergency Management Agency to discuss the situation and identify requirements for possible State and Federal assistance.

FEMA Headquarters is dispatching Larry Zensinger, Chief, Public Assistance Division, Office of Disaster Assistance Programs to Chicago this afternoon to provide support to the region.

Other Federal Agency Response Actions:

First Army has been contacted to provide military assistance. The U.S. Army Corps of Engineers is providing technical assistance to the city under its own authorities.

The American Red Cross operated a Service Center at the Holy Names Cathedral at State Street and Chicago Avenue, which closed today. A total of 1,100 meals were served on Monday. A total of 15 paid staff and 37 volunteers have been involved in the effort. Mobile feeding operations are continuing.

EPA is working with city and State agencies to assess potential water contamination problems.

The Small Business Administration (SBA) is sending a representative to the area to monitor the situation.

FEMA has requested GSA to identify potential sites for a Disaster Field Office, if required.

The tenth part of the report is a description of the project's appendix. It includes a description of the project's data, a description of the project's references, and a description of the project's appendix.

The eleventh part of the report is a description of the project's conclusion. It includes a description of the project's conclusion, a description of the project's findings, a description of the project's recommendations, and a description of the project's conclusions. The twelfth part of the report is a description of the project's appendix. It includes a description of the project's data, a description of the project's references, and a description of the project's appendix.

The thirteenth part of the report is a description of the project's conclusion. It includes a description of the project's conclusion, a description of the project's findings, a description of the project's recommendations, and a description of the project's conclusions.

Incident Report #6
Flooding in Chicago
As of 1000 EDT, April 15, 1992

Requirements for Federal Assistance:

The Governor of Illinois declared the flooding in the city to be a state disaster area at approximately 2:30 p.m. April 14, and requested federal assistance.

Potential Federal assistance includes Public assistance for emergency repair work, SBA loan programs and Disaster Unemployment Assistance.

FEMA Response Actions:

The Regional Operations Center in the FEMA Region V regional office is operational as of 7:00 a.m. CDT this morning. Eleven regional staff are in place in key roles. The correct contact numbers for the ROC are as follows:

**Tel: 312-408-5201 FSN 555-5201 and FTS 363-5201;
FAX: 312-408-5234**

FEMA Region V will convene a Preliminary Damage Assessment meeting with State and city officials at 9:00 a.m. CDT this morning.

FEMA Headquarters is in the process of activating a partial information management team of the Emergency Support Team to be operational from 7:00 a.m. to 8:00 p.m. EDT in Task Area A of the EICC.

At 10:30 a.m. CDT on April 14, FEMA Regional Director Arlyn F. Brower and staff met with officials from the Mayor's office and the Illinois Emergency Management Agency to discuss the situation and identify requirements for possible State and Federal assistance.

FEMA Headquarters has dispatched Larry Zensinger, Chief, Public Assistance Division, Office of Disaster Assistance Programs to Chicago this afternoon to provide support to the region.

Status of Tunnel Leak

The leak is still evident in the service tunnel. Although efforts to repair the leak have been ongoing, water continues to enter the tunnel. Divers were used last night to verify this information.

Meetings between FEMA staff and the Corps of Engineers North Central Division have been scheduled for early this morning for Corps involvement and advice on what could be done to repair the leak.

4. The fourth part of the report is a conclusion and a list of references.

5. The fifth part of the report is a list of appendices.

Status of Tunnel Leak

The leak is still evident in the service tunnel. Although efforts to repair the leak have been ongoing, water continues to enter the tunnel. Divers were used last night to verify this information.

Meetings between FEMA staff and the Corps of Engineers North Central Division have been scheduled for early this morning for

Corps involvement and advice on what could be done to repair the leak.

Other Federal Agency Response Actions:

First Army has been contacted to provide military assistance. The U.S. Army Corps of Engineers is providing technical assistance to the city under its own authorities.

The American Red Cross operated a Service Center at the Holy Names Cathedral at State Street and Chicago Avenue, which closed today. A total of 1,100 meals were served on Monday. A total of 15 paid staff and 37 volunteers have been involved in the effort. Mobile feeding operations are continuing.

EPA is working with city and State agencies to assess potential water contamination problems.

The Small Business Administration (SBA) is sending a representative to the area to monitor the situation.

FEMA has requested GSA to identify potential sites for a Disaster Field Office, if required.

Situation Report #1
Flooding in Chicago

EVENT: Chicago Tunnels Flood

DATE AND TIME: April 15, 1992; 2000 EST

1. SITUATION:

The breach in the tunnel has not yet been contained. Region V reports that in some areas the water appears to be receding but rising in other areas. Efforts to pump water from the building basements have been unsuccessful since the breach has not been closed. The Regional Operation Center (ROC) location's status is currently stable but a lot of water is in the basement. Water and power are operational but the building has no heat. The City of Chicago is continuing attempts to stem the flow of water from the Chicago River.

2. ESTIMATE OF CASUALTIES:

No casualties have been reported.

3. WEATHER REPORT/FORECAST:

Rain has stopped but the forecast calls for sporadic showers and possibly isolated thundershowers for the next three days.

4. SEVERITY AND IMPACT ON POLITICAL JURISDICTIONS:

The City of Chicago downtown area (the loop) is the center of the impacted area. This includes about twelve blocks between Washington, Michigan, Adams, and Dearborn streets. Power remains out in much of this area.

5. STATUS OF DECLARATIONS:

President Bush declared a major disaster for the City of Chicago at 4:15 P.M. EDT. Disaster Number is FEMA 941 DR. Declaration includes both Individual and Public Assistance. Mr. David A. Skarosi of FEMA Region V has been designated as the Federal Coordinating Officer. Daniel L. Smith of the Illinois Emergency Management Agency has been named State Coordinating Officer.

The Incident Period is April 13, 1992 to OPEN.

6. STATUS OF RESPONSE OPERATIONS AND FACILITIES:

Region V activated the Regional Operations Center at 7:00 A.M. CDT, April 15, 1992. FEMA Headquarters activated the Emergency Support Function (ESF) #5 of the Emergency Support Team as of 11:00 A.M. EDT. Operations are located in Task Force Area A of the Emergency

1. The first of these is the fact that the water supply is not sufficient to meet the needs of the population.

2. The second is the fact that the water supply is not sufficient to meet the needs of the population.

3. The third is the fact that the water supply is not sufficient to meet the needs of the population.

4. The fourth is the fact that the water supply is not sufficient to meet the needs of the population.

5. The fifth is the fact that the water supply is not sufficient to meet the needs of the population.

6. The sixth is the fact that the water supply is not sufficient to meet the needs of the population.

7. The seventh is the fact that the water supply is not sufficient to meet the needs of the population.

8. The eighth is the fact that the water supply is not sufficient to meet the needs of the population.

9. The ninth is the fact that the water supply is not sufficient to meet the needs of the population.

10. The tenth is the fact that the water supply is not sufficient to meet the needs of the population.

11. The eleventh is the fact that the water supply is not sufficient to meet the needs of the population.

12. The twelfth is the fact that the water supply is not sufficient to meet the needs of the population.

13. The thirteenth is the fact that the water supply is not sufficient to meet the needs of the population.

14. The fourteenth is the fact that the water supply is not sufficient to meet the needs of the population.

15. The fifteenth is the fact that the water supply is not sufficient to meet the needs of the population.

16. The sixteenth is the fact that the water supply is not sufficient to meet the needs of the population.

Information Coordination Center.

The Disaster Field Office is being established on the 13th floor of the Kluczynski Federal Building, 230 South Dearborn Street.

Region V staff are maintaining communications with regional ESF representatives. The Chicago District of the Army Corps of Engineers is providing technical assistance to the City of Chicago under their own statutory authority. The Corps has provided a survey boat, flow meters, and other equipment to assist. District personnel have begun investigating possible solutions to the tunnel breach problem.

7. STATUS OF RECOVERY OPERATIONS:

Commonwealth Edison personnel are continuing to conduct inspections of the buildings in the impacted area to determine feasibility of restoring power. Some of the buildings have had power restored and efforts to restore power continue on a case-by-case basis.

The Environmental Protection Agency (EPA) is testing the floodwater in the affected buildings for contaminants. Initial examination indicates the water contains some hydraulic oils and fluids from the buildings' mechanical equipment and the air in the lower levels has hydrocarbon fumes from emergency generator exhausts. The Occupational Safety and Health Administration is recommending ventilation procedures. No health problems are expected.

8. STATUS OF ROUTINE GOVERNMENT OPERATIONS AND FACILITIES:

The City continues to provide essential services and provide for public safety.

Situation Report #2
Flooding in Chicago

EVENT: Chicago Tunnels Flood

DATE AND TIME: April 16, 1992; 2000 EDT

1. SITUATION:

Work continues on sealing the breach in the tunnel under the river. Divers have been in the tunnel and silt is being removed from the tunnel bottom. Once the silt is removed a rubber bladder will be inserted and inflated to block the tunnel. Sand bags and concrete will be added to reinforce the bladder.

Power has been restored to all but fourteen buildings within the original affected area. Several buildings still have several feet of water in their sub-basements. The subway system remains closed. The Chicago Transit Authority (CTA) reports that the subway tunnels that pass under the old coal tunnel are flooded. The CTA has major concerns on the conditions of these tunnels. The system is expected to be shut down for at least a week.

2. ESTIMATE OF CASUALTIES:

None.

3. WEATHER REPORT/FORECAST:

Weather forecast is for windy and cooler conditions tonight with scattered showers or drizzle likely.

4. SEVERITY AND IMPACT ON POLITICAL JURISDICTIONS:

The City of Chicago downtown area (the "Loop") is the center of the impacted area. This includes about twelve blocks between Washington, Michigan, Adams, and Dearborn streets.

5. STATUS OF DECLARATIONS:

President Bush declared a major disaster for the City of Chicago at 4:15 P.M. EDT on April 15, 1992. Disaster Number is FEMA 941 DR. Declaration includes both Individual and Public Assistance. be operational on Friday, April 17 until 1900 as well. The Disaster Field Office is operational and is located on the 13th floor of the Klucznski Federal Building, 230 South Dearborn Street. The phone number is (312) 697-0041. An 800 number will be activated on April 17 at 8:00 A.M. (800-572-5757). The Small Business Administration (SBA) will begin distributing loan applications to individuals and businesses on Friday, April 17, beginning at 8:30 AM. The Emergency Support Function (ESF) #5 of the Emergency Support Team will continue operations at the EICC on April 17 as needed.

The Chicago District of the Corps of Engineers is continuing 24 hour operations at their Emergency Operations Center (EOC). The phone number is (312) 353-4009. The Corps is continuing to provide technical assistance under their own authority.

The City of Chicago has established a Command Center at 400 North Franklin Street.

7. STATUS OF RECOVERY OPERATIONS:

Businesses are continuing to pump water from the basements and sub-basements. It is undetermined when the tunnels will be drained. The Corps of Engineers estimate that at least twelve days will be needed to drain the tunnels after the leaking is stopped.

Commonwealth Edison (CECO) continues to restore power. About fourteen buildings remain without full power, eight of which are totally without power. CECO indicates that these outages are due to customer problems. The Chicago Board of Trade was operational on April 16 using limited power from external emergency generators.

The City of Chicago is establishing a Temporary Business Assistance Center which will operate from 8:30 to 5:00 daily. SBA will be represented at this center as well as at the DFO. The City is also offering the following services to businesses: testing of air and water (EPA tests indicated no contamination) and free tetanus shots to persons who were in contact with the flood waters. The City Health Department is testing all restaurants and the Building Commission is sending inspection teams to all affected buildings

8. STATUS OF ROUTINE GOVERNMENT OPERATIONS AND FACILITIES:

The City continues to provide essential services and provide for public safety. The City Hall is open for essential services. The mayor is continuing to work out of City Hall. All non essential services have moved to alternate locations.

Situation Report #3
Flooding in Chicago

EVENT: Chicago Tunnels Flood

DATE AND TIME: April 17, 1992; 1700 EDT

1. SITUATION:

Work continues on sealing off the breach in the tunnel under the river. Early this morning the decision was made not to use the rubber bladder to seal the tunnel. Divers are completing the removal of silt and debris and determining the amount of concrete needed to fill the tunnel and stop the easterly flow of water. Similar damming procedures will also be attempted on the west bank.

Power has been restored to all but fourteen buildings within the original affected area. Commonwealth Edison (CECO) continues to restore power. These buildings are being isolated from the power grid. Once isolated from the grid, the buildings will be provided power through portable generating systems. CECO anticipated providing full power to the Chicago Board of Trade sometime today.

The subway system in the affected area remains closed. Water is continuing to seep into the subway tunnels. The Chicago Transit Authority (CTA) has concerns about the possible shifting of the subway tunnels due to erosion of the surrounding clay. There are also concerns about the damage to the electrical system. Assessment of the damage cannot be accomplished until the flooded tunnel network is drained. Reopening of the subway is not expected until at least a week after the hole in the tunnel is sealed off.

2. ESTIMATE OF CASUALTIES:

None.

3. WEATHER REPORT/FORECAST:

Mostly cloudy and colder with a chance of morning drizzle. High temperatures will be from 45 degrees along the lake to 55 degrees to the west. Winds will be from the northeast at 20 m.p.h and gusty. Friday night will be cloudy with lows in the 40s.

4. SEVERITY AND IMPACT ON POLITICAL JURISDICTIONS:

The City of Chicago downtown area (the loop) is the center of the impacted area. This includes about twelve blocks between Washington, Michigan, Adams, and Dearborn streets.

5. STATUS OF DECLARATIONS:

President Bush declared a major disaster for the City of Chicago at 4:15 P.M. EDT on April

CHICAGO, ILL. 60637

SITUATION REPORT #4

Flooding in Chicago

Event: Chicago Tunnels Flood

Date and Time: April 20, 1992 as of 1500 EDT

Note: The following report was taken from Situation Report #12 from Region V

1. SITUATION:

Engineers succeeded in plugging the leak in the river on Saturday. The Corps of Engineers began to dewater the flooded underground freight tunnel system at a slow pace at 0015 Monday 20 April 1992. The situation has stabilized. However, the COE is expecting the dewatering process to continue until about May 1. This is assuming there are no problems with subsidence, tunnel collapse, or building foundations. The Corps is pumping out the system from three points, two into the Metropolitan Water Reclamation District's Deep Tunnel and the third into the Chicago River.

There are still eleven buildings without power due to the flood situation. City Hall will be open today. However there will be no hot water or heat. Marshall Field & Co. will also open today.

The Chicago Transit Authority's subway system remains closed. Four lanes (two lanes in each direction) of the Kennedy Expressway, I-90/94, are closed at Hubbard Street. The main drain tunnel for the expressway system under the roadway is being monitored. Late last week Illinois Department of Transportation (IDOT) workers found that flood waters were pouring into the drain system. Video tapes showed the water flowing much like a car wash. The lanes are closed to allow IDOT to monitor the drain system. Should the drain system fail, IDOT estimates it will flood the Kennedy Expressway with two feet of water in 40 minutes.

2. ESTIMATE OF CASUALTIES:

No Change.

3. WEATHER:

Warm and humid with occasional thundershowers likely. High around 70 degrees. Southerly winds at 20 m.p.h. Occasional showers and thundershowers likely tonight.

(Mr. Mayor.) (Wally Stickney.)

o I've just met with the Mayor; and momentarily we will tour some of the damaged area. Shortly after that I'll be visiting Governor Edgar to discuss what I've seen.

o But I wanted to stop here and congratulate you -- and the many others like you -- who have volunteered their time and hard work to this clean-up effort.

o I hope it is O.K. to use the word "outpouring" in this situation,

Because "outpouring" -- despite any other connotations it might have in this case -- is certainly the best way to describe the support from the community.

o I understand that there have been more offers of help than could be accomodated. Offers from religious groups, community groups, engineers, and individulas who just want to help.

o Carl Sanburg once described Chicago as: "The City of Broad Shoulders"

And meeting you here today, and the work that you are doing to get your city back up and running, I'd have to say that is an apt description.

o Chicagoans are proud of their town -- and rightfully so.

o From sports teams to the restaurants, museums, and the waterfront, ...

From the weather, to your rough and tumble brand of politics -- all have earned Chicago notice around the world!

And all have earned Chicago many nicknames! but one in particular comes to mind today:

The Land of Neighborhoods.

o It's the neighborhood spirit -- the civic pride -- that's made Chicago the town that it is.

o Too often we forget that neighbors are not just the people on the other side of the hedges, or the family that lives in the house on the corner.

o A real neighbor is someone who is willing to lend a hand, who works to better the community, ...

o Thank you Chicago for reminding us who neighbors really are.

Federal Emergency Management Agency

Washington, D.C. 20472

WHEN DISASTER STRIKES

Requesting Disaster Assistance

The Federal Emergency Management Agency (FEMA) is central point of contact within the federal government for a wide range of emergency response activities including planning, mitigation, response, and recovery in crisis situations. The Robert T. Stafford Disaster Relief and Emergency Assistance Act, P.L. 93-233, as amended, is the legislative authority under which FEMA provides disaster assistance.

States and local governments are responsible for responding initially when disaster strikes. Their efforts may be supplemented by private and volunteer organizations. If it appears that these resources are insufficient and supplemental federal assistance under the Stafford Act may be needed, the State disaster officials ask FEMA to conduct joint Preliminary Damage Assessments (PDAs) in the affected areas. Based on the PDA findings, the Governor may ask the President to declare a major disaster for the State.

The request must be based on a finding that the situation is of such severity and magnitude that effective response is beyond the capabilities of the State and local governments, and supplemental federal assistance is required. The request must also include information concerning the amount and severity of damages, State and local resources on hand, and the unmet needs which require federal assistance; confirmation that the Governor directed execution of the State Emergency Plan; and a certification by the Governor that the State will comply with all applicable cost-sharing requirements of the Stafford Act.

FEMA evaluates the Governor's request and the PDA information and forwards a recommendation to the President for final determination. The Governor and Congressional offices representing the impacted area are immediately informed of the declaration decision.

There are no hard and fast rules within FEMA requiring that a specified number of people must be affected before a request can be considered. The critical consideration is whether those impacted by the disaster have uninsured needs which State, local and/or volunteer recovery efforts cannot meet.

It is virtually impossible to initially assign an accurate dollar value to the amount of property lost or the amount of federal money that will be needed. A Governor's request for federal assistance includes a dollar estimate of the damages, but the record shows these estimates can be far too high or much too low. Such estimates are developed quickly in most cases, and their intended role is to be one factor in the decision process in determining whether the recovery effort is beyond State and local response capability.

If the President declares a major disaster, a Federal Coordinating Officer (FCO) is appointed. As the President's representative, the FCO will direct federal recovery and coordination activities. FEMA designates the counties that are eligible for federal aid. Additional counties may be added.

-2-

DISASTER RELIEF ASSISTANCE

Presidential approval of a Governor's request for federal assistance activates a wide range of disaster recovery programs from a variety of federal agencies. However, not all of them will be activated in a given situation. The determination of which programs will be used is based upon the actual need found during the damage assessment and any subsequent information that may be developed.

FEMA is authorized to supplement disaster assistance available through State and local governments, not to supersede it. FEMA is also responsible for coordinating disaster assistance provided by all other federal agencies, State and local governments, and with their consent, those of private relief agencies as well. Representatives of these agencies will move into the disaster area.

In addition, if requested by the State to do so, FEMA can task other federal agencies to provide assistance normally provided by State and local governments. This could include providing emergency assistance to restore utilities; food, medicine or shelter; or resources to perform tasks such as emergency debris removal.

Basic disaster recovery assistance from the federal government falls into three categories:

- * Individual Assistance, which provides aid to individuals, families and business; and
- * Public Assistance, which provides aid to state and local governments for the repair or replacement of disaster-damaged public facilities and certain private non-profit organizations.
- * Hazard Mitigation Assistance, which provides 50% funding for mitigation measures designed to reduce future losses to public and private property in the disaster area. Eligible applicants are State and local governments, Indian tribes, Alaskan Native villages, and certain private non-profit organizations.

Whether these categories of assistance are made available is a determination made for each county and depends on needs identified during damage assessments by teams usually made up of federal, State and local officials. Some declarations will involve only individual assistance or only public assistance and hazard mitigation programs.

The Application Process for Individual Assistance

National Teleregistration Center

The National Teleregistration Center (NTC) is a permanent FEMA facility housing a national toll-free telephone bank, through which registrations for disaster assistance are taken. The NTC can be activated within hours of the President's declaration of a major disaster or emergency. This capability is used in combination with the Disaster Application Centers, providing victims with an alternative means of applying for disaster assistance.

-3-

Disaster Applications Centers

To make it easier for disaster victims to obtain individual assistance, the FCO may also establish one or more Disaster Application Centers (DACs) in the disaster declared area. At a DAC representatives of federal agencies, local and State governments, and voluntary relief agencies can counsel and accept applications for aid from individuals, families, and business firms under one roof.

DACs are established close to the stricken area in large facilities, often schools or armories, to accommodate many workers and the applicants they will serve. Following an initial interview, each applicant is directed to the desks of one or more of the government or private assistance programs most likely to meet the needs of that applicant. No decision is made in the DAC whether the applicant is eligible for one type of aid or another. Such decisions are made by the various agencies on the basis of information provided by the applicant.

Important points to keep in mind about the DACs:

- * A visit to a DAC is the first of several steps in the recovery process. Applicants will receive information and applications at these centers, not goods or cash.
- * Long lines on opening day and busy signals on the phone can be avoided by those not severely affected by the disaster by waiting a day or two before filing an application.
- * Basic information will be required from individuals at the time they apply, such as the applicant's name, current and pre-disaster address (if appropriate), proof of residence, current phone number, insurance coverage, policy number(s) and agent's name. Applications will be taken without this information, but the process can be speeded up if it is readily available.
- * Applicants have a responsibility to contact their insurance company or companies and file necessary claims. Government assistance does not cover damage or losses already covered by private insurance.
- * Federal disaster aid does not guarantee total recovery from all disaster losses. Assistance is limited to returning damaged or lost property that is considered a serious need and necessary expense to pre-disaster condition.
- * Federal and State assistance is long-range in nature. Therefore, it should be understood that recovery will not occur overnight.

Key Individual Assistance ProgramsTemporary Housing Assistance

The Temporary Housing Assistance program assures that people whose homes are damaged by disaster have a safe place to live until repairs can be completed. There are three basic forms of temporary housing: rental assistance, essential home repair, and mobile home assistance which is provided if the applicant's own insurance will not provide for temporary housing assistance.

BUSH LIBRARY PHOTOCOPY - PRESERVATION

-4-

Individual and Family Grants

The Individual and Family Grant Program (IFG) is a Federal/State cost-shared program. Its purpose is to provide funds for the necessary expenses and serious needs of disaster victims which cannot be met through other forms of disaster assistance or through insurance. For fiscal year 1992, each individual or family may receive up to \$11,500 from the IFG program in each major disaster. Among needs that can be met through the IFG are housing, personal property, medical, dental, funeral, transportation and flood insurance. To obtain assistance, applicants may be required to first apply to the Small Business Administration (SBA) for disaster loan. If SBA determines the applicant ineligible for a loan, or if the loan amount is insufficient, SBA refers the applicant to the IFG program. The State administers the IFG program and pays 25 percent of the grant amount; the federal government provides the remaining 75 percent. The Governor may request a loan of the State's share.

Small Business Administration Disaster Loans

The Small Business Administration (SBA) can make federally subsidized loans to repair or replace homes, personal property or businesses which sustained damages not covered by insurance. The Small Business Administration can provide three types of disaster loans to qualified homeowners and businesses. SBA can provide (1) home disaster loans to homeowners and renters to repair or replace disaster-related damages to home or personal property, (2) business physical disaster loans to businesses to repair or replace disaster-related damaged property, including inventory and supplies; and (3) economic injury disaster loans, which are working capital loans to small businesses and to small agricultural cooperatives to assist them through the disaster recovery period. For many persons this loan program is the primary form of disaster assistance they receive.

Other programs

Other key programs an individual assistance designation can provide include Crisis Counseling, Disaster Unemployment Assistance, Legal Services, tax relief from the IRS, and various Department of Agriculture programs.

Applicants unable to meeting eligibility requirements for these programs or who have remaining unmet needs may apply to the American Red Cross, or other voluntary relief agencies for aid and assistance.

Key Public Assistance ProgramGrants

FEMA can provide funding and technical assistance to the State and local governments and certain private, non-profit institutions for the repair or replacement of facilities damaged or destroyed by the disaster. This assistance is generally in the form of a grant for not less than 75% of the cost of restoration (and hazard mitigation required by FEMA) of facilities (including schools). FEMA also can provide assistance for emergency protective measures, debris removal, emergency communications and emergency public transportation. This is a State administered program, and applicants should consult the Governor's Authorized Representative to apply for assistance.

Federal Aid for Highways

The U.S. Department of Transportation's Federal Highway Administration can provide financial and technical assistance for repair or reconstruction of highways on the federal aid system, forest highways, park roads and trails and other similar projects damaged by the disaster.

BUSH LIBRARY PHOTOCOPY - PRESERVATION

-5-

KEY HAZARD MITIGATION PROGRAMS AND ACTIVITIES

Once a Presidential disaster declaration occurs, a variety of hazard mitigation programs and activities are implemented. The overriding goal of all of these programs and activities is to reduce the potential for future loss of life and property within the disaster area. The three principal mitigation programs are outlined below.

Interagency Flood Hazard Mitigation Teams: Pursuant to a 1980 Directive from the Office of Management and Budget, twelve Federal agencies signed an interagency agreement that establishes teams which convene after every flood disaster for the purpose of identifying mitigation opportunities that can be undertaken by Federal, State or local governments. Each of the ten FEMA regions maintains a roster of team members and activates the teams after flood disasters. These teams are interagency, intergovernmental, and interdisciplinary in nature, and represent a wide range of talent and experience in the field of hazard mitigation. Each team produces a mitigation report, generally within 15 days of the date of the disaster declaration. These reports outline key mitigation opportunities for the disaster.

Hazard Mitigation Planning: Section 409 of the Stafford Act requires that State and local governments evaluate the hazards within the disaster area, and take appropriate steps to mitigate those hazards. This is done through preparation of a hazard mitigation plan, which by regulation is due 180 days after the disaster declaration. The plan is intended to set forth a broad and long range mitigation strategy which State and local governments can implement to reduce future losses from natural hazards. The ultimate goal of this planning requirement is to establish active mitigation programs at the State and local level development, and emergency response activities.

Hazard Mitigation Grant Program: Section 404 of the Stafford Act established a program specifically designed to fund mitigation measures after a disaster. Under this program, FEMA can contribute up to 50 percent of the cost of eligible mitigation measures. Total Federal funding is limited to ten percent of the estimated grants made for permanent restorative work under the Public Assistance Program. By law, mitigation measures must be cost-effective, must benefit the disaster area, and must be consistent with the mitigation plans required under Section 409. Measures can be proposed to protect both public and private property. The State is the Grantee for this program and has responsibility for soliciting projects from eligible applicants and establishing priorities for projects to be funded. Once State review of proposed projects is complete, the State submits these projects to FEMA for review and approval.

If you need additional assistance on the process or programs involved in a Presidential disaster declaration, please call the FEMA Office of Congressional Affairs at (202) 646-4500.

February 1992

FACT SHEET

SUBJECT: U.S. Army Corps of Engineers Emergency Assistance to City of Chicago

1. **Situation Summary:** On April 13, 1992, a breach in a freight tunnel under the Chicago River resulted in the flooding of numerous public and private buildings in downtown Chicago. This inundation and resulting electric power shut-downs caused the closure of City Hall, the Board of Trade and numerous businesses. Roadways, rapid transit, rail transportation and navigation on the Chicago River were also disrupted. The City has estimated the need to pump 250 million gallons of water from the flooded areas.
2. **Mission:** The Federal Emergency Management Agency under the provisions of the Stafford Act tasked the Corps of Engineers on April 18 to provide technical, construction and other assistance to stop river water from entering the freight tunnels at the point of collapse, and to drain the tunnel systems.
3. **Activities to Date:** The Corps, in coordination with the City of Chicago and others, developed and executed a plan to install concrete plugs at three locations near where the tunnel was breached. The initial construction to stop the flow of water was completed on April 19. Dewatering operations began just after midnight on April 20, and continue to the present time. Pumping activities are occurring at three separate locations with a current drawdown rate of four inches per hour. A comprehensive monitoring system has been established to minimize the risk of structural damage, especially to older building foundations. Pumping rates will be adjusted to account for varying soil conditions and their effects on structural stability. Standby provisions have been made to respond to contingencies such as tunnel collapses as the dewatering proceeds. The Corps has committed 98 people to this emergency response. Obligations to date are \$3.75 million. There are four prime contractors supporting the effort.
4. **Activities Planned:** Dewatering will be completed in an estimated seven to 10 days. Simultaneously, the Corps will reinforce the tunnel closure plugs. Continued close contact will be maintained with the City of Chicago, State of Illinois and the Federal Emergency Management Agency. Corps of Engineers teams will remain on 24-hour operation as long as emergency activities continue.

DUNBAR MECHANICAL, INC.**RESUME OF:
HARLTON G. DUNBAR
Chairman & CEO****BUSINESS:**

Harley is Chairman and CEO of Dunbar Mechanical, Inc., one of the largest institutional, industrial and commercial mechanical contracting firms in Ohio.

EDUCATION:

1958 - Ohio Wesleyan University/BA Mathematics

1962 - University of Toledo/BS Mechanical Engineering

BUSINESS AND PROFESSIONAL AFFILIATIONS:

Young Presidents Organization

1978 - Chapter Chairman

1985 - Area Conference Chairman 1985

Mechanical Contractors Association of North-West Ohio

1972 - 1974 Northwestern Ohio President

1990 - Board Member

MCAA/National

1976 - 1982 Board of Directors

Past Chairman of the:

Government Affairs Committee

Education Committee

Management Methods Committee

National Joint Apprenticeship Committee

Project Manager's Education Committee

Northwestern Ohio Council of Construction Employers - Past Chairman

Toledo Small Business Association - Past Board of Trustees and Past Vice President

American Society of Heating, Refrigeration, Air Conditioning Engineers - Past Board Member

American Society of Mechanical Engineers

Toledo Technical Society

Rotary Club of Toledo - Past Vice President and Board Member

CIVIC AND SOCIAL ACTIVITIES**City of Toledo**

1984 - Mayor's Task Force on Economic Development
Current Vice Chairman Committee of One Hundred
Area Growth Council Executive Committee

Flower Hospital - Board of Trustees

University of Toledo

1969 - 1979 Engineering Alumni Board
1975 - University Alumni Board President
1985 - 1990 Presidents Club Chairman
Currently on the University of Toledo Corporation

Epworth Methodist Church - Past Board Member

1974 - 1978 Lucas County Republican Party Chairman

Phi Delta Theta Fraternity Past President - Ohio Wesleyan University

AWARDS:

1986 - Mechanical Contractors Association of America Distinguished Service Award

Tau Beta Pi - National Engineering Honorary

DUNBAR MECHANICAL, INC.**Employee Overall**

Our field labor force is comprised of members of the Construction Trades in the areas of Pipefitters, Millwrights and Operating Engineers. Dunbar Mechanical is the largest employer of pipefitters and millwrights in the Toledo Area. Our current field headcount is 175 with an office staff of 40. Although Dunbar has experienced slow periods over the last 18 months we have been able to keep our headcount at consistent levels with only minimal cutbacks in our office staff.

TEAM PHILOSOPHY

Dunbar Mechanical, Inc. is a strong believer that the best way to run any project is with the team concept. All participants in the project must show loyalty to the team, the team captain (*customer*), and ultimately to the owner.

Dunbar works to build this philosophy among its own people and rewards its employees with recognition and promotions for their team play.

Over 75% of our business is in the industrial sector. Most of this business is with repeat customers. Without our commitment to be key team members this repeat business would not occur.

Among the ways that Dunbar works in the team includes:

- Our commitment to attend and participate in all project meetings.
- Our willingness to volunteer ideas to reduce cost/improve quality.
- Our diligence to commit the best people possible to this job.
- Our pride in our workmanship.
- Our obsession to complete the project on time and on budget.
- Our desire to identify and solve problems before they hinder the project.

Of course, every successful team has a strong team captain that makes decisions and truly leads that team. We look to *customer* to be the captain on this project. We have every confidence that *customer* will provide that leadership.

RECENT MAJOR INDUSTRIAL PROJECTS

ANHEUSER BUSCH/ Columbus, OH - Dunbar is currently the prime contractor for the renovation of Busch's Line 50 pasteurizer. This project includes the demolition of the existing single lane pasteurizer, and the assembly and installation of a new double deck Barry-Weihmiller pasteurizer. This project includes the erection of 10 sections of pasteurizer and infeed and discharge conveying systems, as well as all associated piping systems and structural steel. Tolerances are +/- .005 inches.

CAMPBELL SOUP/Napoleon, OH - Dunbar has completed a wide variety of projects including the installation of a Stork Cooker which required setting the cooker, installation of all piping, cooling tower and pumps. Dunbar installed a juice conveyor system which involved piping, ductwork, labeler and shrink wrap machine. Dunbar has also fabricated and erected miscellaneous conveyor equipment and platform extensions. Dunbar recently completed the installation of an oxidizer regenerator unit. Current projects include the installation of Stork Cooker #18 and the renovation of #15.

CIRALSKY STEEL /Toledo, OH - Dunbar relocated a slitting line and a cut to length line from one plant to another. The project included disconnecting, rigging out, transporting and reinstalling flatteners, levelers, uncoilers, recoilers and coil cars.

CHURCH & DWIGHT /Old Fort, OH - In April of '87 Dunbar completed a new fatty salt plant for Church & Dwight, the first in this country. The patent for this process was purchased by C & D from Ireland and DMI coordinated a one on one installation of the system between Irish and American workers. DMI's scope of the job included stainless steel, refrigeration and black piping, fire protection, sheet metal and duct work.

DU PONT/Toledo, OH - Utilizing double shifts, four foremen, and a work force of 50, Dunbar Mechanical, Inc. completed just under \$1 million worth of work in a tight time frame from August to October of '85. The project featured process piping for the manufacture of chemicals such as formaldehyde and methanol. In addition, Heliarc welding and argon purging were part of the requirements for the job. For DuPont's special paint testing facility, DMI custom-designed and installed a 95% clean room with precisely

controlled heating, air conditioning and humidity. Severely limited space made the design and build work critical. The success of this project led to DMI handling similar projects in Ft. Wayne and Flint.

ECKRICH/Fremont, OH - Prior to closing of this facility, Dunbar redesigned and modified Eckrich's cooking oven. Dunbar also was involved in various ventilation projects.

GENERAL MILLS/Toledo, OH - Dunbar recently replaced a corn syrup line. This project included all new stainless steel piping from the unloading station to the storage tank, and from the tank to the process. Also included were fabrication and installation of a new truck unloading station and a new basket strainer.

H.J.HEINZ/Fremont, OH - Numerous projects have centered around the installation of piping systems including steam and condensate coated piping. Dunbar has also installed an economizer and various steel platforms.

HUNT-WESSON/Memphis, TN - Dunbar just completed this project for the Wesson Oil product line. Project includes elevator, lowerator, empty case conveyor, packaging and filling line, full case conveyor, palletizer, stretch wrapper, piping system for product line and instrumentation for complete system. Project will have approximately 6,000 feet of conveyor.

HUNT-WESSON/Oakdale, CA - Dunbar was the prime mechanical contractor on the \$2.6 million T-200 Evaporator project. The project included installation of all process and ingredient piping systems as well as all utility (steam, condensate, air, water and reclaim waste water). Dunbar did the installation of all process and utility equipment including pumps, exchangers, steam drive turbines and tanks. DMI also performed the installation of conveyors, augers, and equipment for by-products, a new and modified bin fill system and pneumatic control system. Materials used on the project include copper, mild carbon steel, PVC and stainless steel were fabricated in Dunbar's new fabrication facility.

HUNT-WESSON/Perrysburg, OH - Food process piping (including a great deal of stainless steel) and utility piping, equipment setting and HVAC have comprised most of Dunbar's \$6 million plus work over the last two years. DMI millwrights have also installed various types of conveyors and manufacturing equipment. Dunbar handled 2 projects over a 3 year period to install all the refrigeration equipment and ammonia piping for 4 pudding

lines. Frick compressors, Imeco condensers and RVS vessels comprised the equipment. Beatrice is a steady customer, relying on Dunbar Mechanical, Inc. for major maintenance projects as well as new construction.

JEEP CORPORATION/Toledo, OH - Dunbar Mechanical, Inc. has provided Jeep with over \$6 million worth of mechanical contracting services under a number of contracts over the past two years. Their needs have varied from cooling and process piping, hydraulic piping, air and steam to boiler work. We recently converted a robotic line to incorporate new robotic fixtures such as automatic spot welders and clamps. This was a complex pneumatic job done primarily on weekends. The automotive industry has had unique scheduling demands which Dunbar Mechanical, Inc. has been able to meet successfully. Summer and holiday shutdowns have required as many as 160 men and three shifts to meet two week turn around deadlines. Critical schedules were met on installation of a paint and temperature control module and associated equipment. These included paint recovery systems (skimmer system), supplies and returns to remote stations, robotics, and hand held electrostatic systems.

KASLE STEEL/Dearborn, MI - Dunbar was the prime contractor on this nearly \$1 million Pro-Eco steel pickling line. This project included installation of numerous tanks, compressors, pumps, and all piping.

KRAFT FOODS/Cincinnati, OH - In October of 1988, Dunbar completed the equipment setting and ammonia piping at Kraft's national distribution warehouse. The warehouse was 350,000 sq. ft. with 8 different refrigeration freezer areas ranging from -10 degrees Fahrenheit to 45 degrees. RVS vessels, Frick compressors, Krack evaporative coils and Baltimore Air Coil evaporative condensers were used.

LIBBEY GLASS/Toledo, OH - Dunbar met Libbey's objective of increased compressed air capacity by adding a 70 H.P. compressor, 2 air receivers, upgrading 2 existing compressors as well as the cooling water system and adding 2 heating and ventilating units along with temperature control and ductwork.

MANVILLE CORPORATION/Waterville, OH - Dunbar just completed a large glass furnace rebuild in spring of '89 on a quick turn around. The work consisted of the forehearth, refiner and melter as well as the installation of a complete new batch system. The furnace was shut down, rebuilt and back in operation in 45 days, well within the schedule.

MEIJER, INC./Monroe, MI - A 1,000,000 sq. ft. warehouse and distribution center with 400,000 sq. ft. of refrigerated space was completed 6-1-89. The contract amount was \$1,310,000. There are 4 penthouses with 4 evaporators in each penthouse and 16 evaporators for dock cooling. The engine room consists of 5 Frick screw compressors, 2 Mycom reciprocating compressors, several RVS vessels and 2 Imeco evaporative condensers. Evaporators used in refrigerated areas are manufactured by Krack.

MODESTO BEE/Modesto, CA - Dunbar installed all ink piping and utility piping (air, water and hydraulic) for the new press extensions. We also modified existing ink piping.

NAMSCO STEEL/Roseville, MI - Dunbar was the turnkey contractor on this 72" Pro-Eco steel slitting line.

NATIONAL GALVANIZING / Monroe, MI - Dunbar's initial project was the installation of a 72" Pro-Eco steel pickling line. Subsequently we have installed bridge cranes for National Galvanizing. We also do all the maintenance work on their pickle lines.

NESTLE-CARNATION/Oakdale, CA - DMI is currently responsible for the complete package of all process piping, instrumentation, CIP piping, equipment setting for all process systems at Carnation's new evaporated milk facility. This includes installation of palletizers, depalletizers, wrappers, sterilizers and packaging conveyors.

NESTE RESINS - A "from the ground up" chemical plant where Dunbar worked directly for the owner's representative. The project included 24 large steel tanks, 2 reactors, thermal oxidizer, all transfer pumps, stainless and plastic fuseal piping. This job was brought in ahead of schedule, and was completed without fully engineered drawings. Dunbar has also performed various maintenance projects for Neste. Dunbar was recently selected to be a member of Neste's construction team for their plant expansion.

ORVILLE REDENBACHER/Valpariso, IN - Dunbar set the microwave popcorn lines on this fastrack design/build project. Dunbar has ongoing work at this facility.

PERSTORP POLYOLS, INC./Toledo, OH - Dunbar Mechanical was the Prime Mechanical Contractor on this \$8.5 million project. Dunbar was responsible for installing mechanical equipment such as pumps, piping,

tanks, process vessels, heat exchangers, evaporizers, and reactors. This installation was all stainless steel, utilizing a variety of welding and cutting techniques. Dunbar used as many as 130 people working multiple shifts and extended hours to complete the majority of the project within 6 months.

PHILIPS DISPLAY COMPONENTS/Ottawa, OH - Over the past two years Dunbar has completed well over 150 projects at Ottawa, Ohio. Dunbar had done \$5-6,000,000 worth of work as a prime contractor and as a subcontractor for Philips. All of these projects have been completed to Philips satisfaction. These projects include all aspects of the PTV tube line, various piping projects, conveyor installation, HVAC for offices and computer room, and the mechanical contractor for the new energy center.

PILLSBURY-JENOS PIZZA/Wellston, OH - In January 1991 Dunbar Mechanical was responsible for modifying the existing ammonia evaporators in the North Freezer, new control stations outside on the roof, and new main piping from tie-in valves on engine room mains to the North Freeze roof. All of this work was completed while maintaining a minus 20 degree environment, in a tightly constrained schedule of 40 days from mobilization to completion. During the course of this project, a redesign of branch piping from control valves to evaporators occurred, with the use of the production/fabrication shop throughout the entire job.

PRE FINISH METALS/Walbridge, OH - A steel processing facility, selected Dunbar Mechanical, Inc. to install their new electro-galvanizing line. This labor intensive project (\$750,000 in labor costs) features all process and utility piping. This particular line is an experimental one, and Dunbar Mechanical, Inc. is working closely with the design engineers, to assure a successful project. Dunbar was also responsible for all underground mechanical, process and utility piping, and machinery hook-ups of the original Pre Finish Metals facility. We continue to be a member of their shutdown maintenance team.

SEAWAY FOODTOWN/Maumee, OH - From March of '89 to September of '89, Dunbar installed a \$1.2 million ammonia system in Foodtown's new food storage warehouse. On the low temperature side, it was a recirculating ammonia system and on the high temperature side, it was a pressure fed direct expansion system. Installation included 4 Frick screw compressors, 21 Krack evaporators, a 20 ton turbo ice maker and a 60 ton ice rake holding bin with accompanying ice bagging equipment. As a result of our quality work, Foodtown requested Dunbar to do a quick turnaround design/build

project revamping the ammonia system for a 50,000 square foot warehouse. This \$600,000 project was completed on time in June, 1990.

ST. VINCENT'S MEDICAL CENTER/ Toledo, OH - Dunbar is the prime mechanical contractor for a new cogeneration system in a new powerhouse added to an existing facility. Project included boilers, cooling towers, chillers, pumps, compressor, dryer, turbines and various piping systems ranging from 1/4" tubing to 24" carbon steel. This is an ongoing project. **Success of this project is largely dependent upon Dunbar's ability to fabricate and deliver on a tight schedule due to the lack of on site construction and storage space.**

VROMAN FOODS/Toledo, OH - Dunbar Mechanical, Inc.'s refrigeration capabilities were the key to this project's success. Our work here involved responsibility for the installation of a -20 degree F., one million cubic foot freezer, which featured an ammonia refrigeration system. In addition to the erection of the unit itself, Dunbar Mechanical, Inc. was responsible for the installation of the glycol warming system, setting of evaporator units, an accumulator, and two (2) large RVS ammonia compressors. As a result of the success of the freezer project, Dunbar Mechanical, Inc., was called upon to assist Vroman Foods in the installation of a new computer controlled food processing system. Our responsibility was to install the freezers, process equipment, refrigeration and process piping, utilizing pipefitters, millwrights and insulators.

8/18/91

RECENT MAJOR COMMERCIAL PROJECTS

AVCA CORPORATION/Sylvania, OH - This project was a two story office addition to the existing engineering firm headquarters. All construction took place while the firm continued full operations. Care was given during scheduling so as to interfere as little as possible with the normal work day. Dunbar installed a new roof top variable air volume cooling unit and extended the hot water boiler system for heating. Dunbar worked as a team member from the budget stage through construction on this fast track project.

BLUE CROSS/BLUE SHIELD OF OHIO/ Toledo, OH - This 80,000 sq. ft. corporate office building allowed Dunbar Mechanical to provide a complete project from initial budgeting to value engineering on through to construction completion under an extreme fast-track schedule. Included were chillers, boilers, cooling towers and all plumbing. In addition DMI was called back to perform the same functions for a renovation of existing office space into a computer center. The building was fully occupied during construction and continued to function normally.

CROSS COUNTRY INNS/ Toledo, OH - In July of '87 DMI completed both two story hotels for Cross Country Inns, one in Spring Meadows consisting of 128 units and the second in Maumee with 120 units. Dunbar did all HVAC and plumbing.

GARDNER BUILDING/Toledo, OH - Dunbar was an integral part of the design and budgeting for the restoration of a 50,000 sq. ft. 1893 six story building now used for offices and a restaurant. The project consisted of demolition of existing HVAC, installation of a new centralized heating and cooling system with provisions for future tenants, and the main building core plumbing and future tenant service mains. All tenant improvements were done on a pre-established design and costing basis.

MILLAR ELEVATOR/Holland, OH - Dunbar did the plumbing and HVAC including compressed air for the customers new office and warehouse facility. We also handled the move of all equipment and materials from the old facility.

PORTSIDE FESTIVAL MARKETPLACE/ Toledo, OH - A major link in Toledo's downtown "revitalization" program, utilized Dunbar Mechanical to provide the mechanical systems for the general building services including HVAC. This fast-tracked project featured an extremely tight completion schedule requiring interfacing of services with a wide variety of tenants.

RADISSON HOTEL/ Toledo, OH - This is another major part in the movement toward Downtown Toledo Revitalization. It is a 17 story, 400 room, high-rise hotel adjoining the Convention Center. The hotel has two full kitchens plus a meeting room level, ballroom level and lobby level.

REGENCY OFFICE and MEDICAL COMPLEX/ Toledo, OH - A 35,000 sq. ft. luxury office building and a 35,000 sq. ft. complete medical facility. Dunbar worked on the original design and budgeting and installed all the HVAC as well as the plumbing.

SAI TECHNICAL CENTER - Dunbar installed the hot water boiler, perimeter radiation and all plumbing. All systems were capped for future tenant finish work.

SAUDER WOODWORKING/Archibold, OH - This project was a 750,000 sq. ft. shipping and warehouse facility. Our installation consisted of a complete chilled water variable air volume cooling and hot water boiler heating system. Dunbar worked closely with the owners in-house staff. The organization and close coordination of scheduling allowed this project to be completed approximately two months ahead of schedule.

SEAGATE CENTRE/ Toledo, OH - Toledo's new convention center completed in March of '87 played a key role in Toledo's "revitalization" program. As the mechanical contractor for the project, Dunbar's responsibilities included the HVAC and plumbing/piping for the center, meeting rooms, exhibition hall, kitchens and rest room facilities. This project required responsiveness to a fast-track extremely tight construction schedule to meet the demands for the grand opening.

SOCIETY BANK AND TRUST HEADQUARTERS/ Toledo, OH - Dunbar Mechanical was selected to provide mechanical contracting services for their multi-story office and banking facility in downtown Toledo. The installation included central boiler and chiller installations for heating and cooling. Schedule and quality were the key project goals.

TOLEDO MUSEUM OF ART/Toledo, OH - This project involved major renovation of several galleries including plumbing, HVAC, humidifiers, air handlers, booster pump and new circulatory pumps. All work was done while the museum remained open and functioning.

TRINOVA/Maumee, OH - Dunbar installed the new HVAC system for the new world headquarters. The system consisted of a hot water boiler with perimeter radiation and zone reheat capabilities. Cooling was done by a variable air volume system with individual zone fan powered boxes. The building utilized a state-of-the-art centralized computer system controlling individual fan boxes. This is the largest installation of its kind in Northwest Ohio. Dunbar worked extensively with Mechanical Design on system start-up and owner instruction.

WOODLANDS "A", "B", "C"/ Toledo, OH - These are three office building at Arrowhead Park totaling \$1.3 million dollars. The buildings all have an air distribution system utilizing the Carrier Moduline system for ease of tenant modifications and a hot water boiler system with perimeter radiation. A/C is provided by roof top units up to 70 tons. Dunbar also handled the sheetmetal, insulation of all mechanical systems and all tenant finishes.

8/5/91

MAJOR INSTITUTIONAL PROJECTS

COMMUNITY HOSPITALS OF WILLIAMS COUNTY/Bryan, OH - Dunbar is currently constructing all HVAC, plumbing and medical gas systems for the addition of a fourth floor to an existing three story structure. The project includes the extension of all building services and the renovation of the existing operating rooms with the addition of a new operating room. All work requires close coordination as the hospital maintains full occupancy.

FLOWER MEMORIAL HOSPITAL/Sylvania, OH - This is a current project where Dunbar was invited to be a member of the construction team on a negotiated basis. This is the beginning of a long term relationship for a hospital campus development. Dunbar was actively involved in the budgeting and design phase of this project. Work includes HVAC, plumbing and medical gases for a new emergency room that includes 2 laser surgery rooms, 4 endoscopic and 2 surgery rooms utilizing a new technology - laminar air flow. The total project is in excess of more than \$3 million.

MERCY HOSPITAL/Toledo, OH - Dunbar is doing plumbing, medical gas piping as well as piping for 2 new dialysis machines for a renovation of the hospital's 5th floor.

ST. CHARLES HOSPITAL/Toledo, OH - Dunbar is currently in the third and final phase of renovation of various areas on four floors of the original hospital facility. The needs of the project as well as general architectural upgrades were to renovate the ventilation systems to current code requirements. In addition there was major upgrading to the medical gas systems. Work involved administration areas, patient rooms, the pharmacy as well as examining and treatment areas. This team approach, negotiated project nears \$2,000,000 of contract value.

ST. LUKE'S HOSPITAL/Maumee, OH - This was a 2.5 million dollar DMI contract for an 80,000 sq. ft. hospital addition with 80 beds plus support services and a complete kitchen. Dunbar handled all the HVAC, plumbing and medical gas piping.

ST. VINCENT HOSPITAL/Toledo, OH - Dunbar is currently working on this co-generation project for which we are doing all piping and equipment installation including boilers, chillers, pumps and turbines.

ST. VINCENT OUTPATIENT SURGERY CENTER /Toledo, OH - In a four month period, Dunbar Mechanical, Inc. turned commercial office space into *four modern, state-of-the-art operating suites* including spacious pre-op and recovery suites as well as a procedure room. The site also includes complete laboratory facilities for outpatient cases. DMI installed all the medical gases, HVAC, and a laser surgery cooling system providing critically controlled air requirements for surgery. All shutdown of existing services were done on Saturday and Sunday to avoid disruption of current tenants.

TOLEDO HOSPITAL/JOBST TOWER - The nine story Jobst Tower project represents a new basic office building shell constructed for tenant development. This building is virtually identical to the existing Harris-MacDonald Tower and is connected to the existing hospital complex via a series of tunnels. Dunbar provided all the plumbing and mechanical base systems which can be extended to provide services for any potential physician or laboratory tenants.

TOLEDO HOSPITAL/NORTH EXPANSION - This \$1 million dollar plumbing and piping contract includes specialty piping systems and equipment serving six new operating rooms, extensive patient recovery areas and a new surgical intensive care section for the Toledo Hospital. A new nine story tower extension allows ease of patient transfer from the existing hospital floors to the new surgical areas

UNIVERSITY OF TOLEDO/STUDENT RECREATION CENTER - The state of Ohio awarded Dunbar the \$1.3 million plumbing contract for the student recreation center which includes a natatorium with three pools, spa, water slide, six full basketball courts, a running track and numerous fitness rooms. Dunbar installed a truly state-of-the-art regenerative pool water filtration system that insures the cleanest possible swimming conditions and maintenance free operation.

W.I.S.H./Maumee, OH - This project involved not only the installation of standard rooftop heating and cooling equipment and specialized heating and ventilation systems for the therapy swimming pool area. Dunbar also provided plumbing installations and hook ups for the hydrotherapy equipment.
