Purpose of Presidential Visit: To urge Congress to send an education reform bill to the President. This Reading Week event also highlights a school with a large minority and low-income student population that has achieved increasing success through an emphasis on reading, testing, and accountability.

Suggested Lines

- We face a national crisis in education, and it demands immediate attention.
- Many people argue that we need to spend more money on education – and we provide record levels of funding for elementary and secondary education. But as this chart shows, we must combine resources with reform if we expect our children to learn.
- The stakes are high. Thirty-seven percent of fourth-graders cannot read at the basic level. That's almost 1.4 million children each year who can't read and understand a basic children's book. If we don't act this year, we'll lose another 1.4 million. If we don't act, we're basically telling children we don't care if you fail. But I do care. And this must stop.
- These children are silently shuffling through the system, and if they don't get help, they won't catch up. Studies show that 74 percent of students who aren't reading by the third grade and don't get research-based reading help will continue to have reading problems later in life. That's a terrible fate to offer a child.
- It will be a national scandal if this bill is delayed by partisan politics. Every child in America who cannot read will be on the conscience of those who stand in the way of reform.

- The school's motto is "High Expectations for All."
- The school's web site contains "Reading Tips" for parents, including a suggestion to spend at least 20 minutes every day reading at home.
- Every morning, students recite the Pledge of Allegiance and the Emma E. Booker Affirmation:

"I believe knowledge is great power. I want to be well educated. I will learn the basic skills and beyond. I will complete all assignments. I will strive for punctuality and good attendance. I believe I can do anything if I work hard. I pledge this to my school, my family, and myself. Today's students, tomorrow's leaders!"

Suggested Lines

- We face a national crisis in education, and it demands immediate attention.
- Many people argue that we need to spend more money on education – and we provide record levels of funding for elementary and secondary education. But as this chart shows, we must combine resources with reform if we expect our children to learn.
- The stakes are high. Thirty-seven percent of fourth-graders cannot read at the basic level. That's almost 1.4 million children each year who can't read and understand a basic children's book. If we don't act this year, we'll lose another 1.4 million. If we don't act, we're basically telling children we don't care if you fail. But I do care. And this must stop.
- These children are silently shuffling through the system, and if they don't get help, they won't catch up. Studies show that 74 percent of students who aren't reading by the third grade and don't get research-based reading help will continue to have reading problems as adults. That's a terrible fate to offer a child.
- It will be a national scandal if this bill is delayed by partisan politics. Every child in America who cannot read will be on the conscience of those who stand in the way of reform.

Remarks at Emma E. Booker Elementary School – Sarasota, Florida
September 11, 2001
Draft #8

Purpose of Presidential Visit: To urge Congress to send an education reform bill to the President. This Reading Week event also highlights a school with a large minority and low-income student population that has achieved increasing success through an emphasis on reading, testing, and accountability.

If we don't act this year, we'll lose another 1.4 million. If we don't act, we're basically telling children we don't care if you fail. But I do care. And this must stop.

- These children are silently shuffling through the system, and if they don't get help, they won't catch up.

Studies show that 74 percent of students who aren't reading by the third grade and don't get research-based reading help will continue to have reading problems later in life. That's a terrible fate to offer a child.
