## China WTO Agreement April Comparison

In April, we were unable to conclude agreement because there remained a number of significant unresolved issues in our bilateral negotiations with China on its accession to the WTO. These included financial services, audio-visual services and important issues relating to rules governing dumped products and import surges from China ("protocol issues").

Needs to  
be  
more  
positive

In some of these areas we achieved clear gains, in other areas we responded to Chinese concerns but were able to find other ways to strengthen the commitment.

## China WTO Agreement April Comparison

In April, we were unable to conclude agreement because there remained a number of significant unresolved issues in our bilateral negotiations with China on its accession to the WTO. These included financial services, audio-visual services and important issues relating to rules governing dumped products and import surges from China ("protocol issues").

In some of these areas we achieved clear gains, in other areas we responded to Chinese concerns but were able to find other ways to strengthen the commitment.

### Progress Since April

- **Import Surge Mechanism:** <sup>12</sup> No agreement in April. China has agreed to a safeguard mechanism for ~~X~~ <sup>12</sup> years following accession that can be used to address ~~rapid~~ <sup>hurd</sup> increases in imports from China. Permits us to take unilateral action solely against imports from China based upon a lower threshold of injury and causation than under our general import surge law, Section 201. Our existing safeguard law permits domestic industries and workers to seek temporary import relief from imports from all foreign sources, but not from a single foreign source. This special safeguard allows parties to seek import relief against Chinese imports alone. ✓
- **Antidumping:** <sup>hurd</sup> No agreement in April. The provision <sup>ensures</sup> permits us to continue <sup>but we can continue</sup> application of our current non-market economy methodology in antidumping cases <sup>to China</sup> for X years. Key issue for a broad range of constituencies including steel, agriculture, and labor. <sup>without the risk of a WTO legal challenge.</sup>
- **Motion Pictures:** In April, China made no commitments to import foreign films on a revenue sharing basis. China has agreed to import ~~on a~~ <sup>20 films on a</sup> revenue sharing basis ~~15 in each of~~ <sup>in each of</sup> films during the first year after accession, 17 in year two, 20 in year three. <sup>the 3 years after China's accession</sup>
- **Internet Access:** China's telecom services commitments now clearly include internet services and internet telephony. The Agreement confirms that this rapidly growing market for internet services will be liberalized at the same rate as other key telecommunications services of interest to our providers.
- **Satellites:** China has clarified that it will permit provision of telecommunications services via satellite. Commitments were unclear in April.
- **Auto Financing:** <sup>has now</sup> China made ~~no~~ <sup>we sought in April to allow</sup> commitments for non-bank financing of auto purchases in April, but has now agreed to permit <sup>institutions</sup> [non-bank foreign financial service]

suppliers] to provide auto financing upon accession. Under this agreement, foreign companies can now sell, distribute, finance, maintain and repair automobiles.

- **Securities:** Affirmed April tentative commitment that minority foreign-owned joint ventures can engage in fund management on the same terms as Chinese firms. As the scope of business expands for Chinese firms, foreign joint ventures will enjoy the same expansion in scope of business. Minority joint ventures will also be allowed to underwrite domestic securities issuance and underwrite and trade in foreign currency denominated securities (debt and equity). **E**
- **Capital Markets Dialogue:** <sup>China and the U.S.</sup> Secretary Summers and Finance Minister Xiang recently announced a bilateral dialogue on financial and capital markets development. With the high priority placed on reforming the state owned enterprise sector and expanding the availability of private sector finance, China and the United States will focus attention on deepening the securities and banking sectors, including the role of foreign financial services firms in their markets.

#### Adjustments

*The U.S. and China agreed to accelerated tariff reduction in*

- [Auto Tariffs: ~~In April, China had agreed to reduce its auto tariffs to 25% in 2005.~~ China will ~~now~~ reduce automobile tariffs from the current 80-100% levels to 25% in 2006, but with tariff reduction frontloaded to expand market access beyond the April commitments in the near term. With China's commitments to allow auto repair and maintenance, foreign companies can now sell, distribute, finance, maintain and repair automobiles. ] *earlier for a slightly longer period. The U.S. at this agreement is that*

- [Auto Parts: China will ~~reduce auto part tariffs to~~ *the auto parts for first time will be* to an average of 10% by July, 2006.] *first time tariff reduction with country*

- [Telecom: In April China agreed to phase out geographic restrictions on paging and value added services in 4 years. China has now agreed to phase out such restrictions in 2 years. In investment, in April, China agreed to allow 35% foreign ownership for value added and paging services two years after accession. ~~Now they have agreed to allow a 49% foreign ownership with operational and management control. Within one year following accession.]~~ *150% yr* *10 years*

- [Insurance: China will allow [50%] foreign equity share with management control rather than the 51% equity share. China ~~also now excludes brokerage.]~~ *points to insurance and agreed to 2 banks*

- [Distribution of Software Entertainment, Video and Sound Recordings – In April, China only allowed joint ventures.] China will now permit foreign majority ownership in 3 years.] *geographic licensing in April.*

**Held Harmless (FYI for Background)**

- ***Auto Repair and Maintenance Services:*** Foreign investors will be able to establish independent establishments and service all autos. Currently, companies can only service what they manufacture.
- ***Banking (this is the same as April – gain is auto finance):*** Currently foreign banks are not permitted to do local currency business with Chinese clients (a few can engage in local currency business with their foreign clients). China imposes severe geographic restrictions on the establishment of foreign banks.
  - China has committed to full market access in five years for U.S. banks.
  - Foreign banks will be able to conduct local currency business with Chinese enterprises starting 2 years after accession.
  - Foreign banks will be able to conduct local currency business with Chinese individuals from 5 years after accession.
  - Foreign banks will have the same rights (national treatment) as Chinese banks within designated geographic areas.
  - Both geographic and customer restrictions will be removed in five years.

### **China WTO Agreement April Comparison**

In April, we were unable to conclude agreement because there remained a number of significant unresolved issues in our bilateral negotiations with China on its accession to the WTO. These included financial services, audio-visual services and important issues relating to rules governing dumped products and import surges from China ("protocol issues").

In some of these areas we achieved clear gains, in other areas we responded to Chinese concerns but were able to find other ways to strengthen the commitment.

#### **Progress Since April**

- **Import Surge Mechanism:** No final agreement in April. China has agreed to a safeguard mechanism for 12 years following accession that can be used to address increases in imports from China. Permits us to take unilateral action solely against imports from China based upon a lower threshold of injury and causation than under our general import surge law, Section 201. Our existing safeguard law permits domestic industries and workers to seek temporary import relief from imports from all foreign sources, but not from a single foreign source. This special safeguard allows parties to seek import relief against Chinese imports alone.
- **Antidumping:** No final agreement in April. The provision ensures that we can continue to apply our current non-market economy methodology in antidumping cases to China for X years without the risk of a legal challenge. Key issue for a broad range of constituencies including steel, agriculture, and labor.
- **Motion Pictures:** In April, China made no commitments to import foreign films on a revenue sharing basis. China has agreed to import 20 films on a revenue sharing basis in each of the three years after China's accession.
- **Internet Access:** China's telecom services commitments now clearly include internet services and internet telephony. The Agreement confirms that this rapidly growing market for internet services will be liberalized at the same rate as other key telecommunications services of interest to our providers.
- **Satellites:** China has clarified that it will permit provision of telecommunications services via satellite. Commitments were unclear in April.
- **Auto Financing:** China has now made commitments we sought in April to non-bank foreign financial institutions to provide auto financing upon accession. Under this

agreement, foreign companies can now sell, distribute, finance, maintain and repair automobiles.

- ***Securities:*** Affirmed April tentative commitment that minority foreign-owned joint ventures can engage in fund management on the same terms as Chinese firms. As the scope of business expands for Chinese firms, foreign joint ventures will enjoy the same expansion in scope of business. Minority joint ventures will also be allowed to underwrite domestic securities issues and underwrite and trade in foreign currency denominated securities (debt and equity).
- ***Capital Markets Dialogue:*** China and the U.S. recently announced a bilateral dialogue on financial and capital markets development. With the high priority placed on reforming the state owned enterprise sector and expanding the availability of private sector finance, China and the United States will focus attention on deepening the securities and banking sectors, including the role of foreign financial services firms in their markets.

### **Adjustments**

- ***Auto Tariffs:*** China and the United States agreed to accelerated tariff reduction in exchange for a slightly longer phase in period. The effect of this agreement is that China will now reduce automobile tariffs from the current 80-100% levels to 25% in 2006, but with tariff reduction frontloaded to expand market access beyond the April commitments in the near term. With China's commitments to allow auto repair and maintenance, foreign companies can now sell, distribute, finance, maintain and repair automobiles.
- ***Auto Parts:*** China will reduce auto parts tariffs to an average of 10% by July, 2006 on a front-loaded basis..
- ***Telecom:*** In April China agreed to phase out geographic restrictions on paging and value added services in 4 years. China has now agreed to phase out such restrictions in 2 years. In investment, in April, China agreed to allow 35% foreign ownership for value added and paging services two years after accession. They will allow a 49% foreign ownership with operational and management control within one year following accession.
- ***Insurance:*** China will allow [50%] foreign equity share with management control rather than the 51% equity share. China now permits reinsurance and agreed to broader geographic coverage than in April.
- ***[Distribution of Software Entertainment, Video and Sound Recordings –*** In April, China only allowed joint ventures. China will now permit foreign majority ownership in 3 years.]

## **Held Harmless (FYI for Background)**

- ***Auto Repair and Maintenance Services:*** Foreign investors will be able to establish independent establishments and service all autos. Currently, companies can only service what they manufacture.

DRAFT

Statement by the President  
U.S.-China Bilateral WTO Accession Agreement

I am very pleased that the United States and the People's Republic of China have concluded a strong bilateral WTO Accession Agreement that constitutes a major step toward bringing China into the World Trade Organization.

This agreement is good for America, good for China and good for the world economy. The agreement will create unprecedented opportunities for American farmers, workers and companies to compete successfully in China's enormous market. The agreement reached today will bolster China's economic reforms and support the rule of law. President Jiang Zemin and Premier Zhu Rongji have shown genuine leadership in committing China to open its markets and abide by global rules of fair trade. China's commitments also will strengthen the WTO and the global consensus for an open, rule-based international economy.

~~It's obvious that this is more than just an ordinary trade agreement. By agreeing to have China join the WTO on strong, common, viable terms, we not only will enhance our economic cooperation but also create a standard for our cooperation on the many other areas where we must cooperate; such as nonproliferation, regional security, environmental protection, and human rights. As a result, the overall relationship between our countries is bound to be strengthened.~~

On the basis of this excellent agreement, I will work hard with other countries to gain China's entry into the World Trade Organization and mobilize my Administration to undertake an all-out effort to work with Congress to secure permanent Normal Trade Relations for China.

By agreeing to have China join the WTO on strong, common, viable terms, we agree to commit itself on strong, common, viable terms to join the international global-rule based trading system, we

This agreement represents a profound and historic step forward in the long-term relationship of the United States and the ~~People's Republic of China~~ <sup>People's Republic of China</sup>. Today the ~~largest~~ <sup>market</sup> ~~strongest~~ <sup>strongest</sup> economy in the history of the world and the most populous nation ~~which was the most largest, a most populous~~ <sup>which was the most largest, a most populous</sup> communist country in the world join in a historic agreement to ~~increase its~~ <sup>open its doors to global rules of the Marketplace</sup> United States, ~~the world's~~ <sup>and the world's</sup> ~~strongest~~ <sup>strongest</sup> market economy in the history of the world and ~~China's~~ <sup>former communist</sup> formerly its most populous communist ~~adhering~~ <sup>adhering</sup> join in a historic pact to ~~open its markets, its increase the~~ <sup>open its markets and its</sup>

Statement by the President  
U.S.-China Bilateral WTO Accession Agreement

I am very pleased that the United States and the People's Republic of China have concluded a strong bilateral WTO Accession Agreement that constitutes a major step toward bringing China into the World Trade Organization.

This agreement is good for America, good for China and good for the world economy. The agreement will create unprecedented opportunities for American farmers, workers and companies to compete successfully in China's enormous market. The agreement reached today will bolster China's economic reforms and support the rule of law. President Jiang Zemin and Premier Zhu Rongji have shown genuine leadership in committing China to open its markets and abide by global rules of fair trade. China's commitments also will strengthen the WTO and the global consensus for an open, rule-based international economy.

It's obvious that this is more than just an ordinary trade agreement. By putting our highly complementary economies on a foundation of fairness and international rules, we not only will enhance our economic cooperation but also create a standard for our cooperation on the many other areas where we must want to cooperate, such as nonproliferation, regional security, environmental protection, and human rights. As a result, the overall relationship between our countries is bound to be strengthened.

~~Presidential~~ ~~and~~ ~~must want to~~ ~~STEP~~

On the basis of this excellent agreement, I will work hard with other countries to gain China's entry into the World Trade Organization and mobilize my Administration to undertake an all-out effort to work with Congress to secure permanent Normal Trade Relations for China.

This agreement represents a profound  
and historic step forward between in the relationship  
between of the United States and the People's Republic of  
China. Today, China, formerly the most populist  
communist adversary of the United States, commits to  
open ~~its~~ its <sup>now mostly</sup> emerging market economy to  
to the ideas, information, ~~innovation and~~ goods, services  
and agriculture products of  
competition, innovation and flow of ideas that come  
~~from opening tearing down the trade barriers from~~  
opening its ~~own~~ markets to

from the United States and all other free nations in the  
world. This is another step in a historic transformation  
that will help define whether China will define its  
destiny in terms of peace, <sup>cooperation</sup> ~~freedom~~ and open  
~~competition~~, markets and ideas.

suppliers] to provide auto financing upon accession. Under this agreement, foreign companies can now sell, distribute, finance, maintain and repair automobiles.

- **Securities:** Affirmed ~~April~~ tentative commitment that minority foreign-owned joint ventures can engage in fund management on the same terms as Chinese firms. As the scope of business expands for Chinese firms, foreign joint ventures will enjoy the same expansion in scope of business. Minority joint ventures will also be allowed to underwrite domestic securities issues and underwrite and trade in foreign currency-denominated securities (debt and equity).

- **Capital Markets Dialogue:** Secretary Summers and Finance Minister Xiang recently announced a bilateral dialogue on financial and capital markets development. With the high priority placed on reforming the state-owned enterprise sector and expanding the availability of private sector finance, China and the United States will focus attention on deepening the securities and banking sectors, including the role of foreign financial services firms in their markets.

#### Adjustments

- [Auto Tariffs: In April, China had agreed to reduce its auto tariffs to 25% in 2005. China will now reduce automobile tariffs from the current 80-100% levels to 25% in 2006, but with tariff reduction frontloaded to expand market access beyond the April commitments in the near term. With China's commitments to allow auto repair and maintenance, foreign companies can now sell, distribute, finance, maintain and repair automobiles.]

- [Auto Parts: China will reduce auto part tariffs to an average of 10% by July, 2006.]

- [Telecom: In April China agreed to phase out geographic restrictions on paging and value added services in 4 years. China has now agreed to phase out such restrictions in 2 years. In investment, in April, China agreed to allow 35% foreign ownership for value added and paging services two years after accession. Now they have agreed to allow a 49% foreign ownership with operational and management control. Within one year following accession.]

- [Insurance: China will allow [50%] foreign equity share with management control rather than the 51% equity share. China also now excludes brokerage.]

- [Distribution of Software Entertainment, Video and Sound Recordings - In April, China only allowed joint ventures. China will now permit foreign majority ownership in 3 years.]

Held Harmless (FYI for Background)

April commitment?

- **Auto Repair and Maintenance Services:** Foreign investors will be able to establish independent establishments and service all autos. Currently, companies can only service what they manufacture.

We maintained the same strong banking package that we had in April.

- **Banking (this is the same as April – gain is auto finance):** Currently foreign banks are not permitted to do local currency business with Chinese clients (a few can engage in local currency business with their foreign clients). China imposes severe geographic restrictions on the establishment of foreign banks.

- China has committed to full market access in five years for U.S. banks.
- Foreign banks will be able to conduct local currency business with Chinese enterprises starting 2 years after accession.
- Foreign banks will be able to conduct local currency business with Chinese individuals from 5 years after accession.
- Foreign banks will have the same rights (national treatment) as Chinese banks within designated geographic areas.
- Both geographic and customer restrictions will be removed in five years.

November 14, 1999

| Import Quotas                 | Restrictive quotas for automobiles, fertilizer, medical equipment, textile machinery, and a wide range of other products | China will eliminate existing quotas for top U.S. priorities such as fertilizer and fiber optic cable. The remainder will be phased-out by 2002 or 2005                                                           |
| Trading Rights                | China strictly limited the number and kinds of companies allowed to conduct import and export business.                  | China will progressively phase-in the right to import and export products throughout the country so that at the end of three years, all Chinese and foreign firms and foreign individuals will be able to do this |
| Distribution Rights           | Distribution rights for products made in China only                                                                      | Distribution rights in all sectors within five years                                                                                                                                                              |
|                               | No right to own or manage distribution networks                                                                          | Permit 100% foreign ownership for most within 2-3 years, maximum 5 years                                                                                                                                          |

|                       |                                                                                                                                                                                                    |                                                                                                 |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| <b>Grandfathering</b> | China has allowed the establishment of foreign ventures with the approval of local authorities, but without action by the central government, thus jeopardizing the companies' continued operation | China will grandfather all existing current market access and activities in all service sectors |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|

|                |                                           |                                                                                                                   |
|----------------|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| <b>Telecom</b> | Sales of telecom services restricted      | Phase-out of geographic restrictions for <b>paging and value-added services</b> within 2 years                    |
|                | Investment in telecom services restricted |                                                                                                                   |
|                |                                           | Phase-out of geographic restrictions on <b>mobile/cellular services</b> within 5 years                            |
|                |                                           | Phase-out of geographic restrictions on <b>domestic wireline services</b> within 6 years                          |
|                |                                           | <b>X%</b> foreign ownership allowed for value-added and <b>paging services</b> within one year of accession       |
|                |                                           | The <b>internet services market</b> will be liberalized at the same pace as other key telecommunications services |
|                |                                           | China will permit provision of telecommunications services via <b>satellite</b>                                   |

|                                             |                                                               |                                                                                                            |
|---------------------------------------------|---------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|
| <b>Automobiles</b>                          |                                                               | Foreign entities will have right to sell, distribute, finance, maintain and repair automobiles             |
| <b>Auto Tariffs</b>                         | Range from 80%-100%                                           | Front loaded tariff cuts to 25% by 2006                                                                    |
| <b>Auto Financing</b>                       | Only Chinese banks permitted to offer consumer auto financing | China will permit non-bank foreign financial service institutions to provide auto financing upon accession |
| <b>Auto Repair and Maintenance Services</b> | Currently, companies can only service what they manufacture   | Foreign investors will be able to establish independent establishments and service all autos               |

|                |                                                                                     |                                                                                                                           |
|----------------|-------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------|
| <b>Banking</b> | Foreign Banks not permitted to conduct local currency business with Chinese clients | Market access and national treatment for U.S. banks in five years                                                         |
|                |                                                                                     | Foreign banks will be able to conduct local currency business with Chinese enterprises starting two years after accession |
|                |                                                                                     | Foreign banks will be able to conduct local currency business with Chinese individuals from 5 years after accession       |
|                |                                                                                     | Both geographic and customer restrictions will be removed in 5 years                                                      |

|                   |                                                                                            |                                                                                                                                                                                      |
|-------------------|--------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Securities</b> | Only one minority foreign-owned joint venture has limited operations as an investment bank | Minority foreign-owned joint ventures can engage in fund management on the same terms as Chinese firms                                                                               |
|                   |                                                                                            | Minority foreign-owned joint ventures will be allowed to underwrite domestic securities issues and underwrite and trade in foreign currency denominated securities (debt and equity) |

|           |                                                                              |                                                                                                         |
|-----------|------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|
| Insurance | Foreign companies limited in number and restricted to Shanghai and Guangzhou | China will eliminate all geographic restrictions within three years, and open up Beijing upon accession |
|           |                                                                              | All qualified insurers will be issued licenses                                                          |
|           |                                                                              | China will allow reinsurance and insurance of large scale commercial risk                               |
|           |                                                                              |                                                                                                         |
|           |                                                                              | China will allow 50% foreign equity share with management control                                       |

|              |                                                                                   |                                                                                                                         |
|--------------|-----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Audio Visual | Distribution of sound recordings, videos, movies, books, and magazines restricted | China will allow 49% foreign participation for the distribution of video and sound recordings                           |
|              | No commitments on number of revenue-sharing films imported                        | China agreed to import on a revenue sharing basis 20 films per year for three years                                     |
|              |                                                                                   | China will allow majority foreign ownership in 3 years for construction, renovation, ownership and operation of cinemas |

|                  |                                                                                      |                                                                                                      |
|------------------|--------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------|
| Travel & Tourism | Foreign firms subject to geographic limitations and cannot establish travel agencies | China will allow full market access to the Chinese market for certain hotel operators within 3 years |
|                  |                                                                                      | Foreign travel operators can provide full range of travel agency services                            |

|                      |                                                                                                          |                                                                                                                                                                                                                                                                                                                       |

### **China WTO Agreement April Comparison**

In April, we were unable to conclude agreement because there remained a number of significant unresolved issues in our bilateral negotiations with China on its accession to the WTO. These included financial services, audio-visual services and important issues relating to rules governing dumped products and import surges from China ("protocol issues").

In some of these areas we achieved clear gains, in other areas we responded to Chinese concerns but were able to find other ways to strengthen the commitment.

#### **Progress Since April**

- ***Import Surge Mechanism:*** No agreement in April. China has agreed to a safeguard mechanism for X years following accession that can be used to address rapid increases in imports from China. Permits us to take unilateral action solely against imports from China based upon a lower threshold of injury and causation than under our general import surge law, Section 201. Our existing safeguard law permits domestic industries and workers to seek temporary import relief from imports from all foreign sources, but not from a single foreign source. This special safeguard allows parties to seek import relief against Chinese imports alone.
- ***Antidumping:*** No agreement in April. The provision permits us to continue application of our current non-market economy methodology in antidumping cases for X years. Key issue for a broad range of constituencies including steel, agriculture, and labor.
- ***Motion Pictures:*** In April, China made no commitments to import foreign films on a revenue sharing basis. China has agreed to import on a revenue sharing 20 foreign films each year.
- ***Internet Access:*** China's telecom services commitments now clearly include internet services and internet telephony. The Agreement confirms that this rapidly growing market for internet services will be liberalized at the same rate as other key telecommunications services of interest to our providers.
- ***Satellites:*** China has clarified that it will permit provision of telecommunications services via satellite. Commitments were unclear in April.
- ***Auto Financing:*** China made no commitments for non-bank financing of auto purchases in April, but has now agreed to permit [non-bank foreign financial service

suppliers] to provide auto financing upon accession. Under this agreement, foreign companies can now sell, distribute, finance, maintain and repair automobiles.

- ***Securities:*** Affirmed April tentative commitment that minority foreign-owned joint ventures can engage in fund management on the same terms as Chinese firms. As the scope of business expands for Chinese firms, foreign joint ventures will enjoy the same expansion in scope of business. Minority joint ventures will also be allowed to underwrite domestic securities issues and underwrite and trade in foreign currency denominated securities (debt and equity).
- ***Capital Markets Dialogue:*** Secretary Summers and Finance Minister Xiang recently announced a bilateral dialogue on financial and capital markets development. With the high priority placed on reforming the state owned enterprise sector and expanding the availability of private sector finance, China and the United States will focus attention on deepening the securities and banking sectors, including the role of foreign financial services firms in their markets.

### **Adjustments**

- *[Auto Tariffs:* In April, China had agreed to reduce its auto tariffs to 25% in 2005. China will now reduce automobile tariffs from the current 80-100% levels to 25% in 2006, but with tariff reduction frontloaded to expand market access beyond the April commitments in the near term. With China's commitments to allow auto repair and maintenance, foreign companies can now sell, distribute, finance, maintain and repair automobiles. ]
- *[Auto Parts:* China will reduce auto part tariffs in to an average of 10% by July, 2006.]
- *[Telecom:* In April China agreed to phase out geographic restrictions on paging and value added services in 4 years. China has now agreed to phase out such restrictions in 2 years. In investment, in April, China agreed to allow 35% foreign ownership for value added and paging services two years after accession. Now they have agreed to allow a 49% foreign ownership with operational and management control. Within one year following accession.]
- *[Insurance:* China will allow [50%] foreign equity share with management control rather than the 51% equity share. China also now excludes brokerage.]
- *[Distribution of Software Entertainment, Video and Sound Recordings –* In April, China only allowed joint ventures. China will now permit foreign majority ownership in 3 years.]

### **Held Harmless (FYI for Background)**

- ***Auto Repair and Maintenance Services:*** Foreign investors will be able to establish independent establishments and service all autos. Currently, companies can only service what they manufacture.
- ***Banking (this is the same as April – gain is auto finance):*** Currently foreign banks are not permitted to do local currency business with Chinese clients (a few can engage in local currency business with their foreign clients). China imposes severe geographic restrictions on the establishment of foreign banks.
  - China has committed to full market access in five years for U.S. banks.
  - Foreign banks will be able to conduct local currency business with Chinese enterprises starting 2 years after accession.
  - Foreign banks will be able to conduct local currency business with Chinese individuals from 5 years after accession.
  - Foreign banks will have the same rights (national treatment) as Chinese banks within designated geographic areas.
  - Both geographic and customer restrictions will be removed in five years.

### **China WTO Agreement April Comparison**

In April, we were unable to conclude agreement because there remained a number of significant unresolved issues in our bilateral negotiations with China on its accession to the WTO. These included financial services, audio-visual services and important issues relating to rules governing dumped products and import surges from China ("protocol issues").

In some of these areas we achieved clear gains, in other areas we responded to Chinese concerns but were able to find other ways to strengthen the commitment.

#### **Progress Since April**

- **Import Surge Mechanism:** No final agreement in April. China has agreed to a safeguard mechanism for 12 years following accession that can be used to address increases in imports from China. Permits us to take unilateral action solely against imports from China based upon a lower threshold of injury and causation than under our general import surge law, Section 201. Our existing safeguard law permits domestic industries and workers to seek temporary import relief from imports from all foreign sources, but not from a single foreign source. This special safeguard allows parties to seek import relief against Chinese imports alone.
- **Antidumping:** No final agreement in April. The provision ensures that we can continue to apply our current non-market economy methodology in antidumping cases to China for X years without the risk of a legal challenge. Key issue for a broad range of constituencies including steel, agriculture, and labor.
- **Motion Pictures:** In April, China made no commitments to import foreign films on a revenue sharing basis. China has agreed to import 20 films on a revenue sharing basis in each of the three years after China's accession.
- **Internet Access:** China's telecom services commitments now clearly include internet services and internet telephony. The Agreement confirms that this rapidly growing market for internet services will be liberalized at the same rate as other key telecommunications services of interest to our providers.
- **Satellites:** China has clarified that it will permit provision of telecommunications services via satellite. Commitments were unclear in April.
- **Auto Financing:** China has now made commitments we sought in April to non-bank foreign financial institutions to provide auto financing upon accession. Under this

agreement, foreign companies can now sell, distribute, finance, maintain and repair automobiles.

- ***Securities:*** Affirmed April tentative commitment that minority foreign-owned joint ventures can engage in fund management on the same terms as Chinese firms. As the scope of business expands for Chinese firms, foreign joint ventures will enjoy the same expansion in scope of business. ## China WTO Agreement April Comparison

In April, we were unable to conclude agreement because there remained a number of significant unresolved issues in our bilateral negotiations with China on its accession to the WTO. These included financial services, audio-visual services and important issues relating to rules governing ~~dumped products~~ *antidumping* and import surges from China ("protocol issues").

In some of these areas we ~~achieved clear~~ *made* gains, in other areas we responded to Chinese concerns but were able to find other ways to strengthen the commitment.

### Progress Since April

- **Product Specific Safeguard:** Unresolved in April. China has agreed to a safeguard mechanism until 20\_\_ that can be directed exclusively at imports from China that cause or threaten to cause market disruption to domestic producers of like products. Our existing Section 201 safeguard law permits domestic industries and workers to seek temporary import relief from imports from all foreign sources, but not from a single foreign source. This special safeguard allows parties to seek import relief against Chinese imports alone, using a slightly ~~lower injury~~ *higher* standard ("market disruption") than the "serious injury" standard of Section 201.
- **Antidumping:** Duration unresolved in April. China sought short sunset. China has agreed to allow the continued use of non-market economy dumping methodology for X years.
- **Audiovisual:** *NOTHING AGREES* China has committed to import a ~~minimum~~ number of foreign films on a revenue sharing basis: 15 in year one, 17 in year two, 20 in year three. China made no such commitments in April. *No other country has ever made such a commitment.*
- **Internet Access:** Access for internet services and internet telephony was unclear. The agreement confirms that this rapidly growing market for internet services will be liberalized at the same rate as other key telecommunications services of interest to our providers.
- **Satellites:** China has clarified that it will permit provision of telecommunications services via satellite. Commitments were unclear in April.
- **Auto Financing:** China made no commitments for nonbank financing of auto purchases in April, but has now agreed to permit [non-bank ~~foreign~~ *institutions* financial service suppliers] to provide auto financing upon accession. Under this agreement, foreign companies can now sell, distribute, finance, maintain and repair automobiles.

- **Securities:** Affirmed April tentative commitment that minority foreign-owned joint ventures can engage in fund management on the same terms as Chinese firms. As the scope of business expands for Chinese firms, foreign joint ventures will enjoy the same expansion in scope of business. Minority joint ventures will also be allowed to underwrite domestic securities issuance and underwrite and trade in foreign currency denominated securities (debt and equity).
- **Capital Markets Dialogue:** Treasury and the Ministry of Finance announced during the recent Joint Economic Committee meeting chaired by Sec. Summers and Minister Xiang that they would establish a bilateral capital markets dialogue focusing on capital and financial market development issues, including the roles of financial services providers. This group will discuss capital markets development, including deepening the securities markets, and the policy challenges that arise with capital markets integration. Regulatory and infrastructure issues in the banking and securities sectors, as well as approaches to product diversification and appropriate risk management procedures.

## Adjustments

- **Auto Tariffs:** In April, China had agreed to reduce its auto tariffs to 25% in 2005. China will now reduce automobile tariffs from the current 80-100% levels to 25% in 2006, but with accelerated tariff reduction to expand market access beyond the April commitments in the near term.

## REST OF DOCUMENT NEEDS REVISION

- **Auto Repair and Maintenance:** [Did we have this in April] Prior Agreement permits auto repair and maintenance.
- **Auto Parts:** China will reduce auto part tariffs in \_\_\_\_\_ steps to an average of 10% by 200\_.

## Audio Visual (needs work – Christina)

- Video and Sound Recordings – China would allow 49% foreign participation.
- Cinemas – China would allow majority ownership in 3 years for construction, renovation, ownership and operation of cinemas.
- China permitted very few foreign films on a revenue sharing basis.

**Banking (this is the same as April – gain is auto finance)**

Currently foreign banks are not permitted to do local currency business with Chinese clients (a few can engage in local currency business with their foreign clients). China imposes severe geographic restrictions on the establishment of foreign banks.

- China has committed to full market access in five years for U.S. banks.
  - Foreign banks will be able to conduct local currency business with Chinese enterprises starting 2 years after accession.
  - Foreign banks will be able to conduct local currency business with Chinese individuals from 5 years after accession.
- Foreign banks will have the same rights as Chinese banks within designated geographic areas.
- Both geographic and customer restrictions will be removed in five years.

DRAFT

Statement by the President  
U.S.-China Bilateral WTO Accession Agreement

I am very pleased that the United States and the People's Republic of China have reached a strong bilateral WTO Accession Agreement that constitutes a major step toward bringing China into the World Trade Organization.

President Jiang Zemin and Premier Zhu Rongji have shown genuine leadership in committing China to open its markets and abide by global rules of fair trade. The agreement reached today will strengthen China's economic reforms and support the rule of law, while creating unprecedented opportunities for American farmers, workers and companies to compete successfully in China's enormous market. This agreement is good for America, good for China and good for the world economy.

On the basis of this agreement, I will work hard with other countries to gain China's entry into the World Trade Organization, and I will exert maximum effort with Congress to secure permanent Normal Trade Relations for China.
