## MEMORANDUM FOR DISTRIBUTION

FROM: Shirley Sagawa  
RE: Archiving Project  
DATE: May 8, 2000

As you know, we have both a responsibility to preserve the First Lady's official records and an opportunity to make sure that history reflects her many contributions to the nation. Your work is an important part of that history, and a group of us have sketched out a plan to capture this information in a simple, time-efficient manner. It is important for people to start their archiving **now** and into the summer (when we'll have lots of interns), as opposed to next Fall when so many in the White House will be trying to do it at the last minute and interns will be scarce.

Here is what we hope to do:

1. Electronic index. We will develop a computerized index (to be available to us on the "h drive" and transferred to the archives) of the First Lady's schedule, Presidential diary, briefing books, columns, other publications, photos, and speeches (drafts, tapes, and transcripts, including WHCA) *based on the top categories* we identified (attached).
2. Common categories for filing. We are asking all First Lady staff to mark and index their files using the top categories. The simple way to do this is to use stickers that Records Management has prepared for us (attached) to add to the existing label on the files. For example, if I labeled a file "Head Start" it would get a second label for "early childhood development," as would "early brain research conference," and "correspondence – Rob Reiner." That way, no matter how we individually have labeled our files, a researcher looking into one of our top categories will be able to assemble a complete picture of HRC's work in the area. When we send our indexes of our files to Records Management (whether the actual files are still in a drawer or have already been boxed up), we will send them on disk, thereby creating a searchable index of all First Lady files that have been identified that way. If you have questions about this process, please direct them to me or Eric Woodard. *It is our hope that all staff will label and index their files by the end of June.*
3. Assembled materials on key topics. We will attempt to create "record files" on some of our top categories. The files will include a timeline of First Lady activities on the topic, copies of speeches and publications, notes based on taped interviews with key staff, and key memos or other documents that illustrate her role. We ask your cooperation in this effort.
4. Oral histories. Lissa and Missy will conduct taped interviews with all current and former staff, working off of a common set of a dozen or so questions. Notes taken during the interviews will form a guide to the oral history tapes, although we hope they will eventually be transcribed.

Thank you for your assistance with this important effort. It may take a decade for the First Lady's files to be processed by the Clinton Library and archivists. The work we undertake while we are still here will ensure that the First Lady's record is reflected accurately when we leave.

**TO:** All Interns  
**FROM:** Eric Woodard, MaryEllen McGuire  
**RE:** First Lady Archiving Project  
**DATE:** June 14, 2000

---

Since our June 13<sup>th</sup> archive meeting there have been several questions on what to do next. Below is a step by step guide on what to do, where to go and whom to ask. Keep in mind when working with staff documents to be sensitive to staff members' needs. If you walk into an office to collect documents and someone is especially busy or already overwhelmed with a number of interns, go back at another time. Never barge in without asking and always ask permission before using a staff members' documents. Also, be sure to make copies of documents for your binder; NEVER take originals.

1. **Familiarize yourself with your topic-** Go to the First Lady's website ([www.whitehouse.gov](http://www.whitehouse.gov)), paying particular attention to her "Issues" section. Ask MaryEllen (Rm101) for a copy of grid topics relevant to your subject area. Ask Eric (Rm 100) for a copy of First Lady accomplishments in your area of interest.
2. **Develop a key words list-** Develop a list of keywords/names/organizations that you should be looking for when developing your topic. Run this list by Eric or MaryEllen before you go on to step 3.
3. **Compile an event list for your topic-** Going through schedules and using your key words list, compile an events list for your topic area. Schedules can be found in the scheduling office or in the Conference Room. Create your event list file on a disk so it is always available to you. Eric has disks. If you have any questions about an event's relevance to your topic, ask Eric or MaryEllen. Also, have Eric or MaryEllen proof your comprehensive list when you are finished.
4. **Put together a topic binder-** Get a 3-inch binder from Eric and using your event list as an index, create a tab for each event in date order (past to present). All supplies should come from Eric. Each tab should have the event name (abbreviate if need be) and date.
5. **Pull briefings-** Pull briefings for each of your events and make copies for your binders. Briefings are in Room 197. Brenda is your contact person here. There is a copy machine in the room for you to use. Original briefings and briefing books may NEVER leave 197.
6. **Speeches-** Go to the press office (Rm 103) to pull and copy remarks for your events. Speeches are indexed by date in the yellow binders on the wall. Many of the First lady's speeches can also be accessed on our website or on the H drive (Eric can show you). Keep in mind that not every speech has been transcribed. If you are having trouble locating a particular speech, Jen Smith can let you know whether a transcript exists.

7. **Columns-** Go to MaryEllen (Rm 101) to pull and copy columns relevant to your topic. Columns are in date order and are cross-referenced by subject area.
8. **Press-** Go to the press office (Rm 103) to pull articles Mrs. Clinton may have written on your topic. Get these directly from Jen. Please note that not all topics will have corresponding articles.
9. **Bring your book to Eric or MaryEllen for a proof.**
10. **You're done!** Move on to the next topic.

## Office of the First Lady Big Issue Binder Project

1. Consult **Grid** for events related to your topic (see Eric – Room 100).
2. Create tentative **list** (date and event) of appropriate grid items.
3. Check the three **column** binders in Shirley's office (room 101) for columns the First Lady has written, pertaining to your topic, and photocopy them. Add these column dates with each column name to your list.
4. Get a **binder** from Room 100 and make tabs with the date of each event and column to store what you find. Also, ask Eric for solid colored (blue, green, etc) paper to separate each document under each tab in your binder:

Tab with date + schedule + colored paper + speech + colored paper + briefing + colored paper + news articles

Consult the binders in the press office (room 103) for examples in case you have questions.

5. Most **public schedules** can be found on the H Drive under First Lady's Public Schedules or in the Scheduling office. Find the schedule for each event date on your list and print to include in your binder. This will allow those consulting your binders in the future to know exactly to whom the First Lady was speaking as well as other events in her day. (If time permits, create the most comprehensive binder you can by sorting through each daily schedule of the administration to ensure you have included every meeting, event, etc. on your topic).
6. Pull corresponding **speeches** for each event on your list from the H Drive: FL Speech, the Internet, or if all else fails, the binders of speeches in rooms 103 or (last resort) room 197. Photocopy or print these speeches and place them with the corresponding tab in your binder.
7. Room 190 holds all the First Lady's **briefings** in consecutive order. The briefing she was given for your particular event may have been written on that day or a few days before. Check these binders for the briefings corresponding to the events on your list, photocopy them and put them in your binder under the appropriate tabs.
8. Lexis Nexis is a fabulous research device that allows you to track down every article from everywhere. According to what key words you type, you can find **articles** generally related to your topic or specifically related to the event on your list. Track down as best as you are able the specific article and include each under the appropriate tab.
9. **Congratulations!** You have completed an amazingly important project that will be so helpful for the First Lady, her staff and those interested in her life and work in years to come.

MEMORANDUM FOR WHITE HOUSE SENIOR STAFF

FROM: KATHRYN L. SHAW *KLS*

SUBJECT: Employment and Unemployment in September, Labor  
Department Release, Friday, 8:30 a.m.

The unemployment rate fell 0.2 percentage point to 3.9 percent in September, below market expectations. The unemployment rate has fallen 0.3 percentage point over the past year with all the decline accounted for either by young people or adults whose highest level of education was high school or less. Over the past 12 months, the unemployment rate for blacks fell 1.3 percentage points to 7.0 percent (the lowest on record), while the white unemployment rate edged down 0.1 percentage point to 3.5 percent.

Payroll employment rose 252,000, slightly above market expectations. Adjusting for special factors (a net return of 75,000 strikers and the completion of 27,000 temporary Census jobs), payroll employment increased 204,000. Nonfarm employment has increased 22.3 million since January 1993, with 92 percent of this growth in the private sector.

- September job growth was strong in services (200,000) and construction (30,000). However, employment fell 66,000 in manufacturing, where the losses were widespread.

Average hourly earnings of production workers rose 0.2 percent in September. This wage measure has increased 3.6 percent over the past 12 months—about the same as the year-earlier pace.

Production-worker hours rose 0.3 percent at an annual rate in the third quarter. These hours can be expected to support 2-to-3½ percent growth of real GDP.

## THE EMPLOYMENT SITUATION: SEPTEMBER 2000

Total nonfarm employment rose by 252,000 in September, and the unemployment rate declined to 3.9 percent, the Bureau of Labor Statistics of the U.S. Department of Labor reported today. After adjusting for the net return of striking workers (75,000) and a further decline in the number of temporary census jobs (27,000), nonfarm employment was up by 204,000. Job gains were very strong in the services industry, but the overall employment change was tempered by widespread job losses in manufacturing.

Chart 1. Unemployment rate, seasonally adjusted, October 1997 - September 2000

Chart 2. Nonfarm payroll employment, seasonally adjusted, October 1997 - September 2000

### Unemployment (Household Survey Data)

Both the number of unemployed persons, 5.5 million, and the unemployment rate, 3.9 percent, declined in September. Over the past year, the rate has ranged from 3.9 percent to 4.1 percent. Over the month, the unemployment rates decreased for adult women (3.5 percent) and blacks (7.0 percent). Rates for the other major worker groups—adult men (3.2 percent), teenagers (12.8 percent), whites (3.5 percent), and Hispanics (5.6 percent)—showed little or no change. (See tables A-1 and A-2.)

### Total Employment and the Labor Force (Household Survey Data)

Total employment was little changed at 135.2 million, seasonally adjusted, in September. The employment-population ratio—the proportion of the population age 16 and older with jobs—was 64.3 percent, unchanged from August. The civilian labor force, 140.6 million, and the labor force participation rate, 66.9 percent, were both essentially unchanged in September. (See table A-1.)

<sup>1</sup> Includes other industries, not shown separately.<sup>2</sup> Data relate to private production or nonsupervisory workers.

p=preliminary.

The number of persons employed part time for economic reasons (those who would have preferred full-time work) was 3.2 million in September. The number of these involuntary part-time workers has ranged from 3.1 to 3.3 million since July 1999. (See table A-4.)

About 7.5 million persons (not seasonally adjusted) held more than one job in September. These multiple jobholders represented 5.5 percent of total employment, compared with 5.7 percent a year earlier. (See table A-10.)

#### Persons Not in the Labor Force (Household Survey Data)

About 1.2 million persons (not seasonally adjusted) were marginally attached to the labor force in September, about the same number as a year earlier. These people wanted and were available to work and had looked for a job sometime in the prior 12 months. They were not counted as unemployed, however, because they had not actively searched for work in the 4 weeks preceding the survey. The number of discouraged workers was 250,000 in September. Discouraged workers, a subset of the marginally attached, were not currently looking for work specifically because they believed no jobs were available for them. (See table A-10.)

#### Industry Payroll Employment (Establishment Survey Data)

Total nonfarm payroll employment rose by 252,000 to 131.8 million in September. Contributing to this increase was the net return of 75,000 striking workers to their jobs. At the same time, the number also reflects the conclusion of 27,000 temporary census jobs. After adjusting for both effects, payroll employment increased by 204,000 in September. (The strike adjustment primarily reflects the return of 87,000 communications workers who were off company payrolls in August, which was partly offset by new strikes involving 12,000 workers.) So far this year, employment has increased by an average of 192,000 per month compared to 229,000 per month for all of 1999. (See table B-1.)

Employment in the services industry rose by 200,000 in September, seasonally adjusted. Month-to-month growth in services employment has varied widely this year, although the average monthly change (119,000) is close to the monthly average for all of 1999. Employment in help supply services increased by 69,000 in September, after showing little net growth in the prior 3 months. Over the month, job gains continued in health services and in engineering and management services. In September, as in August, there were large employment increases in job training services (within social services) and civic and social organizations (within membership organizations) after seasonal adjustment; these increases resulted from lighter-than-normal seasonal layoffs that followed weak summer hiring.

Construction employment rose by 30,000 in September, seasonally adjusted, following 3 months of very small gains. Seasonal declines in construction usually begin in September. This year those seasonal layoffs were smaller than normal, perhaps reflecting the relatively light hiring over the summer. Thus far this year, construction employment has increased by 17,000 per month on average, compared with 25,000 per month for all of 1999.

Employment in transportation and public utilities rose by 105,000 in September, largely reflecting the return of 87,000 telephone communications workers from a strike that kept them off payrolls during the August reference period. Apart from the strike effect, employment in the communications industry increased by 7,000, and the transportation industry continued to grow.

Finance, insurance, and real estate employment rose by 16,000 in September, following a similar gain in August. In the first 7 months of the year, however, the industry had averaged monthly job losses of

4,000. In September, security brokerages added 6,000 jobs, continuing a strong growth trend. Employment also increased in mortgage brokerages and in real estate.

Employment in manufacturing fell by 66,000 in September, following an even larger decline of 117,000 in August, as revised. Part of September's decline resulted from 10,000 workers being off payrolls due to strikes in transportation equipment and food and kindred products during the survey reference period. September's losses were widespread, with employment down in both durable and nondurable goods manufacturing. Employment fell in industrial machinery and equipment (9,000), apparel (9,000), rubber and miscellaneous plastics (8,000), and fabricated metal products (6,000). The only manufacturing industry to show consistent growth this year has been electronic components, which added 4,000 jobs in September and has added 46,000 jobs since April 1999.

Retail trade employment was essentially unchanged in September, as gains in most component industries were offset by losses in eating and drinking places and in building materials stores. The number of jobs in eating and drinking establishments declined for the second consecutive month, following strong gains in June and July. Wholesale trade showed little change in September.

Federal government employment fell in September, as 27,000 temporary Census 2000 workers completed their assignments. As of September, only about 6,000 temporary census workers remained on the federal government payroll, down from a peak of 618,000 in May.

#### Weekly Hours (Establishment Survey Data)

The average workweek for production or nonsupervisory workers on private nonfarm payrolls was up by 0.1 hour in September to 34.4 hours, seasonally adjusted. The manufacturing workweek edged down by 0.1 hour to 41.2 hours, following a drop of 0.4 hour in August. In September, manufacturing overtime declined by 0.1 hour for the second consecutive month to 4.4 hours. (See table B-2.)

The index of aggregate weekly hours of production or nonsupervisory workers on private nonfarm payrolls increased by 0.3 percent to 151.4 (1982=100), seasonally adjusted. The manufacturing index fell by 0.7 percent to 104.6. (See table B-5.)

#### Hourly and Weekly Earnings (Establishment Survey Data)

Average hourly earnings of production or nonsupervisory workers on private nonfarm payrolls increased by 3 cents in September to \$13.83, seasonally adjusted. Over the month, average weekly earnings increased by 0.5 percent to \$475.75. Over the year, average hourly earnings rose by 3.6 percent and average weekly earnings grew by 3.3 percent. Twelve-month growth rates in hourly earnings have been in the range of 3.5 to 3.8 percent since February 1999. (See table B-3.)

---

The Employment Situation for October 2000 is scheduled to be released on Friday, November 3, at 8:30 A.M. (EST).

### **Expansion of the Current Population Survey (Household Survey) Sample**

The Census Bureau is expanding the monthly sample for the Current Population Survey (CPS) in response to a legislative mandate under the State Children's Health Insurance Program (SCHIP). This expansion, which will occur in 31 states and the District of Columbia, will increase the total number of households eligible for the monthly survey from about 50,000 to about 60,000. The additional households are being introduced into the survey over a 3-month period beginning with September 2000.

The SCHIP legislation requires that the Census Bureau improve state estimates of the number of children who live in low-income families and lack health insurance. The expansion of the monthly CPS sample is one part of the Census Bureau's plan for improving the SCHIP estimates. Other parts of the plan include an increase in the number of households that will be asked the questions from the annual March supplement to the CPS, the source of information on income and access to health insurance.

The Bureau of Labor Statistics (BLS) does not plan to use the expanded sample for the official national labor force estimates until at least July 2001, after the data collected from the new households have been evaluated. BLS will review estimates for November 2000 through April 2001 produced from the expanded sample. If persistent differences are observed between the estimates derived from the current and expanded samples during this period of review, the use of the expanded sample in the official estimates may be further delayed. The announcement of the final decision on whether the expanded sample will be used in the official data for July 2001 (scheduled for release in August) will be made in early June.

| Unemployment rate .....                                | 6.4                     | 5.9       | 5.5        | 6.6                              | 5.8      | 5.6       | 5.6       | 5.7       | 5.6        |

<sup>1</sup> The population figures are not adjusted for seasonal variation; therefore, identical numbers appear in the unadjusted and seasonally adjusted columns.

NOTE: Detail for the above race and Hispanic-origin groups will not sum to totals

because data for the "other races" group are not presented and Hispanics are included in both the white and black population groups. Beginning in January 2000, data reflect revised population controls used in the household survey.

Table A-3. Employment status of the civilian population 25 years and over by educational attainment, seasonally adjusted

<sup>1</sup> The population figures are not adjusted for seasonal variation, therefore, identical numbers appear in the unadjusted and seasonally adjusted columns.

<sup>2</sup> Includes high school diploma or equivalent.

<sup>3</sup> Includes the categories, some college, no degree; and associate degree.

NOTE: Beginning in January 2000, data reflect revised population controls used in the household survey.

NOTE: Persons at work excludes employed persons who were absent from their jobs during the entire reference week for reasons such as vacation, illness, or industrial dispute. Part time for noneconomic reasons excludes persons who usually work full time

but worked only 1 to 34 hours during the reference week for reasons such as holidays, illness, and bad weather. Beginning in January 2000, data reflect revised population controls used in the household survey.

<sup>1</sup> Unemployment as a percent of the civilian labor force.<sup>2</sup> Seasonally adjusted unemployment data for service occupations are not available because the seasonal component, which is small relative to the trend-cycle and irregular

components, cannot be separated with sufficient precision.

NOTE: Beginning in January 2000, data reflect revised population controls used in the household survey.

NOTE: Beginning in January 2000, data reflect revised population controls used in the household survey.

Table A-8. Range of alternative measures of labor underutilization

(Percent)

| Measure                                                                                                                                                                                             | Not seasonally adjusted |           |            | Seasonally adjusted |                  |                  |                  |                  |                  |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-----------|------------|---------------------|------------------|------------------|------------------|------------------|------------------|
|                                                                                                                                                                                                     | Sept. 1999              | Aug. 2000 | Sept. 2000 | Sept. 1999          | May 2000         | June 2000        | July 2000        | Aug. 2000        | Sept. 2000       |
| U-1 Persons unemployed 15 weeks or longer, as a percent of the civilian labor force .....                                                                                                           | 1.0                     | .9        | .9         | 1.0                 | 1.0              | .9               | .9               | 1.0              | .9               |
| U-2 Job losers and persons who completed temporary jobs, as a percent of the civilian labor force .....                                                                                             | 1.7                     | 1.8       | 1.6        | 1.8                 | 1.8              | 1.7              | 1.7              | 1.9              | 1.8              |
| U-3 Total unemployed, as a percent of the civilian labor force (official unemployment rate) .....                                                                                                   | 4.1                     | 4.1       | 3.8        | 4.2                 | 4.1              | 4.0              | 4.0              | 4.1              | 3.9              |
| U-4 Total unemployed plus discouraged workers, as a percent of the civilian labor force plus discouraged workers .....                                                                              | 4.3                     | 4.3       | 4.0        | ( <sup>1</sup> )    | ( <sup>1</sup> ) | ( <sup>1</sup> ) | ( <sup>1</sup> ) | ( <sup>1</sup> ) | ( <sup>1</sup> ) |
| U-5 Total unemployed, plus discouraged workers, plus all other marginally attached workers, as a percent of the civilian labor force plus all marginally attached workers .....                     | 4.9                     | 4.9       | 4.6        | ( <sup>1</sup> )    | ( <sup>1</sup> ) | ( <sup>1</sup> ) | ( <sup>1</sup> ) | ( <sup>1</sup> ) | ( <sup>1</sup> ) |
| U-6 Total unemployed, plus all marginally attached workers, plus total employed part time for economic reasons, as a percent of the civilian labor force plus all marginally attached workers ..... | 7.0                     | 7.0       | 6.6        | ( <sup>1</sup> )    | ( <sup>1</sup> ) | ( <sup>1</sup> ) | ( <sup>1</sup> ) | ( <sup>1</sup> ) | ( <sup>1</sup> ) |

<sup>1</sup> Not available.

NOTE: This range of alternative measures of labor underutilization replaces the U1-U7 range published in table A-7 of this release prior to 1994. Marginally attached workers are persons who currently are neither working nor looking for work but indicate that they want and are available for a job and have looked for work sometime in the recent past. Discouraged workers, a subset of the marginally attached, have given a job-market related reason for not currently

looking for a job. Persons employed part time for economic reasons are those who want and are available for full-time work but have had to settle for a part-time schedule. For further information, see "BLS introduces new range of alternative unemployment measures," in the October 1995 issue of the *Monthly Labor Review*. Beginning in January 2000, data reflect revised population controls used in the household survey.

Table A-9. Unemployed persons by sex and age, seasonally adjusted

| Age and sex                    | Number of unemployed persons (in thousands) |           |            | Unemployment rates <sup>1</sup> |          |           |           |           |            |
|--------------------------------|---------------------------------------------|-----------|------------|---------------------------------|----------|-----------|-----------|-----------|------------|

<sup>1</sup> Data relate to production workers in mining and manufacturing; construction workers in construction; and nonsupervisory workers in transportation and public utilities; wholesale and retail trade; finance, insurance, and real estate; and services. These groups account for approximately four-fifths of the total employees on private nonfarm payrolls.

<sup>2</sup> These series are not published seasonally adjusted because the seasonal component, which is small relative to the trend-cycle and irregular components, cannot be separated with sufficient precision.

P = preliminary.

Table B-3. Average hourly and weekly earnings of production or nonsupervisory workers<sup>1</sup> on private nonfarm payrolls by industry

<sup>1</sup> See footnote 1, table B-2.<sup>2</sup> The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) is used to deflate this series. The data in this series have been revised from January 2000 through August 2000 due to corrections in the CPI-W.<sup>3</sup> Change was .5 percent from July 2000 to August 2000, the latest month available.<sup>4</sup> Derived by assuming that overtime hours are paid at the rate of time and one-half.

N.A. = not available.

P = preliminary.

<sup>1</sup> Based on seasonally adjusted data for 1-, 3-, and 6-month spans and unadjusted data for the 12-month span. Data are centered within the span.

P = preliminary.

NOTE: Figures are the percent of industries with employment increasing plus one-half of the industries with unchanged employment, where 50 percent indicates an equal balance between industries with increasing and decreasing employment.
