scheduling
conflicts*

Dear Katie:

I am very grateful that you are considering speaking to the Alliance of Textile Care Associations ("ATCA") at the Clean 93 show in Chicago on Tuesday, April 20, 1993. Per your request, I provide the following details.

The ATCA is composed of the following trade associations: the International Fabricare Institute, the International Institute of Launderers, the Textile Rental Services Association, the Coin Laundry Association, the National Association of Institutional Laundry Managers and the Textile Care Allied Trade Association. ATCA now represents approximately 25,000 facilities. It sponsors the Clean exhibit/convention every two years.

The Clean 93 show is scheduled for April 19-22, 1993. The environmental program will be on Tuesday, April 20. Your presentation could begin at 9:00 a.m. or any other time convenient to your schedule. While the morning program is scheduled to run until 11:30, you could speak for as long or short a time as your schedule permits.

We anticipate an audience of between 1,500 and 3,000, nearly all of whom will be owners and operators of dry cleaning and laundry businesses. We would be happy to provide any additional

PATTON, BOGGS & BLOW

PHOTOCOPY
PRESERVATION

Ms. Kathleen A. McGinty

information on the dry cleaning and laundry industry. In addition to the convention audience, your presentation will be disseminated by ATCA's six associations and by independent industry trade press to over 50,000 ATCA members and other interested parties throughout the United States and North America.

We know you are aware of this industry's keen interest in environmental matters. The perchloroethylene dry cleaning industry's national emissions standard for hazardous air pollutants is the first NESHAP proposed under the new Clean Air Act air toxics program. The industry is also regulated under CERCLA, RCRA and is affected by the Clean Water Act and the Safe Drinking Water Act. There would be enormous interest in hearing your thoughts about the Clinton Administration's approaches to environmental legislation and regulation.

If you require any additional information, please do not hesitate to contact me. While we very much hope to have you speak, if your schedule will not permit it I hope you will let me know as soon as possible so that we can regretfully look for another speaker.

Thanks again for considering this matter.

Sincerely,

Michael J. Schaengold

Earth Day*

Dear Katy:

Although we have communicated indirectly, I haven't personally congratulated you on your appointment. Therefore, congratulations Katy. I know you will do an outstanding job. I must say that I was very excited when I heard the news of your appointment. It has caused me to reflect fondly on our collaboration during the Clean Air Act debates.

I am writing to request a favor for an organization that you know well, the Chemical Manufacturers Association. We would be honored to have you as a luncheon speaker at our Spring Environmental Update. The meeting is scheduled for April 20 and 21 at the Stouffer Nashville Hotel, Nashville, TN. This meeting is attended by approximately 200 Environmental Managers of CMA member companies. We would be pleased to have you join us on either day.

I know your schedule must be very busy, but I hope that you will be able to accept this invitation. If you need additional information, please contact me at 716-781-7600. My FAX number is 716-724-3245. I look forward to hearing from you.

Sincerely,

David M. Kiser/kl

April 12, 1993

Ms. Kathlene McGinty
Deputy Assistant to the President, and
Director, White House Office on Environmental Policy
Rm. 358
Old Executive Office Building
Washington, D.C. 20501

Dear Ms. McGinty:

As you know, several acts of Congress are up for reauthorization this year including the Magnuson Act, Endangered Species Act, (ISA) and the Marine Mammal Protection Act (MMPA). All of these Acts have significant impacts on the cultural survival of thousands of Alaska Natives (Eskimo, Indian, and Aleut) who depend on subsistence for their sustenance.

In addition to these Acts, Alaska Natives are dependent on Title VIII of the Alaska National Interests Lands Conservation Act, (ANILCA), which provides a subsistence priority as a means to insure the cultural and nutritional survival of Native people.

While Congress intended for ANILCA and the Native exemption of the MMPA to protect Alaska Natives and the environment they reside in, this is proving to be questionable. Groups are seeking to deprive Native people traditional uses of marine mammals, and the State of Alaska no longer implements a rural subsistence priority on State land as a result of a state court ruling which ruled a rural priority unconstitutional. As it is, Alaska currently has two resource managers, the federal government on public lands (two-thirds of the State) and state management of state and private lands. This is causing great confusion and in many cases places the well being of our resources and environment at risk, as agencies argue over jurisdiction.

In the meantime our Native people feel their culture and survival in villages is jeopardized. Next week, the week of April 19, over a dozen Alaska Natives will travel to Washington to confront Congress, and administrative departments with these issues. Alaska Natives are determined to protect their interests and the environment which they are an intricate part of.

REPORT

Ms. Katie McGinty
Special Assistant to the President
for the Environment
358 Old Executive Office Building
Washington, DC 20501

Dear Ms. McGinty:

Recently, our Senior Vice-President and Director of Research, Van Doorn Ooms, discussed with Dana Marshall of the Vice-President's staff the possibility of arranging a meeting with the Vice-President and CED representatives to discuss CED's newest policy statement on energy and the environment. Dana suggested that we should contact you.

CED's statement, What Price Clean Air? is the product of nearly two years of analysis on the most cost-effective means of securing cleaner air. The subcommittee which prepared the statement included senior officials from major oils (Exxon, Shell, Mobil, Texaco, Phillips, Ashland); utilities (Con Ed and Carolina Power & Light); the autos (GM and Ford); manufacturing (Cooper, Air Products, Potlatch); and environmental groups including the World Wildlife/Conservation Foundation; the Environmental Defense fund; Resources for the Future; and the Natural Resources Defense Council.

The essential message of the statement is that market oriented approaches, such as a carbon tax, is a more cost effective method of dealing with the needs of clean air/global warming than command and control.

We expect to release this statement at the National Press Club on Tuesday, April 20th, preceded by a breakfast on the Hill for representatives from the Administration, Members of Congress, and Congressional staff to be followed by a luncheon at the Press Club.

① to Regret
② get report!

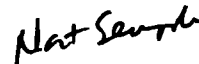

There are a couple of items we would hope that you might consider. The first is whether or not, once you review the material, you could join us at lunch on the 20th and to provide us with a briefing on Administration policy regarding Energy and Environmental issues. The lunch is scheduled to begin at 12:00 noon in the First Amendment Room and will include a couple hundred key players in the energy and environmental fields.

The second is whether or not it might be possible to schedule a session with the Vice President and representatives of CED. Included from CED would be Tom Vanderslice of M/A-Com Inc. who chaired the study; Josh Weston, Chairman and CEO of ADP Inc. and Chairman of CED's Research & Policy Committee; Sol Hurwitz, CED's President; Bill Beeman, CED's Vice-President and Director of Macroeconomic Studies and Project Director; and Van Doorn Ooms, CED's Senior Vice-President and Director of Research. In their previous lives, Van served as Director of Research on the House Budget Committee, and Bill served as Deputy Director of CBO.

Enclosed is an executive summary of the statement.

Thank you for your attention to this matter.

Sincerely,

Nathaniel M. Semple

April 16, 1993

via facsimile 202/456-2710

Mr. Christian Marsh
Staff Assistant
White House Office
on Environmental Policy
Old Executive Building, Room 358
Washington, DC 20501

Dear Mr. Marsh:

The Chairman of our NEPA Working Group, Randall Schroeder, will be in Washington, D.C. on Tuesday, April 20 and would like to meet with Kathleen McGinty. Mr. Schroeder will be available to meet with Ms. McGinty any time during that day. He anticipates that the issues to be discussed will take about one hour. Mr. Schroeder of Greystone Environmental Consultants, Englewood, Colorado, represents those members of our Association working under the regulations of the National Environmental Policy Act (NEPA).

I have enclosed a copy of correspondence sent to Ms. McGinty in February. NAEP is very interested in working with the White House Office on Environmental Policy and we are looking forward to this meeting.

We tried for a similar meeting on March 23 but were unsuccessful due to Ms. McGinty's schedule. We hope this date will be accessible. Please let me know the time Ms. McGinty will be available to meet with Mr. Schroeder and our Executive Director, Susan Eisenberg, on April 20. I look forward to your reply.

Best regards,

Michael David Lamp

Dear Ms. McGinty:

On behalf of the 3,200 environmental professionals who make up the National Association of Environmental Professionals (NAEP), let me tell you how pleased I am to know that you will be leading a trailblazing new agency. We at NAEP wish you and the White House Office on Environmental Policy (OEP) every success and are eager to work with you to translate OEP's goals into reality.

I am certain that OEP, with its own mission of setting policy consonant both with economic growth and environmental factors, will find much of interest in our organization. For example, the NAEP Industry Working Group has been described by one active member as a "forum for reconciling Federal and state regulatory initiatives, industry's interests and concerns, and environmentalists' interests and concerns, while accounting for the general public's interests." In a similar vein, the NAEP Utility Working Group is addressing nationwide issues at the forefront of energy, economic and environmental concerns. I would welcome a chance to share with you the insights and recommendations which have developed through the thoughtful interchange that characterizes these groups.

As an organization, The National Association of Environmental Professionals was first accorded federal recognition in 1978, when ours was the only professional society invited by the Council for Environmental Quality (CEQ) to testify formally at hearings on proposed revisions governing the procedural provisions of the National Environmental Policy Act (NEPA). Our Association has continued to work closely with CEQ over the years, creating a NEPA Working Group whose role is to encourage and facilitate the Act's implementation in accordance with its Congressional mandate.

NAEP

Ms. Kathleen McGinty
February 18, 1993
Page Two

In July, 1992, we signed an agreement with CEQ under which NAEP provided assistance in the development and administration of CEQ's new Federal Environmental Quality Awards, which recognize excellence in federal agency decisionmaking pursuant to NEPA. These awards were presented to the Tennessee Valley Authority and the United States Air Force on January 6 of this year. Our president, Kevin Burger, was one of four environmental experts judging the nominations.

NAEP today brings together seasoned professionals engaged in every aspect of the field. This is a far cry from the situation prevailing in 1969 when NEPA initiated its "systematic, interdisciplinary approach," awakening even the most optimistic environmentalists to a serious lack of expertise in a field younger than space travel. As those in related fields scrambled to learn enough to fill the demand for project managers, it became clear that there was a need for a properly qualified peer group, and that this called for the codification of standards, both professional and ethical.

Historically, the National Association of Environmental Professionals came into being in 1975 as an interdisciplinary, non-partisan organization. The same year, it issued its "Code of Ethics and Standards of Practice for Environmental Professionals" to which all its members pledge adherence. A New Jersey case (*Bowman v. Mobil Oil*) recently set important precedent for our field, which now employs over one million people, in finding the NAEP Code of Ethics to be New Jersey public policy.

NAEP also took the lead in formulating the new field's first professional certification program. Our requirements for status as a Certified Environmental Professional have been almost constantly refined and updated over the years as regulations were promulgated and NAEP's membership grew to encompass a myriad of disciplines. NAEP certification is now widely recognized as the equivalent to registration as an environmental engineer, or to certification in other disciplines by other respected professional organizations.

Both certification and ethical conduct are at the forefront of two of our organization's newly-launched nationwide efforts. NAEP is continuing to exercise its leadership role in piloting a joint effort among all environmental groups to formulate a single nationally recognized certification credential for environmental professionals. At the same time, we are preparing to work closely with local legislators to ensure the adoption, as public policy, of a standardized ethical code of conduct in each state.

Ms. Kathleen McGinty
February 18, 1993
Page Three

Outreach continues to be a priority, with emphasis on career development and the integrity and advancement of the environmental profession. NAEP publishes a bi-monthly newsletter and a journal, *The Environmental Professional*, which acts as a forum for open interchange on news and issues of environmental importance. The Association also holds educational and professional seminars throughout the year, hosts an absorbing Annual Conference which draws attendees representing a cross-section of the field, and maintains links with its environmental counterparts throughout the world.

I enclose material which deals in greater depth with some of the objectives and projects I have outlined. And, again, please accept my warmest wishes for success in your new post. I look forward to meeting you, and we would welcome an opportunity to provide any assistance that would help your office in its mission.

Sincerely,

Susan Eisenberg
Executive Director

OFFICE OF
THE ADMINISTRATOR

TO: Kathy Zoi
Chief of Staff, Office on Environmental Policy

FROM: Allison Rainey *AR*
Special Assistant to the Administrator

RE: Request for Courtesy Visit with the Vice President

DATE: April 20, 1993

As you know, Roz Kelly, Minister of Environment, Sports and Territories for Australia, is in Washington to meet with senior government officials. She is scheduled to meet with Katie McGinty today, and also with Secretary Babbitt, Tim Wirth and Carol Browner. She also will be attending the President's Earth Day announcement with the Administrator.

The Administrator asked me to follow up on the Minister's request for a courtesy visit with the Vice President. I understand he is in Poland today, but will be back in Washington tomorrow. Minister Kelly will be in town until Friday morning.

Please let me know if a brief courtesy visit is possible. My number is 260-7960.

Thanks.

Katie -
We'd like to
regret this
unless you
disagree -

RE: Invitation to speak at the ASDWA Annual Conference, April 20, in Nashville, Tennessee.

Dear Ms. McGinty:

On behalf of the Association of State Drinking Water Administrators (ASDWA), I am pleased to extend to you our invitation to be the Keynote Speaker at the ASDWA Annual Conference. ASDWA has chosen you because the Safe Drinking Water Act (SDWA) is due for reauthorization this year, and now is a propitious time for ASDWA's members to meet with a high-ranking member of President Clinton's environmental staff.

I understand that at this early point in the Clinton Administration, you probably do not wish to be overly specific about your views on the drinking water program. Still, ASDWA's Annual Conference would be a unique opportunity to familiarize yourself firsthand with the difficulties states face in implementing the SDWA. At another level, you would be able to introduce yourself to ASDWA's members in an informal, small group setting and outline your own goals at the White House.

ASDWA is looking forward to a productive relationship as we work to resolve the statutory difficulties that are hindering the implementation of the SDWA. As an introduction to these difficulties, you should know that the SDWA's numerous Federal regulations represent a tremendous administrative and budgetary burden to the states that must enforce them. While ASDWA has always maintained the strongest support for the SDWA as an essential element of our country's public health protection program, the Act's current approaches are overly complex and unjustifiably costly. The result is that state programs expend more effort to meet the program's administrative demands than conducting those activities needed to ensure the quality of the drinking water.

This year, states are expected to spend over \$222 million nationwide on drinking water protection, of which 70 percent comes from state revenues and only 30 percent from Federal grants. Even at these levels, funding for the drinking water program still falls far below what is necessary to meet the tremendous implementation demands of each Federal drinking water

rule. Indeed, the disparity between resources and statutory mandates has led to a crisis in the state implementation program. So far this year, EPA has sought to formally withdraw SDWA enforcement authority from one state, and threatened similar action against three others. The situation is so severe that ASDWA and a coalition of environmental and water industry groups recently sent President Clinton a joint letter (copy enclosed) asking for greater Federal funding of the drinking water program.

The Clinton Administration, Congress, and the states must work together during reauthorization of the SDWA to eliminate the unproductive burdens of the statute. To accomplish this goal, the Association expects to serve as the focal point for much of the consensus-building necessary to integrate the concerns of Congress, environmentalists, and water suppliers, as well as those of the Association's members. As you take on your office's considerable tasks, I hope that you will rely on ASDWA as a voice of reason in the complex debates over national drinking water issues. I would be pleased to meet with you at any time to discuss these issues.

♦ ♦ ♦

Your talk is scheduled for the Plenary Session on Tuesday, April 20, 1993, from 10:00 AM to 10:40 AM, at the Loews Vanderbilt Plaza Hotel in Nashville, Tennessee. The Plenary Session will be held in a large conference hall, with an audience of about 150 people comprising state drinking water directors, water industry representatives, environmentalists, and Congressional staff. This year's Annual Conference will be devoted to ASDWA's primary concerns: reauthorization of the SDWA, balancing risk and environmental costs, and successful implementation of the SDWA.

ASDWA represents the interests of all 56 state and territorial drinking water programs, which together regulate approximately 204,000 public water systems serving 219 million people. ASDWA's primary mission is the protection of public health through the effective management of state drinking water programs that implement the provisions of the SDWA and its 1986 Amendments. To further familiarize you with ASDWA, I have enclosed a brochure describing the Association's membership, mission, and activities. I have also included recent issues of our newsletter, the *ASDWA Update*, which has wide circulation throughout the drinking water community.

Please contact me at 703-524-2428 if you have any questions. I hope that you will be able to speak at our conference, and your earliest response would be greatly appreciated.

Sincerely,

Vanessa M. Leiby

Ms. Kathleen McGinty
Special Assistant to the President for the Environment
Old Executive Office Building
Washington, D.C. 20501

Dear Ms. McGinty,

The Directors of the World Environment Center are pleased to invite you to attend, as their guest, the Ninth Annual presentation of the WEC Gold Medal for International Corporate Environmental Achievement.

Mr. Paul A. Allaire, Chairman and Chief Executive Officer, will receive the award on behalf of Xerox Corporation at a black-tie dinner in Washington, D.C., on Friday, April 30th. Mr. Edwin L. Artzt, Chairman and Chief Executive, The Procter & Gamble Company, will chair the event. Dancing will follow.

The WEC Gold Medal was established in 1985 to recognize industrial environmental leadership when clearly evidenced by an outstanding, sustained and well-implemented environmental policy with worldwide emphasis. An independent, international jury cited Xerox Corporation for its "Design for the Environment" and its ambitious energy and resource conservation programs.

Over 500 dignitaries from industry, governments, international and national agencies, the diplomatic corps, environmental organizations and the news media will attend. We hope that you will be able to join us for this important opportunity to recognize and applaud not only Xerox Corporation, but all those in industry who set an environmental management example for others to follow.

An admission ticket for two is reserved in your name. Please RSVP to Mr. James G. Veras, Executive Vice President, by April 20, 1993.

My colleagues and I look forward to seeing you on April 30th.

Sincerely,

Betsy Ancker-Johnson

1993 WEC GOLD MEDAL

FOR

INTERNATIONAL CORPORATE

ENVIRONMENTAL ACHIEVEMENT

CITATION

The 1993 WEC Gold Medal for International Corporate Environmental Achievement is awarded to Xerox Corporation for its proactive environmental policy progressively strengthened since the 1960's. That policy goes beyond the baseline of compliance and includes ongoing and measurable waste reduction goals. "Design for the Environment," which addresses environmental concerns throughout product life cycles, an ambitious energy and resource conservation program and a policy that encourages both in-house and customer recycling of copier cartridges and paper, are all part of Xerox Corporation's proactive management practices at locations worldwide. Early on, and made possible by technological advances, Xerox Corporation banned all PCB and asbestos-containing components.

The Environmental Health and Safety Department was formed in 1980 to advance environmental programs. Included are annual environmental audits of all manufacturing facilities worldwide to identify hazards and insure compliance with the highest environmental standards established by the corporation. Site Waste Reduction and Recycling programs complement Xerox Corporation's "close the loop" materials purchasing practices. In 1985, Xerox Corporation initiated a voluntary clean-up of groundwater contamination on properties worldwide.

Xerox Corporation plays a leading role in new technology application through innovations such as the elimination of ozone-depleting chlorofluorocarbons in packaging and service materials, the replacement of most solvents with aqueous cleaners and dry-ice-based cleaning. Reusable part-shipping containers and the refurbishing and remanufacturing of returned parts are worldwide practices. Xerox Corporation was the first to introduce two-sided copiers and laser printers.

Xerox Corporation's "Environmental Leadership Program" addresses all aspects of company operations with increased focus on environmental product design and resource conservation. "Cradle-to-grave" life-cycle design requirements have been adopted to minimize environmental impact and provide savings through parts recovery, remanufacturing and recycling.

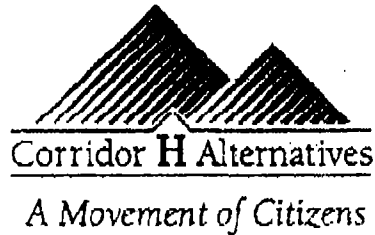

-more-

Environmental education and training are key to achieving company policy objectives. Environmental information reaches shareholders, employees, customers and the community at large. Xerox Corporation's Social Service Leave and Community Involvement Programs encourage employees to work on community projects, including environmental protection. "Business Guide to Waste Reduction and Recycling", a comprehensive "how-to" manual on implementing waste reduction, was originally intended for in-house use and is now widely distributed.

In its commitment to continuous improvement for a better environment Xerox Corporation has adopted the belief that "environmental health and safety concerns take priority over economic considerations" and that environmental responsibility is "a race without a finish line." In the words of the Chairman and Chief Executive Officer, Mr. Paul A. Allaire, such an approach ". . . makes good business sense for Xerox Corporation."

Corridor H Alternatives
A Movement of Citizens

April 22, 1993

Mrs. Katy McCinity
White House Office of Environmental Policy
358 Old Executive Office Bldg.
Washington, D.C. 20501
Attn: Christian Marsh, Scheduling

Dear Ms. McCinity,

Our group, Corridor H Alternatives, requests a meeting with you at your office in Washington on April 29. We represent over 3000 West Virginian's and Virginian's opposed to the proposed Federal billion dollar 4-lane Corridor H from Elkins, WV to Interstate 81 in Virginia. Attached is our fact sheet; additional information was faxed to you March 11.

We hope the Northwest Logging Summit went well for your office. Perhaps such an approach of bringing different sides together can be used with the economic and environmental dilemmas of Corridor H as well. We look forward to meeting with you. You may call us at any of the numbers below.

Sincerely,

Tony Coogan
Secretary

Proposed Corridor H: History and Issues

What is proposed Corridor H?

Corridor H is a proposed highway connecting Elkins, WV with Interstate 81. The highway could be 120 miles. Proposed Corridor H has been on the drawing board since 1965 as part of the Appalachian Rural Development Act. In 1981 the first impact studies were presented. Three years later the proposal fell through because of a lack of funding. In 1990 the highway proposal was revived. Five primary roadways, or "schemes," were proposed—three connecting Elkins, WV to I-81 just west of Strasburg, VA and two following a northern route from Elkins, WV to Winchester, VA. Most recently, the Virginia Department of Transportation has suggested two alternates to the West Virginia proposal. Each proposed alternative would generally follow the route favored by West Virginia and branch at Wheatfield. One would follow a path north of Route 33 and the communities of Lebanon Church and Clary. The other would follow a path south of Route 55 and both communities. Both routes would connect to I-81 close to the existing Route 55 interchange. Under this plan the section of I-81 from the new interchange north to I-66 would be enlarged to 8 lanes. In West Virginia the State Division of Highways has announced plans to bid out construction all along the proposed Corridor H route with construction beginning in 1995. The United States Congress has authorized, but has not yet appropriated, the estimated \$1 billion price tag for proposed Corridor H.

What is the cost of proposed Corridor H?

Proposed Corridor H is expected to cost close to \$1 billion. West Virginia and Virginia must each pay 20% of the cost. West Virginia will have to spend close to \$200 million and its legislature has proposed a gas tax increase to raise this money. Virginia will have to pay about \$20 million depending on the final path of the highway.

Who is pushing for construction of proposed Corridor H?

Proposed Corridor H, according to its proponents in West Virginia, is vital to the state's economic development. Closer analysis indicates that only a few businesses, mainly the poultry industry, would benefit. Certain West Virginia politicians would be able to add the federal portion of the funding to their tally of project money they have channeled into the state. In Virginia, the proposed Corridor H is not part of the state's long-range transportation plan. It will have little or no economic impact on the state while costing the taxpayers millions of dollars. In effect, Virginia will be subsidizing West Virginia's economic development highway.

Is proposed Corridor H necessary?

Absolutely not. And the price tag, ranging from \$840 million to \$1.6 billion, makes the project especially suspect. Existing east-west roads (Routes, 50, 55 and 33) can be improved for far less money. Bad curves could be straightened, passing lanes installed, roadbeds widened, and intersections improved.

How does proposed Corridor H impact the region?

Potentially, the construction of proposed Corridor H and the increased traffic in this area of the country will mean acid rain, noise pollution, pollution of reservoirs and ground water, the overall degradation of natural and cultural resources, and increased crime and uncontrolled development. On a personal level, many peoples' lives will be disrupted by losing their homes, by living the shadow of a super highway and by having their communities disturbed.

Are there alternatives to proposed Corridor H?

Yes. For significantly less money, existing roads could be upgraded to increase their efficiency and safety, while at the same time preserve and enhance the cultural and historical resources and environmental beauty that make this region such an attraction to tourists and wonderful place to live. One alternative advocates a Scenic Highway plan on the proposed Corridor H path which would enhance the area's appeal as an escape to nature, with its scenic beauty, small farms and friendly communities. Corridor H Alternatives rejects the necessity and questions the logic of constructing a 4-lane super highway through West Virginia and northwestern Virginia. This scheme benefits a few selected industries at the expense of local business and cultural and environmental resources.

Proposed Corridor H: What can you do?

Is construction of Corridor H inevitable?

No.

Corridor H is a *proposal*—your voice is important in determining the future of this project. In Virginia the Department of Transportation will make its decision about proposed Corridor H on May 20. One possibility is rejecting this highway completely. This is known as the “**No Build**” option and is advocated by Corridor H Alternatives. It is vital that you let your elected representatives and other public officials know how you feel on this issue.

Take a stand for “No Build.”

It is important that everyone who stands for sensible, sensitive and effective use of tax dollars send a clear message to elected and public officials: **No Build**. Although some of us will be more directly affected than others, it is not enough that the proposed highway is “not in my backyard.” Community groups and organizations, businesses and individual citizens can all take a stand for **No Build** so that Corridor H ends up in no one’s backyard.

Proposed Corridor H is fiscally irresponsible.

With a price tag ranging from \$840 million to \$1.6 billion, the proposed Corridor H is an irresponsible use of tax dollars for a highway that will benefit a few selected industries at the expense of local business and cultural and environmental resources. Upgrading existing roads is far less costly and far more sensitive to the quality of life issues that are so important to all of us. Remind your elected and public officials that you want them to take responsible action with your tax dollars, especially in this era of fiscal crisis.

Write or phone your elected and public officials.

Write as many letters as you can. You will be amazed how effective your letters are and how many letters you will get back. Phone as many as you can, even the ones you write to. This will increase the impact of the overall effort. Don't feel you must limit your communication to your own representatives. Write or phone anyone with influence in the decision-making process.

Get your friends and relatives to write.

The more letters the better. Get people you know from outside the region with some stake in the area (childhood home, vacation here, etc.) to write about this issue. Every Virginian should know that Virginia highway dollars now slated for local projects, i.e. bridge repair in Warren County, are subject to redirection to proposed Corridor H. That should inspire many letters. A letter from New York or Georgia can have a dramatic impact—letting our elected officials know that even people from outside the region are watching and care about this issue.

Write “letters to the editor.”

Absolutely. A “letter to the editor” is the most powerful tool an individual has to express his opinions in a public forum. Elected officials monitor the “letters to the editor” as a gauge of public opinion. This is also an excellent way to keep this issue before the public eye.

Effective letter writing:

- Write a personal letter; avoid form letters.
- Keep each letter brief. Try to limit the subject matter to a single issue.
- Be positive. Avoid criticism. If possible, compliment the legislator on some recent action, vote or public speech.
- Come to the point quickly, clearly and concisely.
- Tell why you hold a particular position. If an organization that you belong to has taken action on the issue, refer to their decision.
- Raise questions. A well formulated question can often get a personal response.
- Point out shortcomings of this issue.
- Spell names correctly, write legibly and use correct salutations.

Effective phone calling:

- Be well informed and prepared.
- Call at a strategic time; for example, just before a vote in committee.
- Always be calm and courteous; venting your anger will not help you in your efforts.
- If you have written or visited with legislator, remind him or her of that contact.
- If the legislator is not available, speak with the legislative assistant.

MEETING WITH KATY MCGINTY

To follow up our phone conversation of a few days ago, I thought I would let you know which days and times I am available during the last week of April:

Monday, April 26 - morning

Tuesday, April 27 - all day

Wednesday, April 28 - afternoon

Thursday, April 29 - morning, afternoon after 3:00

I would be very grateful if you could arrange a meeting during one of these times to discuss Administration policy on indoor air issues ranging from legislative initiatives to regulatory activities by several agencies.

Thank you for your assistance.

Dear Ms McGinty

I would like to invite you to attend a Public/Private Partnership Kickoff Ceremony we plan to hold for the public/private partnership project.

The public/private partnership is an Air Force/Environmental Protection Agency (EPA) initiative to conduct a joint testing program to produce and exchange performance data for a number of innovative technologies. This program will accelerate development of environmentally sound and less costly remedial technologies.

We (McClellan) are participating in the Air Force/EPA initiative as an Environmental Process Improvement Center (EPIC) partner. EPIC is an alliance between McClellan, EPA, and California-EPA, whose main goals are to prevent pollution and accelerate clean up of polluted sites. This includes testing and developing new technologies that may be useful to others. We would like you to attend the ceremony to endorse this unique site demonstration project, cooperatively planned and evaluated by public/private partnership.

This kickoff ceremony will take place on 28 April 1993 at 10:00 AM in Area D at McClellan AFB. A draft agenda is attached (Atch 1). If you plan to attend, please have your staff notify Cindy Rispoli, (916) 643-0831, by 9 April 1993, so that we can arrange for your arrival and modify the agenda.

Sincerely

Francis C. Gideon Jr.

Revised 4/26

management or political campaigns may accept meals, lodgings, transportation and other benefits, including free attendance at events, when provided, in connection with such active participation, by a political organization described in 26 U.S.C. 527(e). Any other employee, such as a security officer, whose official duties require him to accompany an exempt employee to a political event may accept meals, free attendance and entertainment provided at the event by such a political organization.

Example 1: The Secretary of the Department of Health and Human Services is exempt from the noted Hatch Act restrictions. He may accept an airline ticket and hotel accommodations furnished by the campaign committee of a candidate for the United States Senate in order to give a speech in support of the candidate.

(g) Widely attended gatherings and other events-(1) Speaking and similar engagements. When an employee is assigned to participate as a speaker or panel participant or otherwise to present information on behalf of the agency at a conference or other event, his acceptance of an offer of free attendance at the event on the day of his presentation is permissible when provided by the sponsor of the event. The employee's participation in the event on that day is viewed as a customary and necessary part of his performance of the assignment and does not involve a gift to him or to the agency.

(2) Widely attended gatherings. When there has been a determination that his attendance is in the interest of the agency because it will further agency programs or operations, an employee may accept a sponsor's unsolicited gift of free attendance at all or appropriate parts of a widely attended gathering of mutual interest to a number of parties. A gathering is widely attended if, for example, it is open to members from throughout a given industry or profession or if those in attendance represent a range of persons interested in a given matter. For employees subject to a leave system, attendance at the event shall be on the employee's own time or, if authorized by the employee's agency, on excused absence pursuant to applicable guidelines for granting such absence, or otherwise without charge to the employee's leave account.

(3) Determination of agency interest. The determination of agency interest required by paragraph (g)(2) of this section shall be made orally or in writing by the agency designee.

(i) If the sponsor is a person who has interests that may be substantially affected by the performance or nonperformance of an employee's official duties or an association or organization the majority of whose members have such interests, the employee's participation may be determined to be in the interest of the agency only where there is a written finding by the agency designee that the agency's interest in the employee's participation in the event outweighs concern that acceptance of the gift of free attendance may or may appear to improperly influence the employee in the

DR JANE GOODALL, Ph.D. is world-renowned for her long-term field studies of chimpanzees in the wild, conducted in Gombe National Park, Tanzania, Africa. Chosen thirty-two years ago by noted anthropologist/paleontologist Dr. Louis S. B. Leakey, Dr. Goodall has conducted the longest unbroken field study of any group of animals in their natural habitat. Through publication of five major books, her appearances on National Geographic Society specials and her many lectures around the world, Jane Goodall has helped focus world attention on the importance of studying animals in the wild. She holds a Ph.D. in ethology from Cambridge University and has been the recipient of numerous honorary degrees and awards, including those from the San Diego Zoological Society, The Animal Welfare Institute and the National Geographic Society. She has also been awarded the J. Paul Getty Wildlife Conservation Prize and the Encyclopedia Britannica Award. Dr. Goodall is the founder of The Jane Goodall Institute for Wildlife Research, Education, and Conservation.

ZIFF COMMUNICATIONS COMPANY—William B. Ziff, Jr., Chairman of Ziff Communications Company, is a staunch environmentalist. Ziff Communications has worked hard to reduce waste materials from the company's publishing operations. Where possible, Ziff-Davis Publishing uses recycled stock for its magazines; when it wraps its magazines, the company uses a polybag which creates very little post-consumer waste. For the past three years, Ziff Communications has been a major supporter of the Rainforest Alliance. Bill Ziff has said, "As global citizens and businesspeople, the choices we make have far-reaching consequences. Tropical rainforests are among the most important resources our planet holds. My hope is that we can make a little more headway in preserving and developing them responsibly by acting together as a company and individuals."

THE RAINFOREST ALLIANCE—Established in 1986, the Rainforest Alliance is an international non-profit organization dedicated to the conservation of the world's tropical forests. The Alliance's primary mission is to develop and promote economically viable and socially desirable alternatives to tropical deforestation. These alternatives are designed in concert with local peoples to develop forest products and businesses that offer long-term, stable income for people living in or near tropical forests. The Rainforest Alliance also educates the public about tropical conservation and builds new constituencies for tropical forest conservation.

The Alliance has over 15,000 members and supporters and maintains offices in New York, California, and Costa Rica.

National Security Council
Room 365, Old Executive Office Bldg.
Washington, D.C. 20506

*Will not
do.*

Dear Ms. Claussen,

Further to your telephone conversation yesterday with Ann Cronin-Cossette, I am writing to inform you officially of the visit to Washington of the Honourable John Ciaccia, Minister of International Relations of the Province of Quebec, Canada. He will be here April 27-29. He has expressed an interest in renewing his acquaintance with Vice President Gore, who he met at the Rio Summit. Attached is Mr. Ciaccia's biography.

Mr. Ciaccia would like to take the opportunity to explain the position of the Government of Quebec on the proposed Grande-Baleine project. As the negotiator for the original 1975 James Bay and Northern Quebec Agreement with the Cree and Inuit, and as the former Quebec Minister of Energy and Quebec Minister responsible for relations with the aboriginal people, Mr. Ciaccia is well placed to describe the background for this project. For additional background on this issue, attached is a fact sheet on the project prepared by the Embassy.

I fully appreciate that the Vice President's schedule is very tight. However, if he could meet even briefly with the Minister, we would be very appreciative. The afternoon of April 28 would fit in best with the Minister's program as it currently stands.

.../2

Given that the Vice President is unlikely to be able to spend much time with Mr. Ciaccia, I would also be grateful if you yourself would consider meeting with him, perhaps together with Ms. McGinty, either before or after the meeting with the Vice President. Should you wish to discuss this further with me, please do not hesitate to contact me at 682-7735.

Yours sincerely,

A handwritten signature in dark ink, appearing to read "Gail Tyerman", with a long horizontal flourish extending to the right.

Ms. Peggy Cusack
Scheduling, Office of the Vice-President

JOHN CIACCIA

QUEBEC'S MINISTER OF INTERNATIONAL AFFAIRS

AND

MNA FOR MONT-ROYAL

Mr. John Ciaccia was born in Ielsi, Italy on March 4, 1933. He studied law at Montreal's McGill University and was accepted to the Quebec Bar in 1957. He practiced law from 1957 to 1959 and was legal adviser for a major Quebec firm from 1959 to 1966. He then returned to private practice in 1967.

He became a consultant with the Department of Indian and Northern Affairs - Canada in 1969, and was appointed Assistant Deputy Minister with this Department in 1971. He held this office until 1973.

Elected member of the National Assembly for Mont-Royal in 1973, Mr. Ciaccia represented Premier Robert Bourassa during negotiations with the Natives and Inuit of James Bay. These negotiations led to the signing of the James Bay and Northern Quebec Agreement in November 1975.

Reelected MNA for Mont-Royal in 1976 and again in 1981, John Ciaccia was successively Official Opposition Critic for Energy, Housing, Industry and Commerce and Transportation. In 1980 he was member of the executive on the "No" committee for the referendum. Elected once again by the Mont-Royal constituency on December 2, 1985, John Ciaccia was appointed Minister of Energy and Resources on December 12, 1985. On September 25, 1989, Mr. Ciaccia was re-elected in Mont-Royal and was named Minister of International Affairs and Minister Responsible for Native Affairs. Since October 5, 1990, Mr. Ciaccia is Minister of International Affairs.

Hydro-Québec's Great Whale Project

NATURE OF THE PROJECT

Great Whale (or Grande-Baleine) is the second phase of a long-term plan by Hydro-Québec, the public utility owned by the government of Québec, to harness the hydroelectric potential of several northern Québec rivers flowing into James Bay and Hudson Bay.

Development of the region began with the construction of a power complex on the La Grande River which came into service in 1979. The Québec government has said that the Great Whale complex is needed to meet the demand for electricity at the end of this decade. This demand is based on the evolution of energy needs in Québec and sales of electricity to neighbouring systems, both foreign and domestic, and takes into account the ambitious energy efficiency project pursued by Hydro-Québec.

The complex will have a total installed capacity of 3,168 megawatts and will require the flooding of 699 square miles of land, or less than 1/6 of one percent of the James Bay and Northern Québec territory, which has a total area of 410,000 square miles or two-thirds the size of Alaska. Only 5 percent of the 22,000-square-mile drainage basin of Great Whale will be modified by the project. The total estimated cost of the project is US \$11 billion. Once construction starts, it will take seven years before the first generating unit is commissioned.

ENVIRONMENTAL ASSESSMENTS

In 1975, the federal government signed the James Bay and Northern Québec Agreement (JBNQA) with the Québec government, Hydro-Québec and representatives of the Cree and Inuit (Eskimos). The Cree and Inuit were voluntary signatories to the agreement, which explicitly recognizes their rights and mentions the development of Great Whale. The agreement obligates the government and the utility not to undertake further electrical development projects such as Great Whale in the region

without undertaking a thorough environmental assessment. Specific procedures apply north and south of the 55th parallel, defining the areas inhabited primarily by Inuit or by Cree. The Great Whale project overlaps the 55th parallel and is subject to four assessment and review procedures. As well, a review is being conducted under the Federal Environmental Assessment Review Office procedures. Therefore, the Great Whale project will be subject to five review procedures.

Both the federal and provincial governments have established review panels to examine the entire Great Whale project in keeping with their responsibilities under the JBNQA. The Cree and Inuit are fully involved partners and participants in these reviews. Indeed, on January 23, 1992 the two governments, the Cree and the Inuit signed a memorandum of understanding on the harmonization of the various environmental assessment and review processes that should ultimately result in a single recommendation on its acceptability. The agreement also specifies that the project must be justified in terms of supply and demand analysis, including the adequacy of energy conservation policies and whether new hydropower capacity is the best solution available.

Following public hearings conducted throughout Québec during the spring, the final guidelines that Hydro-Québec must follow in the preparation of its Environmental Impact Statement for the Great Whale Hydroelectric Project will be released in August. Once Hydro-Québec submits its EIS, the panels will review it to ensure all questions raised are answered and then will hold public hearings. The governments of Canada and Québec created a fund of \$2 million to help concerned people and groups participate in the process. Hydro-Québec created a separate fund of \$3 million to facilitate the participation of the Cree and Inuit.

IMPACT ON NATIVE COMMUNITIES

The James Bay and Northern Québec Agreement provides the approximately 18,000 Cree and Inuit of Québec a degree of autonomy and self-government

unequaled elsewhere on the continent. Under the Agreement and five subsequent pacts between 1975 and 1988, the Québec and Canadian governments and Hydro-Québec awarded C\$505 million in compensation to the Cree, the Inuit and the Naskapis. Between the mid-1970s and the mid-1980s, infant mortality among the Cree decreased by one-half and life expectancy increased from between 40 and 50 years to about 70. This is comparable to the national average.

The resulting population growth affects the Cree since their hunting and fishing grounds can support only a limited harvest of wildlife. To help the Cree preserve their traditional way of life, the Québec government provides an income security program, which subsidizes traditional activities, such as trapping, hunting and fishing. With funds received from the JBNQA, the Cree and Inuit have also begun several nontraditional businesses. These include construction companies, two airlines, a boat manufacturing firm and services such as restaurants and motels.

The native people affected by the Great Whale project number about 2,500, with some 1,000 Cree and Inuit at Whapmagoostui-Kuujuarapik. It should be pointed out that no communities will be forced to relocate because of the project, nor will they be forced to do so in the future.

IMPACT ON WILDLIFE

The creation of new reservoirs does displace some wildlife habitat. Yet most animal populations in northern Québec have remained constant or increased since hydroelectric development began. With regard to the drowning of 10,000 caribou in September 1984, Canadian and Québec authorities studied the incident and concluded that hydro development was not the cause. Such events are common. Between 1973 and 1983, the Québec ministry responsible for hunting, fishing and recreation noted caribou drownings at more than 30 different locations in northern Québec. Nevertheless,

the caribou population has increased from 200,000 in 1970 to 700,000 today. Less than one percent of the more than 1.1 million inland migrating birds have had to change their nesting habits. This compares with the some 150,000 taken every year by the Cree.

Mercury contamination is a legitimate problem associated with the reservoirs created for these hydroelectric projects. High levels of mercury occur naturally in the soil and vegetation around northern Québec and other parts of Canada and in Scandinavia, and it is transformed and released to the water when the land is flooded. Reservoirs should return to their natural state in 18 to 20 years. Fish in these regions, especially predatory fish further up the food chain, contain increased mercury whether they are in natural lakes or artificial reservoirs.

Since 1986, Hydro-Québec has sponsored a \$12-million program to study and mitigate this problem in the La Grande area. Similar measures will be taken for the Great Whale project. Hydro-Québec also works with the Cree Board of Health and Social Services of James Bay to educate the local population about restrictions on eating predatory fish. However, whitefish -- a nonpredatory fish -- is a staple of the Cree diet and is not restricted for consumption because of mercury. As a matter of fact, the Cree have asked the government for commercial fishing licences on the LG2 reservoir.

CONCLUSION

The governments of Québec and Canada have launched five environmental reviews of the Great Whale project that will be as thorough as any required in the United States. The native peoples in the area will participate in all these reviews. All parties have made it clear that the project will only go ahead once environmental requirements have been met. Given the make-up of the environmental review panels and the scope and breadth of their studies, we are confident that the final outcome will be thorough and fair.

Dear Katie,

Your L.A. fan club knows how challenging your new position is and we are thrilled you are the one on the spot...even if you wonder about it from time to time! We really are proud of you Katie and want to extend all our love and support in any way possible!

I will be in Washington with a few Board members meeting with Senators Lautenberg, Reid and others who are requesting our media/celebrity help with renewable energy hearings, and other matters. While there I was hoping we might get an opportunity to get together for a brief hug and an update on the goings on in our industry, and a chance to explore how we can help and support you!

I will be in D.C. all day Tuesday, the 27th and available to drop by anytime you have.

I hope to see you.

All the best,

Bonnie

Dear Ms. McGinty: *Katie:*

Later this month Island Press will celebrate the publication of Janet Bohlen's book FOR THE WILD PLACES: Profiles in Conservation, for which the Vice President kindly wrote the foreword.

We are giving a small reception for Janet on April 27th from 5:30 to 7:30 at World Wildlife Fund headquarters, 1250 24th Street, NW. Members of the conservation community, including friends from nonprofit organizations, Capitol Hill, and other government officials have been invited.

We - and Janet - would be honored if you could join us. At your convenience, your reply may be addressed to Ms. Linda Chase at Island Press (202) 232-7933.

Sincerely,

Charles Savitt, President
Island Press

Kathryn S. Fuller, President
World Wildlife Fund

P.S. Enclosed is a copy of the book. We hope that you enjoy it.

NATIONAL ACADEMY OF SCIENCES

2101 Constitution Avenue Washington, D.C. 20418

OFFICE OF THE HOME SECRETARY
(202) 334-2446

April 8, 1993

BY MESSENGER

Ms Katie McGinty
Deputy Assistant to the President
Director, Office of Environmental Policy
Old Executive Office Building
Room 358
Washington, DC 20501

Dear Ms McGinty:

Peter Raven asked that I send you background material on the National Academy of Sciences, in connection with his invitation to address the members of the Academy on Tuesday, April 27, during their annual meeting. The enclosed booklets may be helpful in gaining an overview of the Academy's history and purpose:

- *National Academy of Sciences: A New Era in Service to the Nation* describes the Academy's mission and highlights some major program areas.
- *The Policy Partnership with the U.S. Government* outlines the role of the Academy—and its National Research Council—as advisor to the government on science and technology.
- *National Academy Press: New and Forthcoming Books (Winter/Spring 1993)* lists a number of recent Academy reports.

If you need additional information, I can be reached by telephone at 334-2446 or by fax at 334-2153. We hope that you will be able to participate in the symposium on "Preserving the Earth's Ecological Systems" on the twenty-seventh.

Yours sincerely,

Kenneth R. Fulton
Director

NATIONAL ACADEMY OF SCIENCES

2101 Constitution Avenue Washington, D.C. 20418

OFFICE OF THE HOME SECRETARY
(202) 334-2446

April 8, 1993

Ms. Kathleen McGinty
Deputy Assistant to the President
Director of the White House Office
on Environmental Policy
Old Executive Office Building
Room 358
Washington, D. C. 20501

Dear Ms. McGinty:

By means of this letter, I would like to invite you to address the members of the National Academy of Sciences during the course of their annual meeting to be held in Washington later this month. On the afternoon of Tuesday, April 27, 1993, we have organized a symposium entitled, "Preserving the Earth's Ecological Systems," in which we would very much like to have you participate. The symposium will be from 2:00 to 5:00 p.m. that afternoon.

The other participants in the symposium will be Alexey Yablokov, Minister for the Environment for Russia; José Sarukhán, Rector of the National Autonomous University of Mexico and General Coordinator of the Mexican national center for biodiversity; Nathan Keyfitz, Deputy Director, International Institute for Applied Systems Analysis, Austria, on the relationship between population and the environment; and Tom Eisner, a well-known professor at Cornell, on "Chemical Prospecting" -- the search for natural products in the earth's biological systems, and the proper handling of these can be used to promote global stability.

We would hope very much that you might be willing to speak on the Administration's environmental activities and perhaps review the various announcements that we suppose will have been made on Earth Day (April 22, 1993) and the preceding weekend for the future outlook in this area. From our point of view, it would be important to have a strong U.S. spokesperson at this meeting, and we believe you are in a unique position to perform this function.

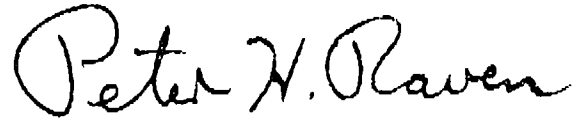

Ms. Kathleen McGinty
April 8, 1993
Page 2

I am sure you are aware that the offices of the National Academy of Sciences, which has about 1600 members, are located at 2101 Constitution Avenue, where these meetings will take place. Ken Fulton, Principal Staff Officer, Office of the Home Secretary, in the Academy, will send you additional material on the Academy. The National Academy of Sciences, along with the National Academy of Engineering and the Institute of Medicine, operates the National Research Council, which provides several hundred reports a year for various departments of the government and for Congress on different matters of interest in science, engineering, and public policy relating to these matters.

It would be our honor to have you accept this invitation, and we look forward to hearing from you soon.

With all best wishes, I am

Sincerely,

Peter H. Raven
Home Secretary

spoke with her office this morning. A letter of invitation should be sent by fax to (202) 456-2710; the cover sheet should addressed to the attention of Christian Marsh, who now does her scheduling (this is the third person for that function in the past three weeks!).

I checked on the location of your USBS meeting, because I have all the meeting rooms in this building on Wednesday for the annual meeting, and no one had requested to use one. The meeting is scheduled to take place in Georgetown, but I called Eric Fisher and told him that the Board Room is available for your meeting; he will make the change with the Meetings Office. Hope that's OK with you...

Carnegie Endowment for International Peace

Face-to-Face is a forum facilitating dialogue among American governmental and nongovernmental participants on major international issues.

7 April 1993

Regretted
4/23

Dear Colleague:

On **Tuesday, April 27th**, the Carnegie Endowment, in association with the Overseas Development Council, will sponsor a meeting on trade policies and sustainable development. I hope you will join us for this discussion.

Our speaker will be **Dr. Richard L. Bernal**, who is currently Jamaica's Ambassador to the United States and its Permanent Representative to the Organization of American States. An economist by training, Ambassador Bernal has written extensively on development, debt, North-South issues and trade policy, with particular concern for Latin America and the Caribbean region. Prior to his posting here, he served with the Central Bank and the Planning Institute of Jamaica, and as special advisor to the Finance Ministry. His presentation at this meeting will concern trade policy generally, and more specifically, the impact of current and prospective regional trade arrangements on environmental and sustainable development policies.

Our meeting will commence **promptly at 5:30 PM** at the eighth floor conference center at the Carnegie Endowment (2400 N Street NW). Our doors will open at 5:00 PM for coffee and conversation, and we will end equally promptly at 7:00 PM. I hope you will be able to stay for a reception after the formal meeting adjourns.

Should you be able to attend, please call Dominic Bianchi (202-862-7981) to reserve a place at this meeting. And as space is limited, please let us know should your plans change after you have confirmed your attendance.

Sincerely,

Paula R. Newberg

STEEL MANUFACTURERS ASSOCIATION

Suite 801
1730 Rhode Island Avenue, N.W., Washington, D.C. 20036-3101
FAX: (202) 296-2506

James F. Collins
President

March 25, 1993

(202) 296-1515

Ms. Katie McGinty
Director
Environmental Policy
The White House
Washington, DC 20500

Dear Ms. McGinty:

We are writing to invite you to be the principal speaker on environmental policy at the annual public affairs conference of the chief executives of the Steel Manufacturers Association, which will be held April 27-28, 1993, at the Willard-Intercontinental Hotel, Washington, D.C. You would be addressing an audience of several hundred industry executives, members of Congress and government officials at 2:00PM during our afternoon session on April 27. We are most interested in your views on RCRA reform, the Basel Convention, Superfund renewal and the major policy issues affecting air and water quality which the Clinton Administration may address.

The Steel Manufacturers Association is a trade group consisting of 54 North American steel companies and 90 other companies that supply the steel industry with goods and services (see enclosed membership directory). We represent approximately one third of United States steel production, and in producing this steel we are the largest recyclers in the country. We consume approximately 38 million tons of scrap metal, which includes 9 million junked automobiles, tin cans, old appliances and other discards in our society. Our members are the fastest growing segment of the world steel industry and are generally identified as internationally competitive supporters of progressive trade, environmental and workforce policies.

We very much hope you can accept our invitation. If you do we can promise an audience, including the media, that would welcome a significant environmental policy statement from the Clinton Administration.

Sincerely,

J. F. Collins

Excerpts from
press conference

To: Kate McGinty
Fr: Kim Hopper

AFL-CIO News Briefing on April 2nd Forest Summit

Thursday, March 25, 1993 11:00 a.m.

Jay Power, legislative representative, AFL-CIO: I want to reaffirm my support for Clinton. Sources of the AFL-CIO are "dedicated to the cooperation of the administration." The AFL-CIO has passed two resolutions to support jobs of workers. At the summit, we want to outline the "terrible impact the situation has had on the lives of families" because of past government gridlock. We are ready to proceed. The impact of the current situation has been: 1) lost jobs 2) deterioration of communities who soon may no longer exist. The high number of lost jobs has led to alcohol abuse, drug abuse and suicides. The AFL-CIO will be actively involved to protect any legislation.

Mike Draper, executive secretary, Western Council of Industrial Workers: The union includes 2 paper unions and 2 wood unions. The summit is a major product of organized labor. During the campaign, Clinton contacted us and asked to come out West to discuss the problem. He came and promised to hold a summit and address government gridlock. "He is a man of his word." I thank the administration for having the courage to work quickly and hope the summit will develop guiding legislation to stop gridlock.

Logging communities are small world communities and could be devastated. We want to take into account the ecosystem and still provide maximum yield for loggers. We are looking forward to working with the administration. We are "willing to work with the administration to find a solution to this terrible problem."

Denny Scott, United Brotherhood of Carpenters and Joiners of America: We are approaching the third year of this crisis. The last Congress couldn't pass a bill. 25,000 jobs have been lost in the past three years. That number could soon double. The workers are "hanging by a thread." The problem "transcends the region and affects the entire economy." Prices have been driven way up for lumber and chips.

Q: Are you willing to compromise and sacrifice East Side forests?

Scott: The summit will focus on the West Side. We have supported reservations and the ecosystem. We have already sacrificed. We are the "new class of homeless under bridges" and in the unemployment line.

Q: What percentage of the forests are you willing to preserve?

Scott: Forests are in constant change; there is not a definite number of trees. You can't measure a certain percentage.

Q: What about reports that say private lands were overlogged, and, as a result, logging had to go into public land?

Draper: This is no longer true. Technology in high-yield forests will show they can sustain a yield in public forests. There is more fiber growing today than ever existed years ago.

Q: How do you look at the summit? Hopeful? Nervous? Scared?

Draper: I am very optimistic. I have "total confidence in the administration's ability." This is the first time in three years we have been optimistic for a resolution. It's the first time there are no competing bills in Congress.

Power: I agree and am convinced Clinton will give workers "more than a fair hearing." Economic recovery for the U.S. will be impaired if the issue is not resolved. We will emphasize that to the President. We strongly support Clinton.

End: 11:30 a.m.

✓ Regret

Dear Ms. McGinty:

The members of the American Water Works Association (AWWA) would be honored for you to be the featured speaker at a session of the AWWA Legislative Seminar which will be held at 1:30 PM ~~April 27, 1993~~, at the Sheraton City Centre Hotel, 1143 New Hampshire Avenue, NW, Washington, DC.

The seminar will be attended by water utility managers from across the nation and AWWA state legislative committee chairmen. The three day program will focus on the reauthorization of the Safe Drinking Water Act and the Clean Water Act, funding federal environmental regulations, and the impact of drinking water regulation on local communities. Your views, as the Special Assistant to the President responsible for environmental policy, would be most appreciated by those attending the seminar.

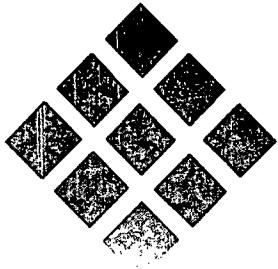

AWWA is the world's oldest and largest scientific and educational association of water supply professionals dedicated to providing drinking water of the highest quality to the American public. The association was founded in 1881 and has a membership of over 55,000. Our membership provides over 75 percent of the drinking water delivered in the United States.

We are pleased to provide this forum for you to share your views on issues which are of vital interest to all Americans. Thank you for your kind consideration. We look forward to hearing from you.

Sincerely,

John H. Sullivan

ASSOCIATION OF
CALIFORNIA
WATER AGENCIES

*a non-profit corporation
since 1910*

Dear Ms. McGinty:

The Association of California Water Agencies will be holding its 1993 Spring Conference April 28-30, 1993, at Caesars and surrounding hotels at South Lake Tahoe, California. We will also be presenting a water quality seminar in conjunction with the 1993 Spring Conference. We would be honored if you would be able to attend as our keynote speaker for the water quality seminar on April 27.

ACWA's membership is comprised of more than 400 public water agencies throughout California, which deliver approximately 90 percent of all water in the state. Over 2,000 conference attendees will include agency board members, general managers, engineers, state and federal officials. I have enclosed some information on the Association for your information.

It would be of interest to our members if you would address how the water industry can work with the Clinton Administration to achieve a results-oriented system that protects both our national water supply and our environment. Of particular interest to our attendees would be your thoughts on how ACWA can work with the new administration to achieve health-beneficial and cost-effective regulations governing clean water and drinking water.

We recommend a presentation of 30-40 minutes, beginning at 10 a.m., with 20-30 minutes for a question and answer period following your remarks.

Our conference normally attracts substantial media coverage. Our public affairs staff will be most happy to help you and your staff coordinate any media availability you find appropriate.

This prestigious gathering of water leaders from throughout the state of California would be an ideal opportunity for a major administrative pronouncement on issues of interest to all Californians.

Please let me, or Debi Fletcher on my staff, know if you will be able to accept our invitation. Our staff will be most happy to assist you with travel arrangements.

In the meantime, if there is anything we may do to assist you, please contact us.

Sincerely,

A handwritten signature in black ink, appearing to read 'S. K. Hall', with a long horizontal flourish extending to the right.

A CWA's 1993 Spring Conference theme, "Investing in California's Water Future," builds on similar themes targeted by President Bill Clinton and California Governor Pete Wilson. As the president implements his plan for change and involvement by the people and the governor sets forth a strategic growth plan to rebuild our infrastructure to meet future economic opportunities for California, ACWA must also devise an investment plan for the state's water future.

When new ACWA Executive Director Stephen Hall looked toward the future in his inaugural speech at ACWA's last conference, he said, "Times have changed and solutions must change with them, but one thing hasn't changed. Just as men and women of vision changed the course of events in the '30s and '60s, I believe they can change them in the '90s."

"There are solutions to our problems and we can help shape those solutions. In fact we must help shape them if they are to last and make this state better and stronger. We can only be part of the solution, though, by working together."

You can be a part of the solution by attending this upcoming ACWA Spring Conference, April 28-30 in South Lake Tahoe. An agenda filled with hard-hitting, timely issues has been planned for the conference. Invest in California's water future by being part of the solution.

Conference sessions will offer insight into the strategic planning process ACWA is embarking on; updates on the federal Endangered Species Act, Clean Water Act, Safe Drinking Water Act; briefings on California's water supply situation and why it is being called a "regulatory drought;" constraints of federal and state water quality regulations; unprecedented threats to water rights; and impacts of the Central Valley Project Improvement Act and the State Water Resources Control Board's draft Decision 1630.

A number of President Clinton's new appointments have been invited to speak. James Ziglar, managing director at PaineWebber, Incorporated, is coordinating a political discussion panel on the Clinton Administration's future water policy. The panel is slated for the Hans Doe Forum Breakfast.

Another highlight will be the water quality workshop, titled "Your District's Role in Setting Water Quality Policy," on April 27, the day before the Spring Conference begins.

As a supplement to *ACWA News*, Conference News includes all of the necessary registration forms and information to attend the Spring Conference. Early registration ends April 2, 1993.

***Ten Years Dedicated to Promoting
Human Rights and Freedom***

“Peace, progress, human rights — these three goals are indissolubly linked; it is impossible to achieve one if the others are ignored.”

Dr. Andrei Sakharov, awarded the Nobel Peace Prize in 1974

“The candle burns not for us, but for all those whom we failed to rescue from prison, who were shot on the way to prison, who were tortured, who were kidnapped, who ‘disappeared.’ That’s what the candle is for.”

Peter Benenson, founder of Amnesty International, Amnesty was awarded the Nobel Peace Prize in 1977

“We are indeed witnessing a tremendous and popular movement for the advancement of human rights and democratic freedoms in the world. This movement has such moral force that even determined governments and armies are incapable of suppressing it. It is an encouraging indication of the triumph of the human spirit for freedom.”

His Holiness the XIVth Dalai Lama of Tibet, awarded the Nobel Peace Prize in 1989

“I consider the Nobel Peace Prize not as an award to me personally, but rather as one of the greatest conquests in the struggle for peace, for human rights, and for the rights of the indigenous people who, along all the 500 years, have been the victims of genocides, repression and discrimination.”

Rigoberta Menchú, awarded the Nobel Peace Prize in 1992

18 March 1993

Mr. Trey Lindseth
Office of Environmental Policy
Old Executive Office Building
Room 358
Washington, D. C. 20501

A handwritten word "Secret" is written vertically, with a large checkmark drawn over it.

Dear Mr. Lindseth:

I've been speaking with Amy Todd about a new low-cost environmental monitoring system I'm working on and she suggested I write you to request a short meeting when I visit Washington next week. The main reason I wanted to speak with people at your office is that this system will provide some unprecedented scientific leaps forward while providing some equally unprecedented opportunities to show the world our country retains the technological high ground--and can do it at a tiny fraction of the cost people have become accustomed to expect.

My system (Amy has a short information sheet on it) will be used by the NOAA Space Environment Laboratory to monitor a worldwide environmental sensor network and distribute that data throughout the entire planet essentially instantly. Besides the obvious scientific breakthrough that represents, I've designed the system so that the pictures and data it sends out can be received by *anyone* with a home computer and the right (about \$200) plug-in circuit board. The way this process works allows anyone anywhere to watch changes affecting the entire planet happening in real-time.

But beyond these "spectacular" aspects, the reality of this system is that it's a new and necessary method to keep track of solar-caused changes in global conditions that can have serious effects on satellites, communications, navigation, and large power transmission systems. Energetic solar outbursts can wreak havoc with all these systems (and they *have* as recently as a couple of weeks ago when CBS lost its satellite feed of a basketball game for 20 minutes due to a large solar flare) and lots of money and effort is spent trying to predict them. So another object of our meeting is to give you a feel for the mushrooming impact of this aspect of the global environment on the increasingly technologically sophisticated systems coming on line.

And please understand that I'm not requesting a meeting as a lobbyist or representative of some special interest, but as someone genuinely interested in this Administration making the most of what appears to be a major breakthrough in our ability to monitor the planetary environment. Moreover, there are many far-reaching impacts of having a continuous low-cost pipeline for data and pictures to the entire planet, not only technological but economic and educational.

The U. S. Information Agency's World Net system will be carrying my data stream and I'll be in Washington next week going over details with them. Friday, the 26th, is still open for me and, if convenient, that would be a good day to get together; realistically, we'd need about 30 minutes. I hope we can talk and look forward to the opportunity to meet. I'll check with Amy when I arrive in Washington on Wednesday, the 24th, and I'll be staying at the Hyatt Regency in Crystal City (703 418-1234) if you need to leave a message for me.

Sincerely,

A handwritten signature in cursive script that reads "David A. Rosenthal".

David A. Rosenthal

18 March 1993

Mr. Lindseth,

This is a backup copy of the visit request letter I faxed to you, care of Amy, earlier today.

Thanks,

March 1, 1993

The Honorable Kate McGinty
Deputy Assistant to the President
and Director of the Office on
Environmental Policy
OEOB, Room 358
Washington, DC 20501

Dear Ms. McGinty:

I have been contacted by the Anchorage Chamber of Commerce to ask that you consider a visit to Alaska to be the guest speaker at their luncheon on Earth Day, Monday, April 26, 1993.

Three years ago the Anchorage Chamber started the very successful Green Star program to promote waste reduction and recycling for local businesses. Last year the Chamber was one of 8 groups out of 150 to win a national EPA pollution prevention award. The Chamber finds that local businesses are saving from \$3,000 to \$20,000 a year by participating in the Green Star Program. And, the Anchorage Chamber has helped spread this successful program to Palmer, Fairbanks and Kenai, Alaska.

It was in connection with Anchorage's very successful efforts that I introduced legislation which would establish a grant program whereby EPA would give grants to local entities to establish these Green Star programs.

This year the Chamber expects 1,000 people at its luncheon. I know Alaska would appreciate an opportunity to hear your comments and have a chance to visit with you about our great state.

Catherine and I would be happy to work with you and your staff on any arrangements that would make your trip easier and more memorable. April would be a great time to visit Alaska and I hope you will let me know if you can consider the Chamber's invitation.

With best wishes,

Cordially,

Ted Stevens

JASON Spring Meeting

April 23 & 24, 1993

The MITRE Corporation

Hayes Building Auditorium

Phone: (703) 883-6123 (for messages)

Follow signs to South Lobby

Directions to The MITRE Corporation (Hayes Building)

From Dulles Airport Take the Dulles Airport Access Road and Toll Road to Exit 10. Take Exit 10A and follow the signs to Route 123 South, Tysons Corner. Bear right onto Route 123 (also called Dolley Madison Boulevard). Immediately after entering Route 123 move to the left lane and make a left turn at the first traffic light, onto Colshire Drive. Follow Colshire Drive to MITRE's Hayes Building (at the top of the hill).

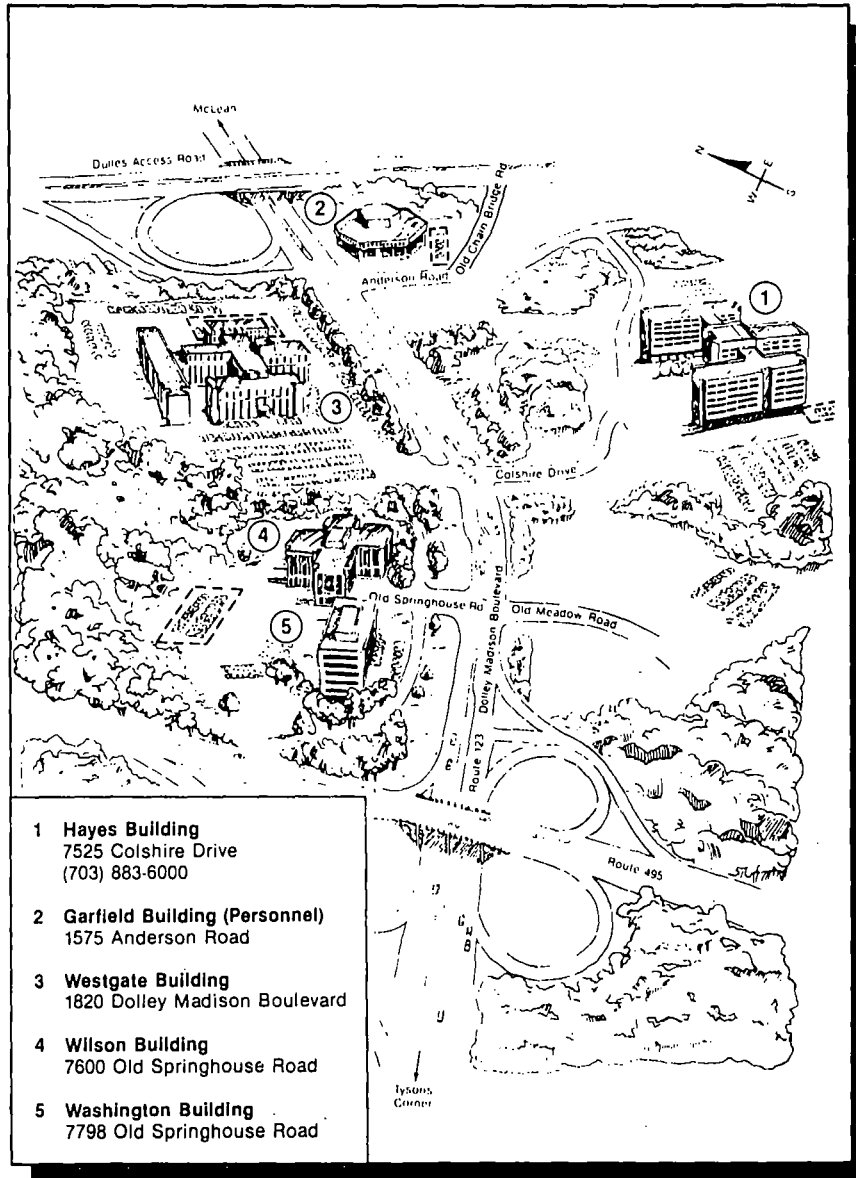

From National Airport Take the George Washington Parkway approximately 6 miles to the Route 123 South, McLean exit. Exit onto Route 123 (also called Dolley Madison Boulevard) and follow it south for approximately 4 miles to its intersection with Colshire Drive. Turn left onto Colshire Drive and follow it to MITRE's Hayes Building at the top of the hill.

OR

Take I-66 West. Exit at Route 267 (Dulles Airport extension). Take Route 123 (Exit 10A) towards Tysons Corner. Turn left at second traffic light on Route 123 (Colshire Drive).

From Route 495 (Beltway) from Maryland Coming from Maryland on Route 495, take Exit 11A (McLean, Route 123). Take Route 123 north to the second traffic light (at Colshire Drive). Go right onto Colshire Drive and follow it to MITRE's Hayes Building at the top of the hill.

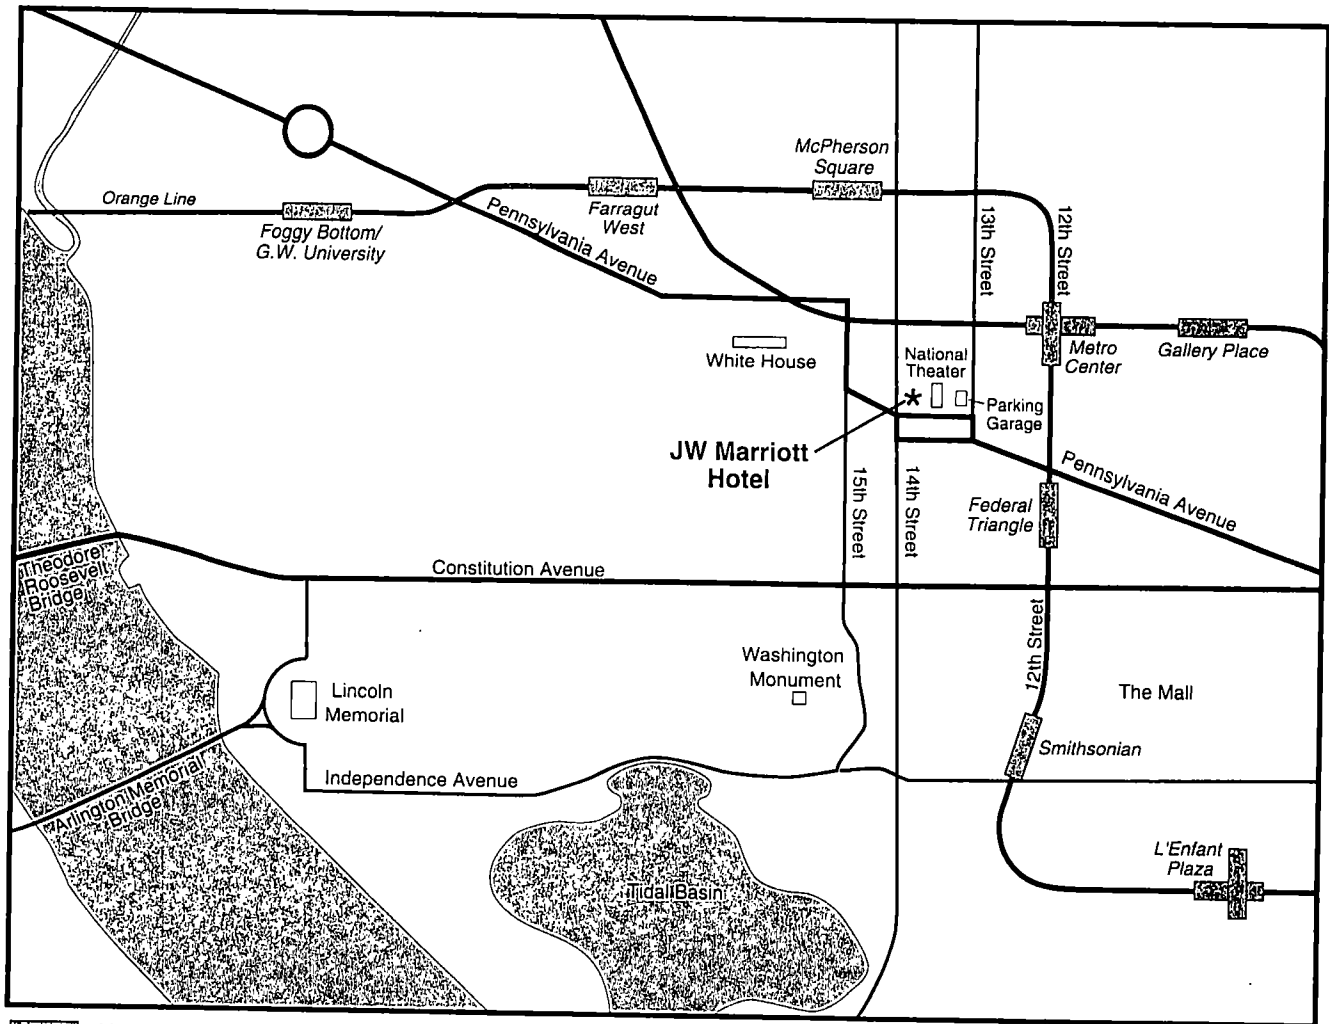

From Route 495 (Beltway) from Virginia Coming from Virginia on Route 495, take Exit 11 (McLean, Route 123). After turning onto Route 123 north, go to the second traffic light (at Colshire Drive). Go right onto Colshire Drive and follow it to MITRE's Hayes Building at the top of the hill.

JASON Spring Reception

Friday, April 23, 1993

JW Marriott Hotel
 Capitol Ballroom
 1331 Pennsylvania Ave., N.W.
 Washington, D.C.
 (202) 393-2000

 Metro Rail

★ JW Marriott Hotel

To Drive

From Rosslyn take the Roosevelt Bridge to Constitution Avenue. Then turn left onto 12th Street. Turn left onto Pennsylvania Avenue, then right onto 13th Street. The garage is on the left side of the street.

From MITRE, take Rte. 123 North to I-66 East, over the Roosevelt Bridge to Constitution Avenue. Turn left onto 12th Street. Turn left onto Pennsylvania Avenue, then right onto 13th Street. The garage is on the left side of the street.

Take Metro

Take the Orange Line. Get off at Federal Triangle stop. When you exit the Metro Station you will be facing the Federal Triangle parking lot. Walk one block to Pennsylvania Avenue. Cross Pennsylvania Avenue and turn left and walk past the National Theater. The hotel is on the corner of 14th Street and Pennsylvania (The entrance is on 14th Street.)

From: Amy Charlene Reed 
Associate Editor
Risk Newsletter

Kathleen McGinty

As an editor and writer for the *Risk Newsletter*, I would like to request an interview with Kathleen McGinty on Friday, April 23, when she is in Knoxville to speak at the Environmental Conference held at the Knoxville Convention Center.

The *Risk Newsletter* is the official publication of the Society for Risk Analysis, which is a professional association of scientists and engineers who assess or manage risks to health, safety, and the environment. The Society has 1,800 members in 32 countries, including, for instance, several U.S. EPA employees.

We would like to feature Ms. McGinty in our second quarter 1993 issue, which will be published in May. My interview questions would pertain to her new position as director of the White House Office on Environmental Policy and to risk analysis. Specifically, we would like to ask about the role risk analysis will play in federal environmental policy under the Clinton/Gore administration. The interview can be brief if Ms. McGinty's schedule is crowded -- even just 15 minutes would be very much appreciated.

Thank you for considering this request.

Post Office Box 6824 • Falls Church, Virginia 22040

March 8, 1993

The Honorable Katie McGinty
Deputy Assistant to the President and
Director, Office on Environmental Policy
Executive Office of the President
Executive Office Building, Suite 358
Washington, D.C. 20500

regret to close to other plans for Earth Day

Dear Ms. McGinty:

The City of Falls Church and the Falls Church Village Preservation and Improvement Society (VPIS) would like you to speak at the 101st Anniversary Celebration of Arbor Day in our City. As part of the Falls Church Earth Week activities, the celebration will take place at historic Cherry Hill Park, adjacent to City Hall in Falls Church, on Friday, April 23, at 1:00 p.m. We would be honored to have you speak regarding the new direction and goals that President Clinton and Vice-President Gore are setting for the environment, and in particular, the role and importance of urban reforestation.

VPIS, founded 108 years ago to improve the village environment, inaugurated the first Arbor Day in Virginia in 1892. Through VPIS leadership, Falls Church received the first "Tree City U.S.A." award in Virginia 15 years ago. VPIS is the largest civic group in the City, with over 600 active members. Attached is a recent VPIS newsletter to familiarize you with the Society.

The Falls Church 1993 "Tree of the Year," a 250 year old specimen Tupelo, and the restored antebellum Cherry Hill barn will be the backdrop to the podium. This symbolic setting represents our efforts to restore native tree species into our urban reforestation efforts and to restore historic structures into our economic recovery plan.

The program includes introductory statements by the Chair of Tree Commission, the President of VPIS and the Mayor of Falls Church. An award will be presented to a business which has demonstrated care for trees and the environment. School children from our local schools will perform and awards will be presented to owners of specimen trees. The program lasts for almost one hour and we could structure the timing of your remarks to suit your convenience. You and members of your staff will also be invited to a luncheon at noon prior to the event.

We hope you will honor our small City, which is only 10 minutes from the White House, with your insights for this special occasion.

Sincerely,

Louis T. Olom, President,
Falls Church V.P.I.S.

Council Appoints New City Manager

David R. Lasso

The City Council appointed David R. Lasso, acting city manager since September, city manager. Mayor Brian M. O'Connor said Lasso was selected from 190 applicants after a five-month nation-wide search.

"The selection of David Lasso culminates an intensive search by the City Council," said Vice Mayor Phillip Thomas who led the search effort. He called the appointment of the city manager the Council's most important decision. Thomas added that Lasso proved to be the best candidate in the face of strong, nation-wide competition. "Lasso has a unique blend of experience, ability, vision and understanding of the community and its citizens to lead the City in confronting the many challenges we face," he said. "Lasso enjoys the confidence and respect of the Council, City employees, residents and business leaders, as well as officials of surrounding jurisdictions."

Vice Mayor Thomas commended the work of Council members, the Council's consultant Walter Scheiber and the Citizens Advisory Committee, as well as all those who provided input into the process for their invaluable assistance and their maintenance of the integrity of the selection process.

Lasso has been acting city manager since the resignation in September, 1992, of John V. Doane. Lasso was also acting city manager in 1989 and 1990 following the resignation of Anthony H. Griffin, who left the City to become deputy county executive for planning and development for Fairfax County.

Lasso has been city attorney for Falls Church since 1982. From 1977 to 1982 he was an Assistant County Attorney in Arlington, Va. While acting city manager, Lasso has continued to perform the duties of city attorney.

After receiving a Bachelor of Arts Degree with honors in Political Science from Moravian College in Bethlehem, Pa., Lasso went on to earn his Juris Doctor Degree from the University of Richmond in 1977. He enjoys golfing and working on old cars.

Lasso, 40, is a native of North Carolina and attended high school and college in Bethlehem, Pa. He and his wife, Karen Henenberg, also an attorney and substitute judge in the juvenile courts, live in Falls Church with their two sons, Kenneth, 9, and Benjamin, 3. Lasso's annual salary will be \$85,000 plus \$3,000 deferred compensation.

Continued on Page 5

FY94 Budget Proposed March 8

City Manager David Lasso will present the proposed fiscal year 1993-1994 budget to the City Council on March 8. A copy of the budget will be available for public review in the Mary Riley Styles Public Library, the Department of Financial Services and City Manager's Office beginning March 9. Following the presentation on March 8, the City Council will conduct a series of work sessions and public hearings on the budget ending with the scheduled second reading and adoption of the budget ordinances on April 26. A schedule of budget work sessions and public hearings will be posted in the City Hall the first week of March. Copies of the budget meeting schedule will be available in the City Manager's Office, City Clerk's Office and Department of Financial Services.

You Are Invited To

**A Salute to the
Silver Anniversary
of The Falls Church VPIS
Attic Treasures Sales**

Date: Friday, April 2, 1993
Time: 7:30 p.m.
Place: The Falls Church Woman's Club

To All Who Worked This Event Anytime Between 1968 - 1993

Dear Attic Treasures Sales Supporter and VPIS Member:

Please set aside the evening of Friday, April 2, 1993! On that evening the Falls Church Village Preservation and Improvement Society will honor and salute all who have worked at Attic Treasures Sales during the last 25 years. We shall also have the pleasure of honoring the person who created the idea and who was instrumental in the reestablishment of the Society in 1965. I refer to Louise Shepherd, who has promised to be with us on April 2. We shall also bestow a special award for Harold Silverstein, who, in addition to making many contributions to the Attic Treasures Sales, has played an instrumental role by bringing younger generations into the Society and by promoting the spirit of Falls Church.

By your participation in the Attic Treasures Sales over the past years, you became part of one of this City's strongest and oldest institutions.

For the past 25 years, the over 125 recipients of this invitation have helped to make this event an annual tradition and a principal fund raiser for many of our beneficial pursuits. Without the annual Sales, we would not have been able to:

1. Create the Elizabeth Graham Garden at Mt. Daniel School.
2. Plant memorial trees every year in City parks.
3. Landscape the three City-owned homes for the disabled.
4. Landscape the W. & O.D. Bike Trail.
5. Purchase the well-designed signs at the entrances to the City.
6. Commission the "Greensleeves" design for W. Broad St.
7. Commission the N. Washington St. architectural design study.
8. Sponsor the annual Falls Church Arbor Day.

(over)

9. Render assistance to the Cherry Hill Farmhouse and barn projects.
10. Support the restoration of our streams and streamvalleys.
11. Lead annual historic and tree appreciation tours for schoolchildren.
12. Administer the 100 Trees for 100 Years Program.
13. Print numerous publications of local interest.

These are but a few of the many projects your work has made possible.

But Attic Treasures Sales also served as a convivial social gathering place for our residents and business people. The Sales have been an outlet for our excess holdings and afforded an opportunity to Falls Church long before yard sales and recycling became popular. We thank you and honor you for making this possible.

Today, a new group of younger men and women are following in your tracks, looking for advice and guidance. And they would like to spend an evening sharing with you the experiences and memories of past Attic Treasures Sales. The Society's programs are being planned to help implement the spirit of Falls Church that was discerned in the Hyatt-Palma Report. These programs will hopefully culminate as part of a City-wide celebration of the Falls church Tricentennial in 1999.

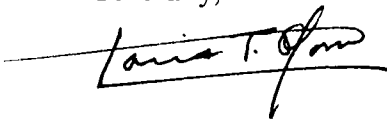

So please come and join us on Friday evening, April 2, 1993, to help us remember the Sales of the past and to hear about the Sales and VPIS of the future, which you have made possible.

Refreshments will be served. We will also have displays of special VPIS projects, such as the color-coded 3-D Model of the City.

Please give me a call at 532-3421 or Mary Ann Yancey at 532-5104 if you are planning to come, so that we can plan for refreshments and seating. **If you need a ride**, please indicate when you call, so we can make arrangements.

With pride in the accomplishments of this Society over more than a quarter century, and with anticipation of an equally productive future, I am

Cordially,

A handwritten signature in black ink, appearing to read "Louis T. Olom", with a long horizontal line extending to the left.

Louis T. Olom, President

P.S.: Please bring any Attic Treasures pictures or memorabilia that you can share at the party. Also, we are looking for copies of "By Fence and Fireside," from anyone willing to part with one.

Falls Church Village Preservation and Improvement Society
Post Office Box 6824 • Falls Church, Virginia 22040

February 25, 1993

Dear Fellow Members of VPIS:

I would like to remind you that this is membership renewal time again, to thank you on behalf of the Board for your past donations and to solicit your contributions for 1993.

During the past year, VPIS has continued to perform a unique and positive role in Falls Church. In 1992, your continued support helped make possible such projects as:

- Our Centennial Arbor Day Celebration (1892-1992)
- The planting of almost 100 trees on public land
- A study on protecting our stream valleys
- Work on the North Washington Street Design & Development Plan
- The historic tours for Falls Church School Children

This year, VPIS has embarked on a new vision: to prepare our membership and Falls Church residents for the upcoming **Tricentennial Celebration (1699-1999)**. The Board has decided to intensify our past efforts (Attic Treasure Sales, Arbor Day, Memorial Day, Independence Day events); but it will also develop new programs that will constitute the first phase of our efforts on the Road to the Tricentennial. Examples will include:

- Falls Church Heritage Tour - Sunday, June 13
- Summer Concerts in Cherry Hill Park
- Falls Church Earth Day - April 24
- Tree-of-the-Year Program - Tupelo is the 1993 Tree
- Publication of Douglas' "Historical News and Notes"

Those who renew their membership, and all Lifetime members, will receive additional information on these and other projects in upcoming issues of the "Village Way."

To support these programs, we are maintaining the traditional \$1 and \$10 categories in our 1993 Membership Drive, but we are inaugurating a new concept. Those who subscribe to a \$25 or greater annual membership prior to April 23 will be eligible to receive something from VPIS that will preserve and improve our community.

- \$ 25 - a 2-3' Tupelo Tree
- \$ 50 - a tree and a ticket (\$12.50 value) to our Heritage Tour
- \$100 - a tree, ticket and a copy of "Historical News & Notes"

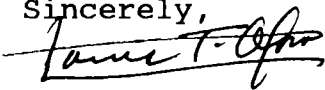

During the past three months, I've had the opportunity to get caught up on some of the above mentioned programs. And I come away with a feeling that a new, talented and capable group of people has emerged with innovative and fascinating ideas about means and ways of improving our City and our society. Most important is the

emergence of a strong effort to make us more conscious of the fragility of the physical environment in which the development of Falls Church has taken place. We believe that our studies and their findings could have an important effect on the future of our City.

Finally, it is your membership that keeps VPIS alive and active. It demonstrates your commitment to preserving one of Virginia's great historic communities. Please help us to assure the future success of the Society, the Tricentennial and our community by taking a moment to renew your annual membership, using the enclosed card and envelope.

Many thanks for your contribution and your steadfast support.

Sincerely,

A handwritten signature in dark ink, appearing to read "Louis T. Olom", written over a horizontal line.

Survival of the Small Town A Timely Topic for Annual Fall Meeting Speaker

Mark Schimmenti, Associate Professor of Architecture in City and Town Design at the University of Virginia will be the keynote speaker at the November 12 Fall Meeting of the Village Preservation and Improvement Society. Mr. Schimmenti's topic, "Survival of the Small Town" should be of particular interest to Society members and his speech will follow a short talk and slide presentation by John Maier, Chairman of the Natural Resources Committee, on "Small Parks in Our Town."

Mr. Schimmenti is the principal in his firm which specializes in design guidelines and master plans for cities, neighborhoods and new developments. His projects include master plans for the cities of Riviera Beach and Lequesta, Florida, urban design guidelines for

Kilmarnock, Virginia and new land plans for an equestrian village in Dade County, Florida, a residential neighborhood in St. Petersburg and a new town in Puerto Rico. He has worked on development plans for Stuart, Fort Lauderdale and Miami Beach, Florida, Austin, Texas and Berlin, Germany.

Combining his professional career with teaching, he has presented lectures and critiques on urban design at Columbia and the Universities of Pennsylvania, Maryland, California at Berkeley and Syracuse. He received the Young Architect Award from the Architectural League of New York in 1981, the Venice Biennale in 1985, the Paris Biennale in 1982 and was named one of "Ten Architects Who Will Change the 90's" by the Miami Herald in 1990.

JOIN YOUR FRIENDS, NEIGHBORS AND FELLOW VPIS MEMBERS AT THE ANNUAL FALL MEETING

Mr. Christian Marsh
Office on Environmental Policy
The White House

Washington

Perchtoldsdorf, 14.4.1993

Dear Mr. Marsh,

Some weeks ago I sent the fax attached to Mrs. McGinty.

It seems like an Austrian invasion. Our Minister for Environmental Protection, Mrs Rauch-Kallat, visited Mrs. McGinty some days ago. Now a delegation of top representatives from the Austrian Parliament and from the Ministry for Environmental Protection will stay in Washington from April 22 to April 29 noon.

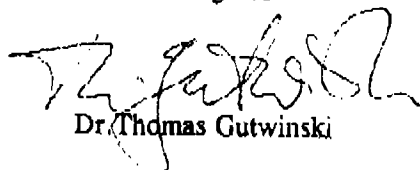

We would be very pleased to meet Mrs McGinty and her staff in a brief meeting, to build up a personal contact and also discuss a invitation to Austria.

There is a high interest in the new administrations environmental policy in Austria. We believe that from your side there will be also some interest in European environmental policy.

We therefore propose to organise a meeting in Austria where we invite a small group of governmental experts in Environmental Policy from some leading European countries and the US. These representatives should in their countries have a similar rank like your office.

We are looking forward visiting your office

with best regards

Dr. Thomas Gutwinski

SUBJECT: Request for Appointments with Delegation from
Austrian Ministry of the Environment

DATE: April 19, 1993 PAGES (including cover): 7

MESSAGE

Please see the following request for meetings with this high level delegation from Austria interested in information about U.S. practices on contaminated waste clean-up.

Thank you for your attention to this request.

**United States
Information
Agency**

Washington, D.C. 20547

April 19, 1993

Ms. Kathleen McGinty
Office of Environmental Policy
The White House
1600 Pennsylvania Avenue, N.W.
Washington, D.C. 20500
ATTN: Mr. Christian Marsh

By FAX

Dear Ms. McGinty:

At the request of the American Embassy in Vienna, our office at the U.S. Information Agency has been asked to arrange a short, professional, Voluntary Visitor's program for a high level delegation from Austria who will be examining American policies and experience in the disposal of contaminated waste. This ten-person delegation, which includes three members of the Austrian Parliament, four senior officials from the Ministry for Environment, two local government officials, and a private businessman, will visit Washington between April 26th and April 29th, 1993.

According to the information I received from our Embassy, one of the members of the delegation -- Dr. Thomas Gutwinsky, owner of his own waste management company -- has already been in contact with your office about setting up a meeting which could focus upon international liability laws, the Basel Convention, and other relevant experiences..

I realize your own time is very limited as you create your new office and determine its focus, but I sincerely hope that you could meet with this delegation for approximately one-half hour, at your convenience, on April 26th, 27th, or 28th. I would hope that potential contact between your office and this Austrian delegation would be mutually beneficial and could lead to collaboration with them on an international scale.

I apologize for the very short notice of this request, but unfortunately we were not aware of the delegation's visit until late last week. I shall take the liberty of following up this request with a telephone call to Mr. Marsh later this week, unless he could give me a response to this request as soon as you are able to consider it.

I remember very well how kind you were to accommodate one of our Swedish visitors in late October, at the height of the campaign season, and I hope our current visitors from Austria can have the same privilege of meeting with you.

Thank you again for consideration of this request -- and I'll give your office a follow-up call in the next few days.

Sincerely,

Katharine S. Guroff

Katharine S. Guroff
Senior Program Officer
Voluntary Visitors Division
Office of International Visitors

BIOGRAPHIC INFORMATION

for

**The Federal Ministry for Environment, Youth, and Family Affairs
Delegation**

from

Austria

This distinguished group will be visiting the United States
from April 26-30, 1993
under the auspices of
International Visitors Program of the U.S. Information Agency

PROFESSIONAL OBJECTIVES:

This high-ranking delegation, composed of three Members of the Austrian Parliament, senior officials in the Ministry of Environment, local politicians, and a waste management businessman, is seeking information about contaminated waste disposal and the clean-up of contaminated sites. They are interested in visiting at least one cleared site and obtaining an overview of legislative and technical experience with the Superfund law. The delegation requests appointments with administration officials and representatives of industry to discuss current and future environmental regulations. The visit by this delegation follows closely upon a recent visit of the Minister of the Environment to Washington and will give an important cross-section of environmental leaders an opportunity to discuss these matters with their American counterparts.

April 1993

LETTER OF INTRODUCTION

Three Alaskans, Mr. Rick Steiner, Ms. Riki Ott, Ph.D and Mr. Stan Stephens, all of Prince William Sound, seek the opportunity to visit your office to talk about several critical oil issues in Alaska. We will be in Washington, D.C. the week of April 19-23.

We are traveling as volunteers and concerned citizens working towards a citizens' perspective on what must be accomplished by us all to achieve environmentally sound oil development in Alaska. Mr. Steiner was profiled, and Dr. Ott mentioned, in the recently released book entitled, "For the Wild Places," in which Mr. Al Gore, wrote the foreword stating that these types of efforts, "when multiplied many times over, will help us forge a path towards sustainable development."

Mr. Steiner is an Associate Professor of Fisheries with the University of Alaska at its extension office in Cordova and a fisherman in Prince William Sound. Rick helped define the terms of the Oil Pollution Act of 1990, including formation of the Regional Citizens' Advisory Council, and was involved in behind-the-scenes activities that led to the \$900 million civil settlement from the Exxon Valdez spill. He is currently working for habitat acquisition with the settlement monies.

Dr. Ott is President of the Oil Reform Alliance, a coalition of commercial fishing and environmental organizations which formed after the Exxon Valdez oil spill to reform oil industry practices. Riki has a Masters and doctorate in marine pollution. She fishes commercially in Prince William Sound.

Mr. Stephens is President of the Regional Citizens' Advisory Council which is mandated by the Oil Pollution Act of 1990 to oversee Trans-Alaska Pipeline System (TAPS) operations in Port Valdez. Stan operates a charter boat business from Valdez.

We have summarized our concerns in a 36 page report entitled "Status Report on Alaska's Oil Industry: A Blueprint for Improving Performance" which addresses North Slope, TAPS and Cook Inlet operations. Our concerns focus on irresponsible waste disposal practices, inadequate government oversight for monitoring and compliance, structural integrity of the TAPS pipeline and TAPS trade tankers, and inadequate spill prevention measures (tug escort).

The "Status Report" also addresses aftermath of the Exxon Valdez oil spill. Our concerns here focus on long-term and ongoing damage to fish and wildlife, damage to fishermen, Natives and municipalities, damage to cleanup workers' health, squandering of civil settlement monies, and lack of followup with requirements of the Oil Pollution Act of 1990.

We would welcome the opportunity to share not only our concerns with you, but also our solutions. None of these problems are insurmountable and we firmly believe these issues must be addressed before the oil industry is allowed into other environmentally sensitive areas in Alaska - notable the outer continental shelf lands.

We look forward to meeting with you.

Mr. Trey Lindseth
Office of Environmental Policy
Old Executive Office Building
Room 358
Washington, D.C. 20501

Dear Mr. Lindseth:

I am writing on behalf of Dr. Riki Ott, Mr. Stan Stephens and Mr. Rick Steiner, three Alaskans who live in Prince William Sound and are active in helping to protect the Alaskan environment. Dr. Ott, Mr. Stephens and Mr. Steiner seek the opportunity to visit with Ms. McGinty to discuss oil spill prevention issues critical to Alaska. They will be in Washington, D.C. the week of April 19-23.

Dr. Ott is President of the Oil Reform Alliance, a coalition of commercial fishing and environmental organizations which formed after the Exxon Valdez oil spill for the purpose of reforming oil industry practices. Dr. Ott has a masters and doctorate in marine pollution. She fishes commercially in Prince William Sound.

Mr. Stephens is President of the Prince William Sound Regional Citizens' Advisory Council, an organization established pursuant to the Oil Pollution Act of 1990 to oversee Trans-Alaska Pipeline System (TAPS) operations in Port Valdez. Dr. Stephens operates a charter boat business from Valdez.

Mr. Steiner is an Associate Professor of Fisheries with the University of Alaska and its extension office in Cordova and a fisherman in Prince William Sound. Mr. Steiner helped to define the scope of the Oil Pollution Act of 1990, including the formation of the Regional Citizens' Advisory Council, and was involved in behind-the-scenes activities that led to the \$900 million civil settlement between Exxon and the state and federal governments.

Mr. Trey Lindseth
April 2, 1993
Page 2

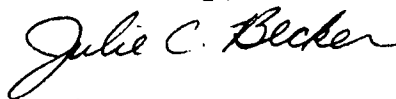

They have summarized their concerns in a 36-page report entitled Status Report on Alaska's Oil Industry: A Blueprint for Improving Performance which addresses North Slope, TAPS pipeline and TAPS trade tankers, and inadequate spill prevention measures (tug escort). The Status Report also describes the aftermath of the Exxon Valdez oil spill. Please let me know if Ms. McGinty has not yet seen the Status Report and would like a copy.

Their concerns focus on long-term and ongoing damage to fish and wildlife; damage to fishermen, Natives and municipalities; squandering of civil settlement monies; damage to cleanup workers' health; and lack of followup with requirements of the Oil Pollution Act of 1990. Dr. Ott, Mr. Stephens and Mr. Steiner would welcome the opportunity to share not only their concerns with Ms. McGinty, but also their solutions. They firmly believe that none of these problems are insurmountable, but that the issues must be addressed before the oil industry is allowed into other environmentally sensitive areas of Alaska -- notably the outer continental shelf lands.

I trust that Ms. McGinty will want to meet with this extraordinary and dedicated group, and would appreciate your contacting me at the telephone number above to set up a meeting date.

Thank you for your kind consideration.

Yours truly,

Julie C. Becker

Washington, D.C. 20501

Dear Ms. McGinty:

The Liaison Committee of the Association of American State Geologists will be in Washington, D.C. April 19-22, 1993 to visit Federal agencies and Congressional offices. We would appreciate an opportunity to meet with you and your colleagues to discuss improved Federal-State cooperation on earth science issues and programs, especially geologic mapping, and related environmental protection and mineral and energy resource delineation. We welcome your suggestions on discussion topics so that our visit will be productive from your standpoint.

We would prefer to visit with you at 1:00 p.m. on Thursday, April 22, 1993, if that time is convenient. Please call me or Angie Karel at 503-731-4600 to confirm the arrangements.

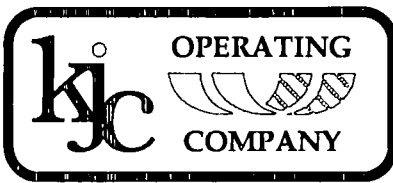

I am enclosing a copy of the brochure that describes our Liaison Committee. Please do not hesitate to call me if you have questions or if we can provide you with additional information.

Sincerely,

Donald A. Hull, President-Elect

Re: Invitation to Visit the World's Largest Solar Power Facility

Dear Ms. McGinty:

All of us here at the world's largest producer of solar electric power invite you to come visit our facility. Our young industry, commercial solar power, has been struggling in the last few years, and we are hopeful that the new administration will help nourish solar power back to health.

Please consider a visit to our facility by President Clinton or Vice President Gore on Earth Day, April 22. They could call attention to an environmentally superior technology that is available for commercial application today. This is a technology that reduces pollution, reduces dependence on foreign energy sources, and creates local jobs. What better way to celebrate Earth Day than with a backdrop of one million square meters of sun-harnessing mirrors?

Please let me know if you and the President or Vice President can join us for Earth Day, or any other time that may fit your schedules. I would be happy to supply you with detailed information, and I look forward to showing you our facility first-hand.

Sincerely,

A handwritten signature in cursive script that reads 'David M. Rib'.

Katie:

This is OK
See attached

Dear Trey,

We would like to invite Ms. Kathleen McGinty, Director of the White House Office on Environment Policy, to attend The First Annual Earth Day Awards dinner in New York City on April 22, 1993.

We will be honoring artist Robert Rauschenberg and Senator Gaylord Nelson.

We feel it is appropriate that Senator Nelson be recognized for his lifetime accomplishments on behalf of our environment. As the founder and father of Earth Day over 23 years ago, he is a visionary who has not been adequately thanked for his dedication to the planet.

The other recipient of an award is the famous artist Robert Rauschenberg. He produced one of the first Earth Day posters in 1970 and 1990 and also painted the official painting of the Earth Summit titled "Last Turn-Your Turn" for the United Nations. The proceeds of the sale of those posters support the United Nations.

Ms. McGinty would have the opportunity to address the guests if she sees fit to do so.

The black tie awards ceremony will take place on Earth Day, April 22, 1993 at: The National Arts Club, 15 Gramercy Park South (on 20th street between Park Avenue and Irving Place) New York, New York 10003. Reception is 6:00 pm with dinner and the award presentation following.

Members of the dinner audience include the Presidents and CEOs of major American corporations such as BMW of North America, Church and Dwight, Johnson & Johnson and other corporations which are now including the environment in their corporate philosophy.

The event and speakers will be featured in an Earth Day supplement in The New York Times. I will call you to discuss the details, and thank you for your consideration. I can be reached at 212-979-9500 if you have questions or suggestions.

management or political campaigns may accept meals, lodgings, transportation and other benefits, including free attendance at events, when provided, in connection with such active participation, by a political organization described in 26 U.S.C. 527(e). Any other employee, such as a security officer, whose official duties require him to accompany an exempt employee to a political event may accept meals, free attendance and entertainment provided at the event by such a political organization.

Example 1: The Secretary of the Department of Health and Human Services is exempt from the noted Hatch Act restrictions. He may accept an airline ticket and hotel accommodations furnished by the campaign committee of a candidate for the United States Senate in order to give a speech in support of the candidate.

(g) Widely attended gatherings and other events. (1) Speaking and similar engagements. When an employee is assigned to participate as a speaker or panel participant or otherwise to present information on behalf of the agency at a conference or other event, his acceptance of an offer of free attendance at the event on the day of his presentation is permissible when provided by the sponsor of the event. The employee's participation in the event on that day is viewed as a customary and necessary part of his performance of the assignment and does not involve a gift to him or to the agency.

(2) Widely attended gatherings. When there has been a determination that his attendance is in the interest of the agency because it will further agency programs or operations, an employee may accept a sponsor's unsolicited gift of free attendance at all or appropriate parts of a widely attended gathering of mutual interest to a number of parties. A gathering is widely attended if, for example, it is open to members from throughout a given industry or profession or if those in attendance represent a range of persons interested in a given matter. For employees subject to a leave system, attendance at the event shall be on the employee's own time or, if authorized by the employee's agency, on excused absence pursuant to applicable guidelines for granting such absence, or otherwise without charge to the employee's leave account.

(3) Determination of agency interest. The determination of agency interest required by paragraph (g)(2) of this section shall be made orally or in writing by the agency designee.

(i) If the sponsor is a person who has interests that may be substantially affected by the performance or nonperformance of an employee's official duties or an association or organization the majority of whose members have such interests, the employee's participation may be determined to be in the interest of the agency only where there is a written finding by the agency designee that the agency's interest in the employee's participation in the event outweighs concern that acceptance of the gift of free attendance may or may appear to improperly influence the employee in the

Dear Ms. McGinty:

On behalf of the Metropolitan Washington Council of Governments (COG), congratulations on your appointment to the Office of Environmental Policy.

I am writing to invite you to be a ~~featured speaker~~ at the Council of Government's Business Recycling Awards luncheon ~~on April 22, 1993~~. This awards program is the first for the Washington region. The event will be held from noon to 2:30 PM at the National Press Club. The audience will be representatives of businesses and commercial buildings that have implemented exceptional recycling programs. These business people will be recognized for their efforts to improve the environment. The audience will also include representatives from the recycling industry in the region and local government recycling coordinators.

We would be truly honored if you would speak at this meeting for approximately 20 minutes and share with us your vision for the Office on Environmental Policy and the environment, as well as the new administration's perspectives on managing solid waste and recycling.

COG has a long successful track record in many environmental areas. COG, a voluntary regional organization of the area's local governments, is the region's federally-designated planning organization for water quality and air quality, in addition to being active in recycling and solid waste issues. I have taken the liberty to enclose a brochure on COG for your information.

You may call Joan Rohlf at (202) 962-3358 if you have any questions regarding this event. I look forward to hearing from you and hope that you will be able to accept our invitation.

Sincerely,

Ruth R. Crone

Office of the Vice President
Old Executive Office Building
Washington, D. C. 20501

Dear Ms. McGinty:

On behalf of the Thirty-fifth Session of The Senior Seminar of the Department of State, it is my honor to invite you to meet with the Members. Ours is the most senior training program in the United States Government, and we focus intensely on global issues. Given your expertise and concern over the global environment, we believe your views are very relevant to our work.

As noted above, the Seminar is the ranking executive development program for career officials of the United States Government. Members are chosen on a highly selective basis by their respective agencies. The nine-month program has been conducted annually since 1958. This year's Seminar is comprised of 30 men and women, half of whom are State Department Foreign Service Officers; the other half represent the uniformed services and other government departments and agencies with foreign affairs/national security responsibilities.

Our hope would be that you would discuss issues such as air and water pollution, deforestation, land degradation, global warming and ozone depletion. We are also studying the qualities and principles of leadership and would welcome your thoughts on how you have developed your skills during your career, and what should be expected of government leaders.

Our usual format is for the speaker to give a presentation of about 30 minutes with an additional 45 minutes for an informal question-and-answer period. Some speakers prefer to make a few remarks and open the session to questions. All our sessions are privileged and strictly off the record.

done
over
we
minded
H

2.

Before this academic year is over, we will have met also with several Cabinet members, including the Secretaries of State and Defense. We will have been exposed to a very wide range of opinion on the environment and the other issues of the day.

It would be a privilege to hold the meeting in our conference room on the 12th floor in our Foreign Service Institute's building which is located at 1400 Key Boulevard, Arlington, Virginia. We would be delighted to go, however, to your office, should you so wish. We have set aside the afternoon of April 21, mornings of April 22 and 23. Recognizing your busy schedule, we would gladly modify our schedule in order to get a chance to hear you speak on this most important issue. The morning schedule blocks are usually from 9:00 to 11:00 a.m. and the afternoon blocks from 2:00 to 4:00 p.m.

I am enclosing an information sheet which gives a brief description of the Seminar and a brochure with brief biographic sketches of the Members.

Should you have any questions or would like to firm up a time for the meeting, please call me at (703) 875-5354.

I believe you would find the Members of the Thirty-fifth Seminar a diverse and interesting group and your session with them intellectually stimulating. I can think of no better way of conveying the importance of the environment to tomorrow's ambassadors and generals, than hearing from you.

Sincerely,

A handwritten signature in cursive script, appearing to read "Fernando E. Rondon".

Dean

Enclosures as stated

THE SENIOR SEMINAR

FOREIGN SERVICE INSTITUTE · DEPARTMENT OF STATE

THIRTY-FIFTH SESSION
August 31, 1992 - June 4, 1993

STATEMENT OF PURPOSE

The Senior Seminar is the most advanced professional development program available to senior foreign policy and national security officials of the United States Government. The academic year-long program has been conducted since 1958 by the Foreign Service Institute of the Department of State.

The purpose of the Seminar is to ensure that its participants:

- Enhance their leadership and executive skills in preparation for top-level assignments abroad and in the United States;
- Develop an appreciation of the role of the different foreign affairs agencies and the Congress, seeking to improve overall understanding, cooperation, and coordination;
- Know and reflect the values and ideas which shape our country, broadening their comprehension of current domestic issues and the institutions that protect and influence the nation's agenda;
- Study major international issues, and understand how domestic priorities and values influence the crafting of a viable national security policy.

The Seminar's curriculum stresses the relationships among domestic, foreign and national security policies. It seeks to open new horizons, revitalize understanding of our country and its diversity, and promote intellectual and professional growth. Members study a wide variety of problems, issues and trends in the United States, relating them to international affairs and national security; and they practice leadership and senior executive skills such as team-building, negotiations and public speaking.

The learning process takes place through extensive reading, field trips, individual research assignments, group projects, case studies, simulations, practical work experiences, and meetings with prominent academics, public officials, businessmen, labor leaders, journalists, representatives of interest groups, and ordinary American citizens.

The Seminar is made up of civilian and military officers from the different foreign affairs agencies and the uniformed services.

Dear Kathleen:

On behalf of the Bureau of National Affairs, Inc. and Business Development Associates, I am pleased to confirm your participation at "The National Environmental Regulation Institute." The conference is scheduled for April 20-21, 1993 at the Mayflower Hotel in Washington, D.C.

We are putting together a substantial notebook for distribution to conference attendees at the meeting. The handout material is an important part of guaranteeing those in attendance the best educational experience possible. Long after the program is over, notebook materials serve as a reminder of the speakers and their expertise on a given subject. Therefore, please send to me a copy of your presentation no later than March 25, 1993.

HOW TO PREPARE YOUR WRITTEN MATERIALS

Your material can be either text or a substantive outline. If you submit text, please make sure that it conforms to your topic(s) on the program. If in outline format, it is urged that your material be approximately 10-20 pages in length.

ACCOMPANYING MATERIALS ARE ALSO VALUABLE

In addition to your presentation, we would appreciate your providing any additional supplementary or background material (articles, checklists, charts, etc.) that you believe the attendees would find useful. Please send this supplementary material along with your presentation. Any copyrighted articles should be accompanied by a signed release.

NEW YORK, NY
219 West 81 Street / Suite 11C / New York, NY 10024
PHONE 212 769 1594 / FAX 212 874 7093

YOUR BIOGRAPHY

Please send us, along with your presentation, a copy of your biography. It should, in no cases, exceed one page. Two to three paragraphs is ideal.

ABOUT SLIDES AND OVERHEADS

If you will be using overheads or 35mm slides, please send a photocopy of them for inclusion in the notebook. Attendees like to follow along and make notes on the paper copy in their books. We strongly urge that your written presentation be more than just a copy of your slides.

THE SCHEDULE

I have enclosed a copy of the brochure detailing the schedule. Please note your specific time on the conference. I have attached a listing of all panelist addresses and telephone numbers for your convenience.

SUBMITTING YOUR PRESENTATION

Please submit your presentation, (and wherever possible, your supplementary material) and biography in original form, double-spaced, single-sided on 8 1/2 by 11 paper so that we can be certain it will reproduce well. If originals are not available, please insure that the pages you send are clear, free of markings in the margins etc. Reproduction of materials is not a reimbursable expense. Please make every effort to have all material to us by the March 25th deadline. If you have a problem, please contact me.

Please send all material to: Business Development Associates,
1225 Eye Street, N.W., Suite 1200, Washington, D.C. 20005.

Thank you again for agreeing to participate on what is certain to be a terrific conference. I will be in contact as the meeting date approaches. If you have any questions at all, in the interim, please do not hesitate to call.

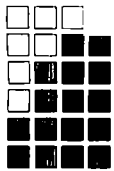

Best regards.

Sincerely,

A handwritten signature in black ink, appearing to read "Beth". The script is cursive and fluid, with the letters connected.

Beth Janoff

P.S. I have enclosed 25 brochures for you to send colleagues and clients. Please call if you need additional copies.
