I am writing to you about the Marine
Mammal Protection Act. It is March 28th
and I have just found out that President Clinton
is thinking of changing the Marine Mammal
Protection Act. I am in the 5th grade and my
math teacher Mrs. Harmon of South Lawn School
Amarillo Tx. is very upset and so are my
classmates. With the advanced technology we humans
have we could probably be able to kill at least
two whales at a time. I may have a child one
day and I would like for that child to be able
to know what a whale is. What if you perhaps
miss a whale with one of your exploding spearheads
and there is a group of sea otters near by. It
hits a sea otter and explodes. There is a race
that we didn't want to kill. You may see my
point you may not, but if I have to write
500,000 letters to stop the changing of this
law I will.

An American Citizen,

I am writing to you about the Marine Mammal Protection Act. I'm a 5th grader at Southlawn Elementary and I have seen the senseless killing of these beautiful, graceful creatures and it is horrible. Whales are endanger of becoming extinct and unless we protect this law they will be completely wiped out.

I am writing in regards to the Marine Mammal
Protection Act. I believe that whales should never be
killed. The Marine Mammal Protection Act is a
great idea. We should try to protect the whales
any way we can. Whales are very important to the
sea environment. Every animal that whales produce when
killed have replacements. Please do not repeal the
Marine Mammal Protection Act.

I'm writing to you in regards of the
Marine Mammal Protection Act. It is a crime
to enter the ocean and wipe out any kind of mammal
in the ocean. If you kill a whale you should be punished
exactly the same way. A whale is a calm and gentle animal.
You don't need any meat from whales, we have tons of other meat.
We don't need anything from whales in the modern life that we can't get
somewhere else. I'm a 5th grader at South Lawn Elementary

I'm writing to the Marine Mammal Protection Act. I'm in fifth grade & go to South Lawn Elementary. I have seen these beautiful whales dying because the government just wants to make it for purses, jackets, & especially finger nail polish. Most of us don't even need the stuff you make out of whales. I think we should put ourselves in the position some whales are in & think how we would feel if someone was shooting arrows & trying to capture us in nets. When I grow up and have kids I want them to be able to see the beautiful whales & some of the other endangered fishes that you are killing. All I want to know is why do we have to use up all the beautie of the ocean.

the Marine Mammal Protection Act.
I'm in the 5th grade at South

If you have seen some of
the things we used to do to
whales. In the voyage of the
Mimi I learned that perfume is
whales. They have not done any-
thing to use but we have to
kill them. For the people who
do care about the whales
are trying to keep the law.
But the people now, do not
care about the whales. Want
a good clean environment
are the people that are killing
the whales. What's a good

I am writing to you about the Marine Mammal Protection Act. We are learning about whales in science, we have even adapted whales in each of our classes. I think that President Clinton's idea to let it be legal to kill whales is wrong. Well, look at it this way should we kill whales to satisfy other countries or should we let people kill our whales and let them become extinct.

I am writing in regards to the Marine
Mammal Protection Act. The President made an
imprecise decision on making this act come to effect.
For this has come to the attention of my fellow
classmates and I. This will be a horrid decision.
As to the wanting to be like Norway, the President
is thinking an obscene decision. The reason for
this letter is for the concern for the whales. The
teaching of whales would be incomplete without
a real life whale to look at. If the President
does not veto this act he will lose a lot of
people's interest in him.

I'm writing in regards to the Marine Mammal Protection Act. I think we should keep the law because they are using fast boats and deadly weapons to hunt the whales. We need the whales for modern day life. I think they should not be able to hunt them. I checked out a book about whales. In Norway many whales were killed and some not even. Touch some carcasses. It is very nauseous on board a whaling ship. The whales are floated open aboard. Since whales are scarce in some areas I think President Clinton should uphold the law.

I am writing to you about the Marine Mammal Protection Act. I am a fifth grader from South Lawn Elementary. We have studied whales all year long and even adopted one of our very own. In fact we have adopted 3 in all. Whales are very spectacular mammals. I am sure our kids and their kids both would want to see some whales, but if they become extinct what will they look at in the ocean? Let's all get together to save these graceful mammals, instead of killing them for ours, and other countries.

I'm a fifth grade student and I'm concerned about the Marine Mammal Protection Act. Bill Clinton is going to pass the act to kill whales. Whales were protected from hunting and need to stay that way. If people hunt whales and they become extinct it will disrupt the food chain. Also the men that hunt whales will be rich for a while but when whales become extinct they won't make any money and will be right back where they started. We Americans need to save the whales.

We must resist Japan's efforts in the International Whaling Commission to end the moratorium on commercial whaling. Dear President Clinton,

My class contributed money to adopt a whale many months ago. Here is our adoption certificate.

We were deeply concerned when the International Wildlife Coalition told us you are supportive of commercial whaling and of countries which participate in it.

We feel strongly about this issue and would like to influence you to change your mind and not support commercial whaling.

Sincerely,

Dear president Clinton,
please stop killing whales. Whales
are important to our class. Please
give them protection. I have counting on
us to save them. The whale we adopted
is Salt, Salt has 6 baby's. Salt costed
us twenty dollars and if she's killed then
all the money goes to waste. When
you kill them it's like murder. Put
yourself in there life. Always having
to watch out for people. You have
to watch out that you don't die. When
I grow up the whale might be
extinct And my kids might not
ever get to see one. It hurts to

Dear Kathleen McGinty,

I am a teacher of 6th, 7th and 8th grade students in San Jose, CA. We have been studying whales. We "adopted" a female humpback by the name of Columbia, and went whale watching on our last field trip. It was an awesome spectacle to see creatures of such beauty and size. Our whale watching trip was not limited to whales. We saw sea lions, jelly fish, star fish and pelicans. My students were thrilled with the experience and are very sincere about wanting to be sure ALL marine life is safe.

We are concerned about the moratorium on commercial whaling being lifted at the next meeting of the International Whaling Commission.

My students have used their own classroom fundraiser money to support the International Wildlife Coalition. The enclosed petition was their idea. Two of my students actually designed it's format and printed it up on the school computer.

We need your help, seeing to it that whales as well as all other marine life are safe in the world's waters.

Thank-you for your time and commitment to public service,

Mrs. Debbie Erbstoesser

Dear Mrs Kathleen McInty,

I am an 8th grader at Windmill Springs year around school. We've been studying about whales, and have heard about the moratorium on commercial whaling being lifted. I have been crushed by this news. I am a student from Windmill Springs in San Jose. My class has been studying whales. We are concerned about the moratorium being lifted on commercial whaling. Our class has been writing letters to other people and right now my classmates and I are bringing a petition around the school for everyone to sign. Our class really cares about these mammals and we would like to preserve them. We even adopted a whale. She's a grandmother and her name is Columbia. We really hope that she turns into a great-grandmother. If the moratorium is lifted then we won't be able to see our Columbia and other whales live longer. Please do something to help our whales.

Dear Mrs. Kathleen M^o Ginty,

I want to know why the President is saying yes to lifting the moratorium on commercial whaling? What would happen to the whales if people start killing whales? There wouldn't be any more whales for us to see on whale watching trips! I think it's a bad choice to kill whales because whales are mammals like humans. They give birth, they come up for air they even talk to each other. I just love their voice. We adopted a whale and she is a Grandmother, and she would be a Great Grandmother but if you say yes to commercial whaling there is little chance she will be one.

Sincerely, James

Dear President Clinton

Please stop whale
hunting. Whales are living
things like us. They are
not hurting us. We don't
want them to be
extinct. Now will you stop
whale hunting?

Sincerely,
Evan Schaele
