Subject: July 29 briefing on the Congo Expedition (environmental education)

We'd like to invite you and your staff to join us for a briefing on the Congo Expedition.

On Friday, July 29, OSTP is hosting the Alliance for Environmental Education for a multimedia presentation on the Congo Expedition, a group of adventurers that is retracing Henry Stanley's 1874 trip across Africa (see enclosed information). The meeting is scheduled for 12:30-1:30 p.m. in Room 476.

The team is performing many scientific experiments during their travels, including water quality and ozone monitoring, and they are relaying their findings to scientists and students across Africa and around the globe. Schools throughout the U.S. and the world are following the steps of the Congo Expedition via interactive satellite links and are learning more about the countries through which the group is traveling and about the environment.

Dr. Gibbons delivered a talk to the team and students around the U.S. at an interactive videoconference kicking off the expedition during Earth Week 1994.

Please let us know if you would like more information. We hope you will attend.

MEMORANDUM:

TO: KATHLEEN MCGINTY
FROM: STACY ISAACSON
DATE: JULY 12, 1994
RE: SCHEDULING REQUEST

David Rosenberg, Executive Vice President of Environmental Compliance Services (ECS) Incorporated, would very much appreciate the opportunity to meet with Kathleen McGinty during the week of July 18, 1994. Mr. Rosenberg is a formidable expert on environmental liability issues. For your convenience, I have provided background information below.

ECS Inc., based in Bixton, PA, specializes in a variety of environmental services, including insurance underwriting, environmental consulting and risk management. Through its subsidiary, ECS Underwriting, the firm underwrites an innovative national program of insurance for companies whose activities impact on the environment, in addition to commercial and industrial property owners, real estate developers and lending institutions.

David Rosenberg, as Executive Vice President of ECS, serves as Corporate Counsel. Specializing in the areas of environmental and corporate law, Rosenberg ensures that ECS complies with the requirements of all insurance, environmental and corporate regulations. Mr. Rosenberg also manages the overall administration and operation of the Marketing Department.

Prior to joining ECS, Rosenberg practiced law in Washington, DC, where he specialized in the areas of environmental, personal injury and real estate law. Rosenberg is a member of the Bar of the Supreme Court of Pennsylvania, U.S. District Court for the Eastern and Middle Districts as well as the Pennsylvania Bar Association, American Bar Association, and the Association of Trial Lawyers of America. A graduate of Pennsylvania State University, Rosenberg holds a J.D. Degree from the Howard University School of Law, Washington, DC.

Rosenberg's legal and professional background make him a formidable expert on environmental issues. A published author on the subject of pollution liability, Rosenberg has written a number of editorials and articles on this topic for such publications as Mealey's Litigation Report, The Journal of Commerce, New Jersey Law Journal, Business Insurance, and Environmental Protection News.

Page 2

In addition, Rosenberg has submitted testimony before numerous state legislatures and before Congress on the subject of pollution liability, most recently before the U.S. Senate Committee on Banking, Housing and Urban Affairs, as well as the House of Representatives Committee on Banking, Finance and Urban Affairs Subcommittee on Policy Research and Insurance.

Rosenberg is also an active participant in the current debate to reauthorize the Comprehensive Environmental Response, Compensation and Liability Act (Superfund). Rosenberg has worked extensively with Congressman Bill Richardson (D-NM) to develop legislation (H.R. 3572) to establish minimum standards for the training and certification of environmental professionals, passed as an amendment to Superfund reauthorization legislation in the House Energy Committee. In addition, Rosenberg played an instrumental role in the development of the Environmental Protection Agency's January, 1993, regulations concerning contractor indemnification. Finally, Rosenberg is a strong supporter of Vice President Al Gore's Plan to Reinvent Government.

Mr. Rosenberg's involvement in the initiatives listed above demonstrate his commitment to the development of sound public policy and responsive government. Please let me know what times are convenient to meet with Mr. Rosenberg during the week of July 18th. I look forward to hearing from you in the near future.

July 11, 1994

Katie McGinty
Deputy Assistant to the President
Director, Office of Environmental Policy
17th and Pennsylvania Ave., NW Room 360 OEOB
Washington, D.C. 20500

Dear Katie:

As part of WRI's ongoing program of activities promoting sustainable development in the Amazon region, we will have the pleasure of meeting with Peru's Ambassador Jorge Voto-Bernales in our offices on Tuesday, July 26, 1994.

Aside from the technical work planning meetings we will have with the Ambassador and his delegation, we are also planning a small, informal lunch with a select group of key decision makers from the Washington community. I would like to invite you to this lunch to be held at 12:30 p.m. on July 26 in the Executive Room of the Maison Blanche Restaurant (1725 F Street, NW, Liberty Plaza).

On his first trip to Washington since being appointed by President Fujimori to the post of Secretary of the Pro Tempore Secretariat of the Amazon Cooperation Treaty, Ambassador Voto-Bernales will provide us with a vision of where he hopes the Treaty members will move over the coming years given their commitments to implement sustainable resource use throughout the Amazon region.

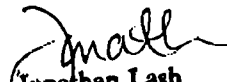

Specifically, the Ambassador will discuss the current status of efforts to harmonize activities of the governments of the Amazon countries, drawing attention to various initiatives underway and proposed to increase the value of Amazonia's extraordinary biological diversity in the eyes of the people who inhabit the region. He will also discuss the current and potential role of international cooperation, especially from the United States, to work with the governments of the Amazon to promote sustainability.

Ms. Kathleen McGinty
Deputy Assistant to the President and
Director of the White House Office on Environmental Policy
OEOB
Washington D.C. 20037

Dear Ms. McGinty:

On behalf of the American Embassy London and the U.S. co-sponsoring firms, I am pleased to extend this invitation to Vice President Gore or yourself to give the keynote address at our forthcoming European Environmental Initiative 1994, to be presented here July 12-13.

This region-wide event is a specific outgrowth of the Administration's strategic initiative to enhance the competitiveness of the U.S. environmental technologies industry and increase exports. We ask that you give the opening address on July 12th. Other speakers who would share the platform with you for this conference include the UK Minister of Environment, the Chairman of the European Parliament's Committee on Environment, and the head of the newly created European Environmental Agency.

In addition, twenty-five new-to-market U.S. companies will be participating in the conference, seeking one-on-one business appointments we are arranging. Also attending will be many that purchase commercial representation through European firms looking for U.S. environmental products and services.

This trade conference is a unique landmark effort by the U.S and Foreign Commercial Service in support of public and private sector cooperation.

We sincerely hope you can attend.

Very truly yours,

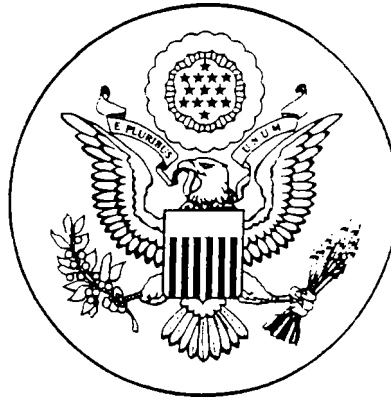

Kenneth P. Moorefield
Minister Counselor
for Commercial Affairs

Encl: Conference program

EUROPEAN ENVIRONMENTAL INITIATIVE 1994

July 12-13, 1994

Sponsored by

U.S. Department of Commerce

and

Chase Manhattan Bank N.A.

Lovell White Durrant

Motorola

Rust Limited

Waste Management International

U.S. Embassy, London

Concept

Significant commercial opportunities have been created in Europe for U.S. firms. Existing and pending EU legislation, increasingly stringent regulatory compliance, public demand for industry to be environmentally responsible and a desire on the part of industry to implement proactive environmental strategies are key factors influencing the market.

The event will have two components:

- Conference addressing trends shaping the commercial environment, and the resultant changes on business and technology
- Business Meetings between U.S. exporters and potential European commercial representatives.

Conference Focus

- European Legislation and Regulatory Trends
- Environmental Stewardship
- Technology Development
- Financing
- Industry Perspectives
- Commercial Opportunities

Tuesday July 12, 1994 - Conference Day 1

LANCASTER HOUSE is the only unaltered survivor of a group of extravagant private palaces which were a focus of social and political life in Victorian London. As Stafford House it was the residence of the Dukes of Sutherland from 1830 till 1911, when its lease was bought by a Lancastrian, later Lord Leverhulme, and it was given its present name. In 1950-53 the house was restored by the Ministry of Works for various official activities including Government hospitality.

Ms. Kathleen McGinty
Director, White House Office on Environmental Policy
Room 360
Old Executive Office Building
Washington, D.C. 20501

Dear Ms. McGinty:

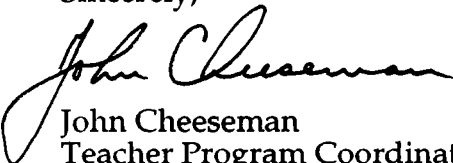

During the summer of 1993, the Close Up Foundation in partnership with the University of Oklahoma conducted an intensive two week program for educators from across the country. Beginning at the Sarkeys Energy Center in Norman, Oklahoma, fifty-seven program participants spent a week examining the concepts and issues related to energy and the environment, and how the interdependence of energy and the environment deeply influences daily life. In the second week of the institute, the educators examined government processes and the issues that policy makers grapple with while addressing these critical interrelationships of politics, economics, energy and the environment.

Last July you graciously accepted our invitation to meet and speak with a group of high school educators who had come to Washington on the Center for Energy Education's Energy, Environment and Policy Choices Institute. We at the Close Up Foundation greatly appreciated your taking the time out of your busy schedule in order to participate. Last year's participants responded that you were "enjoyable, well-informed, willing to listen to educator's concerns, and a signal of hope and promise to President Clinton's team."

We would be honored if you could speak on our program again this year. The date we have set aside for you is Tuesday, July 19th from 9:00 to 10:00am. If you have any questions about the institute please feel free to contact me at (703) 706-3493.

Thank you for your consideration and I have enclosed some background material on the institute.

Sincerely,

John Cheeseman
Teacher Program Coordinator

INSTITUTE SPEAKERS

Jock A. Campbell, Ph.D., has experience consisting of regional petroleum exploration studies, field mapping, prospect development, and well-site geology. Dr. Campbell was employed as Chief of the Petroleum Section for the Utah Geological Mineral Survey where he was responsible for a number of structural, stratigraphic, and petroleum resource studies. He came to the Oklahoma Geological Survey as Senior Petroleum Geologist in 1985, where he continues to be involved with surface and subsurface investigations and regional studies related to petroleum geology.

Faruk Civan, Ph.D., holds an advanced engineering degree from the Technical University of Istanbul, Turkey in chemical engineering. His principal research interests include formation damage and stimulation in oil and gas reservoirs, in-situ processing of minerals and fossil fuel, and phenomenological and thermodynamic analysis of porous media processes.

John D. Coates, Ph.D., is a post-doctorate research associate of the Botany and Microbiology Department of the University of Oklahoma and is affiliated with the University's Microbial Enhanced Oil Recovery (MEOR) research program. He was actively involved in the recent MEOR field pilot in Payne County, Oklahoma. His research interests also include anaerobic biodegradation of oil components. Dr. Coates completed his Ph.D. at University College, Galway, Ireland where he studied anaerobic industrial waste water treatment and received his primary degree in biotechnology from Dublin City University, Ireland. He worked for Interbio Laboratories Ltd., Ireland as a research scientist and project leader in the Production Research and Development department.

Ronald D. Evans, Ph.D., P.E., has been the Director of the School of Petroleum and Geological Engineering at the University of Oklahoma since 1988 and currently holds the Eberly Family Chair. He has been a faculty member at various institutions for over 25 years and served as a department head for 10 years at the University of Central Florida. In addition to his academic role he has been President of RONCO Energy Resources, Inc. since 1976. He also serves on the Board of Directors for the Society of Petroleum Engineers, Oklahoma City Section. Dr. Evan's research activities include non-Darcy flow, reservoir characterization, well completion technology, subsidence of petroleum reservoir, and production system modeling and optimization.

Walter R. Quanstrom, Ph.D. - Vice President, Environmental Affairs & Safety, Amoco Corporation. Dr. Quanstrom graduated from Southern Nazarene University with a B.S. in Biological Sciences, and earned a Ph.D. degree in Zoology from the University of Oklahoma. He also is a graduate of Northwestern University's Executive Development Program and the Advanced Management program of the Harvard Business School. Dr. Quanstrom served as a member of the Management Committee of Amoco Chemical Company for four years and is a past member of the Board of Directors of the Chemical Industry Institute of Toxicology, the Board's Executive Committee, and the Search Committee for a new CIIT President. He is a member of the National Advisory Council for Environmental Policy and Technology (NACEPT) of the U.S. Environmental Protection Agency, and a member of the Clean Air Act Advisory Committee of the U.S. Environmental Protection Agency. Mr. Quanstrom is a member of the American Petroleum Institute (served as a member of the Health and Environmental General Committee), and serves as a Director of the Chicago Academy of Sciences, and Vice Chairman of the Keystone Center in Keystone, Colorado. He has an academic appointment as lecturer in the Management and Strategy Department of Kellogg Graduate School of Business, Northwestern University, where he teaches an MBA course in environmental management.

INSTITUTE SPEAKERS (continued)

Thurman Scott, Ph.D., specializes in experimental rock mechanics with previous research emphasis on the effects of porosity on the mechanics of faulting in sandstones. Dr. Scott worked with Enserch Exploration evaluating both onshore and offshore oil and gas prospects for the U.S. Gulf Coast Region, which included both exploration and field development projects. He also worked as a consultant for Arco Oil and Gas on a variety of rock physics and rock mechanics projects involving fracture behavior of Austin Chalk and the deformation of high porosity sandstones. His current work as a research associate in the School of Petroleum and Geological Engineering at the University of Oklahoma involves interfacing with engineers in an application of acoustic techniques to fractured and deformed rocks.

Paul Skierkowski, Ph.D., is a graduate of Purdue University with a degree in Pharmacy. He served in the U.S. Army with the Third Armor Division in Germany and the First Air Cavalry Division in Vietnam. While serving in the military, Paul received special training in nuclear weapons employment. Following military service, he returned to Purdue University where he received a Ph.D. in Radiological Environmental Health. Following his employment at the University of Mississippi as Radiation Safety Officer as well as faculty member of the School of Pharmacy, Paul came to The University of Oklahoma to set up a comprehensive Radiation Safety program. Paul is currently the director of the Department of Environmental Safety Services for the university as well as being an adjunct professor teaching graduate courses in radioisotope methodology. He is certified in the comprehensive practice of health physics by the American Board of Health Physics. In addition to his work at OU, Paul serves as a consultant for various industries and laboratories in the state that use radioactivity and radiation sources for industrial and analytical purposes. He is a member of the State Radiation Management Advisory Council and has been named the outstanding staff member in Oklahoma Higher Education.

Michael L. Wiggins, Ph.D., P.E., joined the petroleum and geological engineering faculty at the University of Oklahoma in 1991. He has eight years of industrial experience primarily in the areas of drilling and production operations. His areas of technical interest include well completion technology, production optimization, reservoir management, environmental technology and subsurface remediation. Dr. Wiggins is a registered professional engineer in Texas and Oklahoma and a member of the Society of Petroleum Engineers, American Association of Petroleum Geologists and American Society of Engineering Educators.

ENERGY, ENVIRONMENT AND POLICY CHOICES

CENTER FOR ENERGY EDUCATION

WASHINGTON, D.C. WEEK

INSTITUTE SPEAKERS

Robert Bates Jr.
Mobil Corporation

Robert Bates has been a lobbyist for Mobil since 1977. Mr. Bates is responsible for all of Mobil's marketing and refining legislation. Prior to working with Mobil, Mr. Bates was on the staff of Senator Edward Kennedy. He has also worked for the United States Census Bureau. Mr. Bates went to the University of Illinois after graduating from the D.C. Public School system.

Scott W. Peters
U.S. Council for Energy Awareness

Scott Peters currently serves as the Media Services manager with the U.S. Council for Energy Awareness. He has also worked in the Department of Health, Education and Welfare as a special assistant to the secretary for public information. Mr. Peters has worked for the United Press International Radio Network as a White House correspondent, reporter and national news director. He began in radio in Moscow, Idaho and then moved on to WALL and WLNA in New York. Mr. Peters has a degree from the University of Idaho.

John L. Cohen
National Association of Manufacturers

John L. Cohen is Director of Energy and Natural Resources for the Resources and Environment Department of the National Association of Manufacturers. In this position, Mr. Cohen is responsible for policy development and government affairs activities in the energy and natural resources areas. He also chairs the Initiatives Committee of the Global Climate Coalition, an association of over 85 business trade associations and private companies established to coordinate the active involvement of U.S. business in the scientific and policy debates concerning global climate change issues. Mr. Cohen has also worked in the Congressional Affairs Office of the U.S. Department of Commerce and as a staff member in the offices of Senator East and Congressman Jim Broyhill. Mr. Cohen has a degree from Hillsdale College.

ENERGY, ENVIRONMENT AND POLICY CHOICES

CENTER FOR ENERGY EDUCATION

WASHINGTON, D.C. WEEK

INSTITUTE SPEAKERS (continued)

Micheal J. Bennett
Accuracy In Media

Micheal J. Bennett, a prizewinning reporter and former deputy public information chief of the Occupational Safety and Health Administration (OSHA) was recently retained as radon research consultant for the Congressional Office of Technology Assessment. His book, The Asbestos Racket: An Environmental Parable, has been featured in Newsweek and Regulation. It is based on a series of articles for The Detroit News, which won the paper's top prize and was nominated for the Pulitzer for public service. His book was hailed as "a model of informed investigative journalism" by Dr. Aaron Wildavsky, UC/Berkely; and as "required reading" for members of Congress by Dr. Morton Corn, Johns Hopkins University.

Anna Clara Aurilio
U.S. Public Interest Research Group

Anna Clara Aurilio currently serves as staff scientist with U.S. Public Interest Research Group. Ms. Aurilio conducts research on water pollution. Her most recent project involves tracking and measuring arsenic in the Aberjona watershed. Her publication connected with this work will be entitled "Arsenic Speciation and Cycling in Three Lakes". She has also written "Sources and Distribution of Arsenic in the Aberjona Watershed, Eastern Massachusetts" and "Arsenic in the Aberjona Watershed". Ms. Aurilio has served in the Massachusetts Public Interest Research Group. In this capacity she provided technical support for lawsuits against Clean Water Act violators. In addition to her work in Massachusetts, Ms. Aurilio has worked on municipal compliance with environmental laws in Ohio, Illinois, Washington and California. She has degrees from the Massachusetts Institute of Technology and the University of Massachusetts. Ms. Aurilio is a member of the American Geophysical Union.

Micheal Totten
International Institute for Energy Conservation

Micheal Totten is the senior associate for policy development at the International Institute for Energy Conservation (IIEC). Mr. Totten previously served as senior policy analyst to Rep. Claudine Schneider and was very instrumental in drafting the Global Warming Prevention Act (HR 1078) as well as other legislation dealing with vehicle fuel economy standards, research and development money for energy conservation and renewables, and utility company standards. He has served as the executive director of the Energy Conservation Coalition and under the Carter Administration he was the director of the Clearinghouse for Community Energy Efficiency. Mr. Totten has authored numerous articles and several booklets. He received a B.A. with Honors from Yale University in 1972.

CENTER FOR ENERGY EDUCATION

WASHINGTON, D.C. WEEK

INSTITUTE SPEAKERS (continued)

Dawn M. Erlandson
Friends of the Earth

Dawn Erlandson is the Director of the Environmental Tax Reform Project at Friends of the Earth. She previously served as a legislative assistant for tax and human service issues to Senator Donald W. Riegle, Jr. of Michigan, a member of the Senate Finance Committee. She has also worked in the Minnesota State Senate and as a tax consultant/economist in the Washington office of Deloitte, Haskins and Sells.

Melanie Griffin
Sierra Club

ENERGY, ENVIRONMENT AND POLICY CHOICES

CENTER FOR ENERGY EDUCATION

WASHINGTON, D.C. WEEK

INSTITUTE SPEAKERS (continued)

James Mietus

Energy Policy Advisor, Office of Management and Budget

Jim Mietus has worked on energy issues at the Office of Management and Budget since the gasoline lines formed in the 1970s. He is a career bureaucrat who helped develop energy policy in the Ford, Carter, Reagan, Bush and now the Clinton Administrations. During that time he contributed to oil market deregulation, natural gas price decontrol, and electricity market reform currently underway. Mr. Mietus is a graduate of Georgetown University and earned his Ph.D. in economics and international affairs from Tufts University. He taught at Fordham and the University of New Hampshire; served with AID in Vietnam; and worked for Mobil Oil Austria, the Hudson Institute and the Chase Manhattan Bank.

Kathleen A. McGinty

Deputy Assistant to the President and Director, White House Office on Environmental Policy

Katie McGinty was appointed by President Clinton on January 16, 1993 to be Deputy Assistant to the President and Director, White House Office on Environmental Policy. Prior to her appointment, Ms. McGinty served as Senator Albert Gore's Senior Legislative Assistant for Energy and Environmental Policy. In this capacity, she was instrumental in drafting the Clean Air Act, as well as legislation involving international environmental policy. She also served as Congressional Staff Coordinator for the Senate Delegation to the United Nations Conference on Environment and Development held in June, 1992 in Rio de Janeiro, as well as an Official Member of U.S. Delegation to Negotiations on the Framework Convention on Climate Change and the Antarctic Protocol.

ENERGY, ENVIRONMENT AND POLICY CHOICES

CENTER FOR ENERGY EDUCATION

WASHINGTON, D.C. WEEK

Hazel O'Leary SECRETARY OF ENERGY

Prior to becoming Energy Secretary, Ms. O'Leary was President of Northern States Power Company's Gas Utility, headquartered in Minnesota, which provides energy to parts of five northern midwest states. From 1981-89, Ms. O'Leary was Vice President and General Counsel for O'Leary Associates, an international energy, economics and strategic planning firm in Washington, D.C. that specialized in project planning and development of independent power plants. Ms. O'Leary served at the U.S. Department of Energy in the Carter Administration, and the Federal Energy Administration under President Ford, where she oversaw regulation of the petroleum, natural gas and electric industries. Prior to her Washington service, Ms. O'Leary was Assistant Attorney General for the State of New Jersey, and General Counsel of the U.S. Community Services Administration.

Mirka della Cava Environmental Protection Agency

Mirka della Cava is a member of the Marketing Team for the U.S. Environmental Protection Agency's "Energy Star Programs" within the Global Change Division, Office of Air and Radiation. These programs include Green Lights, Energy Star Buildings, and Energy Star computers. Prior to joining EPA, Ms. della Cava worked on energy issues for the Rocky Mountain Institute and the National Resources Defense Council. She has degrees from Duke University and Columbia University.

ENERGY, ENVIRONMENT AND POLICY CHOICES

CENTER FOR ENERGY EDUCATION

WASHINGTON, D.C. WEEK

J. Thomas Sliter

Senate Committee on Environment and Public Works

Mr. Sliter is currently a deputy staff director of the Senate Committee on Environment and Public Works. Prior to joining the Committee in January 1993, he was legislative director for Senator Max Baucus (D-Montana). He also served seven years on the Senate Democratic Policy Committee, becoming staff director in 1988 and also serving on the Senate Budget Committee for four years. Mr Sliter has also worked for several organizations involved in environmental research and engineering. He received a Bachelor of Science degree in Civil Engineering from the University of California at Berkley.

Senator Don Nickles

(R-Oklahoma)

A native and resident of Ponca City, is a graduate of Oklahoma State University and was a businessman before being elected to the Oklahoma Senate in 1978. After serving one term in the Oklahoma Senate, he ran for the U.S. Senate seat left vacant by the retirement of Senator Henry Bellmon. He serves on the Appropriations Committee, the Budget Committee, the Energy and Natural Resources Committee as well as the Select Committee on Indian Affairs. Senator Nickles has been elected to chair the Senate Republican Policy Committee for the 102nd and 103rd Congress. The Close Up Foundation is honored to have Senator Nickles serving on its Board of Advisors.

SH-133 Hart Senate Office Building; 224-5754

Senator J. Bennett Johnston

(D-Louisiana)

A Shreveport native, received his law degree from Louisiana State University. After serving in the Army, he practiced law and was elected to the Louisiana House of Representatives in 1964. Four years later, he was elected to the Louisiana Senate. After narrowly being defeated in his bid for the governorship of Louisiana in 1971, Senator Johnston entered the Democratic primary to oppose incumbent U.S. Senator Allen J. Ellender in 1972. Senator Ellender died in the midst of the primary campaign, and Senator Johnston went on to handily defeat former Governor John McKeithen in the general election. Senator Johnston is in a key position to influence the level and purpose of federal spending, serving on the Appropriations and Budget Committees. He also is the Chairman of the Energy and Natural Resources Committee and serves on the Special Committee on Aging and the Select Intelligence Committee. The Close Up Foundation is honored to have Senator Johnston serving on its Board of Advisors.

Ms. Kathleen McGinty
Deputy Assistant to the President
Director, Environmental Policy
The White House
Washington, DC 20500

Dear Ms. McGinty:

As you know, Bill Burton recently has rejoined Jones, Day to resume his law practice. We are hosting a small reception in The Nest at the Willard Hotel to honor the event on Thursday, July 14, 1994, from 5:30 to 7:00 p.m. We would like very much for you to join us if you have the opportunity.

We are looking forward to having Bill back with us after his nearly three-year stint in the public sector, first as national energy policy coordinator for the Clinton-Gore campaign and extending through his service as Policy and Staff Director for Chief of Staff Mack McLarty. True to his Southwestern roots, Bill has returned to us to focus on energy and natural resource matters as part of the Firm's national energy industry practice. His practice will be based in our Austin, Texas office.

We hope your schedule will permit you to drop by The Nest at the Willard anytime between 5:30 and 7:00 p.m. on July 14, 1994. Please call Melissa Clark at 202/879-3408 as to whether or not you will be able to attend.

Sincerely,

Brad Keithley

THE
ENVIRONMENTORS
PROJECT

The Honorable Katie McGinty
Deputy Assistant to the President and
Director, White House Office on Environmental Policy
Old Executive Office Building, Room 360
Washington, D.C. 20510

Dear Ms. McGinty,

On behalf of the Board of Directors of the Environmentors Project, I would like to invite you to join as an Honorary Judge for the Environmentors Science Fair, at 6:30 p.m. on July 13, 1994, at the Smithsonian Castle.

As you know, the Environmentors Project inspires urban high school students to learn about and protect the environment and explore college and career options in scientific fields. It enables environmental and science "mentors" to work with these students in the design, creation, and evaluation of research and community service projects.

The science exhibition will culminate a three-month session during which 38 students from the D.C. public schools will have developed projects focused on urban environmental issues. Nominal college scholarships will be granted to the students with the most accomplished projects.

We have asked Vice President Gore, Honorary Chair of the Environmentors Project, to speak, but in the event of his unavailability we would be honored to have you represent him.

Because the Administration's support for our work in Washington and six other demonstration cities, I believe your presence would reinforce awareness of the linkage between education and the environment, and a solution that goes to the heart of the difficult experiences facing urban America.

If you have any questions, please feel free to call me at (202) 363-0200. I hope you can join us.

Sincerely yours,

David C. Rubenstein
Executive Director

5301 Broad Branch Road, NW
Washington, D.C. 20015

Telephone: (202) 363-0200

Attn. Beth Viola

From: Eva

No. of pages (incl. cover page): 1

NOTES:

Dear Beth,

Ambassador Tuerk would like to invite Ms. McGinty to a very informal pool party (Barbecue etc.) on Saturday, July 16, at 7.00 pm.

Please let me know whether she will be able to come.

The Ambassador will be away tomorrow, Wednesday, and Thursday, but he will be in contact with me.

My telephone number is: (202) 895-6718.

With best regards

Eva Podiwinsky

repet*

The Honorable Kathleen McGinty
Deputy Assistant to the President, and Director, Office of Environmental Policy
Old Executive Office Building
Room 360
Washington, DC 20500

Dear Ms. McGinty:

This summer the Congressional Youth Leadership Council is sponsoring the National Young Leaders Conference. Outstanding high school juniors and seniors throughout the country will come to our nation's capital for an unparalleled leadership development program. We would be honored to have you address our delegates. Among our recent speakers have been Director of the FBI, Louis Freeh, Secretary of Veterans' Affairs, Jesse Brown and Secretary of Agriculture, Mike Espy.

The Conferences will be held in Washington from mid-June through mid-August and it is our hope that we will be able to schedule a time for you to meet with these young leaders at the National Press Club. Understanding your busy schedule, we are willing to accommodate the timing for an appearance on any of these dates:

- ☛ June 20-28, 1994
- ☛ July 5-12, 1994
- ☛ August 1-9, 1994

These young adults have an keen interest in their role in our nation's future and realize the impact today's issues will have on tomorrow's policies. Your appearance would inspire and encourage these promising young men and women to strengthen their resolve, set goals for themselves and to make a lifelong commitment to service, just as you have done.

We at the Council would be honored and the students would be delighted if you would accept. If your staff has any questions, please have them contact Ellen Daly at (202) 638-0008. Thank you for your time and consideration.

Sincerely,

Ellen D. Patterson
Conference Director

THE WHITE HOUSE
WASHINGTON

Jane -

Can you please look
this over and make
a recommendation as
to whether or not VP of
POTUS should write intro.

If not (as my gut tells
me) then Mickey Kantor
is probably going to do.

Thanks ~

Bill

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

Daniel Magraw

The White House

Dear Beth:

OPTIONAL FORM 99 (7-90)

FAX TRANSMITTAL

of pages 4

To <u>Beth Viola</u>	From <u>Daniel Magraw</u>
Dept./Agency <u>OEP</u>	Phone # <u>260-7616</u>
Fax # <u>456-2710</u>	Fax # <u>260-3828</u>

As we discussed, I am writing to inquire whether President Clinton or Vice-President Gore would be willing to author the Foreword to a book the American Bar Association will publish later this summer titled NAFTA and the Environment. The book is intended to educate the legal community and possibly the larger public regarding the environmental components of the NAFTA package and the critical role of public participation--especially by the environmental community, but also by the business community--in realizing these achievements. I anticipate that the book will also be used as course material for courses on trade-and-environment or on the NAFTA.

The book will consist of several parts. An introduction will identify the environmental issues raised by the NAFTA and describe the role of public participation in the different stages of the NAFTA process as they relate to the environment. I have not yet finalized the introduction, but it will be similar in many respects to an article I recently wrote in Environment magazine on the environmental aspects of NAFTA. The remainder of the book will consist of the text of documents that are important to telling the NAFTA-and-environment story. These will include: then-Governor Clinton's October 1992 speech calling for increased environmental protection and public participation in order to make the NAFTA acceptable; comments submitted by NGOs relating to the environmental aspects of the NAFTA (e.g., making suggestions about the Commission for Environmental Cooperation); and the main governmental documents (e.g., the environmental supplemental agreement, the agreement establishing the Border Environmental Cooperation Commission and the North American Development Bank, the green provisions of the NAFTA, the environmental provisions of the NAFTA implementing legislation and of the statement of administrative action, and letters from Administration officials to Congress and NGOs explaining the environmental aspects of the NAFTA and related agreements). A copy of a draft table of contents is attached (I apologize for its preliminary nature and interlineations).

The Foreword will be short--one to two pages. It will emphasize three themes (although I am, of course, open to suggestions):

- the importance of protecting the environment in the context of trade agreements such as the NAFTA, e.g., of dealing with the environmental implications of international trade;
- the necessity of integrating environmental and economic policymaking (including trade policymaking) in order to achieve sustainable development; and
- the importance of ensuring transparency and meaningful public participation throughout the trade policymaking process, to promote more informed decisionmaking, to achieve broader acceptance and thus better implementation, and to support the democratic process.

These are all themes that this Administration has worked hard to actualize, in the NAFTA supplemental negotiations and elsewhere.

Thank you very much for your assistance on this request. If you have any questions, of course, please do not hesitate to contact me.

Yours sincerely,

Daniel Magraw

Ms. Katie Mc Ginty
Environmental Coordinator
The White House
1600 Pennsylvania Avenue
Washington, DC

Dear Ms. Mc Ginty:

Just to give you an update on the Science Kick project. Things have been going quite well with this project, which I proposed to you in March of 1993. As you might remember, Science Kick was dedicated to the idea of taking advantage of a never again occurring coincidence of the World Cup of soccer being held here in the United States and at the same time, the new and exciting information being generated by the soccer ball like molecule C-60 popularly referred to as the Buckyball.

Although much effort has been put into the idea of doing some sort of educational, on-board event with upcoming STS-65 shuttle flight in July, which by the way coincides with the final two (2) weeks of the World Cup, I believe NASA perhaps needs some encouragement through Vice President Gore's support of having the some sort of "soccer ball", perhaps nerf-like for safety purposes, fly in the shuttle mission. This would allow young people to see a picture within a picture every time they see a soccer ball.

I am asking for your support to present these ideas and the enclosed letter to Vice President Gore as quickly as possible, for the shuttle flight is scheduled for July 8. The theme of this flight is material science and the ideas of the Buckminsterfullerene certainly fits in with the theme.

Thank you for both your support of this project and your presentation of these ideas to Vice President Gore for his support.

Very truly yours,

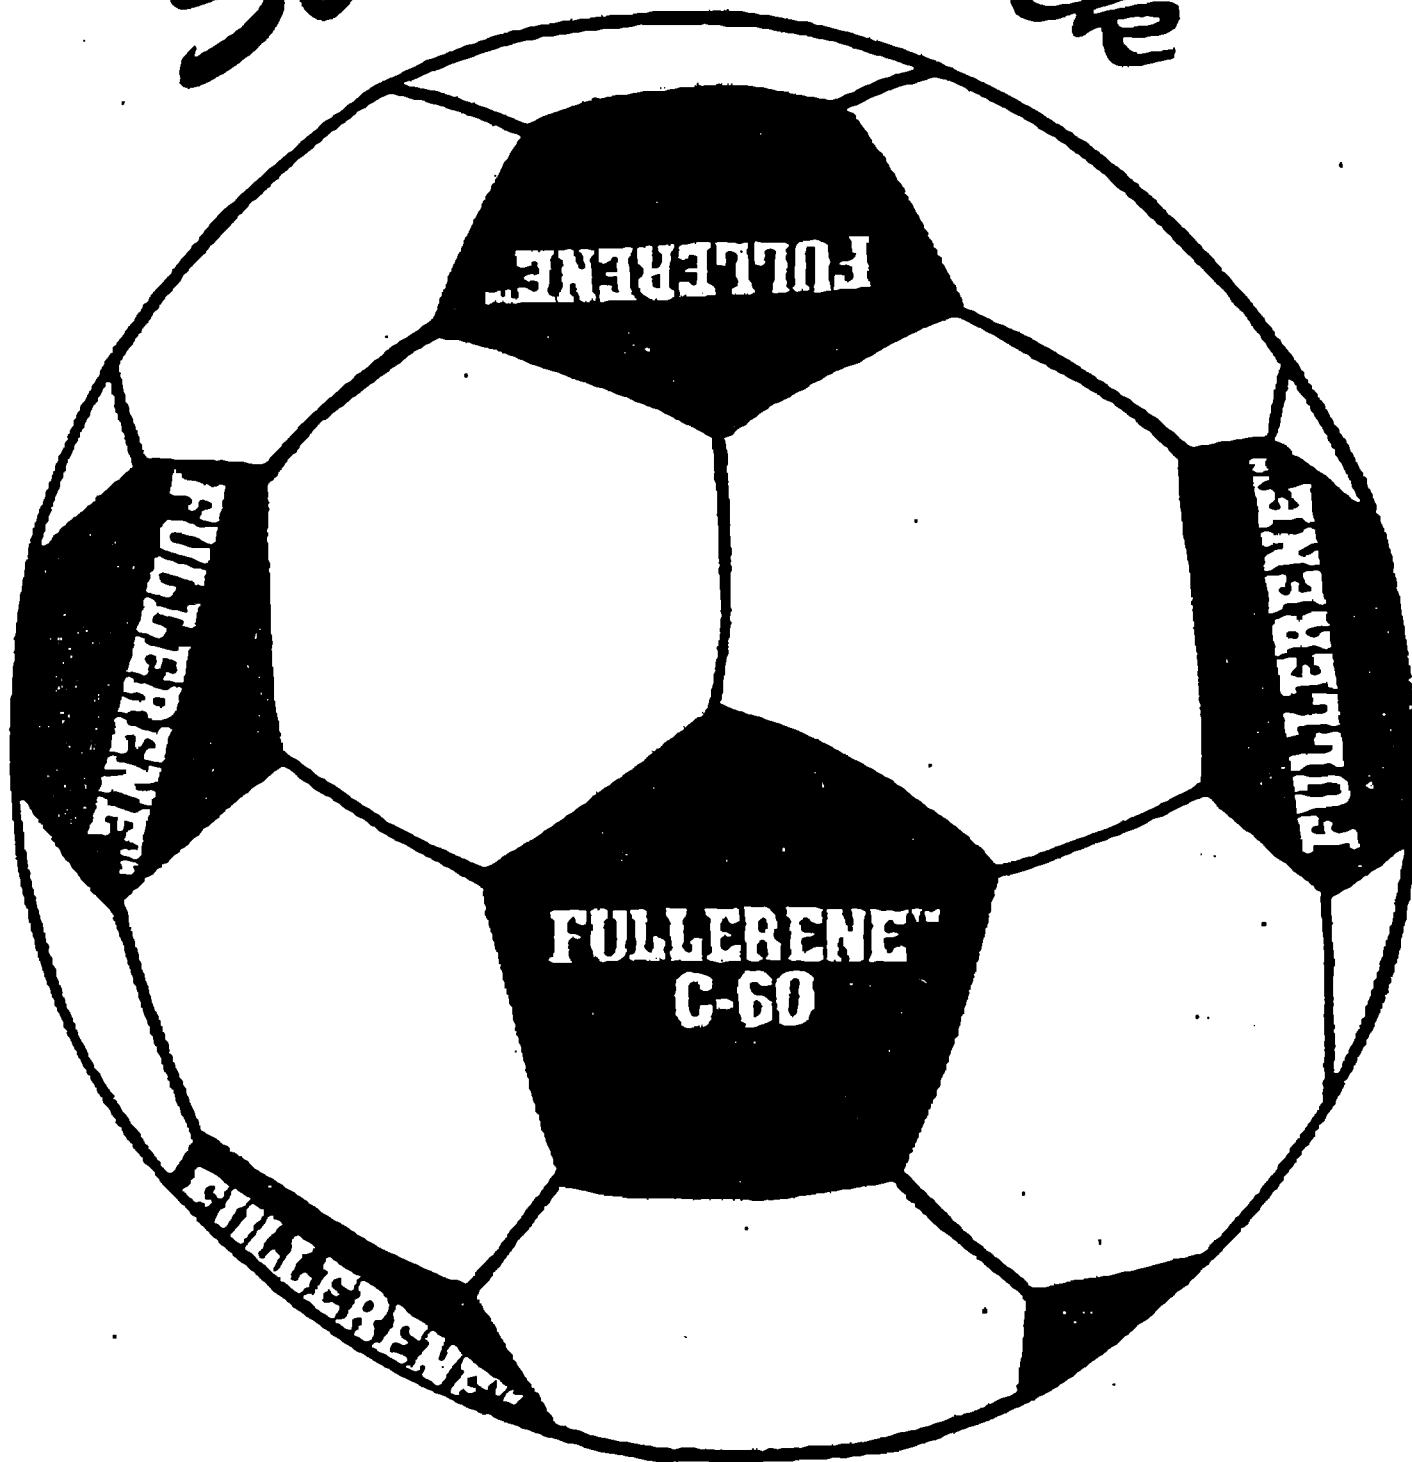

William G. Reach

William G. Reach

TO: ROB NAVIAS
NASA DEPARTMENT OF SPECIAL PROJECTS
FAX: 001-713-483-2000

21
JANUARY 1994

I HAVE BEEN APPROACHED BY BILL REACH, WHO, AS YOU KNOW, HAS BEEN PROMOTING THE FULLERINE SOCCER BALL IDEA. IF IT IS POSSIBLE TO ACCOMMODATE A CHANGE AT THIS LATE STAGE, I WOULD LIKE TO ENDORSE HIS PROPOSAL FOR STS 65 (COLUMBIA, SCHEDULED FOR JULY 1994) TO CARRY OUT THE MICRO-GRAVITY PROCESSING EXPERIMENT.

AS YOU MAY BE AWARE, THE CREW OF STS 46 (ATLANTIS) TOOK INTO ORBIT A COPY OF MY NOVEL THE FOUNTAINS OF PARADISE, IN WHICH THE POTENTIAL OF GRAVITY FREE FACTORIES WAS DISCUSSED. IN THAT STORY, THE SPACE ELEVATOR BECAME POSSIBLE BECAUSE DIAMOND COULD THEN BE MANUFACTURED IN TONNAGE QUANTITIES. I THINK THE RECENT DISCOVERY OF THE THIRD FORM OF CARBON MAY PRODUCE THE SAME RESULT!

I HAVE BEEN TOLD THAT STS 65 IS A JOINT JAPANESE-AMERICAN MISSION. INTERESTINGLY, DR. SUMIO IJIMA OF NEC TOKYO WAS THE FIRST TO CAPTURE BUCKY TUBES ON FILM. THE JAPANESE REFER TO BUCKY TUBES AS "NANOS", AND ARE CARRYING OUT EXTENSIVE RESEARCH ON THEIR PROPERTIES AND USES.

MY CURRENT HEALTH CONDITION (POST POLIO SYNDROME) RESTRICTS MY MOBILITY. HOWEVER, I WOULD BE ABLE TO PARTICIPATE IN A LINK-UP WITH THE SHUTTLE MISSION IF THE PROPOSED MICRO GRAVITY EXPERIMENT IS CARRIED OUT ON STS 65. I NOW FREQUENTLY TAKE PART IN SATELLITE CONFERENCES.

BILL HAS POINTED OUT THAT SUCH AN EXPERIMENT, INVOLVING FULLERINE SOCCER BALLS, WOULD HAVE AN ADDED ATTRACTION IF IT COINCIDES WITH THE WORLD CUP FINALS BEING PLAYED IN THE U.S. DURING THAT TIME.

PLEASE LET ME KNOW WHAT YOU THINK OF BILL'S PROPOSAL, AND WHETHER IT IS POSSIBLE TO ACCOMMODATE IT ON STS 65'S PROGRAMME.

I MIGHT ADD THAT BUCKY FULLER WAS A PERSONAL FRIEND, AND DREW THE SPACE ELEVATOR, SHOWING IT EXTENDING FROM CEYLON TO ORBIT, ON THE SLEEVE OF MY RECORDING OF THE FOUNTAINS OF PARADISE.

ALL GOOD WISHES,

Bucking for buckyballs — and all things linked to Fuller

The molecules, resembling geodesic domes, have a following. Thanks, in part, to the dome's inventor.

By Jim Detjen
INQUIRER STAFF WRITER

This is a story of obsession gone right. It all began in 1977 when a young Philadelphia songwriter named Bill

Reach heard Buckminster Fuller, the visionary inventor of the geodesic dome, speak in Los Angeles.

"He was special, really special," Reach recalls. "I became consumed with him and his ideas."

But it was not until 1990, when he

heard about a remarkable new molecule, the "buckyball," that his obsession shifted into high gear.

Buckyballs, named after Fuller because of their resemblance to his geodesic domes, have excited a small army of scientists because of their possible uses in new fuels, drugs, lubricants and electronics.

But for Reach, 41, the potential of buckyballs lies not in their applications but in their ability to educate

the public about Fuller and his ideas.

So he has hounded a wide range of people, such as U.S. Sen. John Glenn (D., Ohio), the former astronaut, and writer and humorist Garrison Keillor, to promote Fuller. He is lobbying the U.S. Postal Service to issue a stamp to honor the former West Philadelphia resident next year, on the 100th anniversary of Fuller's birth.

He is trying to persuade the World Cup soccer tournament to use soccer

balls that look like buckyballs. He is enlisting the support of anyone who will listen to persuade NASA to let its astronauts take one of the soccer balls into space during a shuttle flight in July.

Tomorrow, Reach will accomplish one of his goals. Because of his organizing and fund-raising efforts, a symposium will be held at the University City Science Center on the See SYMPOSIUM on B2

Bucking up to all things Fuller

SYMPOSIUM from 81 new molecule — formally called Buckminsterfullerene — that has taken the chemistry world by storm. In the last four years, hundreds of research groups around the world have probed and analyzed the molecule, which looks like a soccer ball. Scientists are excited about buckyballs because they are only the third form of pure carbon to be discovered, after graphite and diamonds.

One of the larger research groups, involving about 20 scientists, is based at the University of Pennsylvania and Drexel University.

"Buckyballs may become the backbone of a new class of materials," said David Luzzi, a materials science professor at Penn. "They may someday be used as fuels, solvents, in pharmaceutical products and in electronics."

One of the speakers tomorrow will be Richard Smalley, a Rice University scientist who co-discovered the structure of the molecule in 1985 after guzzling beer one evening while pasting paper pentagons and hexagons onto his salad bowl.

(The version of the buckyball that he discovered contains 60 atoms of carbon; it looks like 12 pentagons and 20 hexagons arranged around a sphere. Another version containing 70 carbon atoms looks more like a rugby ball.)

Another speaker will be Arthur C.

Clarke, the science-fiction author who wrote 2001, A Space Odyssey. Clarke, who was a close friend of Fuller's, will speak by videophone from his home in Sri Lanka.

Clarke believes that one of his ideas — that of a "space elevator" stretching thousands of miles from the ground up and capable of transporting people and materials into space — may become possible because of buckyballs. That's because Clarke believes it may be possible to make the strong fibers needed for the space elevator out of buckyballs.

(Clarke first described the concept of a space elevator in his novel, *Fountains of Paradise*, and Fuller drew pictures of the elevator.)

A third speaker will be Fred Wudl, a chemist at the University of California at Santa Barbara, who will describe how buckyballs may be used as a weapon against the virus that causes AIDS.

In August, Wudl and other researchers reported that buckyballs had been shown in laboratory tests to block the action of an enzyme needed for the HIV microbe to reproduce. The startling potency of buckyball-based chemicals has opened up a promising field of AIDS research, scientists say.

Luzzi said that small amounts of buckyballs are formed every time soul is given off by a burning candle. But it was not until 1990, when re-

searchers figured out how to make large quantities of them, that the field took off.

Since then, scientists have found that buckyballs can be used to make superconductors — substances able to conduct electricity at very low temperatures without resistance. Other researchers are experimenting with the molecules as possible delivery vehicles for getting drugs into the body.

But for Reach, whose grandfather invented the modern-day baseball and basketball while working for A.G. Spalding & Brothers, buckyballs are a way to deliver the word about Fuller and his ideas. And one of his best vehicles is a prototype of a soccer ball that he persuaded Anaconda Sports, in Kingston, N.Y., to manufacture.

The ball looks like a regular soccer ball except that it has the chemical name Fullerene C-60 written on some of its panels.

Reach has been trying to persuade the World Cup soccer tournament to use the balls as a way to increase the public's knowledge about science and Fuller.

Last Friday, Penn scientists inserted tiny amounts of buckyball molecules into his soccer balls at Penn. While these molecules won't affect the ball, they were inserted as a "symbolic gesture."

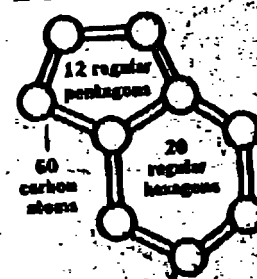

Reach hopes that the soccer balls

Buckyball Carbon Molecule

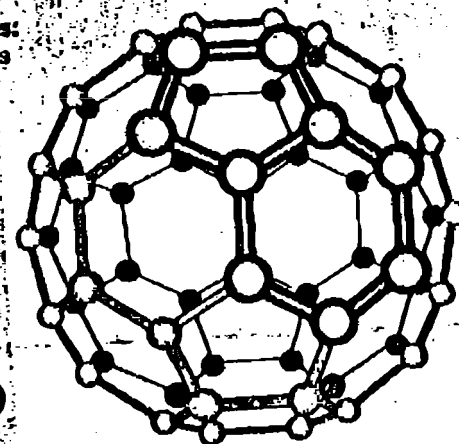

Named after visionary engineer Buckminster Fuller, buckyballs resemble the geodesic domes he invented. They are the third form of pure carbon to be discovered, after diamonds and graphite.

Possible commercial uses:

- high-strength materials
- lubricants
- drugs
- fuels
- batteries

SOURCE: The University of Pennsylvania

The Philadelphia In

will help turn on young people and sports fans to both science and Fuller, who spent the last 10 years of his life until his death in 1983 working at the University City Science Center.

Fuller designed a wide range of visionary cars, buildings and cities, but is best known for the spherical geodesic domes that look so much like buckyballs.

If You Go

- The symposium will be at the University City Science Center, 3600 Market St., 10 a.m. to 3 p.m. tomorrow. The Esther M. Klein Art Gallery, 3600 Market St., will display works reflecting science and art, 9 a.m. to 5 p.m. weekdays until June 3.

Mr. Bill Reach
Science Kick
420 South 19th Street
#15
Philadelphia, Pennsylvania 19146

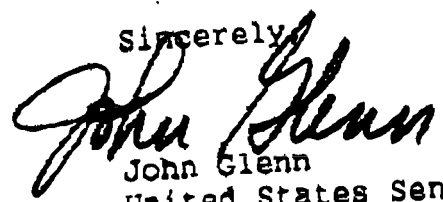

Dear Mr. Reach:

I am pleased to hear of your upcoming exhibit and symposium, "Science Kick" in May of this year. The exhibition appears to be very informative and I am enthusiastic that a portion is targeted towards the promotion of math and science education.

The issuance of a Fullerene version of a soccer ball is an interesting idea. I agree that it could be used as a catalyst to capture the attention of our nations young people possibly promoting greater interest in the study of science and math.

I wish you success in your upcoming endeavor. Best regards.

Sincerely,

John Glenn
United States Senator

JHG/as

C H E M I S T R Y - 1 9 9 2

MORE FUN WITH BUCKYBALLS

FOR THE PAST EIGHT YEARS, ever since chemists first created exotic 60-carbon-atom "buckyballs" in a Rice University lab, the search has been on to find these wondrous spheres in the largest laboratory of all: nature. In 1992 mineralogist Semeon Tsipursky of Arizona State University announced that he'd done it: he found the C_{60} s in a sample of shungite, an uncommon coallike rock native to a remote

corner of northwestern Russia near Finland. The first natural buckyballs were discovered in a thin veinlet running through the rock, which may be 500 million years old.

The discovery of ancient C_{60} s capped another year in the amazing new world of buckyballs and their pure-carbon relatives, collectively known as fullerenes. (Their name comes from their uncanny geodesic shape, much like structures created by architect Buckminster Fuller.) Since physicists devised a recipe for isolating the molecules from carbon soot two years ago, researchers have been playing—productively—with man-made versions of the stuff in labs around the world. In 1992 buckyballs were strung into polymers and squeezed into diamonds. Researchers even synthesized buckytubes, hollow cylinders of carbon atoms that may prove more important than buckyballs because of their surprising strength and ability to conduct electricity.

Tsipursky all but tripped over natural buckyballs in an act of pure serendipity. He had received samples of the lustrous black shungite from Svetlana Firsova, a former colleague at the Rus-

sian Academy of Sciences in Moscow. Tsipursky planned to use high-resolution transmission electron microscopy to study the nature of the carbon in the rock and the details of its transformation from an amorphous to a crystalline state—information that helps scientists understand the processes that form graphite and diamonds (the two pure forms of carbon besides buckyballs).

WHEN HE EXAMINED a thin film lining tiny cracks in one of the chunks of rock, Tsipursky saw a distinctive honeycomb pattern. It reminded him of images of C_{60} crystals studied by Su Wang, a microscopist sharing his office.

"When I got the images I didn't think it was fullerenes," says Tsipursky, "but the pattern was so characteristic I had to check further." Sure enough, the shungite sample caused mass spectrometers at both ASU and Oak Ridge National Laboratory to peak at 720 atomic mass units (amu)—just where a buckyball's 60 carbon atoms, each weighing 12 amu, would be expected.

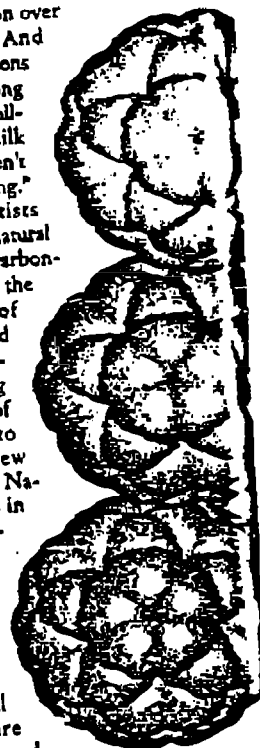

The discovery raises a lot of questions about how nature creates buckyballs. At the moment, only the searing inferno of sooty flames is known to generate the molecules: Did fire play a role in the formation of shungite? Since the molecules were found clustered together, does nature have some way of segregating them? Did the C_{60} s form along with the shungite some 500 million years ago or were they cooked up later?

"Shungite is a mystery rock from Russia, and we need to know much more," says Richard Smalley, the Rice chemist who detected the first traces of buckyballs in 1985. "For all their beauty and strength, buckyballs are susceptible to oxidation under prolonged exposure to air. If these are truly ancient buckyballs, they must somehow have been protected from oxidation over the subsequent eons. And when you're talking millions of years, you've got a long time. It's like finding a million-year-old plastic milk bottle; these things aren't supposed to last that long."

While some scientists continue to search for natural buckyballs—in other carbon-rich rocks, meteorites, the rarefied atmosphere of red-giant stars, and sooty candle flames—others are exploring the enticing promise of man-made versions to produce a host of new materials. At Sandia National Laboratories in Albuquerque, chemists Douglas Loy and Roger Assink made the world's first bucky polymer by linking buckyballs with xylene.

Unlike conventional polymers, which are long strings of repeated units of molecules, the buckyballs in this version are cross-linked. The cross-linking forms a highly branched chain that solvents cannot penetrate. Unfortunately, this limits the polymer's ability to be molded, extruded, or processed in other ways.

While insolubility limits the usefulness of

this first crude polymer, others are on the way. Fred Wudl of the University of California at Santa Barbara has incorporated buckyballs into everyday polymers such as polyurethane and polyester. Wudl first adds a carbon or nitrogen atom to the surface of a buckyball and uses the extra atom as a point of attachment to the polymer. The buckyball can either dangle from the polymer chain in a configuration Wudl has dubbed "charm bracelet," or it can become part of the chain itself, a "pearl necklace." Not only are Wudl's elegant polymers soluble, they retain their electrochemical properties and their ability to filter high-intensity light. A thin coating of these polymers could someday be used to protect optically sensitive equipment.

Methane, for example, is too big to wiggle its way into the matrix. Chemists believe a thin layer of buckyball crystal could filter nitrogen and other common contaminants from natural gas. A chunk of C_{60} crystal might even be used as a time-released storage unit for gases. Using high pressure, Assink has infused oxygen into the crystal; he then found that at lowered pressures the trapped gas slowly leaked out.

THE VERSATILE CRYSTAL can even be fabricated into synthetic diamonds. Until now, industrially useful diamonds have been created by compressing the carbon atoms in graphite's sheetlike layers under high temperatures and pressures into pyramidal arrangements of diamond crystals. However, this year Manuel Núñez Regueiro and colleagues at the Center for Research on Very Low Temperatures in Grenoble, France, announced that they had made diamonds from buckyballs at room temperature. They squished the black C_{60} powder in a simple piece of equipment known as a diamond anvil. The buckyballs rearranged themselves into diamonds at roughly two-thirds the pressure needed to transform graphite into diamonds.

Buckyballs are not the only fullerene shapes intriguing scientists. In November 1991 Sumio Iijima of the NEC Corporation in Japan reported that he had discovered microscopic needlelike tubes while examining the soot that builds up on electrodes when buckyballs are synthesized. The structures are actually tubes nested within tubes, sometimes as many as 50 thick.

Scientists had already speculated that buckytubes could exist. Carbon molecules could arrange themselves into sheets like chicken wire, but instead of curling around themselves to form spherical cages, the sheets could also

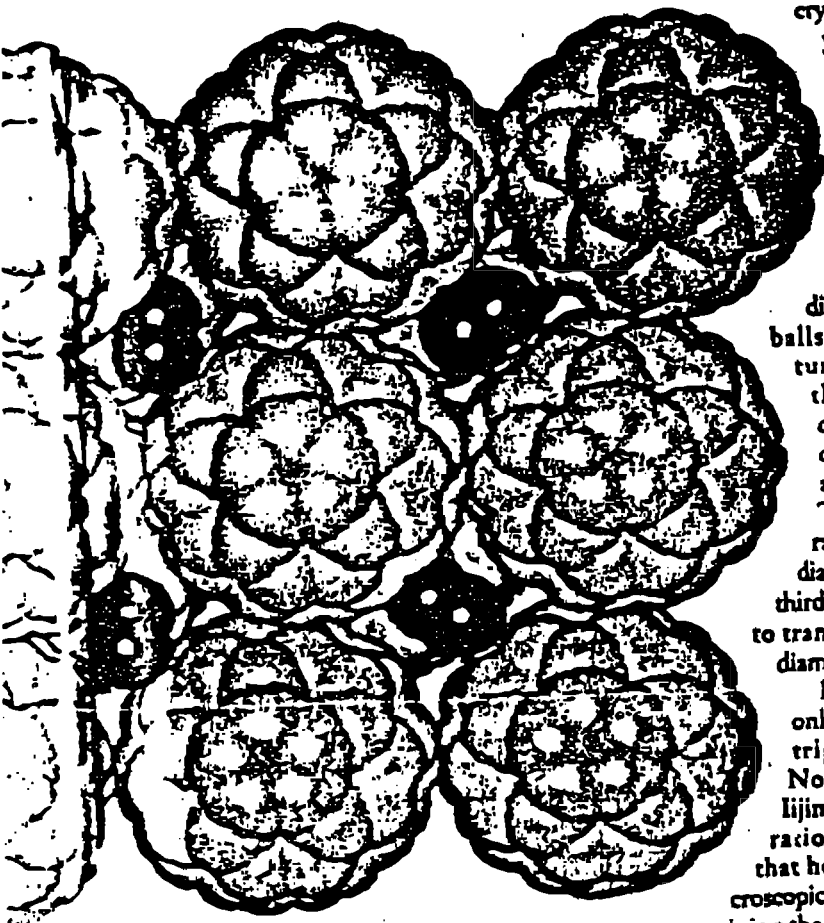

loop around to make tubes. It took a recipe for making large quantities of the tubules, however, before their properties could be studied.

The breakthrough was announced this past July: Thomas Ebbesen and P. M. Ajayan, also of NEC, sent 18 volts of electricity between two graphite rods in a vessel containing helium at two-thirds of an atmosphere pressure. One pencil-thick rod became the negative electrode; a thinner rod became the positive electrode. As the electric current passed between the two, the thinner one evaporated and the positive carbon ions it emitted settled, like a miniature ash gray slagmite, onto the larger graphite rod. This pillar grew a few hundredths of an inch each minute and was packed with a pitch black powder of pure tubules of various lengths and thicknesses.

Now scientists are speculating about the molecules' properties and scrambling to develop a method to sort the hodgepodge of tubules by size. Theoretically, the tubes should be mechanically strong because of the intrinsic strength of the carbon-carbon bonds. They should also be excellent electrical conductors; electrons orbiting the carbon atoms of the tubes are in a prime position to conduct electricity.

"If you generalize the concept of a buckytube, you end up with something I like to call bucky fiber or fullerene fiber, a continuous length many feet or many miles long," says Smalley, who now devotes much research time to buckytubes. "That fiber, if you could make it, would be the strongest fiber not only that we've ever made but that we ever will make out of anything. It's got to be the all-time winner, a Platonic perfection you just can't beat."

The tubules may one day act as ultrathin wires to shrink the size of computer chips, replace power cables all over the world, or shore up composite materials in airplanes and spacecraft. Their usefulness, like that of buckyballs, is just beginning to be explored. The future holds an array of bucky-based products that, says Wudl, "are going to be pretty spectacular." —Charlene Crabb

Loy and Assink also found that gas molecules can lurk in a supposedly "pure" C_{60} crystal. Like grapes stuffed into the spaces between oranges in a grocery store display, molecules of hydrogen, oxygen, and nitrogen squeeze into the gaps between the buckyballs stacked together in a crystal. The gas molecules can weave from gap to gap inside the lattice. But not all gases fit.

June 1, 1994

Mr. Albert Gore
Vice President of the United States
The White House
1600 Pennsylvania Avenue
Washington, DC

Dear Mr. Vice President:

The Science Kick project developed out of the facts that the World Cup of Soccer will be played in the United States in 1994 and that the C-60 molecule, known as the Buckminster fullerene, has the same structural integrity as a soccer ball. Although much effort has been put into the idea of doing some sort of educational, on-board event with upcoming STS-65 shuttle flight in July, which by the way coincides with the final two (2) weeks of the World Cup, I believe NASA perhaps needs some encouragement through your support of having some sort of "soccer ball", perhaps nerf-like for safety purposes, fly in the shuttle mission. This would allow young people to see a picture within a picture every time they see a soccer ball.

It is interesting to note that a single molecule inside the soccerball is proportionally the same as that same soccer ball within the volume of the earth. When you factor in that the World Cup is being played on the surface of the earth this July, that the material science flight STS-65 is flying above the earth, and that the Hubble telescope has free reign to photograph these very fullerenes in their intergalactic dance, one might say that this is an opportunity for science education not to be missed. I hope you agree.

I would appreciate any effort you might make in our behalf with the upcoming STS-65 flight. This would be appreciated by every youngster on earth.

Very truly yours,

William G. Reach
Project Director

FAX: (202) 456-2710 (1 page)

Attention: Beth Viola

Dear Ms. Viola:

I am writing to request your assistance in ascertaining if Ms. McGinty's schedule would permit her to entertain an invitation to speak at the European Environmental Initiative to be held in London, England, July 12, 1994.

The Biotechnology Center of Excellence Corporation is pleased to cooperate with the U.S. Embassy in London on this event which is co-sponsored by private industry. Key participants in the event include Ambassador William J. Crowe, Jr., The Rt. Hon. John Gummer, UK Secretary of State for Environment and public and private sector representatives from several European countries.

If the date looks at all possible for Ms. McGinty, the official invitation for her consideration would be issued by the Embassy officials responsible for the event. I understand that all travel and lodging expenses would be covered by the conference.

Thank you for your kind attention.

Sincerely,

Fernando

Dear Mr. Maras:

Per your request, I am pleased to enclose the program for the European Environmental Initiative to be held in London July 12-13, 1994. Thank you for your consideration.

Ms. McGinty's remarks would be made at 10:15 a.m. on July 12 during the Keynote Address session.

Please do not hesitate to call if I may provide additional information. The U.S. Embassy in London will also be writing you separately.

Sincerely,

Fernando Quezada
Executive Director

EUROPEAN ENVIRONMENTAL INITIATIVE 1994

July 12-13, 1994

Sponsored by

U.S. Department of Commerce

and

Chase Manhattan Bank N.A.

Lovell White Durrant

Motorola

Rust Limited

Waste Management International

U.S. Embassy, London

Concept

Significant commercial opportunities have been created in Europe for U.S. firms. Existing and pending EU legislation, increasingly stringent regulatory compliance, public demand for industry to be environmentally responsible and a desire on the part of industry to implement proactive environmental strategies are key factors influencing the market.

The event will have two components:

- Conference addressing trends shaping the commercial environment, and the resultant changes on business and technology
- Business Meetings between U.S. exporters and potential European commercial representatives.

Conference Focus

- European Legislation and Regulatory Trends
- Environmental Stewardship
- Technology Development
- Financing
- Industry Perspectives
- Commercial Opportunities

Tuesday July 12, 1994 - Conference Day 1

UK Secretary of State for the Environment
- 7:30 End of Reception

LANCASTER HOUSE is the only unaltered survivor of a group of extravagant private palaces which were a focus of social and political life in Victorian London. As Stafford House it was the residence of the Dukes of Sutherland from 1830 till 1911, when its lease was bought by a Lancastrian, later Lord Leverhulme, and it was given its present name. In 1950-53 the house was restored by the Ministry of Works for various official activities including Government hospitality.

The Sponsors

Chase Manhattan Bank N.A.

The Chase Manhattan Bank, N.A. is a leading bank in the environmental sector. With the focus on North America, Latin America, West Europe and the Far East, Chase provides a wide range of banking and investment products to many environmental companies and projects. This includes financial advice and support for emerging technologies and large infrastructure projects in both the public and private sectors in waste management, water treatment and distribution.

Lovell White Durrant

Lovell White Durrant is a leading international law firm, based in the city of London, providing a complete range of corporate legal services. The firm's clients include a significant number of U.S. enterprises.

Motorola

Motorola is a multi-national company of U.S. parentage specializing in the area of electronic systems and equipment including wireless communications. It has a large European manufacturing base. Motorola endorses the policy of implementing uniformly high standards of environmental behaviour on all of its sites worldwide.

Rust Limited

RUST Limited is the international engineering division of RUST International, Inc., a leading technology based company employing 20,000 people.

RUST Limited employs 2,700 in 20 principal offices in Europe, Asia Pacific and the Middle East, focused on engineering solutions in the environmental, power, industrial and transportation sectors.

Waste Management International

Waste Management International is a leading provider of a range of solid and hazardous waste management services, including collection, transportation, storage, treatment, recycling, incineration, disposal, waste-to-energy facilities, and water and wastewater treatment and other environmental services. The company currently operates in ten European countries: Italy, The Netherlands, Germany, UK, Sweden, France, Spain, Finland, Denmark and Austria, as well as Argentina, Australia, New Zealand, Hong Kong, Malaysia, Indonesia, Taiwan, Singapore and Brunei.

Hotel Information

Special Conference rates have been obtained at the Langham Hilton and the Copthorne Tara.

Further details on hotel reservations and your conference participation will be sent to you upon receipt of your Registration Form.

REGISTRATION FORM

I would like to participate in the EUROPEAN ENVIRONMENTAL INITIATIVE '94, 12-13 July in London. Please reserve me spaces at £350 or \$500 per person.

The price includes two days of luncheons, receptions, and coffee/tea breaks between sessions. Checks payable to U.S. Department of Commerce must accompany this form.

Name:
(as you would like it to appear on your name badge)

Dear Kathleen,

I am writing to follow up on a letter which was sent to you by the Administrator of UNDP, Mr. James Gustave Speth, inviting you to participate in the Roundtable "Change: Social Conflict or Harmony?" which will take place in Stockholm, Sweden 22-24 July 1994. I am also including notes of arrangement for the meeting and relevant information.

Preparations for the meeting are going well and to date we have received over 120 acceptance. Time is pressing, but unfortunately we have not received any reply form you to date. Perhaps your response is already in the mail. If you have not replied, I would be most grateful if you could fax me your response as soon as possible and no later than *15 May 1994*.

We sincerely hope that you will join us in what promises to be a stimulating intellectual endeavour and allow us to benefit from your experience and views.

We look forward to hearing from you.

*P.S. : As you can see this meeting
is shaping very well. I really hope
that you will join us...*

Yours sincerely,

Üner Kirdar

ROUNDTABLE ON GLOBAL CHANGE

INFORMATION ON ARRANGEMENTS

Stockholm Roundtable "*Change Social Conflict or Harmony?*", 22-24 July 1994

OBJECTIVE

We look forward to welcoming you to our next Roundtable in the series on *Global Change* which will take place in Stockholm, Sweden from 22 to 24 July 1994.

As indicated in the letter of invitation from Mr. James Gustave Speth, Administrator of the United Nations Development Programme (UNDP), the subject of the session will be "*Change: Social Conflict or Harmony?*". The aim of the Roundtable is to bring together an interdisciplinary group of participants to discuss critically some of the most pressing social problems that are threatening the world community today, in particular: increasing worldwide poverty, unemployment, and societal disintegration. As these three are also the themes of the World Summit for Social Development, to be held in Copenhagen, March 1995, the endeavour of the Roundtable will be to generate ideas towards the search for shared solutions to these problems; and thus to make an intellectual contribution to the preparatory process of the Social Summit.

ORGANIZATIONAL MATTERS

...
► We are very pleased that already more than 120 eminent personalities, international thinkers and development practitioners have agreed to participate in this intellectual endeavour. The list of invitees is enclosed herewith. As your participation is especially valued by us, if you have not yet responded to this invitation, we would appreciate hearing from you as soon as possible, in order to finalize arrangements. Replies received after 15 May 1994 will not be accommodated.

The provisional agenda and annotation of topics for possible written contributions were sent to you along with Mr. Speth's invitation. Well researched overview papers on each of the four main headings of the agenda are in the process of being prepared and will be forwarded to you in good time.

The deliberations of the Roundtable, similar to those of the previous years, will take the form of plenary and working group sessions. The working language of the Roundtable will be English. There will be four working groups based on the main headings of the provisional agenda, namely:

- I. Strengthening the Concept of Human Security
- II. Alleviation and Reduction of Poverty
- III. Expansion of Productive Employment and Sustainable Livelihoods
- IV. Enhancement of Social Cohesion and Justice

Upon confirmation of the final list of participants and the indications of written submissions, the preliminary Programme will be forwarded to you.

WRITTEN CONTRIBUTION

We are pleased that already more than 40 participants have informed us of their desire to prepare a written contribution. These papers will serve as a stimulus for informed and interactive discussions. Those who are also considering a written contribution should let us know the topic of their paper no later than May 15 1994.

In order to be able to distribute papers to the participants in advance, written contributions should reach us *at the latest by the first week of June*. Any participant whose paper will not be ready by this time is kindly requested to bring 200 copies with him/her to Stockholm for distribution during the Roundtable.

In order to make the process of printing and dissemination of documents more efficient, please make note of the following guidelines:

- Submit your written contribution on a 3 1/2 inch diskette in WordPerfect 5.1, with a corresponding hard copy.
- Type the entire paper in one mono-spaced font
- Put all notes and tabular material at the end of the paper.

VENUE

The Roundtable will take place in the Grand Hotel Saltsjöbaden, located on the shores of the Baggensfjärden, approximately 15 minutes from the center of Stockholm and nearly one hour from Arlanda Airport.

The Grand Hotel Saltsjöbaden is a well equipped conference center with plenary halls and smaller conference rooms. It is the site of the historic reconciliation meeting between Swedish labour and management, which took place in the 1930s and produced the Swedish Social Contract. Similarly, meetings of the Bilderberg

Group, OPEC, EFTA, and the Expert Group on Employment for the World Summit for Social Development have taken place in this location.

ACCOMMODATION

Participants will be the guests of the UNDP Development Study Programme, which will cover the cost of room, breakfast, lunch, dinner, coffee/tea breaks, and local transportation. Additional expenses such as telephone calls, drinks, laundry, or a longer stay will be considered supplementary and at the expense of the participants. All participants are kindly requested to settle supplementary charges before their departure. Participants who wish to stay longer should make private arrangements with hotel management.

▶ The participants are requested to confirm to the hotel *as soon as possible and no later than **15 July 1994*** the following:

- length of stay
- arrival and departure dates
- whether they will be accompanied by their spouse

ATTN:	Ms. Pia Andersson
	Tel: +46-8-717-0020
	Fax: +46-8-717-9531
	Telex: 10210
	Grand Hotel Saltsjöbaden
	S-133 83 Saltsjöbaden
	Stockholm, Sweden

This communication is very important in order to ensure that accommodation arrangements are made in a timely manner.

ARRIVAL/DEPARTURE

▶ In order to assist in the arrangements for arrivals and departures, participants are kindly requested to communicate to the BENNETT Travel Agency, no later than 15 July 1994, the following:

- their arrival and departure dates
- carriers
- flight numbers and times.

ATTN:	Mr. Kaj Lindblom
	Tel: +46 8.616.06.08 or 8.616.06.09
	Fax: +46 8.668.96.00
	BENNETT DESTINATION
	Box 9620
	Soeder Maelarstrand 45
	S-117 91 Stockholm, Sweden

The BENNETT Agency will ensure the transport of participants and spouses to and from the airport to the hotel - approximately one hour away. Upon arrival and collection of luggage, if you are not met at the gate, please present yourself to the BENNETT Express Center located at the 2nd Floor of Arlanda Airport (the only arrival airport for all flights to Stockholm).

VISA

▶ Participants are kindly requested to individually verify with their local Swedish embassy or consulate visa requirements, since entry permission may be required for some nationalities.

TRAVEL

▶ Participants are kindly requested to make their own travel arrangements. Most major airlines provide frequent service from major international cities to Stockholm. Travel expenses, as stated in our earlier letter, are not covered by the UNDP Development Study Programme and should be met individually or by the sponsoring organization.

... However, **Scandinavian Airlines System (SAS)** has generously agreed to become the co-sponsoring airline for the Stockholm Roundtable. They will offer a 30-33% discount on normal fares from various international locations which are serviced by to Stockholm. A sample list of fares from major destinations is enclosed. Please note that inter-Scandinavian fares are not included in the discount package and should be purchased locally.

In order to benefit from this generous offer, you must purchase your ticket through the New York Office of SAS wherever you may currently reside. Please act immediately as flights to Sweden in July are full and discounted spots are limited, especially from the North American region.

If you wish to benefit from this special offer please contact at once:

**Scandinavian Airline System
(NY Sales Office)**

ATTN: Ms. Jeanette Gonzales or
Mr. Thomas Long

Tel: +01 (800) 437-4870 or
+01 (212) 332-2500
Fax: +01 (212) 332-2535

Address: 1270 Avenue of the Americas
Suite 3015
New York, NY 10020

- Send a fax to SAS New York office stating
 - dates which you wish to travel both for arrival and departure
 - flight number and times of the flight on which you wish to travel
 - credit card number, expiration date, full name as it appears on the card
- Your flight arrangements will then be confirmed to you by SAS and your ticket will be mailed directly
- If you need further assistance concerning SAS travel arrangements please contact: *Mr. Jesse Reyes, UNDP +01 212 906-5004*

Ms. Kathleen McGinty
Office Environmental Policy (OEP)
Old Executive Office Room 357
Washington DC 20501

Dear Ms. McGinty,

For the past several years, the Western Spaceport Museum and Science Center located just outside of Lompoc, California, has sponsored the area's observance of National Spaceweek. The theme for Spaceweek '93 is "Spirit of Yesterday . . . Vision of Tomorrow". This year's events will be held on Vandenberg Air Force Base, California, the week of July 18 - 22, 1994.

This year six Panels have been selected to support the Spaceweek '94 Symposium. One of these Panels will be an Environmental Panel to be chaired by Colonel Alex Abela, Vice Commander of 30th Space Wing. We would be honored if you would consider attending as a Panel Member. The Environmental Panel will convene on Tuesday, 19 July 1994. Enclosed please find a preliminary program which will give you a better understanding of the kind of activities to expect. Also included is an explanation of "What is Spaceweek". During this week the Vandenberg Center displays exhibits from various contractors on the Base which are both interesting and informative.

Lt Col Dave Van Mullem has been appointed the Session Organizer for your panel. If you have any questions, please feel free to contact him at (805) 734-8232, ext. 6-1921 or me at (805) 734-8232, ext 5-0602.

At your earliest convenience, please relay your answer to Lt Col Van Mullem or me.

Sincerely,

Steve Bridge, Chairman
Spaceweek '94

SPACEWEEK '94

WHAT IS SPACEWEEK? Spaceweek is an annual celebration sponsored by the "Spaceweek National Headquarters" (SNH) during the week of July 20th. It was begun as a national event in 1981. Numerous communities throughout the country and the world celebrate Spaceweek. The "celebration" takes different forms, depending on who is organizing the event. In Lompoc, California, it takes the form of a symposium. Spaceweek coincides with the anniversary of the manned landing on the moon on July 20, 1969. Spaceweek has strong support from the National Space Society.

WHO IS "SPACEWEEK NATIONAL HEADQUARTERS"? SNH is a not-for-profit volunteer group out of Houston, Texas, that has a major commitment to promoting the space program. Lt. Gen. Don Cromer (Ret.) is a member of the board. The National Space Society is an organization with headquarters in Washington DC. It was founded by Dr. Wernher von Braun and now has many United States Senators, high ranking military and distinguished scientists on its governing board. The Society is a public advocacy group in support of the Nation's Space Programs. It is not a lobby. There is a local Society Chapter in Lompoc.

WHO SPONSORS THE LOCAL SPACEWEEK EVENT? The Western Spaceport Museum and Science Center, a local not-for-profit organization, sponsors and manages Spaceweek events. Vandenberg is hosting Spaceweek '94 and has done so at the request of the museum for the last four years.

HOW IS SPACEWEEK ORGANIZED? Spaceweek '94 Program is as follows:

- Reception welcoming participants followed by a series of panels chaired and staffed by Senior DoD, NASA, Industry and Educational Leaders.
- Lunches and banquet with well known guest speakers.
- Children's session with an astronaut.
- Golf tournament and barbecue.

WHAT IS UNIQUE ABOUT SPACEWEEK '94?

- Hon. E.C. "Pete" Aldridge, President of The Aerospace Corporation, will be the Keynote speaker.
- Dr. Sheila Widnall, Secretary of the Air Force is participating as a panel chairman.

WHAT IS THE QUALITY OF THE LOCAL PROGRAM? The Western Spaceport Museum and Science Center won the National Competition for Best Program in 1989, was runner-up in 1990, First place in the National and International Competition in 1991, and tied for first place in 1992.

Western Spaceport Museum and Science Center

Dr. Nicholas Chryssaopoulos
Chair, UPADI Committee on
Sustainable Development
P.O. Box 6125
Boca Raton, FL 33427

Dear Dr. Chryssaopoulos:

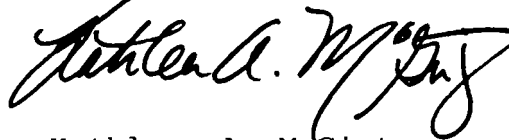

Thank you for your recent letter regarding your efforts in the arena of international sustainable development, and specifically the recent Panel Discussion on Sustainable Development. It was good to hear from you again.

I certainly appreciate your providing me with an update of your efforts and the outcome of your recent panel discussion. Rest assured that President Clinton and I share your commitment to the study of sustainable development issues. I was pleased to learn about your continuing work in international sustainable development initiatives.

With regard to your invitation to attend the 23rd Convention of UPADI to be held in Acapulco, Mexico next July, I will not be able to commit this far in advance. I have asked my scheduling assistant, Mr. Christian Marsh, to keep your information on file for consideration as the date grows closer.

Again, thank you for sharing this information with me. Please keep me apprised of your efforts.

Sincerely,

Kathleen A. McGinty
Director, White House Office on
Environmental Policy

August 27, 1993

Ms. Kathleen A. McGinty, Director
White House Office on Environmental Policy
Rm. 360, Old Executive Office Building
Washington, D.C. 20500

Dear Ms. McGinty:

Thank you for your letter of August 13, 1993, FAXed to me in Rio from the AAES office in Washington. Your letter more than served its purpose, and I when I read it during the Panel Discussion on Sustainable Development on August 17, 1993, it helped confirm the belief I had expressed at the meeting that the period of 12 years of lukewarm support given to environmental matters by the Republican Administrations was over. I added that the Clinton Administration was solidly behind the concepts so often expressed during the presidential campaign, namely that environmental protection and development must go on, hand-in-hand, in a sustainable manner.

You will be interested to know that the Panel Discussion was attended by more than 200 engineers from the 26 member countries of UPADI and was presided by Ing. Conrado Bauer, of Argentina, President-Elect of the World Federation of Engineering Organizations. Prof. Haroldo Mattos de Lemos, of Brazil, Vice President of the UPADI Committee on Sustainable Development, and President of the Brazilian Committee for UNEP, discussed the developing countries viewpoint on sustainable development; Dr. Hanka S. Chryssaopopoulos (my Brazilian-born wife), Member of the UPADI Committee, and President of HSce, Inc., a consulting engineering firm, covered the role of technology transfer on sustainable development; Harry Tollerton, Director of International Affairs of AAES, talked about the AAES Policy on Sustainable Development and the program AAES plans to implement in support of sustainable development; and Rafael Negret, Environmental Specialist of the Inter-American Development Bank in Brasilia, expressed the Bank's commitment to sustainable development. I was the Moderator of the Panel. The session demonstrated the intense interest of all the engineers of our hemisphere on the subject. This interest and commitment was reaffirmed in the UPADI Rio Declaration which stated, in part, that "we will make sure that our actions will realized in the spirit of sustainable development, in harmony with environmental preservation."

You will also be interested to know that the XXIII Convention

23rd convention in Acapulco

Karthleen A. McGinty
August 27, 1993
Page Two

of UPADI will be held in Acapulco, Mexico on July 1-5, 1994, and that one of the technical sessions at that time will be the First Panamerican Congress on Sustainable Development, with the central theme of "Engineering Strategies for the Promotion of a Better Quality of Life." I sincerely hope that you will consider participating in that meeting; your presence would state, once again, President Clinton's commitment to sustainable development and would reinforce the NAFTA spirit.

Finally, a few words regarding the program of the UPADI Committee on Sustainable Development, as approved by the UPADI Board of Directors in Rio de Janeiro. My committee plans to :

- 1-Promote Environmental Awareness;
- 2-Hold Training Workshops throughout our hemisphere on Appropriate Technology and Appropriate Development;
- 3-Conduct Demonstration Projects in Environmental Impact Assessments; and
- 4-Establish a computerized database to make technical existing in the libraries of our technical societies available to all the engineers of the UPADI member countries.

I know that the program is ambitious and that it will take a lot of time and maney; now all we have to do is find the money!

I hope that you will let me know of your thoughts on the contents of this letter that turned out to be much longer than I thought it would. But, we Greeks say that we have a word for everything, and I seem to have used all the words we have!

Thank you again for letting our engineers know of President Clinton's commitment on sustainable development and for expressing your and the Administration's support for what we are trying to do along those lines.

Sincerely yours,

Dr. Nicholas Chrysosafopoulos, P.E.
President, UPADI Committee on Sustainable Development

September 1, 1993

The Honorable Bill Clinton
President of the United States of America
The White House
Washington, D.C. 20500

Dear President Clinton:

While watching, on C-SPAN, the press conference you and the Caribbean Country Leaders gave on August 30, 1993, I was very pleased to hear your announcement that a Small Nations Conference on Sustainable Development will be held next year somewhere in the Caribbean. I was pleased to hear the announcement, not only because it confirmed your commitment on the subject, as shown by your appointment of the President's Council on Sustainable Development, but also because it made clear that you intend to lead future actions, just as the Leader of the most advanced country in the world should.

One of the purposes of my letter is to bring to your attention that the Panamerican Federation of Engineering Societies, UPADI (Union Panamericana de Asociaciones de Ingenieros), has a Committee on Sustainable Development, of which I am the chairman. UPADI is an organization consisting of the Engineering Associations of 26 countries in North, Central, and South America, and the Caribbean; the American Association of Engineering Societies (AAES) is the U.S. member of UPADI. The program of my Committee, approved by the UPADI Board of Directors at its annual meeting in Rio de Janeiro on August 16, 1993, consists of the following:

- 1-Promoting Environmental Awareness;
- 2-Holding of Training Workshops on Appropriate Technology and Appropriate Development;
- 3-Conducting Environmental Impact Assessments as Demonstration Projects throughout the hemisphere; and
- 4-Making available to the engineers in the hemisphere technical information existing in the libraries of the U.S. Technical Societies.

By means of this program, those of us who have been involved in environmental protection projects since 1972, will work together with our colleagues, in the UPADI member-countries, so that they, too, can get the practical experience they lack. In a few months, we intend to have in place a network of engineers throughout the hemisphere for the promotion and achievement

President Bill Clinton
September 1, 1993
Page Two

of sustainable development. Ms. Kathleen A. McGinty, Director of the White House Office on Environmental Policy is familiar with the Committee's purpose and activities.

A second purpose of my letter is to offer to you the help of the UPADI Committee on Sustainable Development in the organization and conduct of the technical aspects of your proposed Small Nations Conference on Sustainable Development. I am confident that in this effort my Committee will have the support of all the UPADI member country engineering associations, as well as that of the World Engineering Partnership for Sustainable Development (WEPED) and AAES.

I hope that you will accept my offer, in line with your statement in your letter, dated August 19, 1993, to Ernest Daman, Chairman of the AAES. In that letter you had indicated your belief that engineers will play a vital role in developing solutions to the World's environmental problems, and that you were looking forward to working with engineers to achieve environmentally sound economic growth. The Conference you plan to hold next year in the Caribbean will be a unique opportunity for you and your Administration to demonstrate to the more than 2,000,000 engineers throughout our hemisphere that your statements on the subject include all the engineers and not only those of us who happen to live and work in this wonderful country of ours. Please give our colleagues in the other UPADI countries the opportunity to get involved in this important Conference, through the UPADI Committee on Sustainable Development.

Respectfully yours,

Dr. Nicholas Chryssafopoulos, P.E.
Chairman, UPADI Committee on Sustainable Development

Ms. Kathleen McGinty, Director
White House Office on Environmental Policy
Old Executive Office Building, Room 360
Washington, DC 20501

Dear Ms. McGinty,

The question of unfunded environmental mandates is of critical importance to state and local governments throughout the United States. By the Year 2000, we will spend more than 30 percent of our revenues on environmental activities. In nearly every state, the costs can be staggering, and because we must balance our budgets every dollar spent on unfunded environmental mandates is a dollar that cannot be spent on other pressing needs such as education and public safety. While we strongly support sound environmental protection, we must be assured that our limited and clearly finite resources are spent in the most efficient manner possible.

THIS
IS
CZ'S
ISSUE;
I
COULDN'T
SPECIFIC
ON IT
ANYWAY

The Energy Council, an organization of state legislators from the nation's energy producing states, has scheduled at its June meeting an important session on the question of unfunded environmental mandates. The session will be held from 9:30 am to 1:30 pm on June 15 in Santa Fe, New Mexico. Attendees will include legislators, business leaders and citizens from many states. I have enclosed a directory of the Energy Council Committee, as well as a preliminary agenda for the conference.

At this session, we will be developing principles we believe should guide an effort to improve the way the federal government mandates environmental management to state and local governments. Our goal is to improve environmental management while assuring that we spend limited resources wisely. Because your office is such an active participant in national efforts to improve our environmental management system, we wish to extend an invitation to participate in our June 15 discussion. We hope to present the principles we develop to the Eco-efficiency Task Force of the President's Council on Sustainable Development and introduce them into other national reform efforts. While we understand your office has been careful not to advance a position on the issue of federal environmental mandates, your insight on the issue, and its relationship to the drive toward sustainable development, would be invaluable during the development of our principles.

Dear Ms. McGinty,

As co-chair of the ~~1994 National Environmental Conference~~, sponsored by the Public Relations Society of America, I am extending to you an invitation to join us on June 20th as keynote speaker for our morning plenary session.

As you'll see in the "Smart Environmentalism" brochure I've enclosed, we've already lined up a group of speakers and panelists who will, undoubtedly, provide us with a lively day of discussion on numerous environmental issues which we read of and listen to almost daily.

Tom Grumbly at the Department of Energy has graciously agreed to be our luncheon speaker and I believe that your remarks on topics of interest to all communications professionals attending the conference, would greatly add to our understanding of national environmental issues and policies from your perspective.

I will be calling your office within the next few days in order to follow up this letter. Should you have need of additional information regarding the conference, please don't hesitate to contact me at (202) 554-1354, or Katherine Tynberg at (202) 332-8939.

Sincerely,

Fred C. Lash, APR

**EDISON ELECTRIC
INSTITUTE**

July 5, 1994

Ms. Kathleen McGinty
Director
Office of Envir. Policy
360 OEOB
Washington, D.C. 20501

Dear Ms. McGinty:

The Geothermal Energy Association and the Edison Electric Institute, with the support of the U.S. Department of Energy, are convening a meeting to determine what joint steps might be taken to establish a collaborative to further the use of geothermal resources. As you may know, Option 26 of President Clinton's Climate Change Action Plan called for collaborative actions as the means to advance renewable energy technologies. This group wishes to develop an aggressive plan for greater use of America's geothermal energy resources as a means of avoiding or reducing greenhouse gas emissions. To this end, we invite you to join other geothermal energy stakeholders on Tuesday, July 19, at the offices of the Edison Electric Institute, 4th floor, 701 Pennsylvania Ave., N.W., Washington, D.C. beginning at 9 am. 

This is the second in a series of collaborative meetings that provide an opportunity for organizations with vital interests in the future of geothermal to help shape a joint strategy for accelerating geothermal development. In addition to geothermal producers and investor-owned utilities, we are inviting representatives from the public and cooperative power sectors, state regulatory officials, environmental and consumer groups, and some U.S. government officials.

As you know, the success of the Climate Change Action Plan depends primarily on voluntary efforts to control greenhouse gas emissions. This federal option provides us with an opportunity, through the collaborative process, to further the commercial development and utilization of geothermal power generation. One goal under consideration is to formulate geothermal strategies that will leverage federal support with private sector investment to reduce greenhouse gas emissions and provide expanded opportunities for commercial geothermal development.

A draft meeting agenda and information about nearby hotels is attached. EEI is located atop the Archives/Navy Memorial Metro Station on the Yellow and Green Lines. We anticipate that this collaborative meeting will last all or most of the day. I urge you to "save the date" and plan to join us in this important meeting.

Please RSVP your attendance to Lisa Booze of EEI at (202) 508-5196.

Sincerely,

Charles W. Linderman
Director, Fossil Fuels & Renewable Programs

Wrap Up and Adjourn

UPADI

UPADI COMMITTEE ON SUSTAINABLE DEVELOPMENT

COMITE UPADI DE DESARROLLO SUSTENTABLE

DR. NICHOLAS CHRYSSAFOPoulos, P.E.
PRESIDENT

May 18, 1994

Ms. Kathleen A. McGinty, Director
White House Office on Environmental Policy
Room 360, Old Executive Office Building
Washington, D.D. 20501

Handwritten notes: *AK PSAD*
Signature: *Regat*

Dear Ms. McGinty:

On April 29, 1994, I wrote the enclosed letter and last Monday, May 16, 1994, I called to find out if you had made a decision. I was told that you were in a meeting and that you, or one of your associates, would call me back. When this did not happen, I called again yesterday and was told that you were in a meeting and that you, or one of your associates, would surely call me back. When I asked if Keith Laughlin, who apparently handles sustainable development in your office, was available and was told that he too was in a meeting. As of this morning, I have not heard from you or your office.

If I were to interpret the above sequence of events correctly, I would have to reach the conclusion that your schedule will not allow you to be with us in Acapulco, and that our colleagues from the 26 UPADI member countries will not hear of President Clinton's commitment to promote and implement sustainable development from a highly-placed member of his administration.

Of course, having somebody from your office call me and tell me that you could not come, rather than letting me draw my own conclusions, might have been another, and perhaps better, approach. In any case, thank you for having considered my request.

Sincerely yours,

Signature of Dr. Nicholas Chryssafopoulos
Dr. Nicholas Chryssafopoulos, P.E.
UPADI Committee on Sustainable Development

Encl.

UPADI COMMITTEE ON SUSTAINABLE DEVELOPMENT

COMITE UPADI DE DESARROLLO SUSTENTABLE

DR. NICHOLAS CHRYSSAFOPOULOS, P.E.
PRESIDENT

April 29, 1994

Ms. Kathleen A. McGinty, Director
White House Office on Environmental Policy
Room 360, Old Executive Office Building
Washington, D.C. 20501

Dear Ms. McGinty:

In early November 1993, following my invitation to you to participate in the First Panamerican Congress on Sustainable Development to be held in Acapulco, Mexico, on July 3 and 4, 1994, you had written to me saying that you had asked Christian Marsh of your office to note this UPADI (Panamerican Federation of Engineering Societies) meeting on your calendar and determine, as we neared that date, if your schedule would permit you to travel to Mexico.

On April 25, 1994, while in the AAES offices for a meeting of the U.S. National Committee for UPADI, I tried to get Christian Marsh on the phone and was told that he was no longer in your office. An accident and an earlier than anticipated return home kept me from trying to get in touch with you, and I decided to write and invite you, once again, on behalf of the UPADI '94 Organizing Committee and the UPADI Committee on Sustainable Development to be with us in Acapulco.

As I had told you in an earlier letter, this event in Mexico is very important and your presence, representing President Clinton, would help push forward what we are trying to achieve. The meeting will be attended by engineers from all 26 UPADI member countries (you might say the cream of the crop of our profession) and will be presided by Ing. Carlos Rojas Gutierrez, Mexico's Minister of Social Development. Parenthetically, you may know that Carlos Rojas, together with Carol Browner and Sheila Copps, Canada's Minister for the Environment, recently inaugurated in Vancouver the North American Commission on Environmental Cooperation, the organization that will implement the environmental provisions of NAFTA.

One of the goals of my Committee is to promote environmental awareness in the UPADI member countries, and to get a commitment from our engineering colleagues to do their best to promote intelligent and appropriate development without hurting our common environment. Your participation in our meeting will be a signal to all that the Clinton Administration is seriously supportive of the concept of sustainable development. I hope you will agree and that your schedule will allow you to be with us. Please let me know as soon as possible.

Sincerely yours,

Exchange Forums

Weapons Complex Monitor Forums

July 20, 1994

*regretted
7/22*

To: Robin

From: Ed Helminski
Phone: 202-296-2815

This is a follow-up to my call to you about inviting Katie McGinty to speak at the **Sixth Annual Weapons Complex Monitor Decisionmakers' Forum**, to be held on September 26-29 at Amelia Island Executive Conference Center, Jacksonville, Florida. If she can accept we could either put her on the **Opening Plenary Keynote Session**, beginning at 8:00 am, Tuesday, September 27 or on the **Closing Plenary Keynote Session** with Tom Grumbly beginning at 11:00 am on Thursday, September 29.

Attached is the first page of the "draft" preliminary announcement. Also, I thought you might be interested in seeing last year's agenda. Some of the primary issues we will focus on this year are contractor/procurement reform, new Ops Office action plans, labor policy, and site workforce transition.

Speakers who have already confirmed for the '94 conference at this time include: Tom Grumbly; DOE Ops Office managers Joe LaGrone, John Wagoner, Mark Silverman; DOE procurement directors Peter Dayton, Oak Ridge and Norman Sandlin, EG&G Rocky Flats; contractors including Don Ofte, President, FERMCO; Ed Keen, Senior VP, Bechtel; Robert Merriman, MMES; and George O'Brien, President, ICF Kaiser Engineers-Hanford. We also have invited several representatives from OMB to be on the Agenda.

We have limited participation in this conference so there is an opportunity for discussion among attendees. In the past five conferences we have drawn top level executives of DOE contractor companies, key officials from federal, state agencies -- I have attached just a sampling of attendees from last year's conference for you to see the level of participation.

We are planning to take our initial announcement to the printer this week if at all possible. If a decision can be made this week, we would greatly appreciate it. Please give me a call at my direct line -- 202-296-2815 -- if you have any additional questions.

I look forward to hearing from you.

Vice-President Al Gore, Jr.
White House Office of Environmental Policy
Old Executive Office Bldg., Rm 360, OSHA#279
Washington DC, 20501

July 15, 1994

Dear Mr. Vice-President,

We miss having you here in Tennessee and would be very happy and honored if you would come to Nashville on **September 16** and lead a forum on **Sustainable Energy Policy Into the 21st Century** -- a subject we know is close to your heart. This forum would be held in conjunction with and as an opening to the annual **HARVEST ENERGY FESTIVAL** put on by the FARM School and Community. One feature will be the Chattanooga electric company that is already working with Douglas Cobb (formerly of the FARM) and The Solar Car Corporation (FL) to provide electric buses for mass transportation without pollution. Cities all over the country need to find out about this collaboration between electric companies and urban transportation.

We know Mr. Vice President that you are trying to lead this country on a sustainable footing toward the year 2000 and beyond. Focusing now on what we need to do to accomplish this goal; working together in this and the remaining election years to keep the people in Congress and the White House who share the vision of a sustainable economy, stewardship of the environment and renewable energy; and finally, gathering momentum at the home base can provide the spark of inspiration needed in the group mind of this country to effectively use the last six years of this millenium to make sure we arrive at the passage on the right note -- setting the tone for the next thousand years! We are still one of the best countries in the global village to provide some light for the rest of the world and technological direction in sustainability.

You were very eloquent on the CNN Population Control Program describing how we as a species have never faced the situation of extreme numbers on the planet that we are about to face. We can't do too much in the way of education and consciousness raising about this impending dilemma. Certainly this makes the subject of **sustainable energy** paramount in importance for all. So please come home for the weekend in September, Mr. Vice-President, and join with us through this event to generate the spirit and the energy needed to meet the task at hand!

Respectfully,

Mary Ellen Bowen

KIDS to the COUNTRY

KIDS TO THE COUNTRY
51 The Farm
Summertown, TN 38483

PLENTY USA, a non-governmental relief and development organization, was born from the realization that all people are members of the human family. And if we wisely use and share the abundance of the earth, there is plenty for everyone.

Donations to PLENTY and The FARM School are tax-deductible.

*The Harvest
Festival
Benefits
Kids To The Country*

Dear Friends,

This summer's KIDS TO THE COUNTRY season begins **July 13** and runs through **August 4, 1994**. Nearly one hundred children (like Cedrick below and his brother Jerald from the Meharry Sisters Program) participated in 1993, and that number is going up this year.

One way we've been asked to significantly increase the number of children is to offer a day trip program in addition to the overnight sessions. We've had a couple of pilot trips that went well, so the KIDS TO THE COUNTRY Field Day Program will also begin this summer.

KIDS TO THE COUNTRY is geared for children aged 6-12, and the kids come from homeless, refugee or other programs dealing with disadvantaged neighborhoods. Our generous sponsors have the gift of knowing that for at least one child, they have made the difference of getting that child out of the city to a totally different scene than what the kids are used to. These kinds of experiences are often peak ones for these youngsters and can affect their lives into the future.

A week's scholarship provides room and board in the homes of families in the community, the supplies and activities, and the instructors from the FARM School extended education staff and students. We heartily thank all the KTC supporters -- the core that keeps this program going!

To suggest or sponsor a child, call Mary Ellen Bowen, Project Director at (615) 964-2534; or write: *Mary Ellen Bowen*

TO:

The Harvest Energy Festival is an alternate energy conference and world music celebration all in one. Vice President Al Gore, Jr. has been invited along with the state senators to hold a panel on sustainable energy and the environment as we approach the year 2000. We'll have updates from the Solar Car Corp on electric buses for mass transit (Chattanooga). Also, there will be workshops and demonstrations on solar cooking, drumming, community living, alternative education, veggie nutrition, crafts and much more!

Conference Center, 21 The FARM, Summertown, TN 38483.

THE FARM is a cooperative community on 1750 acres in Middle Tennessee. It was founded in 1971 on principles of nonviolence and reverence for nature and remains one of the world's most respected and stable intentional communities.

THE 3RD ANNUAL HARVEST FESTIVAL

By: I. Jabulani Tafari

"Feel the power, see the power, be the power" was the theme of the recent 3rd annual Harvest Festival in Tennessee. Taking place over the weekend of October 2nd and 3rd 1993, the event has been described as a great success by its organisers. The Alternative Lifestyles Festival was held at the famous old Hippy enclave know as "The Farm", which is situated in the secluded backwoods at Summertown in South-Central Tennessee, some sixty miles south of Nashville.

The program of events covered a wide range of interesting and inspiring activities, from workshops to product displays to musical performances. In attendance were infants, adolescents and adults as well as a significant number of African-Americans and Afro-Caribbean nationals, mixed in with the basically White majority of young and not so young Hippies. The affair was therefore an inter-generational and multi-cultural happening, which was very much in keeping with the wishes of the organisers.

Among the workshop topics covered were New Directions In Environmental and Human Ecology; Vegetarian Nutrition and Cooking; Alternatives in Transportation; and Natural Childbirth Alternatives. The presentation on alternative transportation was one of the highlights and attracted a large audience and much positive interest. Douglas Cobb, himself a former farm resident and currently the President of the Solar Car Corporation, delivered an intensive overview of recent developments in electronic and hybrid vehicles. He also gave rides in a converted Ford Festiva equipped with solar panels, which was on functional display for both days.

Despite the slight chill of early Fall temperatures, things started warming up considerably when the Farm's homegrown Reggae Band VIBE TRIBE, took the stage on Saturday night. Formed by children of some of the Farm's original founders, VIBE TRIBE had the lively audience dancing and prancing to their fresh Up Beat New-Wave Reggae. Also very well received was the GRIOT SOCIETY from Atlanta, Georgia. The GRIOT SOCIETY pounded out pulsating African polyrhythms and featured the lively dancing of four very exciting performer/percussionists from South Africa, collectively known as VOUKA. The fiery finale was provided by Nashville radio personality MUSTAFA and his MYSTIC MEDITATIONS band. They kept the temperature at boiling point with Reggae and World Beat Sounds complimented by the beautiful and talented UHURU dancers. And the Sunday morning Drumming Circle and workshop directed by MUSTAFA, was was another exciting, well received and much talked about highpoint of the two-day long Festival.

In addition to the workshops, entertainment and focus on renewable energy, the Alternative Lifestyles Festival sideshow included drum makers and their drums, craft and pottery venders, a massage therapist, a solar pathfinder, solar grill and solar bicycle, cultural jewellery, Tye Dye and African styled clothing, and a lot more "cool stuff". This memorable weekend was organised by the Farm's Festival crew headed by Doug Stevenson and Mary Ellen Bowen, and was sponsored by FM-100, Life Works Foundation, Georgetown Masters, Tennessee Managed Care Network, Magical Journey Pangaea, Sunshine Foods and New Life Records.

The Farm was started in 1971 as an experiment in communal living by some 300-odd so-called Hippies. Today, the Farm is an established cooperative of families and friends living on their own 1750 acre property in the lushly vegetated highlands of rural Tennessee. One of the main aims of the Farm devotees, is the promotion of economical and ecologically safe alternatives for industry, agriculture, health care and nutrition - hence their commitment to Alternative Lifestyles. Following the overwhelming success of the recent Harvest Festival, folks on the Farm are already discussing ways to ensure that next year's event is even bigger and better.

The Honorable Kathleen McGinty
Deputy Assistant to the President
Director, White House Office on Environmental Policy
Old Executive Office Building
Washington, DC 20510
FAX - (202) 456-2710

Dear Ms. McGinty:

As Chairman of the American Society for Microbiology (ASM), Public and Scientific Affairs Board, I am writing to request a meeting with you. I attempted to schedule a meeting with you in May, however, due to prior commitments, we were unable to meet. Janet Shoemaker, Director of ASM Public Affairs, and Linda Murphy, Manager of ASM Public Affairs, would also like to participate in this meeting. We would like to meet with you on July 25, 26, or 27, 1994, at a time that is convenient for you.

I would like to discuss with you the increasing concern of waterborne infectious disease contaminating our drinking water supply. This represents an important emerging issue that demands research emphasis on detection of pathogens in drinking water and protection for the nation's potable water supplies. Assuming time permits, I would also like to discuss U.S. policy on international biotechnology concerns, and the need for environmental research and development to prevent further deterioration of the environment and protect human and ecological health.

The ASM is the oldest and largest single life science society in the world, with over 39,000 members, who include academic, government and industrial scientists. A sizable number of ASM members work in areas of applied and environmental microbiology.

Your office may contact Linda Murphy at ASM headquarters by telephone (202) 942-9302 or by FAX (202) 942-9335 to arrange a meeting date or for further information.

I look forward to meeting with you.

Sincerely,

Ronald M. Atlas, Ph.D.
Chair, Committee on Environmental Microbiology
Public and Scientific Affairs Board, ASM

Re: Meeting with Chemical Batch
Processors regarding FIP

Dear Kathy:

It was great to see you at the Show Coalition event in Bel Air earlier this year. I am coming out your way later this month.

My law firm, Radcliff, Brestoff & Frandsen, represents members of the three major national chemical batch processor associations in conjunction with environmental regulatory compliance. In light of the upcoming public FIP hearings in California, I would greatly appreciate it if you could spend twenty minutes or so with representatives of the Chemical Specialties Manufacturers Association, Adhesive and Sealant Council, and Roof Coatings Manufacturers Association on Thursday, July 28, or Friday, July 29, 1994.

The meeting would be beneficial for both the White House and these associations as the specific concerns these important industries have regarding the FIP could be voiced in an informal setting. The representatives of the associations would also benefit from your insight, as many of us in California have from the past.

Two representatives from each association would be present at the meeting, as well as myself. John DiFazio, Jr., Senior Regulatory Counsel of the Chemical Specialties Manufacturers Association, Mark Collatz, Director of Governmental Affairs of the Adhesive and Sealant Council, and Russell Snyder, General Manager of the Roof Coatings Manufacturers Association would be attending, each with an additional person from their respective associations. If the meeting is possible I can

OFFICE OF THE ADMINISTRATOR

*file -
report
July*

Kathleen McGinty
Deputy Assistant to the President for
Environmental Policy and Director
Old Executive Office Bldg., Room 360A
Washington, DC 20503

Dear Ms. McGinty: *Katy*

The U.S. Small Business Administration (SBA) and the Office of Information and Regulatory Affairs (OIRA) at OMB will co-sponsor the Second Small Business Forum on Regulatory Reform on July 27, 1994, from 1:30 to 3:30 p.m., in the 7th floor auditorium of the Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C.

As you are aware, the initial Forum held March 17, 1994 launched a serious initiative to identify, recommend and implement specific changes in the regulatory process as it relates to small business. After receiving input from the small business community in a series of public meetings, five interagency industry-specific working groups are preparing reports and recommendations to be presented at the second Forum. Senior representatives from the participating agencies (the Departments of Labor, Justice and Transportation; the Environmental Protection Agency, the Food and Drug Administration and the Internal Revenue Service) are expected to participate on a panel which we are co-chairing to receive and respond to the working group reports.

As an attendee at the first Forum, we know that you share the President's desire to ease unduly burdensome impacts of regulation and recordkeeping on small business. Your attendance at the second Forum to hear the reports of our working groups would underscore the significance of the undertaking and the importance being placed upon regulatory reform within the administration.

printed on recycled paper

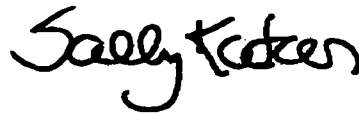

Please confirm that you will be able to attend the Forum on July 27, 1994. If you wish, you may have an additional staff member attend, but limited space requires that you limit the number of attendees to two. Please complete the enclosed response form and fax it back to SBA at (202) 205-6846 as soon as possible.

If you have any questions about the Forum, please do not hesitate to contact John Spotila at the SBA (202 205-6642) or Don Arbuckle at OIRA (202 395-7340). We look forward to seeing you on July 27th.

Sincerely,

Erskine B. Bowles
Administrator
U.S. Small Business Administration

OFFICE OF GENERAL COUNSEL

RESPONSE FORM

Second Small Business Forum on Regulatory Reform

The Second Small Business Forum on Regulatory Reform will be held in the 7th floor auditorium of the Internal Revenue Service ("IRS"), 1111 Constitution Avenue, N.W., in Washington, D.C., from 1:30 p.m. to 3:30 p.m., on Wednesday, July 27, 1994.

A security clearance is required for admittance to the IRS. In this regard, please fill out all of the information requested on the form below, and fax it to us not later than 7:00 p.m. on Friday, July 22nd. On the day of the Forum, please enter the IRS at the Main Entrance on Constitution Avenue. You will need to present a picture ID at this time, so please bring one with you.

If there are any changes to your response form after July 22nd, please notify us of the appropriate information immediately. It may not be possible to accommodate changes received after Monday, July 25th.

Please return this response form as soon as possible to:

Ronald F. Matzner
Associate Deputy General Counsel
FAX: (202) 205-6846
VOICE: (202) 205-6642

I'd like to talk.*

TO: Katie McGinty

FROM: Katy Moran - 202-337-3211

SUBJECT: Meeting with Kuna, Imber'a and Wounaan of Panama to demonstrate their mapping of indigenous territories

DATE: July 7, 1994

Knowing of your interest in indigenous land demarcation as a possible Summit issue, I will be happy to set up a meeting for you with Indians who are now in Washington for the Folklife Festival. Possibilities are:

A visit by you to the Mall where the above groups are demonstrating their mapping techniques today through Sunday

Join us at a WRI brown bag seminar on this tomorrow (see following information)

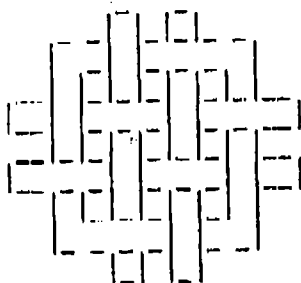

I can set up a visit to your office at your convenience

I will be happy to have a small meeting at my house

One of the most prominent chiefs from Panama is here for a short time, which offers you an unusual opportunity to hear what's going on from those who have the greatest investment and interest in it -- the Indians themselves

Katy

BROWN - BAG - SEMINAR

DEFENDING THE LAND WITH MAPS

by:

Facundo Sanap'i
Regional Cacique
Congreso Imber'a - Wounaan

Friday, July 8th - WRI Main Conference Room - 12:30 to 2 pm

Indigenous Peoples have often lost their land because they couldn't "prove" they owned it. But the Imber'a and Wounaan ethnic groups in the Dari'en region of Panam'a show that by making maps, they can help to defend their ancestral homelands against the incursions of land hungry newcomers. Cacique Sanap'i will explain the history, significance and process by which his people conducted detailed land use and demographic surveys, compiled maps using both local knowledge and remote sensing data, communal workshops and a national seminar to present their findings to politicians and environmentalists. Translations will be provided.
