WASHINGTON, D.C.
DECEMBER 2 - 3, 1993**

In the aftermath of the great midwestern flood of 1993, Governors and other state officials have turned their attention to recovery and mitigation challenges. They are assessing both short- and long-term recovery costs and needs, and are identifying steps that can be taken to mitigate against future natural disasters.

In facing recovery and mitigation challenges, states must work in cooperation with the federal government and Congress. State officials are seeking information and policy clarification on how federal funds can be spent, flexibility of program guidelines, and schedules of major recovery actions.

This workshop brings together state and federal officials to discuss flood recovery and mitigation issues of common concern. The first day is devoted to identifying and prioritizing key state issues. On the second day federal officials are asked to respond to the state concerns, answer specific questions, and present schedules for reconstruction initiatives and delivery of funds.
