GOALS 2000 -- TITLE III STATE FORMULA GRANTS

1995 Appropriation: \$361,870,000

1996 Request: \$693,500,000

1996 Senate Appropriations Committee Bill: \$300,000,000

Program Purpose

Goals 2000 grants help States and communities implement school improvement plans to raise student academic achievement, involve parents in schools, bring technology into the classroom, upgrade teacher professional development, and create partnerships with business and community groups to improve schools. While the majority of State and local education funds support day-to-day school operations, Goals 2000 provides important "venture capital" for schools to focus on academic excellence and school improvement.

Ninety percent of the 1996 funds would go to local districts and schools to support local school reform initiatives. At least 50 percent of the funds provided by districts to individual schools would be made available to schools with a high number of students from low-income families.

Overall Impact of Senate Committee Cuts

A reduction of Goals 2000 would severely undermine State and local efforts to improve elementary and secondary education and achieve the National Education Goals. It would reduce funding for all States and would terminate funding for many school districts and schools just at a time when communities and States have completed their planning and are ready to implement reforms based on challenging academic standards. About 10,000 of the more than 17,000 schools that would have participated under the President's budget proposal would be cut off from funding that is designed to help them better use their resources to improve teaching and learning for an estimated 5.5 million students enrolled in those schools. Without this funding, these schools will not be able to implement much-needed improvements in professional development, curriculum, parent involvement, and various other aspects of school reform.

Specific Examples

KENTUCKY

- ◆ Kentucky has been a leader in statewide education reform since the passage of the Kentucky Education Reform Act of 1990. Goals 2000 funds are

supporting the State's efforts to increase parental and family involvement in schools and in the State's school reform process. For example, **Harrison County** is using Goals 2000 funds to install homework hotlines so parents can track student work; **Hardin County** is using funds for cable television and video programs to reach parents who otherwise could not get to their child's school; and **Franklin County** is using Goals 2000 money to train teachers to recruit parents as classroom instructional volunteers.

UTAH

- ◆ Utah is using Goals 2000 funds to implement the recommendations of the Utah State Education Strategic Plan, which emphasizes high student performance standards and a comprehensive accountability system. During the first year Utah participated in Goals 2000, 30 of the State's 40 school districts applied for funding through collaboratives that include institutions of higher education. For example, nine school districts, the **University of Utah**, and **Brigham Young University** formed a partnership to design and implement a preservice education program to provide teachers with the skills necessary to improve student achievement in inner-city schools.

OREGON

- ◆ Under the Oregon Education Act for the 21st Century, local districts are completing comprehensive plans to improve student achievement. Goals 2000 funds are being used to implement those plans. Special attention is being paid to providing teachers with training to teach to high standards and to identify assessments that measure student performance. Oregon's plan also calls for giving local districts unprecedented flexibility in how they reach State and local education goals. In **Portland** this involves creating a magnet program that focuses on science and math, particularly biotechnology. Oregon was also the first State in the country selected to participate in the "EDFLEX" partnership, which allows the U.S. Secretary of Education to delegate decisions about Federal program waivers to State officials.

KANSAS

- ◆ The **Lawrence School District** is using Goals 2000 funds to develop a variety of assessment tools to help its schools more accurately describe student performance in relation to its high academic standards. In addition, Goals 2000 funds are assisting local districts and individual schools in efforts to incorporate the new standards in classroom teaching. Kansas was recently selected as an "EDFLEX" State, to which the Secretary will delegate decisions about waivers of Federal requirements.

LOUISIANA

- ◆ During the first year of Goals 2000 participation, 48 of the Louisiana's parishes benefited from Goals 2000 support. Goals 2000 funds have helped to forge new partnerships to promote school improvement. In one case 12 school systems, two universities, and a regional service center teamed up to develop new training opportunities for teachers.

MASSACHUSETTS

- ◆ In Massachusetts, Goals 2000 funds are supporting the start-up costs of 14 charter schools—schools formed by teachers who have come together, free of typical State and local regulations, with a shared vision of a good school, a plan to implement the vision, and a willingness to be held accountable for student learning. Massachusetts has just been selected as the third "EDFLEX" State under the Goals 2000 provision that allows the Secretary to delegate to up to six States the authority to grant waivers of Federal education requirements.

MICHIGAN

- ◆ The **Ann Arbor** Public School district, working with the **University of Michigan**, is integrating technology into all aspects of the school experience. The State is using technology to reform the math and science curriculum, support mentoring in jobs connected to students' studies, and train teachers.

TITLE I GRANTS TO LOCAL EDUCATIONAL AGENCIES (LEAs)

1995 Appropriation: \$6,698.4 million

1996 Request: \$7,000.0 million

1996 Senate Appropriations Committee Bill: \$6,019.4 million

Program Purpose

Title I Grants to LEAs provide supplemental financial assistance to almost all school districts in the country, and to about 53,000 schools, especially in high-poverty areas. Funds help improve the teaching and learning of at-risk children to enable them to master challenging curriculum and learn to high academic standards expected of all children. Federal formula funds are allocated to States, which suballocate funds to school districts. Within districts, funds go to schools with the highest proportions of children from low-income families.

Evaluation Findings

- ◆ Title I has improved basic reading and mathematics skills of the lowest-achieving school-children in the Nation and has helped close the learning gap between those children and their peers. With the help of Title I, for example, the achievement gap between black and white 9-year olds narrowed over the past two decades by 18 percent in math and 25 percent in reading. The reauthorized Title I restructures the program to help disadvantaged children make even more progress which is necessary to meet internationally competitive standards.
- ◆ The educational needs of disadvantaged children, especially in high-poverty schools, are growing. Evaluations show that children in high-poverty schools are held to lower expectations than children in other schools, and they are more likely to fall behind in the early school grades and never catch up. For example: first graders in poor schools start school scoring 27 and 32 percentile points lower in reading and math, respectively, than other school children, and the initial gap widens by grades 4 and 8. In addition, eighth-graders in poor schools are 57 percent more likely to leave school by grade 10 than are students in other schools.
- ◆ Administrative costs for Title I are comparatively modest: States retain not more than 1 percent of the funds for State administration; school districts use only 4-10 percent of local Title I funds for district administration. According to a recent GAO study, districts devote a greater percentage of Title I funds to classroom instruction (73 percent) than they do with other district funds (62 percent).

Overall Impact of Senate Committee Cuts

- ◆ Decreases LEA allocations on average by 10.1 percent, which will deprive an estimated 651,000 at-risk children of special services designed to help them to achieve to high levels in core academic subjects such as reading and mathematics.
- ◆ Eliminates about 18,500 teacher and aide jobs.
- ◆ Serves approximately 5,800 fewer schools.

Specific Examples

With the proposed cuts, school districts and schools would have to decide which classrooms and children can do without the essential help that Title I provides to help all children, including poor, low-achieving children, learn to high standards. For example:

- ◆ Some high-poverty schools would have insufficient funds to implement all the components of their Title I schoolwide programs, which promote overall school reforms to benefit all disadvantaged students as an alternative to targeting special services to a few individual students. **Example:** In the year after "schoolwide" restructuring to refocus curriculum, teaching, and community relations on helping students excel, the test scores of fourth and fifth graders at Ronald E. McNair Elementary School, in a poor, crime-ridden urban area of North Charleston, South Carolina, rose from the 1st percentile to the 25th percentile. Since then, the school's ranking has moved from the lowest to the middle range of comparable schools in the district.
- ◆ Schools might have to eliminate intensive learning arrangements that challenge disadvantaged children to match the achievements of the Nation's best students, as well as opportunities for the students to catch up or make extra progress. **Example:** All students in grades 6-8 at the Accelerated Learning Laboratory (ALL) School, in a high-poverty area of Worcester, Massachusetts, attend five-week intensive seminars and laboratories that find creative ways of teaching complex skills in mathematics, social sciences, and other curriculum areas. Title I funds support a Higher Order Thinking Skills (HOTS) laboratory, and the school's reform agenda calls for a technology magnet school, multi-grade "clusters," and an alternative grading system that evaluates student portfolios and awards certificates to students for mastering standards that are defined by leading professional organizations and the State. Title I funds also support summer programs to give extra help to students who score poorly on district tests.

- ◆ Programs focusing on early intervention strategies that may help prevent later school failure might be cut back or eliminated. **Example:** At Cecil Elementary School, a majority of children enter school with poor language skills and limited exposure to the world beyond the poverty, substance abuse, and violence of their northeast Baltimore neighborhood. To help address the problem, Title I supports "Success for All," a program developed by Johns Hopkins University to prevent failure in school. The program includes a prekindergarten program to help children develop language skills, and an "extended-day" kindergarten to help integrate those skills by learning to follow directions, make decisions, and react appropriately to different social situations. Early learning is a major factor in the school's improved test scores: the number of students in the school scoring above the 50th percentile rose from 43 percent to 76 percent between 1991 and 1993.

SAFE AND DRUG-FREE SCHOOLS AND COMMUNITIES

1995 Revised Appropriation: \$466 million

1996 Request: \$500 million

1996 Senate Appropriations Committee Bill: \$200 million

NOTE: The Senate Committee bill provides an additional \$200 million to the Department of Education for youth substance abuse prevention programs that would be carried out by the Substance Abuse and Mental Health Services Administration in the Department of Health and Human Services (HHS). Under the Senate Committee proposal, the Department of Education would be required to transfer the \$200 million to HHS, schools would not have direct access to these funds, and almost none of the funds would be able to be used for violence prevention or school safety activities. Only \$200 million of the \$400 million appropriated to the Department of Education would be available for the Safe and Drug-Free Schools and Communities program discussed below.

Program Purpose

In FY 1995, the Safe and Drug-Free Schools and Communities Act (SDFSCA) replaced the previously authorized Drug-Free Schools and Communities Act (DFSCA). The Safe and Drug-Free Schools program is the Federal Government's primary vehicle for providing school-aged youth with a wide range of drug and alcohol prevention programming and violence prevention programming. SDFSC **State Grants** provide Governors, State educational agencies (SEAs), and local educational agencies (LEAs) considerable flexibility in developing programs and activities based upon their assessment of the problem and the resources available.

The SDFSCA also gives the Secretary broad discretionary authority to carry out **National Programs** to prevent drug use and violence. Such programs may include training, demonstrations, direct services to school districts with severe drug and violence problems, program evaluation, and information development and dissemination. National Programs also support model drug prevention and campus safety programs for students attending institutions of higher education.

The 1994 Reauthorization

The program was reauthorized by the Improving America's Schools Act, which made the following improvements:

- **Adds violence prevention as a key element of the program.** LEAs will have the flexibility to design their own violence prevention programs, which could include comprehensive school safety strategies, coordination with community agencies, conflict resolution and peer mediation, and (subject to a 20 percent cap) the installation of metal detectors and hiring of security guards.

- Targets resources to where they are most needed. States will determine criteria for selecting high-need LEAs and target 30 percent of their LEA funding to those districts.
- Increases accountability. States and LEAs will be required to assess needs, establish goals and objectives, measure program outcomes, and use this information to formulate policies and program initiatives.
- Broadens the range of authorized prevention activities. LEAs will be authorized to implement a broader range of prevention activities, including mentoring, community service and service learning projects, conflict resolution, peer mediation, character education, acquisition of metal detectors, and hiring of security personnel.

Evaluation Findings

In a study examining the implementation of the DFSCA, States reported the following positive changes:

- Increases in the number of school districts with formal prevention programs;
- Increases in school-community collaboration on drug prevention issues;
- Increases in parent involvement in drug education efforts;
- Increases in the degree of community involvement in prevention programs for youth; and
- Increases in the number of high-risk youth served in drug education programs.

Overall Impact of Senate Committee Cuts

The Senate Committee bill would have the following effects on the SDFSCA State Grants Program:

- Drug and violence prevention programs serving approximately 39,000,000 students in 97 percent of the Nation's LEAs would be reduced or eliminated, at a time when national data for the past 2 years show sustained increases in youth drug use for middle and high school-aged youth. LEAs with small enrollments are likely to be disproportionately affected, because such a significant reduction in the appropriation level for the program may decrease allocations to small LEAs below the level required to make operation of any program feasible.

- Many LEAs would not be able to maintain the comprehensive prevention programs they have developed in recent years, yet comprehensive programs are more likely to be effective in preventing drug use and violence than are narrow programs with only a few components or interventions.
- Governors in every State would be forced to reduce or eliminate federally funded drug and violence prevention programs for youth not served by LEAs or for children and youth who need special services or additional resources. The impact of the cut would be particularly harsh on States that receive the "minimum State allocation" amount – those States would receive less than \$195,000 per State for the SDFSCA Governor's Program.

The Senate Committee bill does not include funding for **SDFSCA National Programs**. Consequently, the Department of Education would no longer be able to:

- Develop and disseminate publications on school violence and drug and alcohol prevention. Such activities have been the cornerstone of the Department's efforts to provide schools with information on models and effective practices that have the potential to improve the quality and effectiveness of programs implemented with State grant funds.
- Support the development of models for alternative education for students expelled from their regular education program. With expulsion rates increasing dramatically in some communities – due in part to the Federal Gun-Free Schools Act, which requires a one-year expulsion of a student who brings a firearm to school – it is essential that we provide leadership in this area.
- Support drug and violence prevention programming on college campuses.

Specific Examples

Virginia

In **Prince William County**, Virginia, significant drug and violence prevention activities would be severely curtailed or eliminated. This school system, with an enrollment of approximately 88,000 students, received a SDFSCA allocation of nearly \$111,000 in FY 1995; the House bill would result in an FY 1996 allocation of approximately \$50,000.

The reduction comes at a time when demand for services, even with existing personnel resources, can barely be accommodated. For example, in school year 1994-1995, staff responded to 1,942 referrals for assessment of a student for substance-related problems – an increase of 649 referrals from the 1993-1994 school year. Despite this significant increase in need, the reduction would cause a

significant reduction in staffing. Not only would the number of staff be significantly reduced; a loss of expertise, developed over time and through an investment of resources, would also occur.

Specifically, the following prevention activities being implemented in Prince William County Schools would be significantly curtailed or eliminated by the cuts:

- Contacts with parents concerning substance abuse issues (about 1,000 made in school year 1994-1995);
- Instruction to students on prevention topics by prevention specialists;
- Individual "problem-solving" sessions with students on substance abuse and violence issues (about 4,500 sessions conducted in the 1994-1995 school year); and
- Staff consultations regarding student, staff, and family substance abuse issues (more than 4,700 were held in the 1994-1995 school year).

Illinois

The **Chicago Public Schools** will receive approximately \$4.2 million in Safe and Drug-Free Schools funding in FY 1995. The school district divides its funding between support for district-wide training and technical assistance activities, and a per-student allocation to each school building to meet locally identified needs. The per-student allocation has been as high as \$8 per student, and was set at \$4 per student in FY 1994. The cut for FY 1996 would reduce the school district's allocation to about \$2.1 million.

The district prevention office is staffed by 15 people: a program manager, 3 city-wide coordinators, and 11 field coordinators, each of whom is responsible for overseeing programming in 50 schools.

School district officials think that loss of Federal funding from the Safe and Drug-Free schools program would result in the elimination or significant curtailment of the following:

- The district's prevention office;
- A prevention-based television show offered over a local cable channel;
- A peer leadership/intervention program that was offered for the first time last summer and involved 150 people from 15 Chicago high schools. Students discussed issues related to violence and developed action plans based on their

knowledge of the needs of specific schools. Generally, the participants in the program agreed that metal detectors are not effective deterrents to school-related violence and they urged instead that school officials secure doors, put more people in the hallways, and provide alternative activities for students. They also identified potential trouble spots in the schools, such as bathrooms that are not checked regularly and other isolated spots where students congregate without supervision. Finally, they urged that students and faculty work to change the school climate by emphasizing positive actions of students through the school newspaper and other means.

- Extensive collaboration with other public and private agencies in the city, including the Police Department, that help to leverage support for prevention programs, balance services among schools, and engage students in community-based activities.
- A "Book Buddies" program that trains older students to read to children and talk with them about issues such as drug prevention and personal responsibility based on themes in the books;
- A student assistance program that provides counseling for students re-entering schools after drug treatment;
- A summer program for 400 "extremely high-risk" students who are over-age underachievers. The program is designed to smooth the transition to high school for these students, many of whom are involved in drug use, have discipline problems, and have a high potential for dropping out of school.
- Training for 3,000-4,000 teachers, parents, and administrators annually; and
- Training for an additional 2,000 people annually through non-district sources, which are publicized by the district prevention office.

Michigan

In **Wayne County (Detroit)** Michigan, numerous programs are operated with DFSCA funding. Detroit Public Schools' FY 1995 allocation of SDFSCA funds will be \$934,798. The reduction would result in an estimated FY 1996 allocation of \$467,399, a 50 percent cut. Activities implemented with SDFSCA funds that would be curtailed or eliminated by the reduction include:

- A youth forum on drug-free schools;
- After-school education and conflict resolution training;

- "Street Peace" violence reduction lessons;
- Youth leadership training;
- A youth forum with the mayor;
- Saturday parent conferences; and
- A safe and drug-free schools advisory council.

At the school building level, Van Steuben Middle School would not be able to expand its model program of conflict resolution and drug abuse prevention. Its Violence Reduction/Conflict Resolution Program advocates peaceful resolution of problems through peer mediation training, classroom guidance, student non-violence advocate clubs, community forums, student summits, and thematic assemblies. Its drug curriculum is designed to provide age- and grade-level appropriate drug prevention education.

MacKenzie High School would also be forced to curtail or eliminate its exemplary programs in conflict resolution and drug abuse prevention. In its violence prevention program, the main focus is helping students learn and understand the need for cooperation and structure in order to be positive contributors to society. The school has seen a remarkable decline in the number of student infractions and violent incidents since this program was instituted. MacKenzie's drug abuse prevention program teaches students about substance abuse while providing the opportunity to develop and strengthen character. This program motivates students to complete their education and avoid involvement with drugs and crime.

TECHNOLOGY CHALLENGE GRANTS

1995 Revised Appropriation: \$9.5 million

1996 Request: \$70 million

1996 Senate Appropriations Committee Bill: \$15 million

Program Purpose

The **Challenge Grants** are five-year awards to support the development of a new generation of interactive learning tools. Grants are awarded to partnerships that include school districts, private companies, universities, and other organizations. They will leverage millions of dollars in private-sector and in-kind support for the neediest schools.

Overall Impact of House Cuts

Challenge Grants encourage and support partnerships between school districts and other organizations committed to making use of cutting edge technology to improve student performance. In its first competition, the program generated over 500 applications involving approximately one-sixth of the Nation's school districts. Several hundred companies, including almost every major computer hardware and software firm, have committed financial and in-kind resources to these partnerships. Hundreds of universities, public libraries, and nonprofit organizations are also involved. Unfortunately, the funds available can support only a small fraction of these proposals.

The Senate Committee bill would provide continuation funding for existing projects, but insufficient funds for an additional K-12 competition. A competition targeted at adult learning, including workplace applications and adult literacy, would not occur. The \$70 million requested for FY 1996 would leverage hundreds of millions in private sector support for education.

Specific Examples

The following projects are similar to ones that will be funded through the **Challenge Grant** program:

New Jersey

- ◆ The Christopher Columbus Middle School in **Union City**, NJ has used technology to support a challenging curriculum, leading to improved test scores and higher attendance in a poor urban immigrant community. The program is

a partnership with the school district, **Bell Atlantic**, and the **Educational Development Center in New York City**. The district plans to expand the concept to other schools in the district this year.

Pennsylvania

- ◆ In the **Pittsburgh** Public Schools, high school students are using the Internet to learn science, mathematics, and foreign languages with help from Carnegie Mellon University professors.

Iowa

- ◆ Students at North High School in **Des Moines**, IA are using the Internet to access some of the best libraries in the world to support research projects, with help from **Drake University**.

New Mexico

- ◆ In **Albuquerque**, NM, parents of students at the Eugene Field School can use the school's computer center in the evening and on weekends to work with their children on school projects.

BILINGUAL EDUCATION

1995 Appropriation: \$157 million

1996 Request: \$200 million

1996 Senate Appropriations Committee Bill: \$123 million

Program Purpose

Title VII, the Bilingual Education Act, assists school districts in meeting their obligations under the Civil Rights Act of 1964 and the 1974 Supreme Court ruling in Lau v. Nichols. Both established that school districts have a responsibility to provide equal educational opportunity to limited English proficient (LEP) students.

Discretionary grants are provided to local educational agencies (LEAs), State educational agencies, community-based organizations, and institutions of higher education to implement and improve instructional programs and professional development designed to help LEP students master the English language and challenging curriculum geared to high standards.

Evaluation Findings

- A recent review of relevant educational research concluded that a certain level of skills and literacy in the first language is critical to academic success in the second language. After 4-7 years in a quality bilingual program, students typically reach native speakers' norms in the second language across all subject areas and continue this level of achievement through the upper grades.
- In a study commissioned by the Department of Education, the National Academy of Sciences appointed a panel of statisticians and researchers to thoroughly examine two large evaluation studies funded by the Department of Education. The Academy panel noted the "convergence of the studies in suggesting, under certain circumstances, the importance of primary-language instruction in second-language achievement in language arts and mathematics."
- A study conducted by the Department of Education documented the success of the Family English Literacy program (one of the activities carried out under Title VII) in increasing parent participation, improving student achievement, reducing adult illiteracy, and reducing the dropout rate of LEP students.

Improvements Made Through Reauthorization

The Improving America's Schools Act strengthens and reconfigures the Title VII program to provide LEAs and other grantees with greater flexibility in designing programs to improve

educational services for LEP students. Along with flexibility, new provisions hold funded programs accountable for the progress of enrolled students towards meeting the high standards expected of all children.

In addition, the Department estimates that programs under the new law will serve twice as many students as under the antecedent law because most new projects will serve all LEP students within the school or district. The Department's fiscal year 1996 request would serve an estimated 700,000 students.

Overall Impact of Senate Cuts

The Senate provided only \$123 million for bilingual education. The programmatic impact, compared to the Administration's request, would be as follows:

- Elimination of assistance to 303 school districts for services to 255,000 LEP students.
- Elimination of grants to 53 State educational agencies that currently receive support to provide LEAs with technical assistance and for data collection activities.
- Elimination of 63 professional development projects at colleges and universities to support educational programs for new and existing teachers.
- Elimination of fellowships for 240 graduate students to assist them in obtaining their advanced degrees in educating linguistically and culturally diverse children.

Specific Examples

California State Educational Agency

Without Title VII funds, the California State department of education would be forced to drastically cut back technical assistance activities to LEAs serving 1.3 million limited English proficient students.

Benchmark Study

The recently funded Benchmark study, which is documenting how LEAs currently serve limited English proficient students and how services are changing as a result of systemic education reform, would be terminated without collecting meaningful data or producing a final report.

National Clearinghouse for Bilingual Education

Without Title VII funds for the National Clearinghouse for Bilingual Education, school districts, State educational agencies, and other entities that consider the Clearinghouse a valuable resource for information about bilingual education, would not have access to a national source for this kind of information.

International High School

The International Schools Partnership, that has dramatically increased graduation rates for limited English proficient high school students in the New York area, would be unable to disseminate its successful model to high schools throughout the country.

VOCATIONAL EDUCATION

1995 Revised Appropriation: \$1,103.6 million

1996 Request: \$1,178.1 million

1996 Senate Appropriations Committee Bill: \$1,002.3 million

<u>Program</u>	<u>1995 Appropriation</u>	<u>1996 Request</u>	<u>1996 Senate Appropriations Committee Bill</u>
<u>Vocational Education</u>	\$1,103.6 million	\$1,178.1 million	\$1,002.3 million
<u>State Grants, etc.</u>	1,092.5 million	1,141.1 million	992.9 million
<u>National Programs</u>	11.1 million	37.0 million	9.4 million

Program Purpose

States use funds to support a variety of vocational education programs, including academic and vocational integration and tech-prep, and to provide equal access in vocational education to special populations. National programs focus on research (including support for the National Center for Research in Vocational Education), demonstration grants, and the National Occupational Information Coordinating Committee. Programs supported with Perkins Act funds serve more than 11 million students – two-thirds at the secondary level and one-third in post-secondary institutions.

Overall Impact of Senate Committee Cuts

An estimated 45,000 students would not be able to complete tech-prep programs. The integration of academic and vocational education would be seriously impaired.

Specific Examples

Tech-prep:

◆ State Center Tech-Prep Consortium - California

This Tech-prep consortium in **Fresno** provides career training for high-skill jobs and serves 1,725 secondary students. The program emphasizes the integration of academic and occupational education and grants students college credit while in high school. While there are two other grants to this consortium beyond the Federal Tech-Prep funds, the program would have to be significantly scaled down.

**Comprehensive Competency-Based Guidance Program, Sabino High School,
Tucson, Arizona:**

- ◆ Sabino is one of ten high schools in the Tucson school district implementing a comprehensive, competency-based guidance program. The program is supported by community agencies, business, industry, labor organizations, government, and parents. A team composed of four counselors, the career center coordinator, academic and vocational teachers, and parent volunteers presents the career domain competencies--self-knowledge, educational/occupational exploration, and career planning--to all students. The school has piloted and disseminated two programs to the other schools in the district: (1) a computer/English program in which staff worked with two freshman computer technology English classes to deliver career and educational information using a career information delivery system and (2) a life skills program, "Majoring in the Rest of Your Life."

Chicago High School for Agricultural Services, Chicago, Illinois:

- ◆ Chicago High School offers an applied science curriculum to prepare urban students for careers in agribusiness. The curriculum is skill-based, teaching students problem-solving skills across all subjects. The program boasts a 90 percent attendance rate and graduates 95 percent of its students. Consistently, the school's students have won awards in city and State science fairs and have won recognition nationally. The school has been "adopted" by **USDA**, and has received awards from the Chicago Board of Trade, and Kraft General Foods.

Cuts in vocational education and tech-prep would affect students seeking the academic and occupational skills they need for further education and careers. Stories from several former students indicate the impact that vocational education programs have had on their lives.

- ◆ Don Mauck, blind since birth, participated in the **Community College of Denver's** Computer Training Program for People with Disabilities (CTPD). Despite several health-related setbacks that forced him to leave the program on two occasions, Don graduated from the program in 1992 and was recognized as Student of the Year. Today he is a programmer/analyst for a Colorado high-tech corporation, developing on-line software for accounting and construction firms.
- ◆ Paul Slinko, married and the father of a small child, studied at a large State technical center in **Orlando, Florida**, and at **O-TEC/Mid-Florida Tech**. At O-TEC, Paul completed a program in major appliance and refrigeration repair. The training enabled him to leave a minimum wage job at a coffee shop and obtain employment with Circuit City Service where he went through a training program with a master technician. Based on Circuit City's quality rating system for its technicians, Paul has been recognized as one of the company's top five technicians in the Nation.

- ◆ Summer Downs, a low-achieving student from a severely dysfunctional family, enrolled in a certified nurses aide (CNA) tech-prep program at Quincy High School in **Quincy, California**, during her junior year. After less than one year in the program, Summer's self-esteem improved and her interest in school increased dramatically. During her senior year, she maintained an A-average in her coursework and found employment at Care West Convalescent and Geriatric Facility where she received high praise from the staff and patients. By graduation she had an extremely marketable resume, a strong academic record, and outstanding references. She received several college scholarships from the Quincy community and is preparing to enroll in the registered nurse program at a two-year community college in **Portland, Oregon**.
