Fax: (202) 456-2461

Dear President Clinton:

I am signing this letter to support the Bill H.R.2741 introduced by Congressman Lincoln Diaz-Balart, requesting permanent residency to certain aliens who are Colombian or Peruvian nationals currently residing in the United States of America, prior to December 1, 1995.

The Colombian and Peruvian communities have become well integrated into our society. The Colombian and Peruvians exiles are hard working and law-abiding. They have obtained jobs, paid taxes and are raising families in the United States. Large numbers of Peruvians are professionals graduated in their homeland, as well as in the United States. They have fled violence and terror in their countries. They here because of forces beyond their control.

Unfortunately, the great majority is now subject to deportation to these countries whose social-political environment is in turmoil with large segments of the society in deep poverty. In the most recent reports issued by U.S. Department of State, dated February 26, 1999, we found that two of the most powerful terrorist groups in Peru continue their bloody actions. Since 1980 "The Shining Path" (Sendero Luminoso) and Tupac Amaru Revolutionary Movement (MTRA) have caused the death of more than 20,000 lives. The conditions in Colombia may even be worse as rebel groups control up to 40% to 50% of the country while the death toll has been much higher. These violent conditions exist to a degree because the government of these countries is trying to implement the United States policies against terrorist and drug production. These conditions create an unsafe climate for returning families and their children, many of them whom have been born in the United States.

Besides the death of innocent people, these two groups have been the cause of millions of dollars in material loss to the country. Due in large part to the Governmental strong actions, the threat posed by these groups have decreased, but they are still active in a small scale and it is not completely eliminated. These conditions create an unsafe climate for returning families and their children many of them whom have been born in the United States.

Fairness calls for close this sad and unfortunate chapter in which contradictory U.S. policies have played an instrumental role. As a matter of principle, justice and moral obligation, please grant the Colombians and Peruvians in the United States a humanitarian permanent residency, thus 65,000 Colombian and 15,000 Peruvian families can move ahead with their lives, and secure their well being.

May God bless you! Please pass H.R. 2741

These conditions create an unsafe climate for returning families and their children, many of them whom have been born in the United States.

Besides the death of innocent people, these two groups have been the cause of millions of dollars in material loss to the country. Due in large part to the Governmental strong actions, the threat posed by these groups have decreased, but they are still active in a small scale and it is not completely eliminated. These conditions create an unsafe climate for returning families and their children many of them whom have been born in the United States.

Fairness calls for close this sad and unfortunate chapter in which contradictory U.S. policies have played an instrumental role. As a matter of principle, justice and moral obligation, please grant the Colombians and Peruvians in the United States a humanitarian permanent residency, thus 65,000 Colombian and 15,000 Peruvian families can move ahead with their lives, and secure their well being.

May God bless you! Please pass H.R. 2741

Dear President Clinton:

I am signing this letter to support the Bill H.R.2741 introduced by Congressman Lincoln Diaz-Balart, requesting permanent residency to certain aliens who are Colombian or Peruvian nationals currently residing in the United States of America, prior to December 1, 1995.

The Colombian and Peruvian communities have become well integrated into our society. The Colombian and Peruvians exiles are hard working and law-abiding. They have obtained jobs, paid taxes and are raising families in the United States. Large numbers of Peruvians are professionals graduated in their homeland, as well as in the United States. They have fled violence and terror in their countries. They here because of forces beyond their control.

Unfortunately, the great majority is now subject to deportation to these countries whose social-political environment is in turmoil with large segments of the society in deep poverty. In the most recent reports issued by U.S. Department of State, dated February 26, 1999, we found that two of the most powerful terrorist groups in Peru continue their bloody actions. Since 1980 "The Shining Path" (Sendero Luminoso) and Tupac Amaru Revolutionary Movement (MTRA) have caused the death of more than 20,000 lives. The conditions in Colombia may even be worse as rebel groups control up to 40% to 50% of the country while the death toll has been much higher. These violent conditions exist to a degree because the government of these countries is trying to implement the United States policies against terrorist and drug production. These conditions create an unsafe climate for returning families and their children, many of them whom have been born in the United States.

Besides the death of innocent people, these two groups have been the cause of millions of dollars in material loss to the country. Due in large part to the Governmental strong actions, the threat posed by these groups have decreased, but they are still active in a small scale and it is not completely eliminated. They have obtained jobs, paid taxes and are raising families in the United States. Large numbers of Peruvians are professionals graduated in their homeland, as well as in the United States. They have fled violence and terror in their countries. They are here because of forces beyond their control.

Unfortunately, the great majority is now subject to deportation to these countries whose social-political environment is in turmoil with large segments of the society in deep poverty. In the most recent reports issued by U.S. Department of State, dated February 26, 1999, we found that two of the most powerful terrorist groups in Peru continue their bloody actions. Since 1980 "The Shining Path" (Sendero Luminoso) and Tupac Amaru Revolutionary Movement (MTRA) have caused the death of more than 20,000 lives. The conditions in Colombia may even be worse as rebel groups control up to 40% to 50% of the country while the death toll has been much higher. These violent conditions exist to a degree because the government of these countries is trying to implement the United States policies against terrorist and drug production. These conditions create an unsafe climate for returning families and their children, many of them whom have been born in the United States.

Besides the death of innocent people, these two groups have been the cause of millions of dollars in material loss to the country. Due in large part to the Governmental strong actions, the threat posed by these groups have decreased, but they are still active in a small scale and it is not completely eliminated. These conditions create an unsafe climate for returning families and their children many of them whom have been born in the United States.

Fairness calls for close this sad and unfortunate chapter in which contradictory U.S. policies have played an instrumental role. As a matter of principle, justice and moral obligation, please grant the Colombians and Peruvians in the United States a humanitarian permanent residency, thus 65,000 Colombian and 15,000 Peruvian families can move ahead with their lives, and secure their well being.

May God bless you! Please pass H.R. 2741

Dear President Clinton:

I am signing this letter to support the Bill H.R.2741 introduced by Congressman Lincoln Diaz-Balart, requesting permanent residency to certain aliens who are Colombian or Peruvian nationals currently residing in the United States of America, prior to December 1, 1995.

The Colombian and Peruvian communities have become well integrated into our society. The Colombian and Peruvian exiles are hard working and law-abiding. They have obtained jobs, paid taxes and are raising families in the United States. Large numbers of Peruvians are professionals graduated in their homeland, as well as in the United States. They have fled violence and terror in their countries. They here because of forces beyond their control.

Unfortunately, the great majority is now subject to deportation to these countries whose social-political environment is in turmoil with large segments of the society in deep poverty. In the most recent reports issued by U.S. Department of State, dated February 26, 1999, we found that two of the most powerful terrorist groups in Peru continue their bloody actions. Since 1980 "The Shining Path" (Sendero Luminoso) and Tupac Amaru Revolutionary Movement (MTRA) have caused the death of more than 20,000 lives. The conditions in Colombia may even be worse as rebel groups control up to 40% to 50% of the country while the death toll has been much higher. Tel: (202) 456-1414
Fax: (202) 456-2461

Dear President Clinton:

I am signing this letter to support the Bill H.R.2741 introduced by Congressman Lincoln Diaz-Balart, requesting permanent residency to certain aliens who are Colombian or Peruvian nationals currently residing in the United States of America, prior to December 1, 1995.

The Colombian and Peruvian communities have become well integrated into our society. The Colombian and Peruvians exiles are hard working and law-abiding. They have obtained jobs, paid taxes and are raising families in the United States. Large numbers of Peruvians are professionals graduated in their homeland, as well as in the United States. They have fled violence and terror in their countries. They here because of forces beyond their control.

Unfortunately, the great majority is now subject to deportation to these countries whose social-political environment is in turmoil with large segments of the society in deep poverty. In the most recent reports issued by U.S. Department of State, dated February 26, 1999, we found that two of the most powerful terrorist groups in Peru continue their bloody actions. Since 1980 "The Shining Path" (Sendero Luminoso) and Tupac Amaru Revolutionary Movement (MTRA) have caused the death of more than 20,000 lives. The conditions in Colombia may even be worse as rebel groups control up to 40% to 50% of the country while the death toll has been much higher. These violent conditions exist to a degree because the government of these countries is trying to implement the United States policies against terrorist and drug production. These conditions create an unsafe climate for returning families and their children, many of them whom have been born in the United States.

Besides the death of innocent people, these two groups have been the cause of millions of dollars in material loss to the country. Due in large part to the Governmental strong actions, the threat posed by these groups have decreased, but they are still active in a small scale and it is not completely eliminated. These conditions create an unsafe climate for returning families and their children many of them whom have been born in the United States.

Fairness calls for close this sad and unfortunate chapter in which contradictory U.S. policies have played an instrumental role. As a matter of principle, justice and moral obligation, please grant the Colombians and Peruvians in the United States a humanitarian permanent residency, thus 65,000 Colombian and 15,000 Peruvian families can move ahead with their lives, and secure their well being.

May God bless you! Please pass H.R. 2741

These conditions create an unsafe climate for returning families and their children, many of them whom have been born in the United States.

Besides the death of innocent people, these two groups have been the cause of millions of dollars in material loss to the country. Due in large part to the Governmental strong actions, the threat posed by these groups have decreased, but they are still active in a small scale and it is not completely eliminated. These conditions create an unsafe climate for returning families and their children many of them whom have been born in the United States.

Fairness calls for close this sad and unfortunate chapter in which contradictory U.S. policies have played an instrumental role. As a matter of principle, justice and moral obligation, please grant the Colombians and Peruvians in the United States a humanitarian permanent residency, thus 65,000 Colombian and 15,000 Peruvian families can move ahead with their lives, and secure their well being.

May God bless you! Please pass H.R. 2741

Dear President Clinton:

I am signing this letter to support the Bill H.R.2741 introduced by Congressman Lincoln Diaz-Balart, requesting permanent residency to certain aliens who are Colombian or Peruvian nationals currently residing in the United States of America, prior to December 1, 1995.

The Colombian and Peruvian communities have become well integrated into our society. The Colombian and Peruvians exiles are hard working and law-abiding. They have obtained jobs, paid taxes and are raising families in the United States. Large numbers of Peruvians are professionals graduated in their homeland, as well as in the United States. They have fled violence and terror in their countries. They here because of forces beyond their control.

Unfortunately, the great majority is now subject to deportation to these countries whose social-political environment is in turmoil with large segments of the society in deep poverty. In the most recent reports issued by U.S. Department of State, dated February 26, 1999, we found that two of the most powerful terrorist groups in Peru continue their bloody actions. Since 1980 "The Shining Path" (Sendero Luminoso) and Tupac Amaru Revolutionary Movement (MTRA) have caused the death of more than 20,000 lives. The conditions in Colombia may even be worse as rebel groups control up to 40% to 50% of the country while the death toll has been much higher. These violent conditions exist to a degree because the government of these countries is trying to implement the United States policies against terrorist and drug production. These conditions create an unsafe climate for returning families and their children, many of them whom have been born in the United States.

Besides the death of innocent people, these two groups have been the cause of millions of dollars in material loss to the country. Due in large part to the Governmental strong actions, the threat posed by these groups have decreased, but they are still active in a small scale and it is not completely eliminated. They have obtained jobs, paid taxes and are raising families in the United States. Large numbers of Peruvians are professionals graduated in their homeland, as well as in the United States. They have fled violence and terror in their countries. They here because of forces beyond their control.

Unfortunately, the great majority is now subject to deportation to these countries whose social-political environment is in turmoil with large segments of the society in deep poverty. In the most recent reports issued by U.S. Department of State, dated February 26, 1999, we found that two of the most powerful terrorist groups in Peru continue their bloody actions. Since 1980 "The Shining Path" (Sendero Luminoso) and Tupac Amaru Revolutionary Movement (MTRA) have caused the death of more than 20,000 lives. The conditions in Colombia may even be worse as rebel groups control up to 40% to 50% of the country while the death toll has been much higher. These violent conditions exist to a degree because the government of these countries is trying to implement the United States policies against terrorist and drug production. These conditions create an unsafe climate for returning families and their children, many of them whom have been born in the United States.

Besides the death of innocent people, these two groups have been the cause of millions of dollars in material loss to the country. Due in large part to the Governmental strong actions, the threat posed by these groups have decreased, but they are still active in a small scale and it is not completely eliminated. These conditions create an unsafe climate for returning families and their children many of them whom have been born in the United States.

Fairness calls for close this sad and unfortunate chapter in which contradictory U.S. policies have played an instrumental role. As a matter of principle, justice and moral obligation, please grant the Colombians and Peruvians in the United States a humanitarian permanent residency, thus 65,000 Colombian and 15,000 Peruvian families can move ahead with their lives, and secure their well being.

May God bless you! Please pass H.R. 2741

Dear President Clinton:

I am signing this letter to support the Bill H.R.2741 introduced by Congressman Lincoln Diaz-Balart, requesting permanent residency to certain aliens who are Colombian or Peruvian nationals currently residing in the United States of America, prior to December 1, 1995.

The Colombian and Peruvian communities have become well integrated into our society. The Colombian and Peruvians exiles are hard working and law-abiding. They have obtained jobs, paid taxes and are raising families in the United States. Large numbers of Peruvians are professionals graduated in their homeland, as well as in the United States. They have fled violence and terror in their countries. They here because of forces beyond their control.

Unfortunately, the great majority is now subject to deportation to these countries whose social-political environment is in turmoil with large segments of the society in deep poverty. Dear President Clinton:

I am signing this letter to support the Bill H.R.2741 introduced by Congressman Lincoln Diaz-Balart, requesting permanent residency to certain aliens who are Colombian or Peruvian nationals currently residing in the United States of America, prior to December 1, 1995.

The Colombian and Peruvian communities have become well integrated into our society. The Colombian and Peruvians exiles are hard working and law-abiding. They have obtained jobs, paid taxes and are raising families in the United States. Large numbers of Peruvians are professionals graduated in their homeland, as well as in the United States. They have fled violence and terror in their countries. They here because of forces beyond their control.

Unfortunately, the great majority is now subject to deportation to these countries whose social-political environment is in turmoil with large segments of the society in deep poverty. In the most recent reports issued by U.S. Department of State, dated February 26, 1999, we found that two of the most powerful terrorist groups in Peru continue their bloody actions. Since 1980 "The Shining Path" (Sendero Luminoso) and Tupac Amaru Revolutionary Movement (MTRA) have caused the death of more than 20,000 lives. The conditions in Colombia may even be worse as rebel groups control up to 40% to 50% of the country while the death toll has been much higher. These violent conditions exist to a degree because the government of these countries is trying to implement the United States policies against terrorist and drug production. These conditions create an unsafe climate for returning families and their children, many of them whom have been born in the United States.

Besides the death of innocent people, these two groups have been the cause of millions of dollars in material loss to the country. Due in large part to the Governmental strong actions, the threat posed by these groups have decreased, but they are still active in a small scale and it is not completely eliminated. These conditions create an unsafe climate for returning families and their children many of them whom have been born in the United States.

Fairness calls for close this sad and unfortunate chapter in which contradictory U.S. policies have played an instrumental role. As a matter of principle, justice and moral obligation, please grant the Colombians and Peruvians in the United States a humanitarian permanent residency, thus 65,000 Colombian and 15,000 Peruvian families can move ahead with their lives, and secure their well being.

May God bless you! Please pass H.R. 2741
