Ernest O. Tucker
Chief, Staffing Branch
Office of the Assistant Secretary for Health
Division of Personnel Operations, OPM/OM
Room 17A-07
5600 Fishers Lane
Rockville, MD 20857

Dear Mr. Tucker,

In response to your letter of December 18, 1992, I am hereby submitting my resume and a narrative summary of my qualifications in application for the position of Director, National AIDS Program Office. I am a commissioned officer in the United States Public Health Service with extensive experience in managing AIDS related programs and issues, and am interested in being considered for the position. I would very much appreciate your keeping the fact of my application in confidence until disclosure is needed. Thank you for your assistance.

Sincerely yours,

Gerald V. Quinnan, Jr., MD
Deputy Director
Center for Biologics
Evaluation and Research
Assistant Surgeon General

Gerald V. Quinnan Jr., M.D.

Narrative Summary of Qualifications

A. Mandatory Professional/Technical Qualifications

I received an M.D. degree from Saint Louis University in 1973, and post graduate training in internal medicine and adult infectious diseases from 1973-1977 at Boston University. I am board certified in internal medicine and board eligible in infectious diseases. I have worked in medicine and public health since 1977, including extensive involvement in AIDS issues.

B. Mandatory Managerial/Executive Qualifications

I have had extensive experience in management of programs demonstrating competency of leadership. Specifically, I have served in the following executive positions:

1. Director, Division of Virology, Bureau of Biologics, FDA, 1981-1987. This Division consisted of approximately 70 people, about half doctoral level, and was responsible for the FDA program on viral and rickettsial diseases.
2. Deputy Director, Center for Biologics Evaluation and Research, 1987-1990 and 1992 to present, and Acting Director, Center for Biologics Evaluation and Research, 1990-1992. These positions are on the SES Inventory and involve supervision of SES personnel. This Center is responsible for the FDA program on biological products and consists of approximately 700 individuals. The biological products for which the Center is responsible include vaccines, blood and blood products, and biological therapeutics. These products include most biotechnology derived therapeutics and all of the activities of the blood and plasma industry. Managing these programs has required competent leadership in all of the specific areas of qualification listed involving planning, prioritizing and carrying out program goals and projects, program representation to all designated levels, supervisory responsibilities, and equal employment opportunity goals.

C. Desirable Qualifications

1. National health policy: I have had extensive experience in the development of national health policy working with other agencies and with interactions at the level of the Assistant Secretary for Health. Some policy areas of particular relevance are blood, AIDS, vaccines, and biotechnology.

2. Knowledge of scientific and societal issues: As a well published scientist I have maintained a comprehensive current knowledge regarding AIDS. Having had extensive involvement in AIDS policy development (for example, through the AIDS Executive Committee, the Vaccine and Blood Subgroups of the AIDS Executive Task Force, and the FCCSET Working Group on HIV Vaccine Development and International Field Trials) I am very familiar with societal issues pertinent to AIDS.

3. Knowledge of management and administration activities: Through the various management/administrative positions I have held, I have extensive knowledge and experience in these areas.

4. Ability to articulate complex positions: I have carried out responsibilities of this type routinely in regard to the areas of responsibility that I have had.

5. Knowledge of overall PHS activities and programs: It is the nature of management of FDA responsibilities for biological products, that extensive interaction with other parts of PHS is needed. As a result, I am very familiar with the activities and programs across PHS, as well as key personnel.

CURRICULUM VITAE

Name: Gerald Vincent Quinnan, Jr., M.D.

Duty Station: Center for Biologics Evaluation and Research
Food and Drug Administration
8800 Rockville Pike
Bethesda, MD 20892
(301) 496-3556

Home Address: 14805 Rose Trellis Place
Silver Spring, MD 20906
(301) 598-8554

Date and Place of Birth:

(b)(6)

[002]

Education:

1961 - 1965 Catholic Memorial High School
West Roxbury, MA

1965 - 1969 College of Holy Cross
Worcester, MA
Degree: A.B., Chemistry

1969 - 1973 Medical School, St. Louis University
St. Louis, MO
Degree: M.D., Cum Laude

Post Graduate Training

1973 - 1974 Internship: University Hospital
Boston University
Medical Center
Boston, MA
Straight Medicine

1974 - 1975	Residency:	Boston University Medical Center Boston, MA Internal Medicine
1975 - 1977	Fellowship:	Boston University Medical Center Boston, MA Adult Infectious Diseases

Professional Experience:

1974 - 1977	Consultant Massachusetts Department of Public Health
1974 - 1977	Emergency Medicine Needham Emergency Medical Corporation Glover Memorial Hospital Needham, MA
1974 - 1976	Emergency Medicine Waltham Hospital Waltham, MA
1977 - 1978	Research Associate Division of Virology Bureau of Biologics Food and Drug Administration United States Public Health Service Bethesda, MD
1978 - 1980	Medical Officer Division of Virology Bureau of Biologics
1978 - 1983	Senior Attending Physician Infectious Disease Service Clinical Center National Institutes of Health Bethesda, MD

1980 - 1981 Director
 Herpes Virus Branch
 Division of Virology
 Bureau of Biologics

1980 - 1981 Deputy Director (Acting)
 Division of Virology
 Bureau of Biologics

1981 - Consultant, Internal Medicine and
 Infectious Diseases
 Alexandria Hospital
 Alexandria VA and other Northern Virginia
 Hospitals

1981 - 1988 Director
 Division of Virology
 Office of Biologics Research and Review
 Center for Drugs and Biologics, FDA

1988 - 1990 Deputy Director
 Center for Biologics Evaluation and Research
 Food and Drug Administration

1990 - Acting Director
 present Center for Biologics Evaluation and Research
 Food and Drug Administration

Career Objectives: Research in Virology and Immunology
 Regulation of Biologics
 Public Health Administration

Continuing Medical Education: Credits attained on an ongoing
 basis to qualify for reissuance of
 licensure biannually.

Ad Hoc Consultant:

National Institute of Allergy and Infectious Diseases
 National Cancer Institute
 National Institute of Neurological and Communicative
 Disorders and Stroke
 World Health Organization, Temporary Adviser
 U. S. Public Health Service Advisory Committee on
 Immunization Practices
 Armed Forces Epidemiology Board
 National Institute on Drug Abuse
 Pan American Health Organization
 Infectious Diseases Committee, American Academy
 of Pediatrics

Special Assignments:

Influenza A/USSR Virus Vaccine Task Force, 1977-78
 US-USSR Agreement on Vaccine Research and Development, 1979
 Food and Drug Administration Reye Syndrome Working Group,
 1981-82
 USPHS Reye Syndrome Task Force, 1982-85
 USPHS AIDS Executive Committee, 1981-84
 USPHS Executive Task Force on AIDS: Vaccine Development
 Subcommittee, 1984-1992; Blood Subcommittee, 1988-Present

Meetings Organized:

Workshop of Modified Neurotoxin, FDA
 Bethesda, MD, 1979; Meeting Coordinator

Workshop on Cobra and Krait Venoms for Treatment of
 Chronic Diseases, FDA
 Bethesda, MD, 1980; Meeting Coordinator
 Workshop on Varicella Zoster Virus Vaccines, USPHS
 Bethesda, MD, 1983; Meeting Coordinator

Workshop on Interferon, USPHS
 Bethesda, MD, 1983; Meeting Co-Coordinator

Workshop on Live Varicella Virus Vaccines, USPHS
 Bethesda, MD, 1985; Meeting Coordinator

Live Influenza Virus Vaccines, USPHS
 Alexandria, VA, 1984; Steering Committee

Vaccinia Viruses as Vectors for Vaccine Antigens, USPHS/WHO
 Chevy Chase, MD, 1984; Coordinator

International Conference on AIDS, USPHS/WHO
 Atlanta, GA, 1985; Steering and Program Committee

Immunobiology of Herpes viruses II
 Fort Lauderdale, FL, 1985; Program Committee

NIH Workshop on Cofactors in AIDS
 Bethesda, MD, 1986; Program Committee

International Conference on Rabies Virus
 Fogarty International Center
 Washington, DC, 1986; Organizing Committee

AIDS Vaccine Workshop
 Bethesda, MD, 1987; Coordinator

Third International Conference on AIDS
 Washington, DC, 1987; Organizing Committee

Third International Conference on the Immunobiology of
Herpesvirus Infections

Marco Island, FL, 1987; Program Committee

Fourth International Conference on AIDS

Stockholm, Sweden, 1988, Scientific and Program Committee

First Pan American Congress on AIDS

Guadalajara, Mexico, 1988; Organizing Committee

Fifth International Conference on AIDS

Montreal, Canada, 1989; Program Committee

Second Pan American Congress on AIDS

Santo Domingo, Dominican Republic, 1989; Organizing Committee

Teaching Appointments:

1. Teaching Fellow in Medicine, Boston University Medical Center, Boston, MA, 1975-1977
2. Guest Lecturer, George Washington University Medical Center, Second Year Course on Infectious Diseases, 1978-1979.
3. Attending Physician, Infectious Disease Service, Clinical Center, National Institutes of Health, 1978-1983
4. Lecturer, FAES Course in Internal Medicine, 1979-1985

Board Certification:

Diplomate, American Board of Internal Medicine, 1976
Eligible, Infectious Disease Subspecialty Board

Honors and Awards:

Alpha Omega Alpha, 1972
M.D., Degree, Cum Laude
FDA Commendable Service Award, 1979
U.S. Public Health Service Unit Citation, 1983
U.S. Public Health Service Meritorious Service Medal, 1984
U.S. Public Health Service Outstanding Unit Citation, 1987
U.S. Public Health Service Unit Commendation, 1989
U.S. Public Health Service Citation, 1989
U.S. Public Health Service Distinguished Service Medal, 1990
Sigma Xi, 1992

Memberships:

Alpha Omega Alpha
American Association of Immunology
America Federation for Clinical Research
Washington Area Infectious Diseases Society
USPHS Interagency Group on Vaccine Development Efficacy
and Availability
American Society for Clinical Investigation (1985; 37 years
of age)
Infectious Diseases Society of America (Fellow)
Sigma Xi

Military Service:

Commissioned Officer, United States Public Health Service:

1977 - 1980	Lieutenant Commander (O-4)
1980 - 1982	Commander (O-5)
1982 - 1992	Captain (O-6)
1992 - Present	Rear Admiral (O-7)

Research Interests:

Infectious Disease
Virology
Immunology

Licensure:

Massachusetts
Maryland
Virginia

Editorial Board:

Journal of Biological Standardization
AIDS and Human Retroviruses

Editorial Reviewer:

New England Journal of Medicine
Annals of Internal Medicine
Journal of the American Medical Association
Journal of Clinical Investigation
Journal of Infectious Diseases
Review of Infectious Diseases
Journal of Virology
Journal of Immunology
Journal of AIDS
Journal of Biological Standardization
AIDS Research and Human Retroviruses

Outside Activities:

- 1977 - 1979 Social Activities Committee, Saint Patrick's
 Church, Rockville, MD
- 1978 - 1979 Assistant to Director, Football Program, Saint
 Patrick's Church, Rockville, MD
- 1979 - 1982 Assistant Pack Leader, Saint Patrick's Cub Scout
 Pack, Rockville, MD
- 1980 - 1983 Parish Council, Saint Patrick's Church, Rockville,
 MD
- 1982 - 1985 Assistant Troop Leader, Emory Pines Methodist
 Church Boy Scout Troop, Olney, MD
- 1982 - 1988 Director, Athletic Program, Saint Patrick's
 Church, Rockville, MD

2032 Belmont Rd., NW
Apt. 617
Washington, D.C. 20009
202-332-0033

Current Position:

Associate Staff, Committee on Appropriations, House of Representatives: Staff the Appropriations Subcommittee for the Departments of Labor, Health and Human Services, Education and Related Agencies. This annual bill includes \$260 billion in FY94 for a variety of domestic programs.

Relevant Experience:

Member, HHS Cluster Group, Clinton-Gore Presidential Transition: Conducted policy audits and prepared recommendations to the incoming Administration for agencies within the Public Health Service, including the National Institutes of Health, the Centers for Disease Control and Prevention and the Substance Abuse and Mental Health Services Administration.

Special Assistant, Congresswoman Nancy Pelosi: Served as a special assistant from 1987 through 1992 with primary responsibilities for health policy, including AIDS and health care reform. Also covered Budget Resolutions, Budget Enforcement Act, Americans with Disabilities Act, and lesbian/gay concerns.

Other Experience:

Assistant Clinical Professor, Department of General Internal Medicine, University of California, San Francisco (1984-1993).

Private Practice, Clinical Psychology, San Francisco (1977-1987).

Medical Consultant, Bureau of Disability Insurance, Social Security Administration, Region IX (1977-1987).

Medical Consultant, Office of Worker's Compensation Programs, Department of Labor, Region IX (1981-1987).

Assistant & Associate Professor, Department of Psychology, California State University, San Bernardino (1971-1986).

Education:

B.A., University of Massachusetts, 1967
Ph.D., The Ohio State University, 1971

Accomplishments:

- o Drafted several bills which became law: to ensure continued health care for people who are forced to leave their jobs due to disability; and to authorize funding for innovative health care programs for people with AIDS. Drafted comprehensive HIV prevention legislation which promotes community-based programs under consideration in this Congress.

- o Researched and staffed oversight hearings on the activities of the Department of Health and Human Services, particularly the federal response to the HIV epidemic.

- o Developed a conceptual model based on theory and research in the behavioral sciences to guide AIDS prevention planning. The model was used by the city of San Francisco in shaping early AIDS prevention campaigns and has now been adapted for use throughout the United States, Europe, Australia and New Zealand.

- o Participated in the Social Security Administration's Working Group to revise the medical criteria for mental disability. The revised definition of disability has provided a much better understanding of chronic mental disorders.

- o Served as a member of the California Council on Mental Health, an advisory body to the California Legislature from 1982-1989, and as Chairperson of the Council from 1984-1986. Appointed by the Governor for one term and appointed by Speaker of the California Assembly for two additional terms. The Council was actively involved in reshaping mental health service delivery in California.

- o Served as President of the California Psychological Association in 1988, after having participated in several Boards and Committees of the Association.

- o Served on more than a dozen Boards, Committees and Task Forces of the American Psychological Association, including the Board of Directors. Served as Chairperson of the Board of Social and Ethical Responsibility for Psychology, the Policy and Planning Board, the Task Force on Psychology and AIDS, and the Committee on Lesbian and Gay Concerns.

- o Author of over 25 peer-reviewed journal articles or book chapters, primarily on behavioral issues associated with the AIDS epidemic or lesbian and gay concerns.

Supplemental Executive Qualifications

1. Integration of Internal and External Program/Policy Issues

As the Director of the Office of Health Care Linkage, I am responsible for the supervision and the management of my staff, in activities requiring close collaboration with, and responding to; medical and professional organizations, consumer organizations, and the public concerning health care linkage and integration. This includes linking HIV/AIDS, Primary Care, Mental Illness and Substance Abuse Treatment.

Through the Linkage Initiative, I coordinate with relevant agencies in the Public Health Service; e.g., Health Resources and Services Administration HRSA (Office of the Administrator (OA), Office of Policy and Planning (OPP), Bureau of Primary Health Care (BPHC), Bureau of Health Professionals (BHPr) and the Bureau of Maternal and Child Health and Resource Development), Centers for Disease Control (DC), National Institutes of Health (NIH), Indian Health Service (IHS), Agency for Health Care Policy and Research (AHCPR), as well as other DHHS agencies - HCFA, OASH and OS. In view of the high visibility nature of the DHHS Linkage Initiative, it is imperative that I be continually up to date on the policies of the DHHS and the Administration, as well as medical and professional organizations as they affect health care issues (HIV/AIDS, Primary care and substance abuse), and associated economic issues, e.g., reimbursement and third party payment systems (as it relates to health care and treatment) and public/private payment reforms.

As the Director of the Linkage Initiative, I am routinely involved in the activities designed to keep me abreast of Administration information and policies (development and implementation), and current Congressional actions including understanding the legislative process, key health committee assignments and hearings, and the issues affecting both the Administration and Congress. Representatives and senators have routinely been involved in the linkage initiative.

In my capacity as head of the HIV/AIDS program in Center for Substance Abuse Treatment, I have conceptualized, designed, implemented and managed the program. I have had to answer both Congressional and Administration questions on the HIV/AIDS, in terms of scientific and programmatic issues.

Serve as public liaison on the subject of HIV/AIDS as it relates to the disease and its history and future course, as well as answer scientific and Administration positions on HIV/AIDS programs and policies.

In my capacity as the head of the Hospice Unit at the South Rand Hospital and Johannesburg Hospital consultive service, I coordinated the functioning of the hospice clinic, both within the hospital and with private hospice organizations, and the direction in which the hospice association and the hospice concept would proceed as the movement developed.

On my assumption of duties with the UC Davis hospice program, I was the psychiatric consultant and supervisor of hospice personnel regarding matters of personal and professional mental health issues in the program. I had to represent the hospice program not only to the different departments within the University of California, Davis, system, but also with respect to the media and the public at large in the greater area of Sacramento. This also included needing to testify before the State Legislature on a number of health care related issues.

2. Organizational Representation and Liaison

As Director of the Substance Abuse Linkage Initiative, I was the key speaker at conferences, ranging from medical and professional organizations (American Society of Addiction Medicine, American Hospital Association, American Psychiatric Association, American Psychological Association, American Academy of Family Practice, National Association of State Alcohol and Drug Abuse Directors, Association for Medical Education and Research in Substance Abuse, and the American Medical Association) to name a few. As a past Board of Trustee member of medical and professional organizations (California Medical Association, American Psychiatric Association and the Educational Commission of Foreign Medical Graduates (ECFMG) Board), I have intimate working knowledge of these organizations.

I have also spoken to the Boards of Trustees and/or Directors of the different medical and professional organizations. I have delivered speeches on a variety of scientific issues critical to the health care system to audiences as large as 2000 people. I have chaired numerous panels, often composed of widely divergent political, medical and professional individuals with views. I have testified before the California legislature. As a Delegate to the American Medical

Association for California, I know the leadership of the AMA and the State House as well.

On a regular basis, I am required to prepare talking points and speeches for the Secretary of Health and Human Services and the Assistant Secretary of health in OASH, Office of the Administrator, Substance Abuse and Mental Health Services Administration, and Office of the Director, Center of Substance Abuse Treatment. I have developed briefing packages on linkage and integration for not only DHHS, but also for both Congress and the medical and professional organizations.

I am familiar with the differences between medical and professional organizations, and I was able to get conflicting organizations and boards of trustees/boards of directors to work together and begin to implement policies related to HIV/AIDS, Primary care, Mental Illness and Substance Abuse.

In a tight fiscal environment, I have been able to justify my program and Office sufficiently that I have achieved an increase in responsibilities, both with regard to the scope of the program, staff and in the number of grant announcements out into the health care field. Having run a hospice program under severe fiscal restraints, issues of program responsibilities and services needed to be defined and carried out.

I have represented the University of California, Davis Medical Center, at both internal and external committees, including the State Legislature as well as the media. In my capacity as sitting on the Board of Trustees of the California Medical Association, I was responsible for not only representing the resident body of California, but also representing the Council on the different policy committees, which included the Finance Committee and the Nominating Committee which selected all applicants for the different governing committees of the California Medical Association.

As a member of the Psychiatric Association Board, I represented not only the Board at different internal committees and commissions, but also represented the American Psychiatric Association too externally regarding the status of health care and the development of primary care linkage to Mental Health and Alcohol and Drug Abuse Treatment Centers.

3. Direction and Guidance of Programs, Projects, and Policy Development

Being responsible for the Substance Abuse Linkage Initiative program since its inception, I have developed its design, recruited personnel and implemented the initiative. Specifically, I was required to design the objectives, prioritized them, and understand the politics of developing the program as it interfaced both within the Government, e.g., within the agency of SAMHSA, and the PHS, as well as with outside private organizations. As the program grew, extreme flexibility was essential to maintain consonance with all collaborating partners. I needed to be flexible enough to respond to the changing political climate of the medical and professional organizations, as well as to the internal agency requirements.

The entire first year of the Initiative was an information gathering phase where the vehicle of regional and national conferences and workgroups was used to discuss issues relative to organizational and infrastructure, professional interests, public image and media, and finally reimbursement. Analysis of this information was performed with respect to urban and rural populations; specialties, such as primary care, substance abuse, and HIV/AIDS and included in the information gathering was a need to understand the different politics among the different medical/primary care specialties of internal medicine, pediatrics, obstetrics/gynecology, emergency room, and family practice.

As Director of the Primary Care/Substance Abuse/HIV/AIDS Linkage office, I organized the staff into areas of responsibility and developed hierarchical decision making. One needed to coordinate staff schedules and ensure coverage for the OASH, OA/SAMHSA and OD/CSAT for the Linkage Initiative. I have guided the agenda development of the National Steering Committee, which is chaired by Burton J. Lee, III, M.D., physician to President Bush, and ensured that all levels of the Agency were apprised of the politics and recommendations that were coming out of the regional workgroups and conferences.

As the Office of Health Care Linkage has grown, so has the staff that then required delegation and oversight of the various programmatic and policy issues. I have had to direct both this office and other divisions in CSAT.

In my capacity as one of the physicians on the Placer County Mental Health Service, I provided guidance and supervision to health care workers of the mental health system of Placer County Mental Health, and ensured that all evaluations, transfers, and administrative duties were performed by myself, and by the Administrative Staff. I was required to be up to date with primary health care diagnoses and able to interface with maternal and child health, emergency room, internal medicine and obstetrical and gynecological care.

In my capacity as Hospice Director, I ensured that the programs that functioned under a team approach, which included nurses, psychologists, social workers, chaplains, and volunteers, performed according to written up guidelines, and that policy development for the hospice consult service were kept up to date with the current literature, and included new projects and programs to enhance the field of hospice care.

4. Resource Acquisition and Administration

With the Office of Health Care Linkage being developed under my leadership, all office procedures and the scope of activities needed to be defined. This included both writing of all of the Personnel Job Descriptions, appropriate grade levels, and ensuring that all Federal regulations were met for hiring procedures. I had the duty of not only recruiting both inside and outside of Government, but also ensuring that the selection of the appropriate staff for the office adhered to EEO and affirmative action. All applicant positions were openly competed, and selections were made after review of the SF-171 and individual interviews.

a. Budget

With the formation of the Office of Health Care Linkage, and with my assumption of duties, I prepared a budget for the Office of the Director, Center for Substance Abuse Treatment, as well as projected budgets for succeeding years.

In preparing the budget, I organized spending plans according to staff and program needs. This required adhering to the department's budget process and an understanding of the congressional process for the budget. The budget also included travel and training plans, and special purchase orders.

Included in these plans were the contract for the twelve regional conferences, one national conference, projected grant programs, minor purchase orders regarding special expertise in the area of writing, as well as other expertise areas in primary care and substance abuse. Demonstration grant programs were also written and will be implemented.

As the Director of the HIV/AIDS and Linkage programs I have administered budgets of \$25 million. Needing to justify expenditures and forward plan as we move into the additional epidemic of Tuberculosis.

As one of the members of the Finance Committee of the California Medical Association, I oversaw a budget of approximately \$14 million dollars, ensuring that all functions of the budgetary process were carried out, according to both State and organizational by-laws. I was responsible for creating budget projections and plans for the future of the organization.

b. Contracting and/or Procurement

Under the auspices of the Office of Health Care Linkage, I contracted with outside agencies using a variety of mechanisms, competitive contracts, memoranda of agreement, and special purchase orders for professional services which were required to enhance services.

5. Utilization of Human Resources

The Office of Health Care Linkage operates under the maxim of fair, equitable and collegial working environments. Included in this was:

a. Evaluation of Individual Capabilities and Needs

All staff members, ranging from secretaries to the GM-15 staff, required individual assessment of their capabilities and needs. This included their strengths, in terms of carrying out that specific area of work, as well as their needs of further professional development, and what was required for them and other office staff to carry out the assigned tasks.

As the Hospice Director, I recruited and

hired new staff, ensuring that the individual capabilities met the program needs, particularly that as a Consulting Service, one was dealing with numerous departments which had different procedures, policies, and personalities.

b. Delegation of Work

Under the direction of my office, delegation of work was required not only within the Office of Linkage and Integration, but also to all contractors. This was essential to producing high-quality work in a timely fashion, so that the Government and the public received usable products and programs.

As the Hospice Director, I delegated appropriate work to the team and ensured that it was carried out. As the Board member of the different organizations, I needed to ensure that the staff allocated to the different committees was well-informed and kept up-to-date information, both for myself and for the committees.

c. Provision of Career Development Opportunities

All staff were encouraged to submit proposals as to what career development courses they would like to attend. Applicants were encouraged to participate in career development over the course of each fiscal year, with new proposals submitted each year.

d. Use of Performance Standards and Appraisals

Performance standards and appraisals were done, officially, twice a year. Each staff member would review his or her official performance standards and appraisal, with discussions as to areas that needed to be enhanced, and areas that were of outstanding capability. In a newly created office, it was my duty to ensure that performance standards were written for each position, and then applied to the work of appropriate personnel.

e. Utilization of Government-wide Personnel Programs and EEOs

The composition of my staff over the two years conformed to EEO requirements as well as to Government-wide personnel programs.

6. Review of Implementation and Results

The Office of Health Care Linkage, using the concept of linkage and integration, required that all activities have goals set with recommendations and implementation plans for all areas, starting from staff assignments, through to regional conferences and, finally, the Secretarial Conference. Grant programs also needed to be assessed and reviewed. In my capacity as a member of the OTI management team, it was my duty to monitor the Los Angeles Target Cities program (for another Division of OTI), which required monthly monitoring of State, County and local providers in the program. This also required review of yearly budgets of the Los Angeles Target Cities (which is in the order of \$8-12 million per city), as well as review of staff, FTEs and appropriate spending of monies for health care services.

The office required that all programs be reviewed on a monthly to quarterly basis, as deemed necessary; with reports being written, submitted and evaluated. Evaluation design, implementation and ability to use the information gathered is an essential requirement of all the initiatives and other grant programs I administer.

e. Utilization of Government-wide Personnel Programs and EEOs

The composition of my staff over the two years conformed to EEO requirements as well as to Government-wide personnel programs.

6. Review of Implementation and Results

The Office of Health Care Linkage, using the concept of linkage and integration, required that all activities have goals set with recommendations and implementation plans for all areas, starting from staff assignments, through to regional conferences and, finally, the Secretarial Conference. Grant programs also needed to be assessed and reviewed. In my capacity as a member of the OTI management team, it was my duty to monitor the Los Angeles Target Cities program (for another Division of OTI), which required monthly monitoring of State, County and local providers in the program. This also required review of yearly budgets of the Los Angeles Target Cities (which is in the order of \$8-12 million per city), as well as review of staff, FTEs and appropriate spending of monies for health care services.

The office required that all programs be reviewed on a monthly to quarterly basis, as deemed necessary; with reports being written, submitted and evaluated. Evaluation design, implementation and ability to use the information gathered is an essential requirement of all the initiatives and other grant programs I administer.

Supplemental Executive Qualifications

1. Integration of Internal and External Program/Policy Issues

As the Director of the Office of Health Care Linkage, I am responsible for the supervision and the management of my staff, in activities requiring close collaboration with, and responding to, medical and professional organizations, consumer organizations, and the public concerning health care linkage and integration. This includes linking HIV/AIDS, Primary Care, Mental Illness and Substance Abuse Treatment.

Through the Linkage Initiative, I coordinate with relevant agencies in the Public Health Service; e.g., Health Resources and Services Administration HRSA (Office of the Administrator (OA), Office of Policy and Planning (OPP), Bureau of Primary Health Care (BPHC), Bureau of Health Professionals (BHPr) and the Bureau of Maternal and Child Health and Resource Development), Centers for Disease Control (DC), National Institutes of Health (NIH), Indian Health Service (IHS), Agency for Health Care Policy and Research (AHCPR), as well as other DHHS agencies - HCFA, OASH and OS. In view of the high visibility nature of the DHHS Linkage Initiative, it is imperative that I be continually up to date on the policies of the DHHS and the Administration, as well as medical and professional organizations as they affect health care issues (HIV/AIDS, Primary care and substance abuse), and associated economic issues, e.g., reimbursement and third party payment systems (as it relates to health care and treatment) and public/private payment reforms.

As the Director of the Linkage Initiative, I am routinely involved in the activities designed to keep me abreast of Administration information and policies (development and implementation), and current Congressional actions including understanding the legislative process, key health committee assignments and hearings, and the issues affecting both the Administration and Congress. Representatives and senators have routinely been involved in the linkage initiative.

In my capacity as head of the HIV/AIDS program in Center for Substance Abuse Treatment, I have conceptualized, designed, implemented and managed the program. I have had to answer both Congressional and Administration questions on the HIV/AIDS, in terms of scientific and programmatic issues.

Serve as public liaison on the subject of HIV/AIDS as it relates to the disease and its history and future course, as well as answer scientific and Administration positions on HIV/AIDS programs and policies.

In my capacity as the head of the Hospice Unit at the South Rand Hospital and Johannesburg Hospital consultive service, I coordinated the functioning of the hospice clinic, both within the hospital and with private hospice organizations, and the direction in which the hospice association and the hospice concept would proceed as the movement developed.

On my assumption of duties with the UC Davis hospice program, I was the psychiatric consultant and supervisor of hospice personnel regarding matters of personal and professional mental health issues in the program. I had to represent the hospice program not only to the different departments within the University of California, Davis, system, but also with respect to the media and the public at large in the greater area of Sacramento. This also included needing to testify before the State Legislature on a number of health care related issues.

2. Organizational Representation and Liaison

As Director of the Substance Abuse Linkage Initiative, I was the key speaker at conferences, ranging from medical and professional organizations (American Society of Addiction Medicine, American Hospital Association, American Psychiatric Association, American Psychological Association, American Academy of Family Practice, National Association of State Alcohol and Drug Abuse Directors, Association for Medical Education and Research in Substance Abuse, and the American Medical Association) to name a few. As a past Board of Trustee member of medical and professional organizations (California Medical Association, American Psychiatric Association and the Educational Commission of Foreign Medical Graduates (ECFMG) Board), I have intimate working knowledge of these organizations.

I have also spoken to the Boards of Trustees and/or Directors of the different medical and professional organizations. I have delivered speeches on a variety of scientific issues critical to the health care system to audiences as large as 2000 people. I have chaired numerous panels, often composed of widely divergent political, medical and professional individuals with views. I have testified before the California legislature. As a Delegate to the American Medical

Association for California, I know the leadership of the AMA and the State House as well.

On a regular basis, I am required to prepare talking points and speeches for the Secretary of Health and Human Services and the Assistant Secretary of health in OASH, Office of the Administrator, Substance Abuse and Mental Health Services Administration, and Office of the Director, Center of Substance Abuse Treatment. Marla J. Gold, M.D.

Buck Buckingham
Special Assistant for Planning and Development
AIDS Policy Office, Room 738-G
200 Independence Ave., SW
Washington, DC 20201
August 4, 1993

Dear Buck,

Thank you for getting back to me so quickly- I picture you running in no less than one million directions these days, setting up the office, defining duties and responsibilities, surveying community/public relations issues and the like... I am truly excited to hear about your new position, and I wish you the best of luck and skill! As per our phone conversation, I am enclosing my vitae and a brief "bullet" list of my work in the Philadelphia Department of Public Health. I've included this list to provide you with a feeling for how familiar I am with HIV/AIDS-related issues at local, state and federal levels. Although you are familiar with my work through HRSA, I thought I'd also spend a minute telling you about my background.

I am board certified in both internal medicine and infectious disease (ID), and a member of the national medical honor society, Alpha Omega Alpha. Upon completing my infectious disease fellowship, I was asked to become a faculty member of the Medical College of Pennsylvania (MCP) in Philadelphia. My responsibilities included both internal medicine and ID clinical rotations in a busy multi-specialty teaching hospital, medical student teaching and part-time consultative work in the sexually transmitted disease (STD) control program within the Philadelphia Department of Health. Early in my work at the Health Department, I was deeply moved by the amount of STD morbidity among the under- and uninsured in Philadelphia. Diseases including HIV/AIDS, syphilis, gonorrhea, measles and tuberculosis were all on the increase. It was not quite a full year as Medical Specialist in the STD control program, that I was appointed Assistant Health Commissioner for Infectious Control. Prior to my appointment, the City AIDS program functioned largely as a separate entity from the other disease control programs, and there was no organized response to HIV disease within the City's 8 district health centers, serving many of the City's under- and uninsured individuals. As Assistant Health Commissioner, I was ultimately responsible for all infectious disease programs. My programmatic area also contained a categorical STD clinic that was in the process of integrating HIV counseling & testing services. That clinic averages ~20,000 patient visits per year. I remained on clinical faculty at MCP, where I continued to teach and perform clinical, hospital-based rounds. Through my position at the Health Department, I am knowledgeable regarding both local unions and federal employees, and was able to successfully negotiate many changes. I am also familiar with local government, as well as the Pennsylvania and federal health services. I have worked closely with key persons at the Centers for Disease Control and the Health Resources and Services Administration. I represented Philadelphia (grantee) for Ryan White Title I funding and successfully applied for and received Title III funding for the citizens of Philadelphia. I have also been the principal investigator on several CDC cooperative agreements. Both CDC and HRSA have consulted with me regarding grant-related guidance and programming, and continue to do so. Recently, I received an Assistant Secretary of Health Award for my HIV/AIDS related work in Philadelphia.

Marla J. Gold, M.D.

I believe my greatest strength to be the ability to design and link systems of care with the goal of accessible, affordable health care for all. Doing this kind of work means being fully familiar with areas such as health care provider education, policy formulation, obtaining the needed funds, and negotiating with the many individuals involved in the health care system. I have had the support of leaders in the public and private sector in Philadelphia as well as excellent working relationships with people on the state and federal level. Finally, I have done significant work in several "politically charged" areas here, including successfully working towards the provision of an expanded sexuality education curriculum in our City' public schools along with condom accessibility in Philadelphia high schools and supporting the opening of a extended care center for persons with AIDS. I also worked to pilot needle exchange in Philadelphia, which is currently underway.

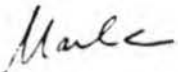

I believe it is essential that there be an **inclusive, coordinated** response to the AIDS pandemic. This, of course, is easy to say, but incredibly difficult to achieve at this point in the history of the United States epidemic. So many federal agencies are funding HIV/AIDS related projects unlinked to each other. Data systems overlap and are both work intensive and costly at the local level. As you know, various affected groups/communities are now fighting one another for every dollar with the result too often being fragmented services that are difficult to link. The many barriers to accessing care for those at risk or infected with HIV are formidable, to say the least.

I know you will be dealing with many of these issues- bringing people to the table who have never even sat in the same room before! Quite a challenge, but I believe it's achievable.

Please don't hesitate to call if I can be of help to you. As I mentioned, I am currently working primarily as a consultant out of Philadelphia, while maintaining a faculty appointment at The Medical College of Pennsylvania Hospital.

Again, congratulations on your new position. It feels good to know that you are there, working on some of the most critical health issues facing Americans today. Let me know if you would like any further information. Perhaps we can get together over a meal the next time I'm in town? Hopefully, you'll remember how to eat meals, yes?

Sincerely,

Marla J. Gold, M.D.

ACCOMPLISHMENT HIGHLIGHTS

I. DISTRICT HEALTH CENTER #1 - SEXUALLY TRANSMITTED DISEASE CLINIC

- ◆ Established new classification of Sexually Transmitted Disease Nurse Specialist. Training of nurses currently underway.
- ◆ Abolished class of Venereal Disease Physicians Assistant and helped establish one Physicians Assistant class with a bi-lingual option.
- ◆ Established a Supervisory Management Team at Health Center #1 to improve overall patient flow, as well as the ability of the Health Center Director to run the Clinic.
- ◆ Coordinated training of District Health Center #1 clinical staff in HIV counseling and testing. This resulted in greatly expanded availability of HIV counseling and testing for all patients pre-senting to District Health Center #1.
- ◆ Established weekly Clinic meetings for presentations, to review protocols, etc.
- ◆ Coordinated monthly STD/HIV Grand Rounds attended both by Clinic, DIS, Disease Control, and AACO staff, as well as outside persons.
These Grand Rounds were recently expanded to "Infectious Disease Control Grand Rounds" to accommodate the multiple requests for information.
- ◆ Worked with the Medical College of Pennsylvania, Department of Medicine and Division of Infectious Disease, to establish and maintain a mandatory clinical rotation for senior medical residents, chief medical residents, and infectious disease fellows. This included the provision of didactic clinical sessions at MCP for the house staff on STD/HIV issues.
- ◆ Helped in the design and assured implementation of the CDC's HIV-Syphilis Study. Philadelphia remains one of five centers in the nation conducting this study and continues to be the most successful with the overall highest patient accrual rate. The study also provided the Clinic with extra staffing.
- ◆ Supported further research projects at the Health Center. Currently several are underway.

II. AIDS ACTIVITIES COORDINATING OFFICE

- ◆ Managed AIDS Activities Coordinating Office (AACO) without the pre-sence of a Director for almost one year through Managers' meetings.

- ◆ Consolidated the class entitled AACO Counselors to Health Service Social Workers providing general social work training to these individuals in order to expand the availability of case management services within District Health Centers for persons at risk or infected with HIV. Social workers have been deployed to various Health Centers throughout the City.
- ◆ Supported the development of on-going education for clinical staff regarding issues pertaining to HIV/AIDS.
- ◆ Worked with AACO staff and CDC officials to design and implement a technical assistance workshop for local community-based organizations in Autumn, 1991.
- ◆ Designed and helped implement an HIV Demonstration Project involving Health Districts #5 & #6 which were fully funded by Centers for Disease Control (CDC) in year one and recently renewed. This funding of \$400,000.00 allowed us to greatly enhance the provision of HIV-related services in certain District Health Centers.
- ◆ Directed the design of and application for funding from HRSA for an Early Intervention Project at Health District #3. This project was fully funded for \$462,000.00 in Year 01 and recently received renewed funding in the amount of \$463,000.00. These monies were utilized to enhance and link services for HIV-infected women and their children at Health Center #3, Children's Hospital of Philadelphia, and the Hospital of the University of Pennsylvania.
- ◆ Represented the City (Grantee) for Title I Ryan White Care Act Funds. Advocated for and successfully transferred the administrative mechanism and monitoring piece of these monies (\$3.5 million) to the City.
- ◆ Instituted monthly AACO/HIV Advisory Committee meetings. These meetings are open to all HIV-infected Philadelphians with whom I have met monthly to directly address concerns regarding the HIV/AIDS service system, as well as elicited ideas to incorporate in our projects.
- ◆ Worked with AACO staff to submit our CDC Cooperative AIDS Prevention Application. Last year we received over \$4 million in continuation funding. This year's grant was submitted on September 17th and we will hear about funding in several months.
- ◆ Successfully coordinated with the Pennsylvania AIDS Education and Training Center (Hahnemann based) to provide clinical training about the manifestations of HIV disease to clinic-based staff at area Health Centers as well as the Prison Health System. Last year a series of 6 symposia were held and noted by evaluation to be highly successful. This year more are planned.
- ◆ Worked in partnership with other agencies and institutions to establish expanded sexuality curriculum along with the availability of condoms in the City's high schools.
- ◆ Supported and helped implement the provision of a clean needle exchange for injection drug-using persons in Philadelphia
- ◆ Re-established CDC HIV seroprevalence funding for CY1991 in the amount of \$500,000.00.

- ◆ Directed the design of and application for funding from HRSA for a state-wide field test of Client Key, a locally designed variation on the HRSA's proposed Uniform Reporting System. This project was fully funded for \$106,463.00 and field tests are now being conducted in 12 CARE Act provider sites throughout Pennsylvania.

III. DIVISION OF DISEASE CONTROL

- ◆ Coordinated application for CDC Cooperative Agreement for tuberculosis funding calendar years 1991 and 1992.
- ◆ Successfully applied for and received supplemental HIV/TB funding for homeless shelter project, and enhanced laboratory services for tuberculosis in the amount of \$184,453.00.
- ◆ Worked, along with Disease Control staff, on the Infant Immunization Initiative Project for the City of Philadelphia. Although one of the most successful plans in the country, this project was under-funded at \$439,000.
- ◆ Worked on application to the Robert Wood Johnson Foundation "All Kids Count" Initiative for an immunization tracking registry system. This project was fully funded by the RWJ Foundation for \$147,206.00.
- ◆ Initiated an Infection Control Program with subsequent inspections of the District Health Centers, as well as the establishment of an Infection Control Committee for review of infection control policy guidelines.
- ◆ Worked in partnership with Healthcare Management Alternatives (HMA) to design and hold a one-day conference on tuberculosis attended by over 500 individuals this past August.
- ◆ Established monthly page in *Philadelphia Medicine*, the monthly publication from the County Medical Society to communicate our disease statistics and programs to the medical society.
- ◆ Successfully acquired funding through various grants to aid in computerization of the Division of Disease Control.

IV. GENERAL ITEMS

- ◆ Through funding obtained from various HIV-related grants, worked to establish a system of HIV care in the City's District Health Centers, now under the direction of Dr. Esther Chernak.

PREVIOUS EXPERIENCE

1986-1991	Co-Director, Center for AIDS Prevention Studies, UCSF
1984-1990	Associate Professor, Department of Medicine, UCSF Director, Behavioral Medicine Unit, DGIM, UCSF
1982-1984	Assistant Professor, Department of Medicine, UCSF, Co-Director, Behavioral Medicine Unit, Division of General Internal Medicine, UCSF
1981-1982	Member, Affiliate Staff, The Johns Hopkins Hospital
1980-1982	Joint Appointments in Pediatrics and Health Education, The Johns Hopkins School of Medicine and School of Hygiene and Public Health
1979-1982	Assistant Professor of Psychiatry, The Johns Hopkins University
1978-1979	Acting Assistant Professor, Stanford University School of Education, Assistant Clinical Professor, Department of Psychiatry, Stanford University School of Medicine
1977-1979	Director, Youth Education Programs, Stanford Heart Disease Prevention Program, Stanford University School of Medicine

CURRENT RESEARCH

Principal Investigator and Director, National Institute of Mental Health, MH42459, **Center for AIDS Prevention Studies (CAPS)**, 1991-1996.

Collaborative Center (UCSF, UCB, SF Department of Health, Bayview-Hunters Point Foundation, San Francisco AIDS Foundation, Communication Technologies) to support studies in prevention of AIDS. Annual Budget=\$3,500,000; total budget=\$15,200,000

Center Director responsibilities include providing scientific direction of multi-project center, establishing and providing oversight for scientific direction and quality assurance, establishing and providing oversight for fiscal and administrative procedures, insuring liaison with collaborating agencies, disseminating outcomes to Federal, state, and local agencies, and providing direction for young investigators (physicians and behavioral scientists) involved in and developing through the Center.

Principal Investigator Family Health International and USAID, DPE 5972-A-1031, **AIDSCAP**, 1991-1996, \$1,232,923

This project is a subcontract from Family Health International and USAID as part of a \$168,000,000 project to develop and implement AIDS prevention programs in developing countries. CAPS role is to implement AIDS behavioral research projects as part of the overall project.

Key Investigator, National Institute of Allergy and Infectious Disease, N01-32519, **A Prospective Sero-Epidemiological Study of Acquired Immune Deficiency Syndrome in Homosexual Men Residing in San Francisco**. Warren Winkelstein, Jr., MD MPH, Principal Investigator 1983-1993, \$4,600,000

Study of psychosocial risk factors for AIDS progression among seropositive gay men; predictors of risk reduction among gay, bisexual, and heterosexual men.

Principal Investigator, National Institute of Child Health and Human Development, HD24934-01, **AIDS Prevention for Sexually Active Adolescents**. 1988-1993, \$1,535,990.
To test the efficacy of an innovative multi-session motivational/educational intervention for reducing exposure of sexually active adolescents to human immunodeficiency in Santa Cruz, CA.

Principal Investigator, National Institute of Mental Health. MH43911, **AIDS Risk Reduction Among Black Gay Men**. 1989-1993, \$759,921.

To evaluate in a controlled clinical trial strategies for reducing high risk behavior in black gay men.

Co-Investigator, National Institute of Mental Health, MH46816, **AIDS Intervention for Young Gay Men**. Susan Kegeles, Ph.D., Principal Investigator 4/1/90-3/31/94, \$1,189,997.

This study will evaluate experimentally the impact of a community diffusion model in reducing AIDS-related high-risk behavior among a hard-to-reach population, namely young homosexually active men (ages 18-25). The intervention will be applied in three cities (Santa Barbara, Santa Cruz, and Eugene) sequentially in a multiple baseline design.

Co-Investigator, National Institute of Mental Health, MH44045, **Effects of Bereavement in Partners of Persons with AIDS**. Susan Folkman, Ph.D., Principal Investigator 7/1/89-5/31/94

This study will evaluate the natural history of bereavement among HIV+, caregiving partners of person with AIDS to evaluate stress, coping, and social support processes that influence these effects.

Co-Investigator, National Institute of Mental Health, MH43892, **AIDS Risk in a Population Based Sample of the United States**. Joseph Catania, Ph.D., Principal Investigator 9/1/89-8/31/95

A national phone survey to determine high risk sexual behavior, distribution of AIDS knowledge, beliefs and other relevant psychosocial factors. State of the art sampling techniques were used to oversample African and Latin-Americans living in the United States.

PRIOR RESEARCH

Co-Investigator, National Institute of Mental Health, MH46240, **AIDS Risk in a Population Based Sample of Older Americans**. Joseph Catania, Ph.D., Principal Investigator 9/1/89-8/31/91

Principal Investigator, Universitywide Task Force on AIDS. **Adolescence and AIDS**. 1988-1990.

Principal Investigator, National Institute of Mental Health, MH39553, **Behavioral and Psychological Consequences of AIDS Antibody Testing**, 1985-1989.

Principal Investigator, National Heart Lung and Blood Institute, HL33902, **Treatment of Mild Hypertension: Side Effects and Efficacy**, 1985-1989.

Principal Investigator, National Cancer Institute, CA383674, **Physician Counseling for Smoking Cessation**, 1984-1989.

Co-Principal Investigator, National Cancer Institute CA3926A-01, ***Smoking Cessation Intervention In Hispanics***, Eliseo Perez-Stable, MD, Principal Investigator, 1985-1990.

Principal Investigator, Office of Technology Assessment, H3-6695, ***Changes Made by Gay and Bisexual Men since the Beginning of the AIDS Epidemic***, 1987-1988.

Co-Principal Investigator, National Heart Lung and Blood Institute, HL31305-01, ***Medication and Behavioral Approaches to Hypertension CME***, David Gullion, M.D., Principal Investigator, 1984-1987.

Principal Investigator, National Institute of Mental Health MH39343, ***A Prospective Psychosocial Study In Men at Risk for AIDS***, 1984-1987.

Co-Principal Investigator, Ichinose Foundation, ***Corporate Health Promotion.***, Albert R. Martin, M.D., Principal Investigator, 1985-1987.

Co-Principal Investigator, National Institute of Mental Health, ***A Longitudinal Psychosocial Study of AIDS Patients***, Lydia Temoshok, Ph.D., Principal Investigator, 1984-1985.

Principal Investigator, National Institute on Aging, ***Sleep Disorders In the Elderly***, 1984-1985.

Co-Principal Investigator, National Heart Lung and Blood Institute, ***School Based Relaxation for Elevated Blood Pressure***, Craig Ewart, Ph.D., Principal Investigator, 1982-1984.

Principal Investigator, National Heart Lung and Blood Institute, ***Behavioral Medicine for Adolescent Hypertension*** (Young Investigator Research Award), 1979-1982.

Co-Principal Investigator, National Cancer Institute, ***The Impact of Physician Messages and Waiting Room Media on Smoking Cessation In Young Women In Family Planning Clinics***, Virginia C. Li, Ph.D., Principal Investigator, 1979-1982.

Investigator, National Heart Lung and Blood Institute, ***The Five City Multi Factor Risk Reduction Program***, John W. Farquhar, MD, Principal Investigator, 1977-1979.

Project Director, National Institute of Mental Health, ***Behavioral Therapy for Insomnia***, Carl E. Thoresen, Ph.D., Principal Investigator, 1976-1979.

Research Associate, Spencer Foundation, ***Teaching and Learning Self-Management***, Carl E. Thoresen, Ph.D., Principal Investigator, 1974-1976.

ANNUAL TEACHING ACTIVITY

Behavioral Medicine Seminar - 78 hours/yr.

Participation in this ongoing seminar in behavioral medicine for primary care medicine residents.

Clinical Health Psychology Supervision - 234 hrs/yr.

Individual and group supervision for trainees in clinical health psychology cluster, Departments of Psychiatry and Medicine.

Clinical Consultation and Supervision - 100 hrs/yr.

Consultation for primary care medicine residents and medical students in FCM 110 regarding behavioral medicine and primary care practice.

Behavioral Medicine Lectures for FCM 110 - 14 hrs/yr.

Lecture of Behavioral Medicine for medical students completing the FCM 110 Clerkship at UCSF.

Research Supervision, Center for AIDS Prevention Studies - 100 hr/yr.

Preceptor for 3 postdoctoral fellows in AIDS Prevention Research.

UNIVERSITY AND PUBLIC SERVICE

Director, Behavioral Medicine Unit, Division of General Internal Medicine, 1984-present.
Responsible for directing group of 14 psychologists, psychiatrists, social workers, and trainees in providing behavioral medicine services in the context of the General Medical Practices at UCSF. Responsibilities include training, quality assurance, and design and implementation of services. Annual volume to the Behavioral Medicine Unit is approximately 5000 patient visits (10% of the visits to the General Medical Practices).

Chairman, Steering Committee, Social and Behavioral Studies Unit, Global Programme on AIDS, World Health Organization, 1991-present

Member, AIDS Advisory Committee, Health Resources and Services Administration, 1991-Present.

Member, Committee on Psychology and AIDS, American Psychological Association, 1991-Present.

Member, Safety and Data Monitoring Committee, Child and Adolescent Trial for Cardiovascular Heart (CATCH), National Heart, Lung, and Blood Institute, 1988-present.

Member, Committee on AIDS and the Behavioral, Social, and Statistical Sciences, National Research Council, National Academy of Sciences, 1987-present.

Member, AIDS Policy Subcommittee, National Mental Health Advisory Council, National Institute of Mental Health, 1987-88.

Member, Safety and Data Monitoring Advisory Committee, Treatment of Mild Hypertension Study, (TOMHS), NHLBI, 1986-88.

Consultant, Social and Behavioral Research, Global Programme on AIDS, World Health Organization, 1987

Member, Panel on Health Education and Behavior Change, Council on Scientific Affairs, American Medical Association, 1988-1989.

Member, American Foundation for AIDS Research (AMFAR), Education Advisory Committee, 1989.

Contributing Editor Journal of Acquired Immune Deficiency Syndromes, published by Raven Press and co-edited by Drs. William Hasetine, William Blattner, and Paul Volberding.

Reviewer, JAMA, AIDS, Journal of Consulting and Clinical Psychology, Health Psychology, Western Journal of Medicine

Primary Care Grand Rounds, UCSF, 1990, 1991, 1992.

Member, Search Committee, Chief of Medical Anthropology, Department of Epidemiology and Biostatistics, 1992.

Member, Task Force on Social and Behavioral Sciences, UCSF, 1990-1991.

Thomas J. Coates PhD is Professor of Medicine (with joint appointments in the Departments of Psychiatry and Epidemiology and Biostatistics), Director of the Behavioral Medicine Unit in the Division of General Internal Medicine, and Director of the Center for AIDS Prevention Studies (CAPS) at the University of California, San Francisco. As Director of CAPS, he has responsibility for overseeing a diverse set of empirical, policy, and ethical studies in the primary and secondary prevention of HIV disease. CAPS is funded by NIMH with individual grants from several NIH Institutes. In addition, CAPS is a subcontractor to Family Health International's AIDSCAP Project (funded by USAID) to provide AIDS prevention services and research in developing countries.

Dr. Coates came to UCSF from Johns Hopkins in 1982. Prior to that time he was on the faculty of the Stanford Heart Disease Prevention Program. He received his doctorate in counseling psychology from Stanford in 1977.

Dr. Coates' interests and professional experience have primarily focused on the study of disease-related behavior, with an emphasis on interventions to modify high risk behaviors in adolescents and adults. He is the author of many recent publications on theoretical underpinnings of AIDS prevention programs, the effects of antibody testing on high risk behavior, and reducing high risk behavior among various populations (seropositive gay men, adolescents, minority homosexually active men, heterosexuals). Dr. Coates has conducted research on community approaches to HIV prevention among a wide variety of populations. He is a special behavioral advisor to Family Health International's AIDS prevention programs (AIDSTECH and AIDSCAP) since 1990, and has consulted on AIDS behavioral research activities in several developing countries. Dr. Coates is a member of the Committee on AIDS and the Statistical, Social, and Behavioral Sciences of the National Research Council/National Academy of Sciences. He is Chairman of the Steering Committee for the Social and Behavioral Studies and Support Unit at the Global Programme on AIDS at the World Health Organization.

Dr. Coates is also a member of the Attending Medical Staff at the UCSF Hospitals and Clinics. He has had significant clinical experience in working with HIV-infected patients. As Director of the Behavioral Medicine Unit, he oversees a staff of 15 psychologists, psychiatrists and social workers involved in the delivery of mental health and preventive services in the context of the General Medicine Practices at UCSF.

Arthur J. Lawrence, Ph.D.
Acting Deputy National AIDS Policy Coordinator
The White House
Washington, DC 20500

Dear Dr. Lawrence:

Thank you for your letter of September 23rd. I am indeed interested in position openings in the office of the National AIDS Policy Coordinator. I will complete the SF-171 so that it is available and on file. Please keep me posted about positions openings.

Thank you very much.

Sincerely,

A handwritten signature in cursive script that reads "Thomas Coates (m)".

Thomas J. Coates, Ph.D.
Professor of Medicine
Director, Center for AIDS Prevention Studies
University of California, San Francisco
