U.S. CORRECTIONAL POPULATION REACHES 6.3 MILLION MEN AND
WOMEN REPRESENTS 3.1 PERCENT OF THE ADULT U.S. POPULATION

WASHINGTON, D.C. The number of adult men and women under the supervision of Federal, state and local correctional authorities rose to a record 6.3 million in 1999, the Justice Department's Bureau of Justice Statistics (BJS) announced today. This number, which represents 3.1 percent of all adult residents in the United States, or one in every 32 adults, includes persons incarcerated in jails and prisons and those supervised in the community under probation or parole.

During 1999, the correctional population increased by 164,400 (2.7 percent). At mid-year 1999, there were approximately 1,254,600 adults in federal or state prisons and 596,500 adults in local jails. The 1990-1999 increase averaged 4.2 percent annually; and was a 44.6 percent gain for the nine-year period. There were 1.9 million more under correctional supervision in 1999 than in 1990.

At the end of 1999, there were approximately 3,773,600 adults on probation and 712,700 on parole. More than 1 million of the nation's probationers and parolees slightly less than one-quarter of the total were in Texas (556,410) and California (446,460). From 1990 through 1999 the percentage of the total correctional population under community supervision declined from 74 percent to 71 percent.

States with the largest percentage of their adult population under community supervision were Georgia (5.8 percent) and Idaho (4.2 percent), and rates exceeding 3 percent were also found in Texas (3.9 percent), Delaware (3.8 percent), Washington (3.7 percent), and Minnesota (3.1 percent). Nine states had less than one percent of their population under community supervision.

Among probationers, criminal offenders sentenced to a period of correctional supervision in the community, slightly more than half (51 percent) had been convicted for committing a felony, 48 percent for a misdemeanor and 1 percent for other infractions. Seventy-seven percent of probationers were being actively supervised at the end of 1999; 10 percent were inactive cases and 9 percent had absconded.

Probation population gains of 10 percent or more during 1999 were recorded in Idaho (up 17.7 percent), Vermont (up 17.1 percent), Arizona (up 11.2 percent) and Montana (up 10.2 percent). Eleven states reported a decline in their probation population, led by West Virginia (down 7.9 percent) and Nevada (down 6.2 percent).

Parole is a period of conditional supervision following a prison term, and almost all parolees had been convicted of a felony (97 percent). Mandatory release from prison because of a sentencing statute or good-time provisions accounted for one-half of the persons entering parole during 1999; 42 percent entered parole because of a parole board decision, 6 percent were reinstatements and 2 percent were other actions.

California had the largest number of persons in the nation under parole supervision (114,046), surpassing Texas (109,310). Eight states reported a 10 percent or greater

increase in their parole population during 1999, led by Ohio (39.6 percent), South Dakota (20.9 percent), West Virginia (18.8 percent), Louisiana (16.8 percent) and Iowa (14.6 percent). Twenty-four states reported a decline in their parole population during 1999 led by Washington (down 46.7 percent), North Carolina (down 24.4 percent), Montana (down 17.7 percent) and Virginia (down 12.5 percent).

More than 1.9 million probationers and 400,000 parolees were discharged from supervision in 1999. More than 60 percent of those exiting probation (1,053,700) and more than 40 percent of those exiting parole (177,300) had successfully met the conditions of their supervision. During 1999, 14 percent of probationers (244,700) who were

discharged from supervision in 1999 and 42 percent of parolees leaving supervision (173,800) were incarcerated because of a rule violation or new offense.

Women represented a larger percentage of the probation and parole populations in 1999 than in 1990. Twenty-two percent of all probationers in 1999 (up from 18 percent in 1990) and 12 percent of those on parole (up from 8 percent in 1990) were women.

Blacks were more than a third of probationers at year-end 1999 (1,310,000), and nearly half of parolees (312,100). Almost two-thirds of probationers (2,394,400) and more than half of parolees (390,700) were white. Persons of other races accounted for about 2 percent of the probation population (69,300) and 1 percent of the parole population (9,900). Hispanics, who are of any race, comprised 16 percent of probationers (600,200) and 21 percent of parolees (152,000).

Data tables, prepared by BJS statisticians Thomas P. Bonczar and Lauren E. Glaze, as well as other information about the nation's correctional populations may be obtained from the BJS Internet site under press releases at:

Two items just came in -- 1) Does HHS have any Q&A electronically on the report? and 2) See story below -- this is a pretty positive story -- do we have any comment?

Number of Probationers, Parolees at Record High

By Ellen Nakashima

Washington Post Staff Writer

Monday, July 24, 2000; A02

The number of people on parole or probation reached a record 4.5 million in 1999, the Justice Department announced yesterday. The biggest increase is in probationers, reflecting a rise in drug arrests and a decline in the number of drug offenders sent to prison.

Twenty-four percent of the people on probation were convicted of drug offenses and 18 percent were given probation for drunken driving.

"What we've seen is a 30 percent decline in the likelihood of going to prison for a drug arrest over the last decade," Justice Department statistician Allen J. Beck said. "So even though we've had an increase in drug arrests, the flow into prisons has stabilized."

More than 1 million of the nation's probationers and parolees were in two states. Texas had 556,410 and California 446,460. States with the largest percentages of their adult population under community supervision were Georgia, with 5.8 percent, and Idaho, with 4.2 percent.

The parolees and probationers are part of the burgeoning population that is under correctional supervision in the wake of a national movement to crack down on crime, Justice Department officials said. States have built new prisons, toughened sentencing standards and increased options for community supervision.

Overall, the number of people under correctional supervision stands at an all-time high of 6.3 million, with 1.86 million men and women behind bars in June 1999. The number has climbed every year for a decade. New figures will be released next month.

"The scope of the criminal justice system has increased substantially over 20 years," Beck said. "It went from a little over 1 percent of the adult population back in 1980 to now up over 3 percent of all adults. That's one out of every 32 adults."

Despite a decline in violent crime, arrests for simple assaults were up by 28 percent between 1990 and 1999; arrests for forgery, fraud and embezzlement increased 37 percent; and arrests for drug use and sale rose 34 percent. The three types of convictions disproportionately result in sentences of probation, which allow offenders to avoid prison or jail but remain under supervision in the community.

After a steady increase in the 1980s, the parole population last decade stabilized at around 700,000, which Beck said reflects a drop in prison release rates and longer lengths of stay.

There were more women on probation (22 percent of the total) and parole (12 percent) in 1999 than in 1990. Blacks were more than one-third of probationers and nearly half of parolees. Almost two-thirds of probationers and more than half of parolees were white. Hispanics, who may be of any race, were 16 percent of probationers and 21 percent of parolees.

The study and other information about the nation's correctional population may be found at the Justice Department Web site: www.ojp.usdoj.gov/bjs.

Table 1. Adults under community supervision or in jail or prison, 1990-99

Year	Total estimated correctional population ^a	Probation ^b	Parole	Jail	Prison
1990	4,348,000	2,670,234	531,407	403,019	743,382
1995	5,335,100	3,077,861	679,421	499,300	1,078,542
1996	5,482,700	3,164,996	679,733	510,400	1,127,528
1997	5,725,800	3,296,513	694,787	557,974	1,176,564
1998	6,124,200	3,670,591	696,385	584,372	1,222,436
1999	6,288,600	3,773,624	712,713	596,485	1,254,577
Percent change ^c					
1998-99	2.7%	2.8%	2.3%	2.1%	3.7%
1990-99	44.6	41.3	34.1	48.0	68.8
Average annual percent change					
1990-99	4.2%	3.9%	3.3%	4.5%	6.4%

Note: The probation and parole counts may vary from previously reported estimates. Counts are for December 31, except for jail counts and the 1999 prison count, which are for June 30. All jail and prison counts are for inmates in custody.

^aA small number of individuals have multiple correctional statuses; consequently, the total of persons under correctional supervision is an overestimate, and are rounded to the nearest 100.

^bTotals in 1999 exclude 23,907 probationers in jail, 22,758 probationers in prison, and 2,163 probationers in an Immigration and Naturalization Service holding facility.

^cPercent change in the prison population was calculated for 6/30/98 to 6/30/99 and for 12/31/90 to 6/30/99.

Note: Because of nonresponse or incomplete data, the probation population for some jurisdictions on December 31, 1999, does not equal the population on January 1, 1999, plus entries, minus exits. During 1999 an estimated 2,042,500 persons entered probation supervision, and 1,927,700 exited, based on imputations for agencies which did not provide data.

. Not known.

... Comparable percentage or rate could not be calculated.

**Between -0.05% and 0.05%.

^aData do not include cases in one or more of the following categories: absconder, out of State, inactive, intensive supervision, or electronic monitoring.

^bEntries and exits do not include county data.

^cPercent change in probation population during 1999 excludes 134 local probation agencies for which a single population estimate was obtained for 12/31/99.

^dData are for the period beginning May 1, 1999, and ending April 30, 2000.

Explanatory notes

The 1999 Probation and Parole Data Surveys provide a count of the total number of persons supervised in the community on January 1 and December 31, 1999, and a count of the number entering and leaving supervision during the year. These surveys cover all 50 States, the District of Columbia, and the Federal System.

Probation

The 1999 Probation Data Survey was sent to 485 respondents — 36 central State reporters and 449 separate State, county, or court agencies. States with multiple reporters were Alabama (3), Arizona (2), Colorado (9), Florida (44), Georgia (6), Idaho (2), Kentucky (3), Michigan (132), Missouri (2), Montana (4), New Mexico (2), Ohio (193), Oklahoma (3), Tennessee (3), Washington (39), and West Virginia (2).

Data were not received from one local jurisdiction in Alabama and two local jurisdictions in Michigan. For these cases, the 12/31/98 population count was used as the 1/1/99 count and the 12/31/99 count. A total of 134 local probation agencies in Ohio provided a single estimate of their probation population for 12/31/99, which was also used for 1/1/99.

Parole

The 1999 Parole Data Survey was sent to 54 respondents — 52 central reporters, the California Youth Authority, and 1 municipal agency. States with multiple reporters were Alabama (2) and California (2).

Federal parole as defined here includes supervised release, parole, military parole, special parole, and mandatory release.

Bureau of Justice Statistics, July 2000, NCJ 183508
