

January 25, 1996

TO: Debbie Fine

FROM: Elisa Koff
Amy Nevel

SUBJECT: Update on DHHS Response to the White House request on Teenage Pregnancy Prevention Research, Evaluation and Demonstration Activities.

Per our phone conversation, we are forwarding you an update on the materials we received from the offices and agencies at DHHS. We are including a draft summary of the materials we received which we are ready to finalize to fill in the gaps if this project continues to go forward. In addition, we would be happy to provide you with copies of the materials or reports should you desire them.

In response to the request for an overview of significant government programs indirectly linked to teenage pregnancy prevention, we have enclosed the matrix, "Summary of DHHS-Youth Related Programs." This was last published in 1994. The enclosed version is a draft and should not be circulated. Broadly speaking, all of the programs are indirectly related to teenage pregnancy, as most risky behaviors are interrelated. The matrix uses a slightly different structure, but does include most of the information you requested.

We hope this is helpful to you. Please feel free to call either of us if you have any questions. Elisa can be reached at 202/690-5932 and Amy can be reached at 202/690-7795.

SUBJECT: Template and Follow-Up Information for Teen Pregnancy Report

In response to your request, the following provides OJJDP's contribution to the Teen Pregnancy Report in the template format requested:

INFORMATION ON CLEARINGHOUSES

Name of Clearinghouse: Juvenile Justice Clearinghouse

Funding Department, Agency and Program: U.S. Department of Justice, Office of Justice Programs, Office of Juvenile Justice and Delinquency Prevention

Target Population: Juvenile and Criminal Justice Professionals, Policymakers, and Service Providers

Specific Types of Information Available on Adolescent Pregnancy: The Clearinghouse offers reference and referral services on topics related to adolescent pregnancy, including information on programs sponsored and supported by the Office of Juvenile Justice and Delinquency Prevention (OJJDP).

As a component of the National Criminal Justice Reference Service (NCJRS), the Clearinghouse has access to publications, articles, and reports on teenage pregnancy and related topics in the NCJRS library and data base collection. There are currently 200 titles available and they are indexed by key search terms such as teenage pregnancy, pregnancy prevention, research, and program evaluations. The data base is available through DIALOG (File 21), on CD-ROM, and through customized searches by Clearinghouse staff.

The Clearinghouse also has access to information on programs related to teenage pregnancy through Partners Against Violence Network (PAVNET); an online resource via Internet.

Other Areas of Information Available: As the primary source for information on juvenile justice and delinquency prevention, the Clearinghouse provides reference and referral services on all topics related to youth; many which may impact adolescent pregnancy such as truancy, delinquency, and literacy.

Phone Number/Address and Hours of Operation:

Phone: 800-638-8736 (Monday through Friday, 8:30 a.m.- 7:00 p.m. EST)

FAX: 301-251-5212

BBS: 301-738-8895

E-mail: askncjrs@ncjrs.aspensys.com

Address for Reading Room: 1600 Research Boulevard
Rockville, MD 20850
(Monday through Friday, 8:30 a.m. - 5:00 p.m. EST)

Address for Mail: Box 600
Rockville, MD 20849-6000

INFORMATION ON REPORTS AND SIGNIFICANT PROGRAMS FOR WHICH FUNDS ARE NOT AVAILABLE (Note: All but the Federal Interagency Partnership (FIP) program were initially funded during this Administration. The most recent cycle of funding for FIP occurred during this Administration.)

1. Name of Report or Program: "YWCA Tower Expansion Program"

Years Funded: July 1, 1995 to June 30, 1998

Objective: The Young Women's Christian Association of the National Capital Area is a nonprofit women's membership organization which seeks to empower the lives of women and families in the Washington, D.C. Metropolitan Area.

Types of Activities Funded: 1) Completion of a Comprehensive Crisis Intervention Assessment to evaluate individual and family needs of each girl, 2) establishment of a Tower Hotline to facilitate relationships between families, residents, and former residents in need of intervention

and counseling services; 3) providing pre-vocational training through the Harrison Center of Career Education; 4) providing training on substance abuse issues; 5) providing life management and personal skills training; 6) providing parenting classes and support groups, establishing a mentorship program; and 7) establishing a consolidated case management system.

Under the parenting classes element of the program, the YWCA offers a Preventive Health Workshop that provides training that includes information on how to prevent unwanted pregnancies; sexually transmitted diseases, including HIV and AIDS; and the various birth control methods available. The social worker also will provide assistance in a wide range of other areas including nutrition, hygiene, prenatal care, and substance abuse education and prevention.

Name of Funding Department and Organizational Unit: U.S. Department of Justice, Office of Justice Programs, Office of Juvenile Justice and Delinquency Prevention

Funding Flow and Eligible Grantees: The Young Women's Christian Association of the National Capital Area was awarded this OJJDP grant as a result of the Congressionally mandated competitive process.

Grants Awarded: One grant in the amount of \$100,000

Significant Results/Findings/or Lessons: This program is in process.

2. **Name of Report or Program:** "Practical and Cultural Education Center for Girls, Inc., (P.A.C.E.)"

Years Funded: August 1, 1994 to July 31, 1996

Objective: P.A.C.E.'s goal is to improve the quality of life for at-risk girls between the ages of twelve and eighteen. To promote and enable these girls to further their education; build self esteem; and develop personal, social and family relationship skills thereby becoming productive citizens through responsible decision making.

Types of Activities Funded: 1) Providing accredited high school completion and basic skills education; 2) Developing and implementing a career placement plan; 3) Preventing substance abuse through education and counseling; 4) preventing teenage pregnancies; 5) teaching cultural awareness; 6) enabling young women to choose a safe environment free from violence and abuse; 7) teaching responsible health choices; and 8) encouraging involvement and volunteerism in the community.

P.A.C.E. programs are operational in Florida at Pensacola, Tallahassee, Jacksonville, Orlando, Bradenton, Ft. Lauderdale and Miami.

Name of Funding Department and Organizational Unit: U.S. Department of Justice, Office of Justice Programs, Office of Juvenile Justice and Delinquency Prevention

Funding Flow and Eligible Grantees: Girls, Inc., was awarded this OJJDP grant as a result of the Congressionally mandated competitive process.

Grants Awarded: Two grants, one each of two fiscal years, for a total amount of \$300,000

Significant Results/Findings/or Lessons: Program is in progress.

3. **Name of Report or Program:** Cities In School, Inc. “Federal Interagency Partnership”

Years Funded: April 16, 1994 to August 31, 1996

Objective: The *Federal Interagency Partnership* program, implemented by Cities In Schools, Inc. (CIS), reduces school dropout rates and school-related violence by mobilizing and coordinating public and private sector resources within a given community and focusing the communities' efforts and resources on the schoolhouse.

Types of Activities Funded: CIS, Inc. provides training and technical assistance to States and local communities, enabling them to adapt and implement the CIS model. The model brings social, employment, mental health, drug prevention, entrepreneurship, and other resources to high-risk youth and their families at the school level. The goal of the program is to create and support local programs with the capacity to serve 150,000 students and their families, and positively impact an additional 600,000 young people annually by September 30, 1996. Also, CIS, Inc., is fostering working relationships between the local CIS programs, the National Network, and Federal partners of CIS, Inc., to strategically apply available state, Federal, and local private and public resources to improve the quality and expand the capacity of local CIS programs.

CIS, Inc., activities contribute to the healthy development of young people, and CIS, Inc., supports local program efforts to join with families, schools, community agencies and religious organizations in maximizing each student's potential. This requires providing each young person with the opportunity to maintain a balanced lifestyle and a purposeful direction. CIS endorses a Comprehensive School Health approach to adolescent development. This includes a holistic focus on behaviors that promote health and wellness; prevent specific diseases, disorders and injury; prevent high risk social behaviors; intervene to assist youth who are in need; and help support those who are already exhibiting special health care needs. It includes providing programs that promote positive health and safety behaviors, and ensuring a supportive and healthy environment that nurtures academic growth and development.

Name of Funding Department and Organizational Unit: U.S. Department of Justice, Office of Justice Programs, Office of Juvenile Justice and Delinquency Prevention

Funding Flow and Eligible Grantees: The grant to Cities In Schools, Inc., is continuation funding in support of their program.

Grants Awarded: Two grants, one each of two fiscal years, for a total amount of \$1,277,000. These funds represent funding support from the Departments of Justice, Commerce and Health and Human Services, with OJJDP as the lead grantor agency.

Significant Results/Findings/or Lessons: This program is in process.

4. Name of Report or Program: “Program to Promote Alternative Programs for Female Juvenile Offenders”

Years Funded: August 1, 1995 to July 31, 1996

Objective: The grantee, Cook County Juvenile Temporary Detention Center, is working to develop a comprehensive strategy to promote systemic change and alternative community-based services to adjudicated female juvenile offenders in Cook County, Illinois and to enable them to become productive members of their communities and avoid further involvement in the juvenile justice system.

Types of Activities Funded: 1) Assessing the juvenile justice system in Cook County; 2) assessing the alternative services available to adjudicated female juvenile offenders in Cook County; 3) refining the definition of the Cook County female juvenile offender population; 4) developing a strategy to promote systemic change and a shift in attitudes in the Cook County juvenile justice system about handling female juvenile offenders and alternative sentencing/sanctions; 5) developing gender-specific programs for female juvenile offenders that addresses education, life management and personal growth skills, physical and mental health care and counseling, parenting skills, job training and skills, community service; 6) preparing an implementation plan; developing a means of evaluating both the planning process and the programs designed; and 7) developing a plan for securing funding support from both public and private community organizations.

Name of Funding Department and Organizational Unit: U.S. Department of Justice, Office of Justice Programs, Office of Juvenile Justice and Delinquency Prevention

Funding Flow and Eligible Grantees: Cook County Juvenile Temporary Detention Center was awarded this OJJDP grant as a result of the Congressionally mandated competitive process.

Grants Awarded: One grant in the amount of \$100,000.

Significant Results/Findings/or Lessons: Program is in progress.

5. Name of Report or Program: “SafeFutures”

Years Funded: October 1, 1995 to September 30, 2000

Objective: The SafeFutures community-wide approach will prevent and control juvenile violence and delinquency in targeted communities by: a) reducing risk factors for delinquency and increasing protective factors; b) providing a continuum of services for juveniles at risk of delinquency with appropriate immediate interventions for juvenile offenders; and c) developing a full range of graduated sanctions designed to hold delinquent youth accountable to the victim and the community, to ensure community safety, and to provide appropriate treatment and rehabilitation services.

Types of Activities Funded: 1) The SafeFutures Partnership will facilitate systems reform and linkages among the juvenile justice, education, social service and mental health systems that will improve access to services for families and youth; 2) increase the number of youth/families that receive culturally relevant and gender specific case management services and therefore are properly assessed and linked to needed support services; 3) increase the availability of culturally appropriate, neighborhood and school based before/after school and summer programs for youth ages 5 to 14 in the target neighborhoods; and 4) increase parents’ knowledge of and access to the juvenile justice system, social, health and education services, through a variety of parent education and intensive family support services.

The SafeFutures program will include up to nine components: Serious, Violent, and Chronic Juvenile Offender Program Development; Program to Promote Continuum of Care Services for At-Risk and Delinquent Girls; After School Programs; Juvenile Mentoring Program; Family Strengthening and Support; Mental Health Services for At-Risk and Adjudicated Youth; Delinquency Prevention Program; A Comprehensive Community-wide Approach to Gang-Free Schools and Communities and Community-Based Gang Intervention; and Bethesda Day Treatment Center Services.

Name of Funding Department and Organizational Unit: U.S. Department of Justice, Office of Justice Programs, Office of Juvenile Justice and Delinquency Prevention

Funding Flow and Eligible Grantees: The following jurisdictions were awarded this OJJDP grant as a result of the Congressionally mandated competitive process: Contra Costa County, California; Imperial County, California; Boston, Massachusetts; St. Louis, Missouri; Seattle, Washington; and Fort Belknap Indian Community in Harlem, Montana.

Grants Awarded: Each jurisdiction, with the exception of Fort Belknap, has received it’s first year award of \$1,410,000. Fort Belknap received its requested first-year award amount of \$900,000.

Significant Results/Findings/or Lessons: This program is in process.

6. **Name of Report or Program:** "Training and Technical Assistance for Family-Strengthening Programs"

Years Funded: October 1, 1995 to September 30, 1996, Year One of an anticipated three-year project period

Objective: To increase and enhance family strengthening programs nationwide by disseminating information on model family strengthening approaches, providing training and technical assistance on implementation barriers and issues, and helping communities to select and evaluate family programs. As too-early childbearing is associated with several undesirable outcomes -- school dropout, delinquency, alcohol/substance abuse, life-long poverty -- that family strengthening programs seek to ameliorate, teen pregnancy prevention is an outcome of successful family strengthening programs.

Types of Activities Funded: This project will examine the research literature on family strengthening program models, conduct a search for exemplary family strengthening practices and review evaluation data on these models and practices to select those family strengthening approaches that are most effective and replicable. The project will widely disseminate those findings nationwide through a variety of vehicles including one-page fact sheets, newsletters and the WWW. It will also develop training and TA manuals and reference material in conjunction with its provision of training and technical assistance to selected communities in family strengthening program model development and improvement.

Name of Funding Department and Organizational Unit: The Office of Juvenile Justice and Delinquency Prevention within the Office of Justice Programs, Department of Justice.

Funding Flow and Eligible Grantees: The funds for this project were provided through OJJDP's discretionary grants funds in a competitive solicitation open to all public and private agencies with demonstrated expertise in providing training and technical assistance in family strengthening.

Grants Awarded: An FY95 award of \$250,000 was made for a single year to the University of Utah's Department of Health and Education to carry out this project.

Significant Results: The project is in its initial stages, having begun October 1, 1995.

January 23, 1996

U. S. Department of Labor
Employment and Training Administration

Please see below a brief description of projects funded by the Department of Labor which have some linkage or relevancy to at-risk populations, such as teen parents, teens at-risk of dropping out of or have dropped out of school.

YOUTH FAIR CHANCE (YFC). The Youth Fair Chance Demonstration program (YFC), authorized by the Job Training Partnership Act Amendments of 1992, is a \$25 million community-based program that targets money directly into areas where youth problems are greatest, in areas of high poverty. The program takes a multi-faceted approach to fighting poverty by providing a variety of services and harnessing the cooperation and involvement of other service providers to focus on such youth problems as dropping out of school, teen pregnancy, drug and gang involvement, employment and training, lack of sports and recreation, family support, child development and health.

YFC targets youth and young adults between the ages of 14 and 30 and includes two components--an in-school component which is a School-to-Work (STW) program to transform high schools and improve the education, training and employment opportunities of youth, and an out-of-school component for activities for out-of-school youth and young adults comprised of centers for continuing education and training as well as other ancillary activities. An Advisory Board ensures that community leaders and residents, schools, businesses and other interested/appropriate persons are directly involved in the project.

Seventeen YFC sites were funded \$3 million each in July 1994--13 in urban communities, 2 rural sites, a native American site, and a migrant and seasonal farmworker community--providing funds for 18 months. Additional resources were added to the grants in July 1995 and grants were extended through December 1997.

Some of the YFC sites utilize AmeriCorp volunteers (the new national service initiative signed into law by President Clinton). Six of eight YFC sites have developed a Resource Mothers program--where AmeriCorp volunteers make home visits to young pregnant women and young mothers to teach them about nutrition, parenting and provide information to link them to health services.

NOTE: YFC builds on a previous Department of Labor prototype which tested a more comprehensive approach to providing training and employment services to youth in high poverty areas. In 1990, the Department funded seven pilot projects called Youth

Opportunities Unlimited (YOU), to focus on the range of needs of youth ages 14-21 in communities with high poverty and crime rates and with populations of not more than 25,000. In 1991, the Department funded four additional projects. **Preliminary evaluation data of the YOU project did find that teen birthrates declined.**

JOB CORPS. Job Corps is a major national training and employment program administered directly at the federal level by the Department of Labor to address the multiple barriers to employment faced by severely disadvantaged youth, ages 16 through 22. The program's residential aspect distinguishes it from other employment and training programs and enables it to provide in one setting 24 hours a day, seven days a week a comprehensive array of services, including entry diagnostic testing, occupational exploration and world-of-work training, occupational training, academic education, intergroup relations, counseling and health care, life skills development, regular student progress reviews, work experience programs, and post-program placement services.

Currently, there are 110 Job Corps centers serving more than 100,000 enrollees annually. Since its inception in the early sixties, Job Corps' ability to keep abreast of and meet innovatively the challenges demanded of it by the societal, technological and economic changes over the years has contributed to the program's current success.

Job Corps developed an expanded, comprehensive and competency-based preliteracy to precollege academic education program in response to the needs of the workplace of the 1990s and beyond for additional and advanced skills. Part of the required academic program is a comprehensive Health Education curriculum which includes reproductive health. In addition, all students -- male and female -- are required to take a parenting course.

Child care availability was expanded both on-site and off-center through linkages developed in coordination with State and local agencies. A comprehensive Social Skills Training program was implemented at all Centers during PY 1991 to complement the job skills received by enrollees, focusing on such characteristics as teamwork, decision-making, dealing with emotions, self-control and punctuality.

A national study is now being conducted on Job Corps to provide reliable estimates of the net impacts of the program on participants' post-program lives. Answers to questions to determine the program's impact on participants' employment, earnings, behavior, family formation and children, the likelihood of bearing and fathering children, among other factors will be assessed. An interim report on this study is expected in May 1997.

ALTERNATIVE SCHOOLS DEMONSTRATION PROGRAM. This demonstration was launched in 1988 to address the needs of a segment of high

school dropouts and potential dropouts neglected by existing programs. Seven schools initially participated in this \$5.6 million venture in 1988, five are still operating today, evidence of the districts' good-faith efforts to sustain the schools once grant funding expired. Three out of the five have on-site day care and one offers off-site day care with transportation provided between school and day care.

This program represents a new and very different approach to serving young adults with high school diplomas, one which enables them to return to school to earn their diploma and thereby lead more productive lives.

QUANTUM OPPORTUNITIES DEMONSTRATION. The Department of Labor and the Ford Foundation are jointly funding a demonstration of the Quantum Opportunities Project. This Ford Foundation project was originally funded by the Ford Foundation and developed by the OICs of America, placed 100 entering ninth graders in inner-city high schools in groups of 25 and assigned them to the same adult counselor throughout their four years of high school. Eligible students were randomly selected to be part of either the treatment or control group, and both were followed over time.

An evaluation of the program showed that QOP had been able to cut dropout rates in half, double the college entrance rate of participants, and reduce births to teens. Even though the project involved a small sample and was primarily centered in one site, the results are very promising. The current demonstration, with the Department of Labor and the Ford Foundation, is larger--involving over 1000 youth--and will be located in seven sites. Services will begin at most in the late fall of this year. Students in the treatment and control groups will be tracked over time to determine the program's impacts on high school graduation, college entrance and adolescent birth rates.

NOTE TO DEBBIE FINE:

Enclosed is the Department of Education's compilation of programs relevant to teen pregnancy prevention. I have sent you both a hard copy and a Word Perfect 5.1 version. Please let me know the next steps.

Thanks

Judy Wurtzel

I. INFORMATION ON PROGRAMS

Name of Program: Women's Educational Equity Act (WEEA) Program

Objective: To promote gender equity in education; to promote equity in education for women and girls who suffer from multiple forms of discrimination based on sex and race, ethnic origin, limited English proficiency, disability, or age; and to provide financial assistance to enable educational agencies to meet the requirements of title IX of the Education Amendments of 1972.

Types of Activities Funded: (1) Grants for the implementation of gender equity programs in schools; and (2) research and development grants to develop model equity programs.

Name of Funding Department and Organizational Unit: Department of Education; Office of Elementary and Secondary Education; School Improvement Programs

Funding Flow and Eligible Grantees: ED makes grants directly to public agencies, private nonprofit agencies, organizations, institutions, student groups, community groups, and individuals.

Funding Cycle/When are Funds Available: The WEEA program receives an annual appropriation. ED announces grant competitions in the *Federal Register*.

Funds Available in 96: Both the House-passed bill and the Senate Committee-passed bill would eliminate funding for WEEA. Under the current continuing resolution, the FY 1996 appropriation would be \$2.975 million. At that level, all funds would support continuation grants.

Typical Number and Average Amount of Grants: 15-20 grants; average amount \$179,000

Information Contact: Office of Elementary and Secondary Education/School Improvement Programs; phone 260-3693

Name of Program: Adult Education State Grants

Objective: To assist States to improve educational opportunities for adults who lack the level of literacy skills requisite to effective citizenship and productive employment and to expand and

improve the delivery system for adult education services that enable educationally disadvantaged adults to acquire the basic educational skills necessary for literate functioning, profit from employment-related training, and complete high school.

Types of Activities Funded: Adult basic education; high school equivalency instruction; and English classes for adults who speak other languages

Name of Funding Department and Organizational Unit: Department of Education; Office of Vocational and Adult Education; Division of Adult Education and Literacy

Funding Flow and Eligible Grantees: ED distributes funds by formula to States. State educational agencies subgrant funds to: local educational agencies, correctional education agencies, community-based organizations, public or private nonprofit agencies, postsecondary educational institutions, and other institutions that have the ability to provide literacy services to adult and families.

Funding Cycle/When are Funds Available: This is a forward-funded program. The FY 1996 appropriation would become available on July 1, 1996.

Funds Available in 96: Both the House and the Senate Committee would provide \$250 million for this program.

Typical Number and Average Amount of Grants: Under current law, ED makes 59 grants averaging \$4.2 million each.

Information Contact: Office of Vocational and Adult Education/Division of Adult Education and Literacy; phone 205-8270

Name of Program: Goals 2000: Educate America Act, State and Local Grants

Objective: To provide assistance to States and local school districts to devise their own strategies for comprehensive reform of elementary and secondary education. The strategies center on the creation and implementation of high standards in the State's core academic subjects that define what all students should know and be able to do at various points along the K-12 school continuum.

Types of Activities Funded: Education

Name of Funding Department and Organizational Unit: U.S. Department of Education, Office of Elementary and Secondary Education

Funding Flow and Eligible Grantees: Federal funds are distributed to States by formula; States award subgrants to local school districts

Funding Cycle/When Funds Are Available: Annually

Funds Available in FY 1996: The House-passed appropriations bill would provide no funding for Goals 2000. However, the Senate Committee-passed bill includes \$300 million for State and local grants.

Typical Number and Average Amount of Grants: In FY 1994, 50 States (including D.C. and Puerto Rico) received a total of \$91.5 million, averaging \$1.8 million per State.

In FY 1995, 52 States (including D.C. and Puerto Rico) are eligible for a total of \$358.3 million, averaging \$5.9 million per State.

Information Contact: U.S. Department of Education, Office of Elementary and Secondary Education, Goals 2000 Staff (202--401-0039)

Name of Program: Goals 2000: Educate America Act Parental Assistance

Objective: o support a network of parent information and resource centers that provide parents with training, information, and support in better understanding their children's educational needs and how to help their children achieve to high standards.

Types of Activities Funded: Education, training.

Name of Funding Department and Organizational Unit: U.S. Department of Education, Office of Elementary and Secondary Education, Goals 2000 Staff

Funding Flow and Eligible Grantees: Competitive grants to nonprofit organizations and to nonprofit organizations in consortium with local educational agencies.

Funding Cycle/When Funds Are Available: Competition held every four years. The first four-year awards were made in FY 1995.

Funds Available in FY 1996: The House-passed appropriations bill includes no funds for this activity, while the Senate committee-passed bill includes \$10 million. If the program receives a 1996 appropriation, all funds will be used for continuation awards to the grantees selected in the initial competition.

Typical number and average amount of grants: Currently, 28 grantees share a total of \$10 million, for an average grant of \$357,000.

Information Contact: U.S. Department of Education, Office of Elementary and Secondary Education, Goals 2000 Staff (202--401-0039)

Name of Program: School-to-Work Opportunities, State Grants and Local Partnerships

Objective: To enable every State to design and implement a comprehensive school-to-work transition system that will be available to all children. These systems integrate academic and vocational education, link secondary and postsecondary education, provide learning opportunities at the work site, and fully involve the private sector. States and local partnerships develop plans that, among other things, describe the methods they will use to ensure opportunities for young women to participate in school-to-work programs in a manner that leads to employment in high-performance, high-paying jobs, including nontraditional employment.

Types of Activities Funded: Education

Name of Funding Department: School to Work Office (jointly administered by U.S. Department of Education/OVAE and U.S. Department of Labor/ETA)

Funding Flow and Eligible Grantees: (1)Competitive grants to States; States make subgrants to local partnerships.(2)Competitive grants to local partnerships located in States that do not yet have grants to implement State plans.(3)Competitive grants to local partnerships in urban and rural areas characterized by high poverty.

Funding Cycle/When Funds are Available:(1)States receive 5-year grants; competitions held annually.(2)Local partnerships receive grants of one or more years duration, depending on State receipt of grant; competitions held annually.(3)Grants to high-poverty areas are for five years; competitions held annually.

Funds Available in FY 1996: The House-passed bill would provide \$190 million total for the two Departments; the Senate Committee-passed bill would provide \$245 million, the same as the FY 1995 level.

Typical number and average amount of grants: For FY 1995

(1) 27 States; average award = \$6.4 million

(2) 90 local partnerships; average award = \$500,000

Information Contact:(1) School-to-Work National Office
202--401-6222;(2) Regional Offices/ED and DOL

Name of Program: Bilingual Education: Instructional Services

Objective: Improve the quality of instructional services for limited English proficient students to teach them English, permit them to achieve to high academic standards, and prepare them to enter all English classrooms.

Types of Activities Funded: Instructional Services that may use the native language and are designed to teach English, assist limited English proficient students to achieve to high academic standards, and prepare these students to enter all English classrooms.

Name of funding Department and Organizational Unit: U.S. Department of Education, Office of Bilingual Education and Minority Languages Affairs

Funding Flow and Eligible Grantees: Discretionary grants, primarily to local educational agencies

Funding Cycle/When are Funds Available: Discretionary grant competitions are held, usually every year for two- to five-year grants. Competitions are generally announced in late summer or fall with deadlines in late fall. Awards are usually announced the following spring.

Funds Available in 96: At the House-passed appropriations bill level, all 1996 funds would be required to fund continuations; no new awards could be made. At the Senate committee-passed level, approximately \$18 million would be available for new grants.

Typical number and average amount of grants: In fiscal year 1995, the Department made 237 new awards at an average level of \$220,000.

Information Contact: Delia Pompa, Director, Office of Bilingual Education and Minority Languages Affairs, U.S. Department of Education

Name of Program: Title I Grants to Local Educational Agencies

Objective: This program supplements State and local funding to school districts and schools, especially in high-poverty areas, to help low-achieving children in all school grades achieve educational excellence. The 1994 reauthorization gives Title I the purpose of helping children in high-poverty schools reach the same high State academic standards expected of all children, thus making the program an integral component of State and local educational reform efforts.

Types of Activities Funded: Funds provide extra educational reinforcement for students who do not typically have access to the same resources as other, more advantaged children, either at home or at school: activities during the regular school day to help students master challenging curriculum in reading, mathematics, and other core academic areas as well as pre-school, after-school and summer programs to reinforce classroom teaching and learning.

Name of Funding Department and Organizational Unit: U.S. Department of Education, Office of Elementary and Secondary Education, Compensatory Education Programs

Funding Flow and Eligible Grantees: Program funds are allocated by formula through State educational agencies (SEAs) to almost all the Nation's school districts. Within districts, funds go to schools with the highest proportions of children from low-income families.

Funding Cycle/When Funds Are Available: Annually

Funds Available in FY 1996: The House-passed appropriations bill would provide about \$5.6 billion for Title I LEA Grants, while the Senate Committee-passed bill includes an amount slightly over \$6 billion.

Typical Number and Average Amount of Grants: About 93 percent of the Nation's school districts, or more than 14,000, receive formula grants that range from a few thousand dollars in small districts to about \$400 million in the largest district (New York).

Information Contact: U.S. Department of Education, Office of Elementary and Secondary Education, Compensatory Education Programs, (202) 260-0826

Name of Program: Title I Migrant Program

Objective: This program provides funds to State educational agencies (SEAs) for education services to children of migrant agricultural workers and fishermen. Like other Title I programs, this program focuses on helping migrant children master challenging curriculum and learn to the high academic standards expected of all children. The program promotes greater access for migratory children to services available under Title I LEA Grants while, at the same time, encouraging the use of Migrant Program resources for services not usually available from those programs.

Types of Activities Funded: Academic instruction and support services for migratory children under age 21, as well as intra- and inter-State activities to coordinate services for migratory children and families.

Name of Funding Department and Organizational Unit: U.S. Department of Education, Office of Elementary and Secondary Education, Office of Migrant Education

Funding Flow and Eligible Grantees: Program funds are allocated by formula to State educational agencies (SEAs).

Funding Cycle/When Funds Are Available: Annually

Funds Available in FY 1996: The House-passed and Senate Committee appropriations bills would provide \$305.5 million.

Typical Number and Average Amount of Grants: In FY 1995, 49 States as well as D.C. and Puerto Rico received a total of \$299 million, averaging \$5.9 million per State. (Hawaii did not participate in the program.) Also, about \$6 million supported migrant coordination activities through discretionary grants awarded by the Department.

Information Contact: U.S. Department of Education, Office of Elementary and Secondary Education, Office of Migrant Education, (202) 260-1124

Name of Program: Vocational Education State Grants

Objective: State Grants assist States and Outlying Areas to expand and improve their programs of vocational education and provide equal access in vocational education to special needs populations.

Types of Activities Funded: States use State Grants funds to support a variety of vocational education programs developed in accordance with a State plan. The populations assisted by State Grants range from secondary students in pre-vocational courses through adults who need retraining to adapt to changing technological and labor market conditions. Women also benefit from activities designed to reduce sex stereotyping in vocational education and enable members of both sexes to prepare for and enter occupations that are nontraditional for their gender.

Funding Flow and Eligible Grantees: Federal funds are distributed to State educational agencies.

Funding Cycle: Funds are available annually (in July of each fiscal year).

Funds Available in 96: The House action would provide \$786,383,000 while the Senate committee action would provide \$874,709,000.

Typical number and average amount of grants: This program provides 53 grants. The average grant amount in 1995 was \$18,031,000.

Information Contact: Office of Vocational and Adult Education, Division of Vocational-Technical Education; phone (202) 205-9441.

Name of Program: Safe and Drug-Free Schools and Communities State Grants

Objective: To support comprehensive, integrated approaches to youth drug and violence prevention. The program primarily funds service delivery; the target population is youth 5 through 21 years of age.

Types of Activities Funded: Drug and violence prevention activities such as classroom instruction, professional development, early intervention and rehabilitation referral, peer counseling and mediation, conflict resolution, school security, and community-wide coordination of comprehensive programs.

Name of Funding Department and Organizational Unit: Department of Education, Office of Elementary and Secondary Education, Safe and Drug-Free Schools and Communities Program.

Funding Flow and Eligible Grantees: 80 percent of funds are awarded to State educational agencies (SEAs) and 20 percent to the Nation's Governors. SEAs subgrant their funds to local educational agencies, and Governors' funds are passed through to community-based and nonprofit organizations and agencies.

Funding Cycle/When are Funds Available: Annually

Funds Available in 96: Both the House-passed 1996 appropriations bill and the Senate Committee-passed bill would provide \$200 million for this activity.

Typical number and average amount of grants: Each year the Department awards approximately 104 State grants (one to each SEA and one to each Governor in each of the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico). In fiscal year 1995, total funding for these grants was \$430.3 million, an average of \$4.1 million per grant and an average of \$8.3 million per State.

Information Contact: U.S. Department of Education, Safe and Drug-Free Schools and Communities Program, at 202-260-3954.

Name of Programs: Federal TRIO programs, which include:

- o Student Support Services Program
- o Upward Bound Program
- o Talent Search Program
- o Educational Opportunity Centers
- o McNair Postbaccalaureate Achievement Program

Objective: The Federal TRIO programs fund postsecondary education outreach and support services designed to encourage qualified individuals from disadvantaged background to enter and complete college, and to motivate and prepare these students for doctoral studies.

Activities Funded: Academic, personal and career counseling; tutorial services; admission and financial aid counseling; cultural enrichment activities; assistance with re-entry to high school or college.

Funding Dept./Organizational Unit: U.S. Department of Education, Office of Postsecondary Education

Funding Flow/Funding Cycle/and Eligible Grantees: Discretionary grants of up to 4 or 5 years in duration are awarded competitively to institutions of higher education and other public and private nonprofit institutions and agencies.

Funds Available in FY 1996: \$463 million

Number and Average amount of grants:

	<u># awards</u>	<u>Average amount</u>
Student Support Services Program	706	\$206,000
Upward Bound Program	681	\$260,000
Talent Search Program	319	\$246,000
Educational Opportunity Centers	74	\$333,000
McNair Postbaccalaureate Achievement Program	96	\$189,000

Information Contact:U.S. Department of Education, Office of Postsecondary Education, Division of Student Services

Name of Programs: Federal Student Financial Assistance Programs

- o Pell Grant Program
- o Supplemental Educational Opportunity Grant Program
- o Federal Work-Study Program
- o Perkins Loan Program
- o Federal Family Educational Loan Program
- o William D. Ford Direct Student Loan Program
- o State Student Incentive Grant Program

Objective: Increase postsecondary educational opportunities by providing financial assistance to eligible students attending participating postsecondary educational institutions.

Activities Funded: Student financial aid

Funding Dep't./ Organizational Unit: U.S. Department of Education, Office of Postsecondary Education.

Funding Flow and Eligible Grantees:

Pell Grant Program -- Federal funds are awarded directly to eligible students under a standard national need formula and distributed by participating postsecondary institutions.

William D. Ford Direct Student Loan Program -- Federal funds are loaned directly to eligible students under standard national criteria by participating institutions. In addition, the Federal government pays the interest for needy students while they are in-school or in a qualified deferment status.

Federal Work-Study Program -- Federal funds are distributed to participating postsecondary institutions under a statutory formula. Institutions provide matching funds and award funds for work-study employment to student beneficiaries on the basis of need.

Perkins Loan Program -- Federal capital funds are distributed under a statutory formula to participating postsecondary institutions with revolving loan funds. Institutions provide matching funds and award loans to student beneficiaries on the basis of need. Loans are repaid to the institution's revolving loan fund for subsequent lending to future borrowers.

Federal Family Educational Loan Program -- Privately-financed loans are made by participating lenders, guaranteed against default by loan guaranty agencies, and reinsured by the Federal government. In addition, the Federal government pays the interest on loans made to needy students while they are in-school or in a qualified deferment status.

State Student Incentive Grant Program -- Federal funds are distributed to state higher education agencies under a statutory formula. States provide matching funds and administer need-based grant and work-study programs.

Supplemental Educational Opportunity Grant Program -- Federal funds are distributed to participating postsecondary institutions under a statutory formula. Institutions provide matching funds and award grants to student beneficiaries on the basis of need.

Funding Cycle: Annual

Funds available in 1996:

Program Name	Aid Available 1996 (\$ in thousands)
Pell Grants	\$5,994,000
Supplemental Educational Opportunity Grants*	\$738,500
Federal Work-Study*	\$759,800
Perkins Loans*	\$975,273
Federal Family Educational Loans	\$14,235,000
William D. Ford Direct Student Loans	\$13,807,000
State Student Incentive Grants*	\$62,750
TOTAL	\$36,574,319

* Aid available includes required matching funds.

Typical number and average amount of awards:

Program Name	Number of Awards 1996	Average Award 1996
Pell Grants	3,550,000	\$1,688
Supplemental Educational Opportunity Grants	991,000	\$745
Federal Work-Study	713,400	\$1,065
Perkins Loans	726,731	\$1,342
Federal Family Educational Loans	3,760,000	\$3,786
William D. Ford Direct Student Loans	3,533,000	\$3,908
State Student Incentive Grants	104,000	\$601

II. INFORMATION ON CLEARINGHOUSES AND OTHER TECHNICAL ASSISTANCE AND INFORMATION RESOURCES

Name of Clearinghouse: ERIC Clearinghouse on Counseling and Student Services

Funding Department, Agency and Program: U.S. Department of Education, Office of Educational Research and Improvement (OERI), National Library of Education, ERIC (Educational Resources Information Center)

Target Population: Education Community and the general public

Specific Types of Information Available on Adolescent Pregnancy: Digests, Monographs, research reports, curricular materials, articles, and other printed materials.

Other Areas of Information Available: On-line searches, CD-ROMs, annotated bibliographies, and packaged searches in almost every area of education.

Phone Number/Address and Hours of Operation: 910-334-4114; ERIC Clearinghouse on Counseling and Student Services/University of North Carolina at Greensboro/School of Education/101 Park Building/Greensboro, North Carolina 27410-5001; 9:00a.m.-5:00p.m. Alternatively, call **(800) LET-ERIC** or, on the Internet, **acceric@inet.ed.gov** to obtain information about its resources on the issue of teenage pregnancy.

Name of Program: National Institute on the Education of At-Risk Students (NIEARS)

Objective: NIEARS carries out a coordinated and comprehensive program of research and development for the improvement of the education of at-risk students -- i.e., students, who because of limited English proficiency, poverty, race, geographic location, or economic disadvantage, face a greater risk of low education achievement or reduced academic expectations.

Regarding teen pregnancy and reducing the high rate of teen pregnancy, and educating the public about this issue, NIEARS considers the situations of both teenage mothers and their infants as serious risk factors for low education achievement and reduced academic expectations.

Types of Activities Funded: NIEARS supports the expansion of research-based knowledge and strategies that promote excellence and equity in the education of children and youth placed at risk of educational failure. The Research and Development Center program, with 4 centers: 1) The Center for Research on the Education of Students Placed At Risk (CRESPAR), 2) The National Center for Research on Cultural Diversity and Second Language Learning, 3) The National Research Center on Education in the Inner Cities, and 4) The National Research Center on the Gifted and Talented, complements the work of NIEARS. NIEARS also funds Field-Initiated Studies grants.

Teenage mothers and their infants have not been specifically targeted groups of NIEARS funding; however, NIEARS' funded centers do include research and development programs that investigate issues surrounding them.

Name of funding Department and Organizational Unit: U.S. Department of Education, Office of Educational Research and Improvement

Funding Flow and Eligible Grantees: Federal funds distributed to nationally competed research and development centers at post-secondary institutions/consortia and to peer-reviewed field-initiated studies grantees.

Funding Cycle/When are Funds Available: Research and Development Centers are funded on a 5-year basis: CRESPAR is in the second year of its program; a competition is underway for funding a research center on student diversity for 5 years. Field-initiated studies grants are awarded annually, as funding is available.

Funds Available in 96: \$6 million

Typical number and average amount of grants:

Research and development centers: 2

Average amount: \$5,000,000

Field initiated studies: Number and amount as funding is available

Information Contact:

National Institute on the Education of At-Risk Students/OERI

Room 610 - Capitol Place

555 New Jersey Avenue, NW

Washington, D.C. 20208-5521

Telephone: **(202) 219-2239**

WWW home page: **http://www.ed.gov/prog_info/At-Risk/**

Name of Clearinghouse: National Clearinghouse for
Bilingual Education

Name of funding Department and Organizational Unit: U.S.
Department of Education, Office of Bilingual Education and
Minority Languages Affairs

Target Population: Schools serving limited English
proficient students

**Specific Types of Information Available on Adolescent
Pregnancy:** Information is available on techniques for
providing teen pregnancy prevention services to limited
English proficient students

Other Areas of Information Available: Information on
providing high-quality instructional services for limited
English proficiency students.

Phone Number/Address and Hours of Operation: Telephone:
(202) 467-0867, (800) 321-6223; Address: NCBE, 1118 22nd
Street, N.W., Washington, D.C. 20037, Hours 9:00 - 5:30
(eastern); Internet ASKNCBE@ ncbe.gwu.edu.

Name of Clearinghouse: National Center for Research in Vocational Education (NCRVE). Among its functions, NCRVE serves as a clearinghouse on research, curriculum development, and personnel development in vocational education.

Funding Department, Agency and Program: Department of Education, Office of Vocational and Adult Education, Vocational Education National Programs--Research

Target Population: NCRVE targets the entire vocational education community. Its mission is to strengthen education to prepare all individuals for lasting and rewarding employment, and lifelong learning.

Specific Types of Information Available on Adolescent Pregnancy: n/a

Information Contact: National Center for Research in Vocational Education
University of California at Berkeley
2150 Shattuck Avenue, Suite 1250
Berkeley, CA 94720-1674

AskNCRVE@vocserve.berkeley.ed

III. INFORMATION ON REPORTS AND SIGNFICANT PROGRAMS FOR WHICH FUNDS ARE NOT AVAILABLE

Name of Report or Program: Dropout Prevention Demonstration Program, Evaluation of Structured Dropout Prevention Projects.

Years Funded: 1991 - 1995

Objective: To test and evaluate the effect of promising strategies in high school dropout prevention and reentry.

Types of Activities Funded: Demonstration projects participating in this evaluation carried out a variety of programs, including comprehensive dropout prevention and recovery models that focused on restructuring and reform within schools clusters (that is, a high school and its feeder elementary and middle schools), and model programs that involved comprehensive targeted services for at-risk youth. Some, but not most, of the projects included teen pregnancy components.

Name of funding Department and Organizational Unit:
For project grants, Office of Elementary and Secondary Education, Office of School Improvement Programs

For the national evaluation: Office of the Under Secretary, Planning and Evaluation Service

Funding Flow and Eligible Grantees:

For project grants, funds were awarded to local educational agencies and community-based organizations

For the national evaluation, funds were awarded under contract to Mathematica, Inc., a research and consulting firm.

Note: Funds are no longer available for this program.

Grants Awarded:

The national evaluation was funded at approximately \$2 million annually.

A total of 85 project grants were awarded. Total funding for these projects ranged from \$12 million in fiscal year 1995 to \$38 million in 1992.

Significant Results/Findings/or Lessons: Preliminary findings from the Evaluation of Structured Dropout Prevention Projects indicate that alternative middle school programs look promising, but there are weak results for alternative high schools. School-wide reform efforts can affect student outcomes when they include targeted

support services. Such reform efforts are difficult to sustain, however, due to staff turnover and shifts in district policy. Students in the dropout prevention programs had much higher rates of drug use and arrests, and were more likely to have children, than youth in general. It may be possible to look at these highly at-risk groups separately in the final report.

JAN 25 1992

NOTE TO: Debby Fine

FROM:  Debby Greenstein

SUBJECT: HUD Teen Pregnancy Program Information

The disk I am sending includes two files. Teen includes information from our Office of Public and Indian Housing and Teenpreg.hsg include information from the Office of Housing. If you have any questions, give me a call and I will either get the answer or put you in touch with the person who is better able to give you an answer. In no case did I edit/eliminate any project descriptions on the files. You can decide if they are too far off the mark to include in your publication.

I have also included a paper copy of a short description of HUD User and its subsidiary clearinghouses. I thought this might be of interest as you think about how to link information sources. If at some time you would like to talk to the HUD staff who sponsor these clearinghouses, I would also be happy to arrange that.

HUD USER: The Source for Housing Information (1-800-245-2691)

HUD USER is an information source for housing and community development researchers and policymakers. Established in 1978 by HUD's Office of Policy Development and Research (PD&R), HUD USER is the primary source for Federal Government reports and information on housing policy and programs, building technology, economic development, urban planning, and other housing-related topics. With its specialized clearinghouses, HUD USER collects, creates, and distributes a wide variety of products and services to nearly 50,000 requesters each year.

Specific products and services include:

- *Recent Research Results*, a free monthly newsletter.
- Distribution of research reports from PD&R and other HUD Offices.
- Audiovisual materials, including videotapes and slides.
- An online bibliographic database of more than 5,500 documents.
- Resource guides that contain summaries of information sources on selected topics.
- Photocopies of unpublished and out-of-print materials.
- Blueprints of affordable and energy-efficient housing.

HUD USER's component Clearinghouses/Information Centers also respond to specialized information needs:

- **Fair Housing Information Clearinghouse (1-800-343-FHIC)**

Established by HUD's Office of Fair Housing and Equal Opportunity, this Clearinghouse provides access to resources and outreach materials for fair housing advocates, policymakers, researchers, and concerned individuals.

- **Regulatory Reform for Affordable Housing Information Center (1-800-36-NIMBY)**

This Information Center disseminates information on successful regulatory reform efforts and offers technical assistance to State and local governments, the housing industry, and advocacy groups working to eliminate excessive regulations that increase the cost of housing.

(over)

■ **Resident Initiatives Clearinghouse (1-800-955-2232)**

HUD's Office of Resident Initiatives (ORI) created this Clearinghouse to share information on successful resident initiative programs and ORI-sponsored activities with residents and public and Indian housing agencies.

■ **Multifamily Housing Clearinghouse (1-800-955-2232)**

The Office of Housing/Multifamily Housing Programs created this new Clearinghouse to disseminate information on elderly and assisted housing programs, multifamily housing management, multifamily housing development, preservation and property disposition, and resident initiatives within multifamily housing communities.

■ **American Communities: The Information Center of HUD's Office of Community Planning and Development (CPD) (1-800-998-9999)**

Formerly the HOME Information Center, American Communities (AMCOM) has expanded to serve as a resource for all CPD programs and initiatives, including Community Development Block Grant (CDBG); HOME Investment Partnership (HOME); homeless and Special Needs Assistance Programs (SNAPS); Economic Development programs such as Empowerment Zones/Enterprise Communities; the Consolidated Plan (supplanting the Comprehensive Housing Affordability Strategy); and Environment and Energy. AMCOM serves nonprofit housing and community development organizations, State and local government agencies, public interest groups, and HUD personnel at all levels.

■ **Drug Information & Strategy Clearinghouse (1-800-578-DISC)**

HUD's Drug-Free Neighborhoods Division established the Drug Information & Strategy Clearinghouse (DISC) to promote the health and safety of public housing residents and help control drug trafficking and other drug-related activities.

SUMMARY OF DHHS YOUTH-RELATED PROGRAMS							
Program	OPDIV/ Admin Unit	Legislative Authority	Funding	Eligibility	Number of Youth Served Last Year	Purpose	Contact
Community Schools Youth Services and Supervision Grant of 1994	ACF/ACYF/ Family and Youth Services Bureau	PL 103-322, Subtitle D, Section 30401	Discretionary FY 1995: \$25,900,000	Grantee Eligibility: Community-based organizations in areas of significant poverty and juvenile delinquency. Participant Eligibility: Children and youth ages 5 through 18 who reside in the eligible community.	Not Applicable	To provide matching grants to private, community-based, non-profit organizations in communities with significant poverty and juvenile delinquency for after-school, weekend, and summer recreation and education programs, including supervised tutoring, mentoring, work force preparation, and access to health care, including counseling and substance abuse treatment. Priority will be given to applicants that demonstrate the greatest effort in generating local support for the program. Funds will be allocated among States based on each State's relative population of children from families with incomes below the poverty line, and an appropriate amount of funds will be made available for grants in Indian country.	Terry Lewis 202-205-8102
Independent Living Program	ACF/ACYF Children's Bureau/ Child Welfare Division	Title IV-E, SSA Act, Sections 470, 477	Formula Grant FY 1995: \$70,000,000(?)	Age: 16 or older Income: None Special: Foster Children	45,000	To assist foster children age 16 or older with the transition to independent living. Services include assistance with earning a high school diploma or obtaining vocational training and training in daily living skills such as budgeting, locating housing, career planning and job finding. Grants are awarded to States on the basis of their proportion of the national total of foster children that received maintenance payments under the IV-E Foster Care program in fiscal year 1984. In order to be awarded Federal funds over their share of \$45,000,000, States must match the additional Federal funds dollar for dollar.	Irene Hammond 202-205-8666

SUMMARY OF DHHS YOUTH-RELATED PROGRAMS

Program	OPDIV/ Admin Unit	Legislative Authority	Funding	Eligibility	Number of Youth Served Last Year	Purpose	Contact
Drug Education and Prevention for Runaway and Homeless Youth (DAPP)	ACF/ACYF Family and Youth Services Bureau	Anti-Drug Abuse Act of 1988, Section 3511	Competitive; Discretionary FY 1995: \$14,465,683	Age: Youth Income: None Special: The program targets runaway and homeless youth. Definitions from RHY Program and Transitional Living Program for Homeless Youth	Not Available	To prevent and reduce alcohol and other drug use by runaway and homeless youth. The program awards research, demonstration and service grants to public and private non-profit organizations. Priority is given to agencies which have experience serving the target population. Projects are designed to provide individual, family and group counseling; develop and support peer counseling programs and community education programs; provide assistance to runaway and homeless youth in rural areas; provide training and information on drug abuse to providers; support research on the effect of drug use by family members and any correlation between such use and suicide or attempted suicide; and, improve the availability and coordination of local service programs.	Terry Lewis 202-205-8102
Drug Education and Prevention Program Relating to Youth Gangs	ACF/ACYF Family and Youth Services Bureau	Anti-Drug Abuse Act of 1988, Section 3501	Competitive; Discretionary FY 1995: \$10,525,000	Age: None, most programs target youth between the ages of 10 and 16 Income: None Special: Youth involved or at risk of involvement in gangs	Not Available	To prevent and reduce participation in youth gangs and drug-related activities. Grants are awarded to national, State, and local public and non-profit private organizations. Grants are designed to (1) increase understanding of why youth become involved in gangs and of gang formation and dynamics, (2) demonstrate and assess effective measures for preventing further recruitment and involvement of at-risk youth in gangs and drug-related activities, and (3) develop successful and replicable model approaches that prevent involvement in gangs and illegal drug activities. In FY 1994, ACF launched a new Youth Initiative that builds on the existing youth gang prevention program. The agency awards 22 planning grants worth \$2 million to concentrate community resources on youth ages 9-12 that live in socially and economically isolated neighborhoods or target areas. Grantees are required to identify the developmental needs of youth, review existing services and strategies, and develop five-year action plans. Among other things, communities are expected to organize coalitions to combat youth violence and gang activity.	Terry Lewis 202-205-8102

SUMMARY OF DHHS YOUTH-RELATED PROGRAMS							
Program	OPDIV/ Admin Unit	Legislative Authority	Funding	Eligibility	Number of Youth Served Last Year	Purpose	Contact
Runaway and Homeless Youth Program	ACF/ACYF Family and Youth Services Bureau	Title II of JJDPA of 1974, RHY Act	Competitive; Discretionary FY 1995: \$40,457,964	Age: Under 18 Income: None Special: Runaway youth under 18 who are away from home at least 1 night without parental permission	Not Available	To support local centers that provide immediate, crisis intervention services to runaway and otherwise homeless youth and their families. The goal is to promote family reunification or other positive placement and provide ongoing support services to stabilize youth. Grants are used to develop or strengthen community-based centers which are outside the law enforcement, juvenile justice, child welfare, and mental health systems. Funds support up to 15 days of shelter. Funds are allocated among States based on each State's population under 18 years of age.	Terry Lewis 202-205-8102
Transitional Living Program	ACF/ACYF Family and Youth Services Bureau	Runaway and Homeless Youth Act, Part B; Title III of the Juvenile Justice and Delinquency Prevention Act	Competitive; Discretionary FY 1995: \$13,648,533	Age: 16-21 Income: None Special: Homeless youth are defined by the Act as "any individual who is not less than 16 years of age and not more than 21 years of age for whom it is not possible to live in a safe environment with a relative and who has no other safe alternative living arrangement."	200,000	To address the shelter and service needs of homeless youth. The program is designed to meet the more complex, long-term needs of homeless youth ages 16-21. Grants are used to (1) develop/strengthen community-based programs which assist homeless youth in making a smooth transition to productive adulthood and self-sufficiency; and (2) provide technical assistance to transitional living programs. A homeless youth is eligible to receive shelter and services for up to 540 days (18 months). Services include: information and counseling in basic life skills, interpersonal skill building, educational advancement, job attainment, and mental and physical health care.	Terry Lewis 202-205-8102
National Youth Sports Program Fund (NYSPE)	ACF/OCS	Section 681 of the Community Services Block Grant Act, as amended	Discretionary FY 1995: \$12,000,000	Age: 10-16 Income: Low Income Special: None	(70,000)	To motivate disadvantaged youth living in areas of urban and rural poverty to earn and learn self-respect through sports instruction and competition. Youth are provided with information relating to career and educational opportunities, personal health, drug and alcohol abuse education, nutrition, free medical examinations and meals. Funding is provided through a competitive application process. The grant must be administered on a national or regional basis on the campus of a college or university.	Veronica Terrell 202-401-5295

Grants to States for Medical Assistance Programs - Medicaid	HCFA/Medicaid Bureau	Title XIX of the Social Security Act; SSA amendments of 1965 (P.L. 89-97) and subsequent amendments	Entitlement - Federal and State spending	The Medicaid program pays for medical services on behalf of certain groups of low-income persons. States have broad discretion in determining eligibility. The specific eligibility rules that apply to children and youth are described below. Age: States are required to provide eligibility to children under age six whose family income does not exceed 133% of the federal poverty line and under age 19 born after 9/30/83 whose family income does not exceed 100% of the federal poverty line. States have many options to cover children under age 21 or subgroups of these children. Income: Income standards vary by eligibility group. In addition to the income levels listed above, states may use cash assistance programs' resource tests to determine eligibility. Special: States are required to provide eligibility to recipients of cash assistance (eg., SSI, AFDC, IV-E Foster Care), certain pregnant women, certain Medicare beneficiaries; States have the option of providing eligibility to persons deemed "medically needy"	2.7 million	To enable each State to furnish medical assistance on behalf of pregnant women, children, families with dependent children and aged, blind or disabled individuals whose income and resources are insufficient to meet the costs of necessary medical, rehabilitation and other remedial services. For Medicaid-eligible individuals under age 21, States provide Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services -- a preventive and comprehensive health program. Required EPSDT services include screening services, which consist of comprehensive health and developmental history, comprehensive unclothed physical examination, appropriate immunizations, laboratory tests and health education/guidance, vision, dental and hearing services (including eyeglasses and hearing aids); and other medically necessary health care diagnosis and treatment, whether covered by States Medicaid plan or not. Administration for Children and Families

The Administration for Children and Families (ACF) Office of Planning, Research and Evaluation (OPRE) funds several research, evaluation and demonstration projects. We received an extensive description of the following:

Research and Evaluation

Teen Parent Demonstration Evaluation From 1986-1991, ACF funded the operation of the Teen Parent Demonstration, a large-scale education-training-employment demonstration initiative for teenage parents on welfare, in two state welfare agencies, Illinois and New Jersey. ACF and ASPE are currently funding a five-year follow-up.

New Mothers' Study Since FY 1988, ACF/OPRE has jointly funded with other government agencies and with private foundations of the research and analysis of the nurse home visitor project in Memphis, Tennessee. Through the New Mothers' Study, first-time pregnant, low-income women were randomly assigned to treatment streams, one of which included weekly home visits by a nurse throughout the period of pregnancy and the next two years following delivery. Approximately 65 percent of the research sample were 18 or younger at enrollment.

Evaluation of the Home Visiting Services Demonstration ACF/OPRE committed FY 1995 funds to enhance the evaluation of the Home Visiting Services Demonstration targeted to teenage parents receiving AFDC. Under the demonstration, which is funded by ACF, state and local welfare agencies are responsible for identifying first-time teenage parents coming onto welfare. This is being done jointly with the Henry J. Kaiser Family Foundation.

Demonstrations

Comprehensive Services for Teenage Parents on Welfare Beginning in FY 1992, 15 demonstration sites in 14 states were approved for a 24 month period. The goal of this activity was to support the development of programs which provide comprehensive services to meet the personal, physical and social needs of teenage parents on welfare as well as aid the cognitive, physical and emotional development of their children in conjunction with mandatory participation requirements for JOBS activities (i.e., education and employment-related activities).

Home Visiting Services Demonstration In FY 1994 ACF awarded five grants to support a 17-month Feasibility Phase of the demonstration. In FY 1995, ACF selected three of the five sites to continue for an additional two year period of full operations. Under the demonstration first-time teenage parents on welfare are being randomly assigned to one of three groups, a control group which receives the services normally provided through the welfare system and two experimental groups: one in which the teenage parents receive JOBS/employment-related services and weekly home visits by a paraprofessional through the welfare agency and another in which the demonstration activities are provided by a community-based organization under contract to the welfare agency. ACF expects to continue the Home Visiting Services Demonstration grants for an additional 12-month period, through November 1997.

Dissemination of Information

ACF has issued fact sheets and press releases to inform the public about the findings from the Teen Parent Demonstration evaluation (based on two year follow-up period). In addition, press releases have been issued to inform the public regarding the award of funds for new demonstration projects.

ACF/OPRE has sponsored conferences bringing together demonstration project managers and staff to share information across experiences and with ACF and to facilitate dissemination of related research findings to enhance demonstration design and implementation in the local site.

The Office of Community Services funds the Demonstration Partnership Program which authorizes grants to Community Action Agencies and other Community Services Block Grant Eligible Entities for the Development and implementation of new and innovative approaches to increasing the self sufficiency of the poor. This office submitted summaries of all grants from 1989-1994 and highlighted those related to teenage pregnancy. While their sole purpose is not to prevent teenage pregnancy, there have been approximately 20 grants awarded related to youth-at-risk that could include the issue.

The Administration for Children, Youth and Families funds a variety of programs for youth (see attached draft matrix). We will be receiving information on their research and evaluation findings.

Health Care Financing Administration/Medicaid Bureau

In general, adolescents enrolled in Medicaid are entitled to a comprehensive range of preventive, primary, and specialty services encompassed with the Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) program. EPSDT is a comprehensive health program for Medicaid eligible individuals under age 21.

The Medicaid Bureau has information on how much it spends on family planning services for those aged 20 or younger.

Together with the Health Resources and Services Administration/Maternal and Child Health Bureau the Medicaid Bureau conducted the Bright Futures project which included guidelines for children's health services. The report included adolescent pregnancy prevention.

Medicaid operates as a joint Federal-State program. Each state, using Federal and state funds can develop its own teenage pregnancy prevention initiatives and ways to improve teenage pregnancy outcomes. In addition, several states have been granted waivers for demonstrations to expand family planning services for up to five years for women following a birth. These efforts are being evaluated.

Public Health Service Agencies

Included below is summary information on teenage pregnancy prevention activities from the **Indian Health Service, Health Resources and Services Administration, Office of Population Affairs, National Institutes of Health, Substance Abuse and Mental Health Services Administration, and the Centers for Disease Control and Prevention.**

Indian Health Service

The Indian Health Service (IHS) has had a limited role in its ability to be proactive on teenage pregnancy prevention and related issues given the nature of the relationship between the federal government and the sovereign American Indian and Alaska Native (AI/AN) nations. Despite high teenage pregnancy rates many AI/AN nations have not identified this as a high public health priority.

IHS **research and evaluation** has focused on broader contributing issues to teenage pregnancy prevention which includes child abuse and neglect, family violence, teenage behavior patterns (risk factors) and Teen Clinic projects. There does not appear to have been an enhanced interest or focus on teenage pregnancy prevention within IHS during this Administration.

IHS **disseminates information** in a variety of ways including: IHS Primary Care Provider Newsletter, Community Health Representative program, IHS AIDS program, IHS Public Housing program, Teen Health Clinics, and IHS Health Education program which functions as a clearinghouse of information.

IHS has recently only minimally participated in two **local demonstrations** which have addressed teenage pregnancy.

Health Resources and Services Administration

Two Bureaus within the Health Resources and Services Administration (HRSA) address teenage pregnancy prevention. HRSA provided information from the Maternal and Child Health Bureau (MCHB) and the Bureau of Primary Health Care (BPHC) on research projects, dissemination of information, and demonstration projects. Some of the activities listed below are jointly funded by the two Bureaus.

Since FY 1992 MCHB funded 10 **research** projects which address teenage pregnancy related issues. Some are training projects which include a research component. MCHB **disseminates information** through a variety of mechanisms including: six databases, many publications, the National Maternal and Child Health Clearinghouse, National Resource Centers on Adolescent Health, conferences and meetings, and electronic media. Since FY 1992 MCHB has funded 59 **demonstration projects** related to teenage pregnancy prevention.

The BPHC **disseminates information** through publications, technical assistance, and associations. The Healthy Schools, Health Communities is the only **local demonstration** BPHC

is currently funding which addresses teenage pregnancy prevention. This demonstration funds school-based health centers.

Office of Population Affairs

The **Title XX Adolescent Family Life (AFL)** Program, administered by the Office of Population Affairs, supports **research** grants that encourage all applicable scholarly approaches to the study of adolescent family life. Grant awards are made to investigate six areas: 1) influences on adolescent premarital sexual behavior; 2) consequences of adolescent premarital sexual behavior; 3) consequences of adolescent premarital pregnancy; 4) the adoption option for the unmarried adolescent mother; 5) parenting by the unmarried adolescent mother; and 6) adolescent pregnancy services. Awards are for three years and direct costs do not exceed \$100,000. Deadlines for AFL research grants are October 1, February 1, and June 1 of each year. The AFL research grant program was enacted in 1982 and has provided funding for approximately 58 projects related to adolescent health and other youth related issues. In FY 1993 AFL funded four projects.

The **Title X Family Planning Program**, administered by the Office of Population Affairs, supports **research** grants for topics about which greater knowledge is needed as a basis for improving the delivery of family planning services in the United States. Service delivery improvement research projects with a focus on adolescents are invited in ten topical areas: 1) Family planning client behavior; 2) adolescent family planning clients; 3) male family planning clients; 4) targeting of family planning services; 5) clinic personnel behavior; 6) organization and management of family planning services; 7) role of private physician; 8) natural family planning; 9) infertility services; and 10) counseling services. Deadlines for family planning research grants are October 1, February 1, and June 1 of each year. The Family Planning research grant program was enacted in 1970 and has provided funding for more than 30 service delivery improvement projects. In FY 1993 the Family Planning program funded three projects.

The Office of Population Affairs supports a clearinghouse which develops and **disseminates educational and informational material** on adolescent pregnancy prevention, as well as general reproductive health and family planning issues.

The Title XX Adolescent Family Life (AFL) program, administered by the Office of Population Affairs, supports **demonstration projects**: 1) to develop and implement programs designed to prevent adolescent pregnancy and 2) to develop and implement new approaches in the delivery of health, social and educational services to pregnant and parenting adolescents, their infants and their families. The AFL program was enacted in 1981 and has since provided funding support to nearly 200 demonstration projects. In FY 1992 AFL supported 31 local demonstrations.

National Institutes of Health

The National Institute of Child Health and Human Development (NICHD) at the National Institutes of Health (NIH) has primary responsibility for research on adolescent sexual behavior and pregnancy-related issues. From FY 1992 to FY 1995 NICHD funded 24 research projects

including both new and continued projects. NICHD also provided a listing of more than 100 research projects funded since FY 1992 by other institutes at NIH on teenage fertility research.

Substance Abuse and Mental Health Services Administration

The Substance Abuse and Mental Health Services Administration (SAMHSA) is primarily focused on the prevention and/or treatment of substance abuse or mental health problems as opposed to reduction of teenage pregnancy prevention. However, these issues are closely related. SAMHSA operates through three Centers: Center for Mental Health Services, Center for Substance Abuse Prevention, and Center for Substance Abuse Treatment. SAMHSA provided information from each Center on the many relevant research and evaluation and demonstration projects currently underway. SAMHSA disseminates information through a variety of mechanisms including: clearinghouses, resource centers, electronic media, publications and public information/education campaigns.

Centers for Disease Control and Prevention

The Centers for Disease Control and Prevention (CDC) provided information on teenage pregnancy prevention activities in several areas: (1) HIV prevention activities related to high-risk sexual behaviors among youth, school health education, (2) STD prevention programs focusing on youth risk behaviors, and (3) teenage pregnancy prevention.

In the area of HIV prevention activities related to high-risk sexual behaviors among youth CDC conducts research and evaluations.

In the area of school health education CDC began in 1994 to conduct evaluations with state and local education agencies on school-based programs designed to reduce sexual risk behaviors that result in teenage pregnancy, HIV, and other sexually transmitted diseases (STDs). These evaluations will continue through FY 1996. Another project in this area was initiated in 1993 and is aimed at examining existing intervention research and to provide qualitative and quantitative analyses on a variety of teenage pregnancy prevention related topics. A variety of mechanisms are used to disseminate information in this area, such as: Research to Classroom project, conferences, newsletters and electronic media.

In the area of STD prevention programs focusing on youth risk behaviors CDC conducts research and evaluation on a variety of related topics. Information is disseminated through program announcements, conferences and meetings, professional journals, and other publications. In this area CDC has conducted many local demonstration projects.

In the area of teenage pregnancy prevention CDC disseminates information through the Morbidity and Mortality Weekly Report (MMWR), other journals, newsletters and reports, and technical assistance. CDC is currently supporting a local teenage pregnancy prevention demonstration known as the Community Coalition Partnership Program for the Prevention of Teenage Pregnancy. Thirteen coalitions were funded in FY 1994.

THE WHITE HOUSE

WASHINGTON

December 7, 1995

MEMORANDUM FOR DISTRIBUTION

FROM: Debbie Fine

SUBJECT: Template and Follow-Up Information for Teen Pregnancy Report

Following up on our meeting last Wednesday, this memo provides templates and additional information to help guide you as you put together descriptions of federal government or federally-supported initiatives in your departments or agencies that work towards learning more about teen pregnancy, reducing the high rate of teen pregnancy, or educating others about this issue. As discussed, this is often in the context of a comprehensive approach to youth and youth at-risk.

OVERVIEW

The purpose of the document we are working on is to outline the federal government's current role in teen pregnancy prevention. The audiences we are striving to reach include: community members and state and local officials who want to access resources for projects or who would like to learn more about projects piloted in other communities, and private sector organizers at the national level who are looking at how to effectively target their efforts. As we discussed, this will also be a helpful guide for people in the government.

The document will likely be presented in a couple of different sections which would:

1. Give an overview of significant government programs indirectly linked to teen pregnancy prevention, such as Medicaid. Descriptions will be broad and would not identify how these funds are used and by whom in each of the 50 states.
2. Outline information about government funding or grants available in FY 96 or on an ongoing basis for research and demonstration projects;
3. Detail clearinghouses or resources for information that are available throughout the government; and
4. Catalogue: (a) reports currently available, and (b) government-funded programs funded prior to FY 96 for which funding is not currently available, but that continue to be relevant or significant. Examples of this would be: (a) "Beginning Too Soon: Adolescent Sexual Behavior, Pregnancy and Parenthood," a comprehensive report that is described in the summary document we have put together on the Clinton Record; and (b) the Teen Parent Demonstration, which is also described in the Clinton Record.

As in the last document, please indicate if there are specific programs that were started by this Administration, or implemented or expanded in a significantly different way from previous Administrations. Furthermore, please try to describe how the initiatives you are presenting are linked with teen pregnancy prevention efforts.

NOTE: If information about upcoming grants or projects in 1996 does not fit into the templates, please give me a separate document on those. Regardless of whether or not it is included in this report, it is helpful for us for planning purposes.

Attached are the templates. Just a reminder that I will need this information on disk in Word Perfect 5.2. (If that is a problem, please let me know.) I will look forward to receiving these summaries on January 5th. Also attached is the first memo from Carol Rasco to the Assistant Secretaries for those of you who never received it.

I apologize for the delay on this, which was due to ongoing internal discussions here. Thanks so much for your help. Please feel free to call me with questions at 456-5572.

TEMPLATE CATEGORIES

1. Information on Programs

Name of Program:

Objective: (include whether program funds service delivery, research, evaluation, demonstration, technical assistance, etc. and describe target population)

Types of Activities Funded: (e.g. education, counseling, or research)

Name of funding Department and Organizational Unit:

Funding Flow and Eligible Grantees: (e.g. Federal funds distributed to state agency/department or local agency/organization including non-profit and academic institutions)

Funding Cycle/When are Funds Available: (e.g. annually, every 3 years, no set cycle, as available)

Funds Available in 96:

Typical number and average amount of grants:

Information Contact: (At the level a potential grantee would call--e.g. DHHS/ Family and Youth Services Bureau or Your State Department of Education. NOTE: Do not include specific individuals names -- these change too quickly.)

2. Information on Clearinghouses

Name of Clearinghouse:

Funding Department, Agency and Program:

Target Population:

Specific Types of Information Available on Adolescent Pregnancy:

Other Areas of Information Available:

Phone Number/Address and Hours of Operation:

3. Information on Reports and Significant Programs For Which Funds Are Not Available
(Section 4)

Name of Report or Program:

Years Funded: (when started, when completed)

Objective: (include whether program funded service delivery, research, evaluation, demonstration, technical assistance, etc. and describe population targeted)

Types of Activities Funded: (e.g. education, counseling, or research)

Name of funding Department and Organizational Unit:

Funding Flow and Eligible Grantees: (e.g. Federal funds distributed to state agency/department or local agency/organization including non-profit and academic institutions)

Grants Awarded: (Number and amount of grants awarded)

Significant Results/Findings/ or Lessons: (Include notable specific demonstrations/research projects funded in the past and significant findings. Please be expansive in your explanation for the importance of these projects.)
