Clinton Presidential Records Digital Records Marker

This is not a presidential record. This is used as an administrative marker by the William J. Clinton Presidential Library Staff.

This marker identifies the place of a publication.

Publications have not been scanned in their entirety for the purpose of digitization. To see the full publication please search online or visit the Clinton Presidential Library's Research Room.

A Startling Look at the Effects of
Electromagnetic Radiation on Your Health

GROSS CURRENTS

The Perils of Electropollution

The Promise of Electromedicine

ROBERT O. BECKER, M.D.

author of The Body Electric

"A brilliant exploration of electromagnetic fields and life by a pioneering scientist."

Paul Brodeur, author of

Currents of Death and *The Zapping of America*

Cross Currents describes the meeting of two opposing trends: the rapid rise of electromedicine, which promises to unlock the secrets of healing, and the parallel rise of electropollution, which poses a serious environmental danger.

In this groundbreaking book, Robert Becker, M.D., explains how new and nontraditional healing techniques such as acupuncture, homeopathy, visualization, hypnosis, and electrotherapy work through an invisible common source — the body's electrical system. But at the same time that exciting insights into how to use the body's inherent healing abilities are gained, electromagnetic fields radiating from powerlines, radar, microwave ovens, VDTs, satellites, radios, and even electric blankets are attacking our bodies' resources. Researchers are finding that this radiation correlates with increases in cancer, birth defects, depression, learning disabilities, Chronic Fatigue Syndrome, Alzheimer's disease, AIDS, and Sudden Infant Death Syndrome.

"A fascinating, thoughtful, and accessible account of the emerging field of electromedicine. A timely and eloquent warning on the hazards of electronic pollution."

Jeremy Rifkin, author of

Entropy: Into the Greenhouse World

Cross Currents offers practical ways to protect ourselves in our homes and offices from the hazardous effects of electromagnetic pollution, and teaches us how to engage the healing energies of electromagnetism. Dr. Becker's powerful synthesis reshapes the future of medicine by putting life energy back into our medical perspective and by enabling us to see the body in the context of its total living environment — the earth's electromagnetic field.

"The single best guide on electrobiology now available."

Louis Slesin, editor of

Microwave News

ROBERT O. BECKER, M.D. is a pioneering researcher and leading expert in the field of biological electricity and regeneration. Twice nominated for the Nobel Prize, he is an orthopedic surgeon and is a full professor at the State University of New York, Upstate Medical Center, and Louisiana State University Medical Center in Shreveport. He is the author of *The Body Electric*.
