WHAT THE CLASS-SIZE REDUCTION PROGRAM IS DOING IN URBAN SCHOOLS

School districts across the nation received a total of \$1.2 billion for the first year of the Class-Size Reduction program, \$281 million of which was allocated to 54 Great City School districts—the largest and neediest urban schools in the nation. Forty (40) urban districts responded to this survey, where federal support was used to hire 3,558 new teachers, whose total salary and benefits equaled almost \$168 million. The Class-Size Reduction program provided 1,074 new first grade teachers in urban schools, as well as 431 new second grade teachers, 465 new third grade teachers, and 481 new teachers in other grades.¹ The new teachers were hired to serve students in urban education's areas of greatest need, including literacy, mathematics, bilingual education and special education.

Figure 1
Total Number of New Teachers, Salaries and Benefits Provided with
Federal Class Size Reduction Funds, by Grade in Urban Schools

	Grade One	Grade Two	Grade Three	Other	Total *
Teachers	1,074	431	465	481	3,558
Salary and Benefits	\$45,004,094	\$17,859,159	\$20,366,595	\$17,451,294	\$167,788,761

*Individual grades do not sum to total since some districts were unable to provide a per-grade breakdown

Current teachers are also benefiting from the Class-Size Reduction program, with over \$10.2 million in new professional development services to 14,953 existing urban instructors. These teachers have received training to improve their current instructional practices, learn new technologies and information systems, and serve as mentors for new educators entering their schools. Ten school districts use the federal funds exclusively for the salaries and benefits of new teachers, using state and local funds for professional development and recruitment, showing a comprehensive and coordinated effort to provide more instructors in the early grades.

New Teachers

Of the 3,558 new urban teachers hired under the Class-Size Reduction program, only three districts employed instructors with emergency credentials, a total of only 404 teachers (11.4%). The remaining 3,154 new teachers, almost 90% of the total, have full certification. Cities were also able to combine federal resources with state aid. New York City, for instance, was able to supplement its state initiative by partially funding 788 teachers with federal money, bringing the number of classrooms affected by the program to well over 4,000.

In addition, some 7,700 new urban teachers are receiving professional development with

1. Since some respondents were only able to provide the total number of new teachers, and not a per-grade breakdown of new hires, individual grades do not sum to total.

Class-Size Reduction money. Almost \$7.9 million are being spent training 2,075 new first grade teachers, 1,276 second grade teachers, 1,133 third grade teachers, and 1,485 new teachers from other grades.²

Figure 2
Number of Teachers Receiving Professional Development with
Federal Class Size Reduction Funds, by Grade in Urban Schools

	Grade One	Grade Two	Grade Three	Other	Total *
New Teachers	2,075	1,276	1,133	1,485	7,762
Current Teachers	3,696	1,922	3,169	5,562	14,953

*Individual grades do not sum to total since some districts were unable to provide a per-grade breakdown

Current Teachers

The Class-Size Reduction program also assists existing educators, providing in-service training to 14,953 teachers already in the classroom. Over \$10.2 million in federal CSR funds have been spent in urban schools improving the instructional practices of 3,696 first grade teachers, 1,922 second grade teachers, 3,169 third grade teachers, and 5,562 teachers from other grades.² In all, almost \$32 million of first-year Class-Size Reduction funds have been used to provide professional development to 22,255 new and current teachers in the nation's urban schools.³

Figure 3
Usage of Federal Class Size Reduction Funds, by Percentage of Urban Districts

2. Since some respondents were only able to provide the total number of new teachers or current teachers receiving professional development, and not a per-grade breakdown, individual grades do not sum to total.

3. Certain districts were only able to provide the total amount of federal funds spent on professional development, and not the amount spent exclusively for new or current teachers. The amount spent on professional development for new teachers (approximately \$7.9 million) and the amount spent on current teachers (approximately \$10.2 million) do not sum to the actual total amount spent on all professional development (approximately \$32 million).

Internal Fact Sheet/Talking Points
The Council of the Great City Schools
Reducing Class Size in America's Urban Schools
October 31, 1999

BACKGROUND

The Council of the Great City Schools is an organization of the nation's largest urban public school systems, governed by superintendents and board of education members from 58 cities across the country.

***Reducing Class Size in America's Urban Schools* provides findings based on survey of the Council's members about what the class-size reduction program is doing in urban schools. 40 school districts responded to the Council's survey and this report describes the results.** The report provides no information on what is happening with the rest of the \$1.2 billion allocated for class-size reduction throughout the country.

PREVIOUS RESEARCH ON CLASS SIZE

The report highlights the growing body of research finding that smaller classes yield increased student performance, especially for poor kids. Specifically, the report points to:

- Project STAR in Tennessee which found that the greatest benefits of smaller classes were found in inner-city schools with the poorest students and that benefits from smaller classes lasted well after the program ended in 3rd grade. The STAR experiment randomly assigned students in classes of different sizes.
- The California Class Size Reduction program, which mandated reductions to 20 students per class in grades 1 and 2. Studies found across-the-board gains in the 3rd grade (only grade where CSR students and non-CSR students could be compared) and higher satisfaction among parents of CSR students.
- The SAGE program in Wisconsin, a quasi-experimental program which reduced some classes in K-3 for high-poverty students to 15 students. Results from the 1997-98 school year show 1st and 2nd graders in smaller classes outperforming their peers in larger classes in math, reading and language arts tests. Findings also show that African-Americans in smaller classes outperformed African-Americans in larger classes.
- The studies provide support for the contention that smaller classes lead to higher achievement by offering the following advantages:
 - students have more time with their teachers
 - allows children with learning challenges and individual needs more personalized attention.
 - Teachers spend less time on management and discipline and more time on planning and personalized attention for students.

REPORT FINDINGS

The Council for Great City Schools reports that urban school districts have found the President's Class Size initiative to be flexible enough to allow urban districts to meet their unique needs and challenges, and focused enough to ensure class size is reduced. In the first year of the program, the Council reports that funds have been used in a variety of ways:

- 3,558 teachers have been hired in 40 of the nation's largest urban school districts to reduce class sizes in the early grades.
- Teachers hired are serving in areas of highest need, including literacy, mathematics, bilingual and special education.
- Over 22,000 teachers have also received high-quality training to support class-size reduction. Urban schools have provided new and current teachers with training on instructional practices and technology and mentors for support.
- Funds have also been used to recruit, train and support new hires. Activities in urban areas have also included advertising and travel for hiring purposes; hiring packages including bonuses, moving expenses and college tuition; the creation of staff recruitment positions; and induction programs.

LOCAL EFFORTS WITH CLASS SIZE MONEY

Funds have been used in a variety of ways. Most districts have used federal dollars to reduce class size in grades 1-3 and provide professional development opportunities to support both class size reduction and literacy strategies in those grades. For example:

- **In New York City**, federal funds have helped to hire and train over 1,500 new teachers. If the program is fully funded by Congress, New York City expects to reduce class size for 90,000 students—over 25% of the K-3 student population. The City was also granted a waiver to use funds in kindergarten.
- **Atlanta** has hired 58 new teachers in 41 low-performing schools in high-poverty areas. The funds also help implement the “Success for All” program.
- **Broward County (FL)** has hired teachers to reduce classes in schools based on their performance poorly on state achievement tests and their actual class sizes.
- **New Orleans** has hired 100 teachers for 26 schools—most of which required Title I improvement plans. Federal funds help provide professional training and mentor support for these new teachers.
- **Oklahoma City** has focused their funds on hiring teachers for grades 1-3 in low-performing and/or high-poverty schools.

Innovative Strategies. In addition, a number of districts have employed a variety of innovative strategies (some with, some without waivers from the Department of Education) for reducing class size and enhancing teacher quality. These strategies include:

- **Des Moines** is using federal funds to increase all-day kindergarten classes from 27 to 49 across the city.
- **Long Beach (CA)** district is creating internships to prepare teachers hired with emergency permits to obtain state certification. Candidates who finish with a “B” average or better are reimbursed for tuition, textbooks and fees.
- **Philadelphia** is dealing with classroom shortages and difficulty hiring qualified teachers by hiring and rigorously training recent college graduates as “literacy interns” to work with certified teachers and their students in the early grades.

- **Denver** has initiated a Lead Teacher Project which trains teachers who work half the day with children in intensive reading programs and half the day working with new and current teachers on staff development, planning and instructional practices that bolster academic achievement.

BUDGET/FINANCIAL ISSUES

The Class Size reduction program directed \$281 million to urban school districts. The 40 schools responding to the survey received over \$220 million for class size reduction.

The majority of the funds were spent on salaries and benefits (\$168 million) and professional development (\$32 million). Funds were also spent on recruiting and testing.

The report does not detail over nearly \$15 million in expenditures. That level of expenditure represents 6.7% of the total. School districts can only use 3 percent of the money for administrative expenses. The gap is accounted for by CGCS not itemizing certain smaller expenditures.

Salary and benefits per teacher in the 40 urban district respondents is \$47,218. This is likely one reason why the survey results do not jibe with the Department of Education's projected number for teacher hires (Ed's figure being higher). Salaries and benefits in these districts are much higher than the national averages for these expenses.

The 40 districts spent \$1,400 per teacher on professional development.

The lionshare of the recruiting expenses were for advertising and travel. Roughly \$800,000 being spent by 4 districts on hiring bonuses and other hiring packages.

October 29, 1999

STATEMENT ON COUNCIL OF GREAT CITY SCHOOLS' CLASS SIZE REPORT

DATE: October 31, 1999
LOCATION: Behind the Oval Office
BRIEFING TIME: 4:00pm – 4:10pm
EVENT TIME: 4:15pm – 4:25pm
FROM: Bruce Reed

I. PURPOSE

To release a new report by the Council of the Great City Schools on the benefits of smaller classes, and to urge Congress to fund your class size initiative.

II. BACKGROUND

Today you will release a new report by the Council of the Great City Schools on the benefits of smaller classes for students. The report demonstrates that your class size reduction initiative is helping schools across the nation improve student learning by enabling them to hire additional highly qualified teachers in the early grades, where students learn to read and master the basics. Urban districts report that your initiative is flexible enough to allow them to meet their unique needs but focused enough to ensure smaller classes in the early grades. Today you will call on Congress not to renege on the bipartisan commitment made last year to fund this important initiative.

RAISING STUDENT ACHIEVEMENT BY REDUCING CLASS SIZES IN THE EARLY GRADES. Last year, Congress made a down payment of \$1.2 billion toward your goal of hiring 100,000 new teachers to bring class sizes in the early grades to a national average of 18. The first teachers hired with that down payment began teaching in classrooms nationwide this fall. Today, you will call on Congress to keep its commitment and finish the job. Unfortunately, Republicans have passed an appropriations bill that eliminates the class size initiative and fails to guarantee that a single cent will be used to hire a single teacher to reduce the size of a single class. Research has shown that class size reduction in the early grades is one of the most direct and effective ways to boost children's academic achievement.

EDUCATION LEADERS EMPHASIZE THE IMPORTANCE OF THE PRESIDENT'S PLAN. In the report to be released today, the Council of the Great City Schools finds

that there is strong demand for the dedicated resources provided by your class size reduction initiative -- and that these resources are making a tangible difference. The Council is an organization of the nation's largest urban public school systems, working to improve K-12 education in the inner city, and governed by superintendents and education board members from 58 cities across the country. You have worked closely with this group and many others at the local level to fight irresponsible cuts in key investments for our children's future. Among the findings of the Council's report:

- Teachers hired under the class size reduction program are working in areas of highest need, including literacy, mathematics, bilingual and special education.
- Teacher quality is being enhanced through this program. Over 22,000 urban teachers are receiving high-quality training, and urban schools have been able to provide new and current teachers with critical training on instructional practices and technology.
- In just the first year of your class size initiative, 3,558 teachers have been hired in 40 of the nation's largest urban school districts to reduce class sizes in the early grades.

REPUBLICAN EDUCATION BILL IGNORES THE VOICES OF TEACHERS AND COMMUNITIES. Making targeted investments in class size reduction is a common-sense strategy that teachers and school leaders across the country support. And yet, as you will point out today, Republicans in Congress are undermining such investments by breaking their pledge to dedicate funds for smaller classes and by shortchanging other key programs. The Republican education spending bill:

- Abandons the bipartisan commitment to fund your class size reduction initiative, and provides no guarantee that the teachers hired for this year can continue teaching.
- Fails to hold schools accountable for results by providing no funds to turn around failing schools;
- Underfunds after-school and summer programs, denying as many as 800,000 students access to a safe place to learn during after-school hours when most juvenile crime and drug and alcohol abuse occur;
- Shortchanges teacher quality and recruitment, and eliminates the Troops to Teachers program that enables retired military personnel to teach in high-need areas;
- Underinvests in educational technology and the GEAR-UP program, denying more than 130,000 disadvantaged young people the help they need to get into college
- Fails to fund your plan to build or modernize 6,000 schools across the country.

III. PARTICIPANTS

Briefing Participants:

Loretta Ucelli

Andy Rotherham

Paul Glastris

Statement Participants:

YOU

Mike Casserly, Executive Director, Council of the Great City Schools

IV. PRESS PLAN

Open Press.

V. SEQUENCE OF EVENTS

- YOU will greet Mike Casserly in the Oval Office, and proceed to the podium on the driveway outside the Oval Office.
- YOU will make a statement and depart.

VI. REMARKS

To be provided by speechwriting.

Draft 10/31/99 3:30 p.m.
Glastris/Halperin

PRESIDENT WILLIAM J. CLINTON

DEPARTURE REMARKS

THE WHITE HOUSE

WASHINGTON, DC

October 32, 1999

First of all, let me repeat what I said earlier today, that I am deeply saddened to learn of the disappearance of Egyptair Flight 990 early this morning off the coast of Massachusetts. Although we know that there has been a loss of life, the Coast Guard, supported by the Navy, is conducting extensive search and rescue operations in the area. That effort will continue for as long as necessary.

We are also working with Egyptian authorities, and earlier I spoke with President Mubarak of Egypt to express my condolences. We do not know what caused this tragedy. But we will devote every necessary resource so that we understand exactly what happened.

At this moment, our thoughts and prayers are with the families of the passengers and the crew of Flight 990.

In a few minutes, I will be leaving for Norway, where leaders will gather to honor the memory of one of this century's greatest heroes: Israeli Prime Minister Yitzhak Rabin. We will honor him not only by remembering his life, but by pursuing his vision of a peaceful Middle East. I will meet with Prime Minister Barak and Chairman Arafat, who are moving forward on an ambitious agenda to reach a just and lasting peace. There are tremendous challenges ahead, and I will do everything I can to help, because peace in the Middle East is strongly in the interests of the American people.

But before I leave, I also want to say a few words about the budget debate here in Washington, and how that debate may effect another matter of great interest to the American people: the education of our children.

This is now the seventh budget season I have been through as President. Each and every time, Vice President Gore and I have insisted that Congress produce budgets that live within our means while living up to the values of the American people. There is no greater value than education, especially in an information-age economy. So, even as we've reduced the size of government, turned budget deficits into surpluses, and sparked an economic expansion that this February will be the longest in history, we have also nearly doubled our investment in education and training.

Last fall, we took another important step. We reached an agreement with Congress to help states and school districts begin hiring 100,000 new, high-quality teachers to reduce class sizes in the early grades. The need was obvious. School enrollments are exploding. Record numbers of teachers are or will soon be retiring. And the research is clear that students learn more in smaller classes with quality teachers.

Today, we've learned about a new report indicating that our class reduction initiative is producing results. Moments ago, I was briefed by Mike Casserly, Executive Director of the Council of the Great City Schools, on the Council's just-completed survey of 40 of the nation's largest school districts.

The survey shows that our class size reduction initiative has so far done precisely what we said it would do: it has put more teachers in the classroom, and increased training for those already there, with a minimum of red tape and bureaucracy. The report also shows that these school districts have not only hired over 3500 well-trained teachers, but that they have hired them for hard-to-fill positions that have the greatest impact, including teaching reading, math, and special education.

I am not surprised by these results. Every time I have visited a school in recent months, teachers, principals, parents, and administrators have raved about our class size reduction initiative. This report confirms that our targeted effort to hire more teachers is what local schools need and want.

Congressional Republicans agreed to support this effort last fall. In fact, they went home and campaigned on it, and ran ads touting it as their idea.

Now, suddenly, the Republican majority has changed its mind, and this week Congress will consider a Labor and Education Budget Bill that doesn't commit to hiring 100,000 new quality teachers. Nor does it put a dime into our effort to demand accountability for results by helping states and school districts turn around or shut down their lowest-performing schools. And it makes mindless across-the-board cuts in everything from education to health and safety. If that bill passes, I will veto it.

I do not believe that the proper response to America's education challenge is fewer teachers, no accountability and across-the-board cuts in education.

I want to hire 100,000 more teachers, and 50,000 more police. I want to protect the environment, and invest in education strategies that work.

I think America's local schools want the same thing. This report shows that. So I ask Congress to put partisanship aside and work with me to make this a season of progress. Let's pass a budget that honors our values by investing in education strategies that work.

Thank you.

Reducing Class Size in America's Urban Schools

By the
Council of the Great City Schools

October, 1999

REPORT PREPARED BY

**MANISH NAIK
LEGISLATIVE AND RESEARCH SPECIALIST
COUNCIL OF THE GREAT CITY SCHOOLS**

EXECUTIVE SUMMARY

The Council of the Great City Schools, a coalition of the nation's largest urban public school systems, surveyed its membership to determine how they were using new federal funds that became available this school year to reduce class sizes. Some forty major city school systems with the nation's largest class sizes responded. Responses from the school systems indicated the following:

- Approximately 3,558 new teachers have been hired in 40 of the nation's largest school districts this fiscal year with new federal class size funding;
- Some 7,762 new teachers received professional development with new federal class size funding, as have 14,953 current teachers— or over 22,000 teachers receiving critical training on instructional practices and methods;
- About 90% of the new teachers hired in the 40 responding urban school districts were fully-certified despite the difficulty in finding qualified teachers;
- All 40 urban school districts responding to the survey (100%) hired new teachers with the federal class size funding; 75% provided professional development to new and current teachers to enhance teacher quality; 33% of the urban districts used funding for recruiting new teachers; and 10% used the federal funds to test new teachers to ensure that they met state standards;
- New urban teachers were hired for grades 1-3 in the critical shortage areas of literacy, mathematics, bilingual education and special education;
- Funding under the federal class size reduction program has been flexible enough to assist the responding urban school districts in their efforts to end social promotions, provide after-school instruction, and target aid to low-performing schools;
- Interesting programs include Philadelphia's innovative approach to recruit, train, and mentor beginning teachers, Columbus's effort to strengthen accountability and turn around low-performing schools, Boston's Transition Program to end social promotion, and Long Beach's internship program to prepare and certify emergency teachers hired through the state initiative;
- The class size program in the responding urban districts have also leveraged state and local resources to reduce class size and improve the quality of teacher skills;
- Continuation and expansion of the program will be critical for urban school efforts to accelerate achievement gains, ensure quality teaching, turn around low-performing schools, and recruit highly qualified instructors.

Reducing Class Size in America's Urban Schools

By the
COUNCIL OF THE GREAT CITY SCHOOLS

INTRODUCTION

Ensuring that every class and every student has a qualified teacher providing instruction to the highest standards is one of the stiffest challenges facing American public education. This goal is becoming harder and harder to meet in the nation's urban schools, however, as enrollments rise, facilities age, and pressure for smaller classes mounts. But the research is getting stronger all the time that reducing class size pays concrete and long lasting benefits, particularly for poor children. Reducing class size gives every student more of the teacher's time, and allows children more individualized attention to meet their learning challenges. This report was prepared to give policymakers a better idea about how federal funding is being used to reduce class sizes and to spur academic achievement in America's urban schools.

WHAT DOES THE RESEARCH SAY?

Many education critics view efforts to reduce the number of students in American classrooms as a waste of money, claiming that student performance does not improve appreciably in smaller classes. More and better studies over the last ten years, however, have shown that these claims are incorrect and that smaller class sizes can produce significant increases in student achievement and enhance parent and teacher satisfaction with the educational process.

The most definitive study linking achievement and smaller classes was Tennessee's Student Teacher Achievement Ratio, or Project STAR. The longitudinal Project STAR studied over 6,000 children from 1985 to 1989, during which time students progressed from kindergarten to fourth grade. Project students were placed in three types of classes: small (13-17 children), regular (22-25), and regular with a full-time teacher aide. While no advantage was found in larger classes having a teacher aide, students in the smaller classes demonstrated significantly higher achievement on both standardized and curriculum-based tests than either of the large classes. Higher achievement began in the first grade, and continued through second and third grades. The results of Project STAR also showed that **the greatest benefits of smaller classes were found in inner-city schools with the poorest students.** Follow-up studies on participants in Project STAR found that children who were originally enrolled in smaller classes continued to outperform students who had begun in larger classes well after the third grade.

Another well-known effort involved the "Class Size Reduction (CSR)" program in California. Enacted in the summer of 1996, the California program mandated that all 1st and 2nd graders learn in classes of no more than 20 students. Kindergartners and third graders also benefited, with over 90% participation in the 1999-2000 school year. While logistical concerns arose regarding the quickly formed program, a preliminary evaluation shows positive results after the first two years. Benefits for all students in CSR classes **and across-the-board achievement**

gains were found in the third grade--the only grade where it was possible to compare learners in CSR and non-CSR classes. Teachers in CSR classes also reported spending more time with problem readers and students with individual needs and less time on discipline. Another positive finding in California involved **higher satisfaction of parents and increased contentment with the education** system due to more regular contacts with teachers. To date, California has placed over 1.6 million students in reduced-size K-3 classes.

A quasi-experimental study is currently being performed on the "Student Achievement Guarantee in Education (SAGE) Program" in Wisconsin. SAGE, a five-year pilot program, is designed to increase the academic achievement of high poverty students by reducing the student-teacher ratio to 15:1 in kindergarten through third grade. Results from the 1997-1998 school year showed that first and second grade students in the small SAGE classes tested higher in math, reading, and language arts. The 1997-1998 results also showed that **African-American students in the smaller classes outperformed African-American students in larger classes**. Qualitative research from the SAGE Program also reported that teachers knew their students better in smaller classes, required less time for management and discipline, and had greater opportunities for individualized instruction. Similar results were found in 1996-1997--the first year of the program. Since SAGE also promotes a rigorous curriculum, ongoing professional development, and before-and after-school activities, the positive findings demonstrate the success that trained teachers can achieve in small classes and supportive surroundings.

CLASS-SIZE REDUCTION PROGRAM (PL 105-277, SECTION 307)

Signed into law on October 21, 1998, the federal Class-Size Reduction Program aims to bring some 100,000 new, qualified teachers to America's classrooms. The law provides federal funds to local education agencies (LEAs) to reduce class sizes to 18:1 in Grades 1-3. At least eighty-two percent (82%) of the federal funds were to be used to recruit, hire (including salaries and benefits), and train certified classroom teachers. Up to fifteen percent (15%) of an LEAs federal allocation can be used to test new teachers to meet State certification requirements and to provide professional development for existing teachers. No more than three percent (3%) of the funds could be used for administrative costs.

An important component of the Class-Size Reduction program is its emphasis on helping the neediest children. The formula allocates 80% of the program's resources based on poverty, consistent with the research showing that benefits are strongest among poor kids.

Federal funds for the first year (Fiscal Year 1999) of the Class-Size Reduction Program were set at \$1.2 billion— with **almost \$300 million dollars targeted to the neediest students in urban schools**. The initiative would allocate \$12.4 billion over 7 years, reducing average class sizes in the early grades to 18 nationally, and meeting the goal of hiring 100,000 new teachers. The Clinton administration's request for the second year of the program, FY 2000, was \$1.4 billion.

WHAT THE CLASS-SIZE REDUCTION PROGRAM IS DOING IN URBAN SCHOOLS

School districts across the nation received a total of \$1.2 billion for the first year of the Class-Size Reduction program, \$281 million of which was allocated to 54 Great City School districts— the largest and neediest urban schools in the nation. Forty (40) urban districts responded to this survey, where federal support was used to hire 3,558 new teachers, whose total salary and benefits equaled almost \$168 million. The Class-Size Reduction program provided 1,074 new first grade teachers in urban schools, as well as 431 new second grade teachers, 465 new third grade teachers, and 481 new teachers in other grades.¹ The new teachers were hired to serve students in urban education's areas of greatest need, including literacy, mathematics, bilingual education and special education.

Figure 1
Total Number of New Teachers, Salaries and Benefits Provided with
Federal Class Size Reduction Funds, by Grade in Urban Schools

	Grade One	Grade Two	Grade Three	Other	Total *
Teachers	1,074	431	465	481	3,558
Salary and Benefits	\$45,004,094	\$17,859,159	\$20,366,595	\$17,451,294	\$167,788,761

*Individual grades do not sum to total since some districts were unable to provide a per-grade breakdown

Current teachers are also benefiting from the Class-Size Reduction program, with over \$10.2 million in new professional development services to 14,953 existing urban instructors. These teachers have received training to improve their current instructional practices, learn new technologies and information systems, and serve as mentors for new educators entering their schools. Ten school districts use the federal funds exclusively for the salaries and benefits of new teachers, using state and local funds for professional development and recruitment, showing a comprehensive and coordinated effort to provide more instructors in the early grades.

New Teachers

Of the 3,558 new urban teachers hired under the Class-Size Reduction program, only three districts employed instructors with emergency credentials, a total of only 404 teachers (11.4%). The remaining 3,154 new teachers, almost 90% of the total, have full certification. Cities were also able to combine federal resources with state aid. New York City, for instance, was able to supplement its state initiative by partially funding 788 teachers with federal money, bringing the number of classrooms affected by the program to well over 4,000.

In addition, some 7,700 new urban teachers are receiving professional development with

1. Since some respondents were only able to provide the total number of new teachers, and not a per-grade breakdown of new hires, individual grades do not sum to total.

Class-Size Reduction money. Almost \$7.9 million are being spent training 2,075 new first grade teachers, 1,276 second grade teachers, 1,133 third grade teachers, and 1,485 new teachers from other grades.²

Figure 2
Number of Teachers Receiving Professional Development with
Federal Class Size Reduction Funds, by Grade in Urban Schools

	Grade One	Grade Two	Grade Three	Other	Total *
New Teachers	2,075	1,276	1,133	1,485	7,762
Current Teachers	3,696	1,922	3,169	5,562	14,953

*Individual grades do not sum to total since some districts were unable to provide a per-grade breakdown

Current Teachers

The Class-Size Reduction program also assists existing educators, providing in-service training to 14,953 teachers already in the classroom. Over \$10.2 million in federal CSR funds have been spent in urban schools improving the instructional practices of 3,696 first grade teachers, 1,922 second grade teachers, 3,169 third grade teachers, and 5,562 teachers from other grades.² In all, almost \$32 million of first-year Class-Size Reduction funds have been used to provide professional development to 22,255 new and current teachers in the nation's urban schools.³

Figure 3
Usage of Federal Class Size Reduction Funds, by Percentage of Urban Districts

2. Since some respondents were only able to provide the total number of new teachers or current teachers receiving professional development, and not a per-grade breakdown, individual grades do not sum to total.

3. Certain districts were only able to provide the total amount of federal funds spent on professional development, and not the amount spent exclusively for new or current teachers. The amount spent on professional development for new teachers (approximately \$7.9 million) and the amount spent on current teachers (approximately \$10.2 million) do not sum to the actual total amount spent on all professional development (approximately \$32 million).

Recruiting

Funding under the Class-Size Reduction program can also be used to recruit new teachers and to test them on compliance with state standards. Just over \$2.1 million in CSR funds has been spent by urban schools on recruiting costs, including \$146,134 on advertising, \$133,503 on travel, and \$75,000 on hiring bonuses. The most popular recruitment tools have included attractive hiring packages (such as moving expenses, paying college tuition, etc.) on which school districts spent \$761,800. Some \$372,594 was spent on other activities, including the creation of staff recruitment positions and induction programs for potential hires.

DESCRIPTIONS OF FEDERAL CLASS-SIZE REDUCTION PROGRAMS IN THE GREAT CITY SCHOOLS

The Class-Size Reduction program is flexible enough to allow urban school districts to meet their very different needs and challenges, but focused enough to ensure that the important goal of hiring qualified teachers is met. The following is a description of the ways some urban school districts are using the federal class size reduction funds to improve student achievement.

Atlanta

With federal Class-Size Reduction funds, the Atlanta Public Schools have hired 58 new teachers, who are now working in 41 low-performing schools in high poverty areas throughout the city. The federal funds support schools implementing the "Success for All" program and supplement the state-funded class-size reduction program, "Georgia Special Instructional Assistance," and other reform efforts. Expansion of the program would enable the Atlanta Public Schools to reduce class sizes in a larger number of low-performing schools.

Birmingham

The Birmingham Public Schools have hired 7 new teachers for Grade Two and 16 new teachers for Grade Three, employing them in schools under "Academic Alert". Birmingham used its federal class-size reduction funds to ensure that all students are reading on grade level by the end of Grade 3. Both new and current teachers receive training with the federal funds. Future efforts will include expanding locations from which top teachers are recruited, providing targeted professional development in high need areas, offering stipends for mentor teachers to assist new hires, and focusing on recruitment and hiring of special education teachers.

Boston

The Boston Public Schools hired 38 new instructors with the federal Class Size Reduction funds, supplementing its "Transition Program." An alternative to retaining students who are not ready to advance to the next grade, the Transition Program serves Boston's desire to reduce class size as well as end social promotion. The 15 month program provides a small learning environment, well-trained teachers, and intensive classes: giving low-performing students a chance to master the material they missed, learn the material from their intended grade level,

"Each participating school must select a research-based literacy program, and receives technical assistance and professional development in its implementation."

-Boston Public Schools

and at the program's conclusion, rejoin their peers back on schedule. The Transition Program, which is one part of a comprehensive literacy and math initiative, is funded mostly through local funds, but also receives support from Reading Excellence, Title I, Eisenhower grants, IDEA, and other external funds.

The building blocks of the Transition Program involve smaller class sizes in Grades 1-3, providing extra instructional services for students in transitional grades, and providing after-school and Saturday classes to tutor students in small groups. Instructors hired through the program are literacy/math specialists, who teach third grade for two-thirds of the school day, coach other teachers for the remaining third, and work extended hours each day to tutor students after school. Specialists working in early learning centers focus on the first grade.

Broward County

The Broward County Public Schools used its federal Class Size Reduction money to hire 74 new first grade teachers in 51 elementary schools throughout the district. The elementary schools were selected based upon test results on the Florida Comprehensive Achievement Test (FCAT) and their actual class size in the 1998-1999 school year. The district also uses Title I funds to reduce class sizes in an additional 58 elementary schools. Further support would ensure that all schools have the opportunity to participate and achieve.

Columbus

The number one goal of the Columbus Public Schools is to ensure that all students can read at or above grade level by the third grade. The federal Class-Size Reduction grant complements the district's reform efforts to achieve this goal. Funds were used to hire 58 teachers in

"These funds allow the District to provide a smaller learning environment in our highest need schools, which will serve to facilitate language and communication skill development—the basis of all learning."

-Columbus Public Schools

13 Title I elementary schools, further extending the district's smaller learning community philosophy. The Columbus program supplements a state effort to reduce class sizes in all kindergartens. The additional federally-supported teachers provide small class sizes of 15:1 in grades one through three, reducing the number of students per teacher by an average of 10.

Denver

In Colorado, the Denver Public Schools are using Class-Size Reduction money to fund its "Primary Lead Teacher Project", hiring 12 new teachers who attended training this past summer, and will continue to attend training twice a month this fall. Their responsibilities include group work and 2.5 hours each day with children in programs such as "Reading Recovery", "Descubriendo La Lectura", and "Success in Early Reading." The Primary Lead Teachers work regularly with small groups of students, taking children from large classes during literacy instruction periods and providing more individualized instruction.

The remainder of the day for Primary Lead Teachers is used for staff development, planning and organizing, conducting demonstration lessons, and co-teaching in primary grade classrooms. Primary Lead Teachers also mentor new teachers, and provide release time for veteran teachers to work with their less-experienced colleagues. Primary Lead Teachers also gather as-

assessment data, and help other classroom teachers (10 to 15 teachers a week) use the results to guide instruction.

Des Moines

In Des Moines, federal Class-Size Reduction funds are being used to increase the number of all-day kindergarten classes from 27 to 49. Over 83% of the elementary schools in Des Moines now provide all-day kindergarten, at 35 locations. In addition to providing smaller

“The federal class size funds supplement allocations and a determined effort from the state and local level, which provide standardized district-wide diagnostic assessment, reporting to parents, instructional materials, and professional development.”

-Des Moines Public Schools

classes in kindergarten, the Des Moines Public Schools are using federal funds to lower class sizes in grades one through three, establish more classes, and provide team teaching and student assessments—consistent with the “District Improvement Plan”. The federal funds have supplemented state and local efforts by hiring 24 new kindergarten teachers, 3 new first grade teachers, and one new teacher in both second and third grade.

Long Beach

California was one of the first large states to initiate its own class-size reduction program, allowing Long Beach a waiver from the U.S. Department of Education to use federal class size funds to improve teacher quality or reduce class size in other grades. The waiver granted to Long Beach Unified School District (LBUSD) permitted the district to hire 15 new teachers for the ninth grade, as well strengthen the teachers they have already hired, through internships and programs to help teachers achieve full certification. LBUSD uses federal CSR funds to support five internship programs to prepare and certify emergency teachers hired to meet state requirements to reduce all early-grade class sizes below 20 students. The internships lead to a Multiple Subject Credential, with courses being offered on school district campuses and incorporating LBUSD content standards. In addition, all interns perform at least 30 hours of classroom instruction in support of the State’s reading initiative, while under the observation of a mentor teacher. Interns have a university advisor, as well as a New Teacher Coordinator and a New Teacher Support Provider, both of whom meet regularly with the intern, giving feedback after observing teaching sessions. Federal Class-Size Reduction funds help reimburse emergency-permit teachers receiving grades of "B" or better for the cost of tuition, textbooks, and related fees. The federal funds also provide materials and stipends to the New Teacher Support Providers for their coaching.

Miami-Dade County

In Miami, there are 207 new teachers participating in professional development activities supported with federal Class-Size Reduction funds designed to improve classroom instruction. There are 62 new teachers in the first grade, 76 new teachers in the second grade, and 69

new teachers in third grade. They attend professional development activities along with an equal number of current teachers (207), participating in core courses which include Effective Tutoring Techniques, Classroom Management Practices, The Use of Data Analysis of Student Performance, and Co-teaching Methods. Class-Size Reduction funds are also used to supplement the district's Comprehensive Reading Plan by pairing new teachers with veteran teachers. This allows instruction to be delivered in classes with fewer than 18 students.

Milwaukee

Like other Great City School districts, Milwaukee uses its federal class size reduction funds to focus on reading and literacy challenges. In this effort, Milwaukee has hired 89 new first grade teachers, as well as 7 new second grade teachers and 1 new third grade teacher. Teacher training, for both new and veteran instructors, includes attending Title I Literacy Conferences and workshops on How to Teach Reading/Language Arts and Working with Struggling Readers. The district is involved in a variety of reading reform efforts, including Target Teach, SAGE, Let's Read Milwaukee, Community Learning Centers, and Goals 2000. Class-Size Reduction works in conjunction with these programs. Federal funding in support of the teachers is also coordinated with Title VI and Title I, and with reading, language arts, and with early childhood curriculum specialists. Class Size Reduction Subcommittees, composed of teachers, parents, school and central office staff, were also formed in Milwaukee, to ensure successful program implementation. Continued funding would allow Milwaukee to expand its efforts to hire more bilingual teachers for grades 1-3.

New Orleans

Over one hundred new teachers (109) were hired by the New Orleans Public Schools with federal Class-Size Reduction funds, and placed in twenty-six locations—mostly schools requiring Title I improvement plans. This addition to the teaching corps brings the total number of instructors in Grades 1-3 to 370 in New Orleans, and makes 1 teacher available for every 18 students. Intensive professional development is provided to these teachers with the federal

“Intense professional development will be provided to meet the teachers’ needs, and to help them meet the students’ needs.”

-New Orleans Parish School District

funds. In addition, a team of highly trained individuals—mentors, consultants, and teacher liaisons—provide on-going support. Services include informal observations; diagnostic video taping and analysis; instructional demonstrations; curriculum and pedagogy skills development; before, during and after-school consultation and team meetings, and specialized training institutes based on student needs assessments. The designated schools use their Title II allocations to provide professional development in math, science, and reading—activities which are tailored to meet each school's specific needs.

New York City

Funding from the federal CSR program, along with State funding, is allocated to New

York City's 32 Community School Districts and to the Chancellor's District. All districts were instructed to distribute funds to hire teachers to reduce class size or implement alternative models to provide smaller group instruction. Alternative models were to be used where additional space was not available for more classrooms. In order to supplement the already-existing State program, New York City was granted a waiver to use Federal funds in kindergarten, in addition to grades one through three. New York City uses its federal allocations to fund the full salaries of 808 new teachers, while partially-funding the salaries of an additional 788 new early grade teachers that were not covered by the State program. Approximately \$9 million in Federal funds are used for the professional development of over 1,500 new teachers, as well as in-service training for current teachers. The participation rate of current teachers in the federal program was unavailable, but all 80,000 teachers in the New York City schools are eligible. Funds are also used to set up district centers for instructional development, to expand early childhood and elementary education coordination, and provide early childhood professional development. New York City expects to reduce class size for approximately 90,000 students, or 27% of the K-3 enrollment.

Norfolk

Norfolk Public Schools used federal Class-Size Reduction funds to hire one additional teacher at each grade level in grades one, two, and three at nine high-poverty schools in the district—a total of 27 new teachers in the early grades. The new teachers were matched with experienced teachers to form instructional teams responsible for all students in each class. To-

“The new teachers hired were matched with experienced teachers to form instructional teams... Together they decide on a team teaching model that best suits their instructional styles and the needs of their students.

-Norfolk Public Schools

gether they develop a team teaching model that best suits their instructional styles and the needs of their students. Several teaching models were presented for consideration by the teams at a professional development conference held prior to the opening of school. In subsequent workshops, teachers will be supported in their team efforts and trained in best instructional practices, including the latest brain research about how children learn. The teams plan lessons and resolve problems together, and experienced teachers model practices they have found to be the most effective.

Oklahoma City

The Oklahoma City Public Schools spent the majority of their Class-Size Reduction funds on hiring 41 new teachers in low-performing and/or high poverty schools, including 11 new first grade teachers, 10 second grade teachers, and 20 third grade teachers. Professional development activities, as well as on-the-job support, are provided for these teachers to learn how to utilize lower class sizes to teach children more effectively. Professional development activities and in-service support are provided by teacher consultants—veteran teachers from the district who have special training as professional development trainers and mentors, and who

**“Class-Size Reduction funds are supplementing our reform efforts in establishing choice schools, and our implementation of effective school programs.”
-Oklahoma City Public Schools**

are resident teachers in the Oklahoma City Public Schools. The district expects that Class-Size Reduction funds will increase student achievement, provide more individualized attention for students, reduce discipline problems, increase instructional time for reading and math, and increase teacher flexibility. The federal funds supplement other state and local funds. Where space is not available to establish new classes, the newly-hired teachers are teamed with other instructors to co-teach, ensuring that the benefits of small class size and increased contact are maintained with small instructional groups. These teachers will receive special training and assistance from teacher consultants in effective co-teaching strategies.

Omaha

Omaha Public Schools used the federal class size funds to hire 30 new teachers— 9 teachers in both first and second grade, and 12 teachers in third grade. All new teachers hired in Omaha with Class-Size Reduction funds are assigned to a veteran mentor teacher, with whom they must meet regularly. In addition to the typical training provided to new teachers before they enter the classroom, Omaha also provides professional development throughout the school year. Monthly sessions include workshops in Behavior Management Training, Classroom Management, Use of Assessment Data, Teaching For Mastery, and Effective Practices. At the conclusion of the first year, new teachers must meet with their mentors to discuss progress and next steps.

Philadelphia

The Philadelphia School District has designed an innovative approach to class size reduction to overcome two major obstacles—a shortage of space for additional classrooms and the difficulty in hiring certified teachers. The district has hired 288 new teachers, 34 of which have full certification. This alternative certification approach involves hiring recent college graduates who are intensely trained in early literacy development and partnered with veteran teachers, who will also receive intensive professional development. These “Literacy Interns”, the remaining 254 new teachers, undergo a rigorous professional development program de-

“Philadelphia has focused on students in kindergarten and first grade, using federal funds to accompany their Early Literacy Framework. Funds for the second year...would afford the opportunity for more high poverty kindergarten and first grade classes to participate.”

-Philadelphia Public School District

signed by the district. Pairing new teachers with veteran partners, the teams will be teaching in self-contained, reduced-size classrooms, delivering research-based literacy instruction in kindergarten and first grade. The professional development will include a nine-day Summer Insti-

tute on balanced approaches to literacy development, a two-week practicum where the Literacy Interns will work with students in a classroom staffed with an experienced teacher, a seminar with adjunct faculty drawn from local colleges and universities during the 1999-2000 school year, and Mentoring Workshops throughout the year. Philadelphia received a waiver from distributing funds solely to Grades 1-3, due to its continued efforts to provide a rigorous kindergarten experience in early literacy. Consequently, Philadelphia has focused its federal funds on the district's Early Literacy Framework for kindergarten and first grade students. Funds for the second year of the Class-Size Reduction program will allow more high poverty kindergarten and first grade classes to participate.

Salt Lake City

The Salt Lake City School District has directed its federal Class-Size Reduction funds to schools with the largest population of at-risk students, hiring 20 new teachers, including 7 new first grade teachers, and 11 new ESL and literacy specialists. Federal money is used to staff the district-wide literacy initiative, including improved instruction for English Language Learners. Plans for using the Class-Size Reduction funding emerged from site-based decision-making sessions, and included plans for additional regular classroom teachers, teachers for multi-age ESL classes in the primary grades, literacy specialists, and additional part-time teachers to reduce class sizes for reading/language arts.

Tucson

Tucson has been using its own funds to pay for recruiting costs and the professional development of current teachers, focusing federal Class-Size Reduction funds on the salaries, benefits, and training of 52 new teachers in Grades 1-3. Federal funds are used to hire additional teachers to implement the district's priorities on school-wide improvements, literacy, achievement gaps, and student performance in schools below the 40th percentile.

Summary of Class-Size Reduction Efforts in the Great City Schools

The following figures represent aid that the Federal Class-Size Reduction funds have provided for the Great City Schools.

Class-Size Reduction funds directed to urban schools:	\$281 million
Number of new teachers hired:	3,558
Cost of new salaries and benefits:	\$168 million
Number of new teachers receiving professional development:	7,762
Number of current teachers receiving professional development:	14,953
Cost of professional development for all teachers:	\$31.8 million
Recruiting costs:	\$2.1 million
Testing costs:	\$3.9 million
Areas of greatest need:	Literacy Mathematics Bilingual education Special education

1. Total Salaries and Benefits, Professional Development Costs, Recruiting Costs, and Testing Costs do not sum to total Federal Class Size Allocation. At the time of this survey, some districts were unable to determine exactly how *all* of its federal allocation would be used, and therefore only reported the funds which had already been budgeted or spent.

1. Memphis has allocated \$116,254 for recruitment, but had only spent \$47,000 at the time of the survey.

APPENDIX A
CLASS SIZE REDUCTION PROGRAM
PL 105-277

Class Size Reduction Program

PL 105-277

SEC. 307. (a) From the amount appropriated for title VI of the Elementary and Secondary Education Act of 1965 in accordance with this section, the Secretary of Education -

1. shall make available a total of \$6,000,000 to the Secretary of the Interior (on behalf of the Bureau of Indian Affairs) and the outlying areas for activities under this section; and
2. shall allocate the remainder by providing each State the greater of the amount the State would receive if a total of \$1,124,620 were allocated under section 1122 of the Elementary and Secondary Education Act of 1965 or under section 2202(b) of the Act for fiscal year 1998, except that such allocations shall be ratably increased or decreased as may be necessary.

(b)(1) Each State that receives funds under this section shall distribute 100 percent of such funds to local educational agencies, of which -

1. 80 percent of such amount shall be allocated to such local educational agencies in proportion to the number of children, aged 5 to 17, who reside in the school district served by such local educational agency from families with incomes below the poverty line (as defined by the Office of Management and Budget and revised annually in accordance with section 673 (2) of the Community Services Block Grant Act (42 U.S.C. 9902(2))) applicable to a family of the size involved for the most recent fiscal year for which satisfactory data is available compared to the number of such individuals who reside in the school districts served by all the local educational agencies in the State for that fiscal year; and
2. 20 percent of such amount shall be allocated to such local educational agencies in accordance with the relative enrollments of children, aged 5 to 17, in public and private nonprofit elementary and secondary schools within the boundaries of such agencies;

(2) Notwithstanding paragraph (1), if the award to a local educational agency under this section is less than the starting salary for a new teacher in that agency, the State shall not make the award unless the local educational agency agrees to form a consortium with not less than 1 other local educational agency for the purpose of reducing class size.

(c)(1) Each local educational agency that receives funds under this section shall use such funds to carry out effective approaches to reducing class size with highly qualified teachers to improve educational achievement for both regular and special-needs children, with particular consideration given to reducing class size in the early elementary grades for which some research has shown class size reduction most effective.

(2)(A) Each such local educational agency may pursue the goal of reducing class size through-

1. recruiting, hiring, and training certified regular and special education teachers and teachers of special-needs children, including teachers certified through State and local alternative routes;
2. testing new teachers for academic content knowledge, and to meet State certification requirements that are consistent with title II of the Higher Education Act

- of 1965; and
3. providing professional development to teachers, including special education teachers and teachers of special-needs children, consistent with title II of the Higher Education Act of 1965.
2. A local educational agency may use not more than a total of 15 percent of the award received under this section for activities described in clauses (ii) and (iii) of subparagraph (A).
 3. A local educational agency that has already reduced class size in the early grades to 18 or less children may use funds received under this section -
 1. to make further class-size reductions in grades 1 through 3;
 2. to reduce class size in kindergarten or other grades; or
 3. to carry out activities to improve teacher quality, including professional development.
1. Each such agency shall use funds under this section only to supplement, and not to supplant, State and local funds that, in the absence of such funds, would otherwise be spent for activities under this section.
 2. No funds made available under this section may be used to increase the salaries or provide benefits, other than participation in professional development and enrichment programs, to teachers who are, or have been, employed by the local educational agency.
- (d)(1) Each State receiving funds under this section shall report on activities in the State under this section, consistent with section 6202(a)(2) of the Elementary and Secondary Education Act of 1965.
- (2) Each school benefiting from this section, or the local educational agency serving that school, shall produce an annual report to parents, the general public, and the State educational agency, in easily understandable language, on student achievement that is a result of hiring additional highly qualified teachers and reducing class size.
- (e) If a local educational agency uses funds made available under this section for professional development activities, the agency shall ensure for the equitable participation of private nonprofit elementary and secondary schools in such activities. Section 6402 of the Elementary and Secondary Education Act of 1965 shall not apply to other activities under this section.
- (f) ADMINISTRATIVE EXPENSES. - A local educational agency that receives funds under this section may use not more than 3 percent of such funds for local administrative costs.
- (g) REQUEST FOR FUNDS. - Each local educational agency that desires to receive funds under this section shall include in the application required under section 6303 of the Elementary and Secondary Education Act of 1965 a description of the agency's programs to reduce class size by hiring additional highly qualified teachers.

This title may be cited as the "Department of Education Appropriations Act, 1999".

APPENDIX B
CLASS SIZE REDUCTION PROGRAM SURVEY

Council of the Great City Schools

"Class-Size Reduction" Program Survey

The following questions regard the funds your district received from the
"Class-Size Reduction" program for the 1999-2000 School Year.

School District: _____

Phone: _____

Name of Person Responding: _____

Fax: _____

Note: Please provide projected or approximate numbers if actual amounts are not yet known.

1. Actual amount of district's "Class-Size Reduction" program (CSR) grant award: _____

2. Amount of CSR funds district has spent on recruiting costs: Total: _____

Advertising: _____

Travel to interview prospective teachers: _____

Hiring bonuses: _____

Hiring packages (paying for college tuition, moving expenses, etc.): _____

Other (please list activities below): _____

3. Please complete the table below for the new teachers that your district has hired, or plans to hire, with CSR funds. "Area of Greatest Need" represents the critical subject or shortage areas in your district (i.e. mathematics, special education, etc.).

New Teachers	<i>Number of New Teachers</i>	<i>Total Salary and Benefits</i>	<i>Area of Greatest Need</i>
<i>Fully-certified</i>			
Grade One			
Grade Two			
Grade Three			
Other (Grades _____)			
<i>Emergency</i>			
Grade One			
Grade Two			
Grade Three			
Other (Grades _____)			

4. Amount of CSR funds district has spent on:
Testing new teachers for academic content knowledge: _____

Testing new teachers to meet State certificate requirements: _____

Feel free to contact Manish Naik at (202) 393-2427 with any questions.
Please fax the completed 2-page survey **no later than September 3, 1999** to
Manish Naik at (202) 393-2400. Thank you.

5a. Amount of CSR funds district has spent on professional development:

New teachers: _____

Current Teachers: _____

5b. Please provide the **number** of current and new teachers who have received, or are planning to receive, professional development with CSR funds.

<i>Grade Level</i>	<i># of New Teachers</i>	<i># of Current Teachers</i>
Grade One		
Grade Two		
Grade Three		
Other (Grades _____)		
TOTAL		

6. Please list the CSR-related professional development activities for teachers in your district. Also indicate with an "x" whether the participants were new or current teachers (or both), and the total amount of CSR funds spent on each activity.

<i>Activity</i>	<i>Current Teacher</i>	<i>New Teacher</i>	<i>Total Cost</i>

7. How would your district spend a 15% increase in the annual CSR allocation funds if they became available to you for the 2000-2001 School Year?

8. Which of your reform efforts aimed at turning around the lowest-performing schools will the federal CSR funds supplement?

Andy Rotherham

Subject: class size report numbers issues

Mike: To reiterate our call, the things that we think should be raised with Casserly are as follows:

- The report needs an executive summary including a disclaimer that the numbers are self reported and not official government figures and highlighting the overall accomplishments of the program thus far;
- Each small vignette needs a sentence on the number of teachers hired with the authority and if possible and positive, the effect this has had on class size. Currently only 2 or 3 have this.
- The numbers have to square better than they do now and/or better explanations for why not.

Numbers Issues:

- The report indicates that the Great City Schools received \$281 million under the authority but only shows \$220 million for the 40 schools listed. This is because at the time of the report the CGCS had 54 members (+ or - 1 or 2, check that stat with them) and only 40 are covered here. Hence, the missing \$61 million. That needs to be clarified in the report.
- More importantly, the report breaks out \$205 million in spending on hiring, professional development, recruitment, and testing from that \$220 figure. We need an accounting for the remaining \$15 million (\$14,686,130) to be exact. Under the general provisions they can hold some for the following year but that figure represents over 6% of the \$220 allocation. Since this program has a local administrative cap of 3 % we need to clarify where that money is.
- And you all are going to examine why their hiring rates are lower than our projections, I'll be interested to hear what you find out. I suspect it is in large part because of the benefits packages that these teachers are getting. The districts we're talking about here are among the highest in both salary and benefits and so they represent the extreme of spending in terms of our cost projections.

PRESIDENT CLINTON RELEASES REPORT ON BENEFITS OF CLASS SIZE REDUCTION, URGES CONGRESS TO FUND THIS IMPORTANT INITIATIVE

October 31, 1999

President Clinton today will release a new report by the Council of the Great City Schools on the benefits of smaller classes for students in America's urban schools. The report demonstrates that the President's class size reduction initiative is helping schools across the nation improve student learning by enabling them to hire additional highly qualified teachers in the early grades, where students learn to read and master the basics. Urban districts report that the President's initiative is flexible enough to allow them to meet their unique needs but focused enough to ensure smaller classes in the early grades. Unfortunately, Republicans in Congress are now trying to renege on the bipartisan commitment made last year to fund this important initiative. President Clinton today will call on Congress to heed the voices of those at the community level who want to hire more high-quality teachers and give children smaller, more personal classes.

RAISING STUDENT ACHIEVEMENT BY REDUCING CLASS SIZES IN THE EARLY GRADES. Last year, Congress made a down payment of \$1.2 billion toward the President's goal of hiring 100,000 new teachers to bring class sizes in the early grades to a national average of 18. The first teachers hired with that down payment began teaching in classrooms nationwide this fall. Today, the President will call on Congress to keep its commitment and finish the job. Unfortunately, Republicans have passed an appropriations bill that eliminates the class size initiative and fails to guarantee that a single cent will be used to hire a single teacher to reduce the size of a single class. Research has shown that class size reduction in the early grades is one of the most direct and effective ways to boost children's academic achievement and build a solid foundation for further learning.

EDUCATION LEADERS EMPHASIZE THE IMPORTANCE OF THE PRESIDENT'S PLAN. In the report to be released today, the Council of the Great City Schools finds that there is strong demand for the dedicated resources provided by the President's class size reduction initiative -- and that these resources are making a tangible difference. The Council is an organization of the nation's largest urban public school systems, working to improve K-12 education in the inner city, and governed by superintendents and education board members from 58 cities across the country. The President has worked closely with this group and many others at the local level to fight irresponsible cuts in key investments for our children's future. Among the findings of the Council's report:

- Teachers hired under the class size reduction program are working in areas of highest need, including literacy, mathematics, bilingual and special education.
- Teacher quality is being enhanced through this program. Over 22,000 urban teachers are receiving high-quality training, and urban schools have been able to provide new and current teachers with critical training on instructional practices and technology.
- In just the first year of the President's class size initiative, 3,558 teachers have been hired in 40 of the nation's largest urban school districts to reduce class sizes in the early grades.

REPUBLICAN EDUCATION BILL IGNORES THE VOICES OF TEACHERS AND COMMUNITIES. Making targeted investments in class size reduction is a common-sense strategy that teachers and school leaders across the country support. And yet, as the President will point out today, Republicans in Congress are undermining such investments by breaking their pledge to dedicate funds for smaller classes and by shortchanging other key programs. The Republican education spending bill:

- Abandons the bipartisan commitment to fund the President's class size reduction initiative, and provides no guarantee that the teachers hired for this year can continue teaching. It also provides no funding for the 8,000 additional teachers the President's plan would support this year.
- Fails to hold schools accountable for results by providing no funds to turn around failing schools;
- Underfunds after-school and summer programs, denying as many as 800,000 students access to a safe place to learn during after-school hours when most juvenile crime and drug and alcohol abuse occur;
- Shortchanges teacher quality and recruitment programs, and eliminates the successful Troops to Teachers program that enables retired military personnel to teach in high-need areas;
- Underinvests in educational technology and the GEAR-UP program, denying more than 130,000 disadvantaged young people the help they need to get into college
- Fails to fund the President's plan to build or modernize 6,000 schools across the country.

**PRESIDENT CLINTON RELEASES REPORT ON BENEFITS OF CLASS SIZE REDUCTION,
URGES CONGRESS TO FUND THIS IMPORTANT INITIATIVE**

October 31, 1999

President Clinton today will release a new report by the Council of the Great City Schools on the benefits of smaller classes for students in America's urban schools. The report demonstrates that the President's class size reduction initiative is helping schools across the nation improve student learning by enabling them to hire additional highly qualified teachers in the early grades, where students learn to read and master the basics.
