Unfortunately, due to circumstances beyond our control, we are no longer able to post on our website the unofficial daily transcripts of proceeding in the tobacco trial.

Because of continued unauthorized re-publication of the transcripts, the unofficial court reporter, who owns the rights to his work product, has withdrawn his verbal authorization for such use, and has retained counsel to help resolve this matter.

An official transcript will be prepared in the event of any appeal.

Minnesota's Tobacco Trial Presents "The Osdene Files"

Thomas S. Osdene began at Philip Morris in 1965 as Manager of Chemical Research and retired as Senior Vice President for Science and Technology in 1992.

He invoked the Fifth Amendment over 100 times during portions of his videotaped deposition played for the Minnesota jury.

Quote Sheet #3

From Deposition, Documents, and the Minnesota Trial on February 13 & 17, 1998

Q: "It would be your understanding that the sole basis for your being subject to a criminal inquiry would be your activities as an employee of Philip Morris; is that correct?"

A: "Yes"

Q: "Dr. Osdene, is it your belief that if you answer questions truthfully, your answers will confront you with a substantial hazard of self-incrimination?"

A: "On advice of counsel, I respectfully refuse to answer based on my Fifth Amendment privilege against self-incrimination because there is an ongoing parallel criminal investigation."

"It's certainly not what we wanted. Philip Morris asked Dr. Osdene to testify fully and truthfully."
Peter Bleakley, Philip Morris Attorney, as quoted in the press.

"The Osdene testimony is a powerful reminder that these companies have much to hide." *Attorney General Hubert H. Humphrey III, as quoted in the press.*

Using Nicotine to Keep the Tobacco Industry in Business

Q: "First draft of annual report to Philip Morris board by VP for research and development considered too technical, fall '69... 'We have, then, as our first premise, that the primary motivation for smoking is to obtain nicotine.'... and that was the considered view of the research and development department of Philip Morris in 1969, was it not sir?" [Report prepared by Osdene's Department. Trial Exhibit 3681]

A: "On advice of counsel, I respectfully refuse to answer based on my Fifth Amendment privilege against self-incrimination because there is an ongoing parallel criminal investigation."

Q: "[T]he next paragraph... 'In the past, we at R&D have said that we're not in the cigarette business, we're in the smoke business. It might be more pointed to observe that the cigarette is the vehicle of smoke, smoke is the vehicle of nicotine and nicotine is the agent of a pleasurable body response'... And that was the view at Philip Morris research and development throughout the period of time that you were there; correct, sir?" [Report prepared by Osdene's Department. Trial Exhibit 3681]

A: "On advice of counsel, I respectfully refuse to answer based on my Fifth Amendment privilege against self-incrimination because there is an ongoing parallel criminal investigation."

Q: "[Y]ou state... 'This program includes both behavioral effects as well as chemical investigation. My reason for this high priority is that I believe the thing we sell most is nicotine'.... And in 1980, you

believed the thing Philip Morris sold most was nicotine; correct?" [August 12, 1980 memo from T.S. Osdene regarding the evaluation of most R&D programs. Trial Exhibit 10255]

A: "On advice of counsel, I respectfully refuse to answer based on my Fifth Amendment privilege against self-incrimination because there is an ongoing parallel criminal investigation."

Q: "I'd like to first draw your attention to... a memorandum dated March 18, 1980 from James R. Charles to Dr. R.B. Seligman... it indicates that a CC was sent to Dr. T.S. Osdene... And the very first line... states, 'Nicotine is a powerful pharmacological agent with multiple sites of action and may be the most important component of cigarette smoke'.... and that was consistently the internal philosophy of Philip Morris research and development department...?"

A: "On advice of counsel, I respectfully refuse to answer based on my Fifth Amendment privilege against self-incrimination because there is an ongoing parallel criminal investigation."

"Dr. Seligman brought up the grant by Dr. Abood in which one of the stated aims was to make a clinically acceptable antagonist to nicotine. This goal would have the potential of putting the tobacco manufacturers out of business." January 10, 1978 memo from Osdene regarding the issues discussed during a January 5, 1978 CTR meeting in New York City. Trial Exhibit 10227

Smoking and Health Issues

Q: "And one of the statements you made to Dr. Seligman [Vice President, Philip Morris] and the board of directors [sic] of Philip Morris was, under biological effects of smoking... 'In view of the clouds on the horizon, we must be more aware of the activities of additives, materials etc.', correct?" [August 12, 1980 memo from T.S. Osdene. Trial Exhibit 10255]

A: "On advice of counsel, I respectfully refuse to answer based on my Fifth Amendment privilege against self-incrimination because there is an ongoing parallel criminal investigation."

"Please find attached the additives list that we discussed on November 19, 1980. Additives are those used domestically by Philip Morris USA as of August 6, 1980." 1980 memo from Dr. Charles to R.P. Heretick with a CC to Osdene. Trial Exhibit 2513

Q: "And in fact one of your responsibilities as Philip Morris director of research was an overall responsibility for knowledge of the additives being sold throughout the United States; correct?"

A: "On advice of counsel, I respectfully refuse to answer based on my Fifth Amendment privilege against self-incrimination because there is an ongoing parallel criminal investigation."

"This company is in trouble. The cigarette industry is in trouble. If we are to survive as a viable commercial enterprise we must act now to develop responses to smoking and health allegations from both the private and the government sectors." February 23, 1988 handwritten note from Dr. Charles to Osdene. Trial Exhibit 10523

"An admission by the industry that excessive cigarette smoking is bad for you is tantamount to an admission of guilt with regard to the lung cancer problem. This could open the door to legal suits in which the industry would have no defense." 1978 Osdene memo to Dr. R.B. Seligman, Vice President, Philip Morris. Trial Exhibit 3697

Q: "[You] have stated... 'Dr. Kreisher's work in the area of AHH from my point of view, starts out with the proposition that smoking causes lung cancer. The rest of work seems to justify this approach. I am very surprised about the extensive human clinical data which is now being sought and feel after four years of this project nobody has the slightest idea where it is going, where it is, or what it is trying... It is my strong feeling that with the progress that has been claimed, we are in the process of digging our own

grave... I am very much afraid that the direction of the work being taken by CTR [Editor's note: CTR is Council for Tobacco Research, an arm of the Tobacco Industry] is totally detrimental to our position and undermines the public posture we have taken to outsiders....And, in fact, the direction of CTR changed significantly in response to your concerns; correct?"

A: "Same response." [Editor's note: Part way through the deposition, it was agreed that Dr. Osdene could answer "Same response" instead of the longer "On Advice of Counsel, I respectfully refuse to answer...".]

"Let's face the facts:

1) Cigarette smoke is biologically active.

A. Nicotine is a potent pharmacological agent. Every toxicologist, physiologist, medical doctor and most chemists know that. It's not a secret.

B. Cigarette smoke condensate applied to the backs of rats causes tumors.

C. Hydrogen cyanide is a potent inhibitor of cytochrome oxidase - a crucial enzyme in the energy metabolism of all cells.

D. Oxides of nitrogen are important in nitrosamine formation. Nitrosamines as a class are potent carcinogens.

E. Tobacco-specific nonvolatile nitrosamines are frequent in significant amounts in cigarette smoke.

F. Acrolein is a potent eye irritant and is very toxic to cells. Acrolein is in cigarette smoke.

G. Polonium 210 is present in cigarette smoke.

H. We know very little about the biological activity of sidestream smoke.

I. We do not know enough about the biological activity of additives which have been in use for a number of years." *February 23, 1988 handwritten note from Dr. Charles to Osdene. Trial Exhibit 10523*

"While the bulk of gas phase is composed of nitrogen, oxygen, and carbon dioxide, there are present certain gases which are known to be or are suspected of being toxic....The single most toxic compound in gas phase (present in high concentration) is carbon monoxide." *1968 memo from Osdene. This information was never released to the public. Trial Exhibit 3695*

"Now we have a study of the effect of smoking in pregnancy which supports previous conclusions that smoking mothers produce smaller babies. The position of the medical people is that smaller babies suffer detrimental effects all through life." *1969 memo to Helmut Wakeham, Philip Morris V.P., that was also copied to Osdene. Philip Morris did not disclose this information and it was not required on warning labels until the 1980s. Trial Exhibit 3696*

Destruction of Documents and Hiding Research Abroad

"Since we have a major program at INBIFO, and since this is a locale where we might do some of the things which we are reluctant to do in this country, I recommend that we acquire INBIFO either in toto or to the extent of controlling interest." *1970 memo from Philip Morris Vice President, Helmut Wakeham, that recommended buying a research lab in Cologne, Germany. Philip Morris bought the lab in the early 1970's. When asked what Philip Morris did abroad that they were reluctant to do in the United States, Osdene took the Fifth Amendment. Trial Exhibit 2554*

"We have gone to great pains to eliminate any written contact with INBIFO... If this procedure is unacceptable to you, perhaps we should consider a 'dummy' mailing address in Köln [Cologne] for the receipt of samples." *March 1977 memo to Dr. Max Hansermann of Philip Morris Europe S.A.'s research department from Dr. R.B. Seligman, Philip Morris V.P. When asked why Philip Morris wanted to avoid direct contact with INBIFO, Osdene took the Fifth Amendment. Trial Exhibit 2688*

"1. Ship all documents to Cologne. 2. Keep in Cologne. 3. Okay to phone and telex (these will be destroyed)... 5. We will monitor in person every 2-3 months. 6. If important letters or documents have to be sent, please send to home - I will act on them and destroy." *Handwritten note by Thomas S. Osdene on how sensitive Philip Morris documents should be handled. Trial Exhibit 2501*

Q: "Did you ever receive letters or documents concerning research conducted on behalf of Philip Morris by IMBIFO [sic] [German research facility] at your home....[D]id you ever destroy any such documents, sir?"

A: "Same response."

"I have given Carolyn (Levy) approval to proceed with this study. If she is able to demonstrate, as she anticipates, no withdrawal effects of nicotine, we will want to pursue this avenue with some vigor. If, however, the results with nicotine are similar to those gotten with morphine and caffeine [sic], we will want to bury it." *November 1977 Philip Morris memo from William Dunn to Thomas S. Osdene. Trial Exhibit 3708*

"I consider myself well trained in the biological and chemical sciences and qualified to make the following comments which should be taken as constructive criticism with suggestions as to how to approach the solution to some of the problems. You may shred this document, have it typed as is, incorporate the suggestions in a position paper or use the document in any way you see fit." *Handwritten note from Dr. Charles to Osdene, February 23, 1982. When asked what he did with this document, Osdene took the 5th. Trial Exhibit 10523*

Marketing to Teens

"Smoking a cigarette for the beginner is a symbolic act... 'I am no longer my mother's child, I am tough, I am an adventurer, I'm not a square.'... As the force from the psychosocial symbolism subsides, the pharmacological effect takes over to sustain the habit." *1969 draft report to the Philip Morris board of directors prepared by Osdene's department. Trial Exhibit 3681*

"Most of these studies have been restricted to people age 18 and over, but my own data, which includes younger teenagers, shows even higher Marlboro market penetration among 15-17 year-olds. The teenage years are also important because those are the years during which most smokers begin to smoke, the years in which initial brand selections are made, and the period and the life-cycle in which conformity to peer group norms is greatest." *1975 memo from Myron Johnston to Dr. R.B. Seligman, Philip Morris VP, stating that several studies had attested to Marlboro's popularity among younger smokers. When asked if he encouraged staff to keep records on cigarette smoking among 15 to 17 year olds, Osdene took the Fifth Amendment. Trial Exhibit 2557*

Q: "And this document is entitled 'GENERAL COMMENTS ON SMOKING AND HEALTH.' The first line states, '.... Of all the concerns, there is one - taxation - that alarms us the most. While marketing restrictions and public and passive smoking do depress volume, in our experience taxation depresses it much more severely. Our concern for taxation is, therefore, central to our thinking about smoking and health. It has historically been the areas to which we have devoted most resources and for the foreseeable future, I think things will stay that way almost everywhere.'... And the reason that Philip Morris was concern [sic] about taxation was because Philip Morris knew that as taxes went up cigarette consumption went down; correct?"

Mr. Webb: "Objection"

A: "Same response."

~~CONFIDENTIAL FACSIMILE~~

The Minnesota Court of Appeals has denied the industry's petition for writs of prohibition and mandamus on the 39,000 privilege documents. The order is attached

The ruling itself is an unqualified victory for getting out the truth. However, the Court has delayed the effectiveness of its Order until noon on Thursday (3/19), permitting the defendants to seek a stay from the Minnesota Supreme Court.

Here is the address for the Appellate Court's decision which is now on our website:
<http://www.ag.state.mn.us/press/newssearch.qry?function=tobaccolitigationsearch>

The three-page decision states:

- (1) any challenge to the use of document categories is too late;
- (2) the industry failed to show that specific documents are CLEARLY not discoverable, or that they were afforded inadequate remedies, or that the District Court exceeded its legitimate powers;
- (3) the industry failed to: (a) provide a full record of proceedings before the Special Master, (b) identify the specific documents on which they made individualized argument below, or (c) show that such claims were raised below.

The Court is "mindful of . . . the numerous interlocutory petitions previously filed by these parties". Petitioners fail to establish that:

- (a) they were denied adequate opportunity to present their arguments;
- (b) the District Court misapplied the crime-fraud standard; or
- (c) the Special Master's findings of fact are inadequate.

"Petitioners are not entitled to relief".

ORDER

#CX-98-414
#CX-98-431

Respondents,

vs.

Philip Morris, Inc., et al.,

Petitioners,

Liggett Group, Inc.,
Defendants.

Considered and decided by Tausseint, Chief Judge, Lansing, Judge, and
Crippen, Judge.

**BASED ON THE FILE, RECORD, AND PROCEEDINGS, AND FOR THE
FOLLOWING REASONS:**

Petitioners seek prohibition and mandamus, for relief from orders compelling
discovery. Petitioners also seek oral argument on the petitions and a stay, in the
event that relief is denied. Respondents oppose the petitions and motion for stay
and seek attorney fees and costs incurred in defense of the petitions.

The focus of the petitions is the trial court's use of a process of categorical review to evaluate claims of privilege. This process was established by order of May 9, 1997, and we have previously denied extraordinary relief on a similar petition involving production of a different group of documents. To the extent that petitioners are challenging the use of categories rather than a line-by-line review of every document, the petitions are untimely. *See Ebenezer Soc'y v. Minnesota State Bd. of Health*, 301 Minn. 188, 193, 223 N.W.2d 385, 388 (1974) (petition for extraordinary relief to be filed within time permitted for appeal from an order).

To obtain a writ of prohibition, petitioners must establish that the documents ordered disclosed are *clearly* not discoverable. *Mampel v. Eastern Heights State Bank*, 254 N.W.2d 375, 377 (Minn. 1977). Prohibition is appropriate "only in extreme cases where the law affords no other adequate remedy." *Wasmund v. Nunamaker*, 277 Minn. 52, 54, 151 N.W.2d 577, 579 (1967). It is issued to prevent a trial court from acting when it is wholly without jurisdiction or from exceeding its legitimate powers. *Id.* at 55, 151 N.W.2d 579. Petitioners have not established that specific documents are *clearly* not discoverable, that the remedies afforded them are or were inadequate, or that the trial court exceeded its legitimate powers, and prohibition will not lie.

Petitioners did not (a) provide a complete record of the proceedings before the special master; (b) identify the documents on which they made individualized argument in support of their claims of privilege, either before the special master or the trial judge; or (c) establish that claims made in this court as to specific documents were raised and preserved in the trial court. We have carefully

reviewed the arguments of the petitioners and the appendices submitted to this court (which lack many of the documents to which petitioners refer in their arguments) and are mindful of the facts and circumstances of this case, as well as the numerous interlocutory petitions previously filed by these parties, the submissions made in connection with those petitions, and our previous rulings in this case. Petitioners have failed to establish (a) that their opportunity to present argument or evidence in support of claims of privilege was limited or abridged in any significant way; (b) the existence of errors of law in the application of the standards governing the crime-fraud exception; or (c) that the detailed findings of the special master are inadequate to support the trial court's order compelling disclosure. Petitioners are not entitled to relief.

IT IS HEREBY ORDERED:

1. The petitions in CX-98-414 and CX-98-431 are consolidated.
2. The petitions and motions of the parties are denied.
3. This order shall be effective at noon on Thursday, March 19, 1998, unless a stay is granted by the Minnesota Supreme Court.
4. Counsel shall retrieve their confidential appendices from the clerk of the appellate courts by noon on Thursday, March 19, 1998.

**Review and Revisions to
Proposed Tobacco Settlement
Resolution dated June 20, 1997**

I. Title I. Reformation of the Tobacco Industry

A. Restrictions on Marketing and Advertising

1. Marketing and Advertising Restrictions must include a ban on lifestyle and image advertising that are appealing to minority populations.
2. Marketing and Advertising Restrictions must be required on all military bases and in all prisons.
3. Deceptive advertising, e.g., "low tar" and discounting practices, must be banned.

B. Warnings, Labeling and Packaging

1. All warnings, labeling and packaging must be distributed in languages that will reach nonEnglish speaking populations.

C. Restrictions on Access to Tobacco Products

1. No comments at present.

D. Licensing of Retail Tobacco Product Sellers.

1. No comments at present.

E. Regulation of Tobacco Product Development and Manufacturing

1. No comments at present (see F).

F. Non-tobacco Ingredients

1. Minority population's use of mentholated tobacco products is disproportionately high. There has been limited research evaluating the combined effects of menthol and nicotine in tobacco products.

Discussion Draft - October 28, 1997

2. The FDA's Scientific Advisory Committee must examine not only the effects of alteration of nicotine yield, but also the effects of mentholated products in tobacco products based on its prevalence in tobacco brands consumed by minorities.

G. Compliance and Corporate Culture.

No comments at present.

II. Title II. Look-Back Provisions

- A. Historically, tobacco consumption in certain minority youth populations have been significantly less than for White youth. However, there is evidence indicating a significant increase in tobacco consumption in certain minority youth populations in the last few years.
 1. The benchmark used must adequately capture data reflecting this changing trend.
 2. The methodology used to compute the reduction targets must adequately capture changes in minority youth tobacco use.
 3. The benchmark and targets must measure use of all tobacco products, including cigarettes, cigars, smokeless tobacco and other similar products that serve as nicotine delivery devices.
 4. Any surcharge collected for failure to meet the targets must ensure that a percent of those funds be used exclusively for efforts to reduce tobacco use by minority youth. The percent would be based on the percent of minority youth tobacco users relative to all youth tobacco users.

Discussion Draft - October 28, 1997

III. Title III. Penalties and Enforcement Consent Decrees: Nonparticipating Companies.

No comments at present.

IV. Title IV. Nationwide Efforts to Minimize Involuntary Exposure to Environmental Tobacco Smoke.

- A. All standards imposed must include the nation's prisons, mental health institutions and military bases.

V. Title V. Scope and Effects.

No comments at present.

VI. Title VI. Programs/Funding.

See Title VII.

VII. Title VII. Public Health Funds from Tobacco Settlement

A. Allocation of Grant Monies Among Programs

To date, research on factors contributing to tobacco use in minority populations has been limited. As a result, the success of many cessation/treatment programs have not proven effective in minority communities. Therefore, any future research and cessation/treatment programs must include and be effective for minority communities.

1. Reduction in Tobacco Usage. This section must earmark a specified percent of these funds to programs targeted at the minority communities. The percent would be ___ based on the percent of minority smokers to all smokers. The Secretary could provide grants to qualified nonprofit organizations.
2. FDA/State Enforcement. This section must ensure that minority communities are not disproportionately targeted in enforcement.
3. State/Local Tobacco Control Community Based Efforts. This section must earmark a specified percent of these funds to programs targeted at the minority communities. These programs could be based on any effectively program designed to reduce tobacco use, not just ASSIST, in the minority communities. The

Discussion Draft - October 28, 1997

percent would be ____ based on the percent of minority smokers to all smokers. These funds could be distributed directly to qualified nonprofit entities.

4. **Research/Methods for Prevention and Cessation.** This section must earmark a specified percent of these funds to programs targeted at the minority communities. The percent would be ____ based on the percent of minority smokers to all smokers.
5. **Compensation for Past Sponsorship.** This section must earmark a specified percent of these funds to programs targeted at the minority communities. The percent would be ____ based on the percent of events sponsored by tobacco companies in minority communities.

B. Establishment of Programs by Secretary

1. The Secretary must be directed to ensure that any education, prevent and cessation campaign include culturally-sensitive, minority focused programs.
2. The Secretary must be directed to ensure that any research into and development of technologies designed to reduce tobacco use include minority communities.
3. The Secretary must be directed to evaluate the effects of menthol and tar, in addition to other tobacco and non-tobacco constituents of tobacco products.

C. Public Education Campaign.

1. The Commission must be directed to include representative of minority communities, without regard to whether the individual worked with an entity affiliated with tobacco. This is important due to the number of events and other activities in minority communities sponsored, in part, with tobacco dollars.
2. The Commission must earmark a specified percent of these funds be used to support campaigns that are targeted at the minority communities. The percent would be ____ based on the percent of minority smokers to all smokers.
3. The Commission must ensure that entities knowledgeable about

Discussion Draft - October 28, 1997

these communities be provided with funding to develop campaigns designed to discourage and deglamorize tobacco product use.

4. The Commission shall be directed to contract with private nonprofit entities, beyond state health departments, to run such campaigns. These entities must have a demonstrated knowledge of the community in which the campaign is run.

D. Tobacco Use Cessation

1. This Trust Fund must earmark a specified percent of these funds be used to support tobacco cessation/treatment in minority communities. The percent would be ____ based on the percent of minority smokers to all smokers.
2. The Secretary must use a negotiated rule-making process to develop the criteria and procedure for implementing this section.

E. Public Health Trust Fund

1. The Commission must include representatives from various organizations representing minority communities.
2. The Commission must earmark a specified percent of these funds be used to fund research of minority-specific tobacco-related health matters. The percent would be ____ based on the percent of minority smokers to all smokers and will be administered by the new independent nonprofit corporation created under Section F, of which ____ percent shall be distributed to qualified educational institutions whose historic charter is designed to serve minority communities or who currently serve minority communities and who are eligible for funds under Title VIII of the Public Health Service Act. [Ensure that this wording is sufficient to include the 4 historically African-American medical schools, 4 medical school serving Hispanic communities and the 2 medical schools serving Native Americans.]

F. New Section.

1. ____ percent of the total payments described in Title VI, shall be distributed to an independent nonprofit organization with a Board made up of individuals and leaders with expertise in minority health and health-related professions, education, financial and other

Discussion Draft - October 28, 1997

relevant professions that shall be created under this Act. The organization shall be able to distribute funds to eligible and qualified nonprofit organizations to conduct research designed to examine factors promoting tobacco use in minority communities, to develop culturally appropriate prevention, treatment and education programs designed to reduce tobacco use in minority communities and to provide other health-related services to minority communities.

- G. New Section. There shall be a clearinghouse created that will collect information regarding the use of funds distributed under this Title. The information collected shall include a description of all education, treatment, prevention and cessation programs and research funded under this Title and an evaluation of all such programs and research (including the program's effectiveness). This clearinghouse shall be maintained by the Office of Smoking and Health at the Center for Disease Control. This information shall be publicly available.

H. New Section. Definitions

1. For purposes of this Act, the term "minority" shall have the meaning used in the Disadvantaged Minority Health Act.

Dear Mr. Reed:

Thank you for meeting with me, Pam Carter, Lacy Johnson and Karen Anne Lloyd to discuss the minority implications of a potential Tobacco Settlement. I hope the briefing book we supplied was helpful to you and your staff.

I would like to request a follow-up meeting with you on February 11, 1998, preferably mid-morning, to discuss the status of the tobacco settlement. Other attendees would include Lacy Johnson, Karen Anne Lloyd and Todd Gee of Congressman Thompson's office. Todd has been coordinating the efforts of the Congressional Black Caucus, Hispanic Caucus, Native American Caucus and Asian American Caucus toward a Tobacco Settlement. As you know, Lacy, Karen Anne and I represent those same groups.

My assistant, Angela, at (317) 686-4228 will be more than happy to make final arrangements. Thank you in advance for your continued assistance.

Mr. Bruce Reed

Dear Mr. Reed:

I would like to thank you for attending the meeting I held last week to discuss minority concerns raised by the proposed tobacco settlement. As you observed, the Congressional Black Caucus and many members of the Congressional Hispanic Caucus, the Congressional Asian Pacific Caucus, and the Congressional Native American Caucus are very interested in this matter.

It can not be emphasized enough that the regressive nature of the settlement demands the inclusion of specific provisions to provide cessation, education, and prevention services targeted directly at minorities. These programs are essential in order to ensure that demand for tobacco products is driven downward among youth and adults in these populations.

These initiatives should be carried out by educational institutions and experienced public health organizations that have close ties to the minority communities. In order to develop these types of culturally-effective programs, funding will also have to be included for research conducted by minority education and public health institutions.

It should be noted that the Department of Health and Human Services and a number of federal departments have recognized the importance of establishing a community-oriented solution to the minority tobacco problem for some time. However, these suggestions have been largely ignored. Among African Americans, for example, the National Cancer Institute's 1991 report entitled "Strategies to Control Tobacco Use in the United States: a blueprint for public health action in the 1990's," called for developing extensive communications channels that included, among other things, "the health care system, black-focused mass media, churches, voluntary health organizations, fraternal and mutual aid organizations, workplaces, unemployment offices, job training programs, retail establishments, families, and neighborhood and tenants' organizations." These types of comprehensive efforts were never

wholeheartedly undertaken by the Department of Health and Human Services and they certainly were not included in the proposed tobacco settlement.

African Americans and Tobacco

Smoking rates among African American adults historically have been higher than among the general U.S. population; however, in recent years smoking rates have been similar. Smoking among African American teens has declined dramatically since 1976; however, recent increases in teen smoking among African American males document the need for continued prevention efforts. African Americans continue to suffer disproportionately from chronic and preventable disease compared to white Americans. Of the three leading causes of death in African Americans -- heart disease, cancer, and stroke -- smoking and other tobacco use is a major contributor of these illnesses.¹

- Each year, approximately 45,000 African Americans die from a smoking-related disease that could have been prevented.²
- An estimated 1.6 million African Americans who are now under the age of 18 will become regular smokers. About 500,000 of those smokers will die of a smoking-related disease.²
- Aggregated data from 1994 and 1995 shows that current smoking prevalence rates were similar among African American adults (26.5%) and white adults (25.9%) in the United States.³
- In 1995, about 5.3 million African American adults smoke cigarettes, accounting for approximately 11.4% of the 47 million adult smokers in the United States.⁴
- In 1994 and 1995, African American men (31.4%) smoked at a higher rate than white men (27.6%), while African American women (22.7%) and white women (24.4%) smoked at a similar rate.⁵
- Among African Americans, as seen in other U.S. populations, the prevalence of smoking declines as education increases. Smoking rates were higher among African Americans who had less than a high school education (34.8%) compared to those with a college education (16.7%).⁵
- Among African American high school seniors, cigarette smoking declined by 76% from 1977 (36.7%) to 1992 (8.7%). However, smoking prevalence rates increased by 64% from 1992 to 1997 (14.3%).⁶
- Among African American 10th-grade students, smoking prevalence increased by 94% from 1992 (6.6%) to 1997 (12.8%). For African American eighth grade students, smoking prevalence increased by 106% from 1992 (5.3%) to 1997 (10.9%). The rate of increase was substantially higher among African American students than were observed for white and Hispanic students.⁶
- The Centers for Disease Control and Prevention's 1995 Youth Risk Behavior Survey shows that the rate of past month cigarette smoking among high school students in grades ninth through 12th increased from 27.5% in 1991 to 34.8% in 1995. The rate of increase among African American male high school students was particularly high, nearly doubling from 14.1% to 27.8% between 1991 and 1995.⁷
- In 1996, an estimated 6 million (26.7%) U.S. teenagers aged 14-19 -- 4.3 million males (37%) and 1.7 million females (16%) -- reported having smoked at least one cigar within the past year. A greater percentage of white (28.9%) and Hispanic (26.2%) teenagers reported smoking at least one cigar in the previous year compared to African American teenagers (19.3%) in 1996.⁸

- White male high school students (25.1%) were significantly more likely to use smokeless tobacco products compared with African American male (3.5%) high school students.⁹
- Of current African American smokers, more than 70% indicated that they want to quit smoking completely.¹⁰ African American smokers are more likely than white smokers to have quit for at least one day during the previous year (48.7% vs 40.3%). African Americans, however, are much less likely than whites to remain abstinent for one year or more.¹¹
- Prevalence of cessation was higher among whites who had ever smoked (50.7%) compared to African Americans who had ever smoked (35.4%).¹²
- A one-year study found that three major African American publications -- Ebony, Jet, and Essence -- had 12% more cigarette advertisements than widespread publications -- Newsweek, Time, People and Mademoiselle.¹³
- A study conducted in Los Angeles, California found a higher density of tobacco billboards (the number of billboards per mile) in African American communities, compared to Hispanic and Asian communities, with lowest billboard placement in white communities.¹⁴
- Approximately 90% of the billboards in African American communities featured an African American as the central character, while in other ethnic communities whites were portrayed as the central characters.¹⁴
- The tobacco industry attempts to maintain a positive image and public support among African Americans by supporting cultural events and by funding minority higher education institutions, elected officials, civic and community organizations, and scholarship programs.¹⁵

BASED ON THE PREMISE OF \$ 1 BILLION FOR THE FIRST YEAR AND GRADUALLY INCREASING TO \$1.5 BILLION THEREAFTER, ADJUSTED FOR INFLATION AFTER THE FIRST YEAR.

BASED ON THE PREMISE OF \$1 BILLION FOR SMOKING CESSATION FOR THE FIRST 4 YEARS AND \$1.5 BILLION THEREAFTER, ADJUSTED FOR INFLATION.

(A) ALLOCATION OF GRANT MONIES AMONG PROGRAMS - The use of moneys under this Section shall be limited to programs established under this Section, shall be adjusted for inflation annually from the effective date, and shall be allocated among such programs as follows:

(2) \$300,000,000 annually for the FDA to carry out its obligations under and to enforce the terms of this Act, including for grants to the states to assist in the enforcement of the provisions of the Act;

(3) \$75,000,000 for the first two years, \$100,000,000 in the third year, and \$125,000,000 annually thereafter to fund state and local tobacco control community based efforts modeled on the ASSIST program, designed to encourage community involvement in reducing tobacco use and the enactment and implementation of policies designed to reduce the use of tobacco products;

(4) \$100,000,000 annually to fund research and the development of methods for how to discourage individuals from starting to use tobacco and how to help individuals to quit using tobacco;

(5) Beginning in the second year, \$75,000,000 annually for a period of ten (10) years to compensate events, teams or entries in such events, who lose sponsorship by the tobacco industry as a result of this Act, or who currently receive tobacco industry funding to sponsor events and elect to replace that

funding, provided that the event, team, or entry is otherwise unable to replace its tobacco industry sponsorship during those given years. Funds used for this purpose shall promote a Quit Tobacco Use theme. After a ten year period, no additional funds shall be used for this purpose and the funds previously allocated to this purpose shall be used as follows: 50% to supplement funding of the multi-media campaigns in paragraph (1) of this subsection; 25% to supplement the funding of the enforcement provisions of paragraph (2) of this subsection; and 25% to supplement the funding of community action programs in paragraph (3) of this subsection.

(B) ESTABLISHMENT OF PROGRAMS BY THE SECRETARY - The Secretary shall establish programs to accomplish the following purposes—

(1) the reduction of tobacco product usage, both by seeking to discourage the initiation of tobacco use by persons under the age of 18 and by encouraging current tobacco users to quit through media-based and non-media based education, prevention and cessation campaigns. The Secretary may make grants to state health departments to assist in carrying out the purposes of this provision.

(2) the research into and development and public dissemination of technologies and methods to reduce the risk of dependence and injury from tobacco product usage and exposure;

(3) the identification, testing and evaluation of the health effects of both tobacco and non-tobacco constituents of tobacco products;

(4) the promulgation of such other rules and regulations as are necessary and proper to carry out the provisions of this Act, as well as the development of such other programs as the Secretary determines are consistent with the goals of the Act.

(C) Public Education Campaign - \$500,000,000 shall be spent annually in such multi-media campaigns designed to discourage and de-glamorize the use of tobacco products. To carry out such efforts, an independent non-profit organization with a Board made up of prestigious individuals and the leaders of the major public health organizations shall be created which shall contract or make grants to non-profit private entities who are unaffiliated with tobacco manufacturers or tobacco importers, who have a demonstrated record of working effectively to reduce tobacco product use and expertise in multi-media communications campaigns. The independent body shall be authorized to contract with state health departments, where appropriate, to run campaigns for

their states and communities. In creating the program the Secretary or independent body shall also take into account the needs of particular populations. The goal shall be the reduction of tobacco product usage, both by seeking to discourage the initiation of tobacco use by persons under the age of 18 and by encouraging current tobacco users to quit.

(D) Tobacco Use Cessation - For the first 4 years, \$1 billion, and thereafter, \$1.5 billion of the total amount paid by the tobacco industry shall be paid into a Trust Fund to be used to assist individuals who want to quit using tobacco to do so. Within 12 months the Secretary shall promulgate regulations to govern (1) the establishment of criteria for and a procedure for the approval of cessation programs and devices for which payment may be made under the program, (2) the eligibility requirements for individuals seeking to use moneys from the trust to fund the tobacco cessation efforts, and (3) the procedures to govern the tobacco cessation program.

The goal of the tobacco cessation program shall to enable the most tobacco users possible to receive assistance in their effort to quit using tobacco by providing financial assistance and identifying the programs, techniques, and devices that have been shown to be safe and effective. Benefits to individuals should not be limited to a single effort, but should be tailored to the needs of individual smokers according to standards established by the Secretary using the best available scientific guidelines.

(E) Public Health Trust Fund Presidential Commission - A Presidential commission will be appointed to include representatives of the public health community, Attorneys General, Castano attorneys and others to determine the specific tobacco-related medical research for which the \$25 Billion Public Health Trust Fund will be used.
