

CRIME BILL -- DOLLARS FOR MISSOURI, 1995 - 2000
(Revised 8/22/94)

LAW ENFORCEMENT

- * **100,000 POLICE** -- Guaranteed minimum of \$44 million -- more than 500 police officers at \$75,000 per officer.
 - ** Given Missouri's share of the population and the additional \$6.5 billion in discretionary dollars, Missouri should expect a total of about \$180 million over the next 6 years.
 - ** Of the total, up to 85% can be used to hire about 2,100 police officers. At least 15% -- \$27 million -- can be used to help pay the training, overtime and administrative costs of implementing community policing in Missouri.
- * **PRISONS & BOOT CAMPS** -- \$83 million for prison grants, including military-style boot camp prisons. An additional estimated \$83 million is possible if Missouri meets the "Truth in Sentencing" target of second-time violent offenders serving 85% of their sentences.
- * **BYRNE ENFORCEMENT GRANTS** -- \$1 billion in the Trust Fund will help continue full funding for these grants, including Missouri's \$8 million annual share.
- * **RURAL LAW ENFORCEMENT GRANTS** -- \$2.5 million for drug and crime enforcement in Missouri's rural areas.
- * **DISCRETIONARY GRANTS** -- Missouri's law enforcement agencies and courts may apply for:
 - ** \$1,000,000,000 -- Drug Court programs (treatment backed up by drug testing and certain punishment for non-violent offenders currently on probation.) Estimated \$20 million for Missouri -- enough for about 10,200 offenders over six years.
 - ** \$320,000,000 -- Criminal record systems (Brady Law), communications equipment, and DNA testing; and
 - ** \$200,000,000 -- Judges, prosecutors and public defenders (estimated \$4 million for Missouri).

PREVENTION PROGRAMS

- * **LOCAL PARTNERSHIP ACT** -- \$26 million in direct grants to cities and towns in Missouri. Wide discretion permits local governments to use the dollars for education, drug treatment, and jobs programs.
- * **VIOLENCE AGAINST WOMEN ACT** -- \$16 million in grants for police, prosecutors and victims services; \$6 million in grants for shelters for battered women and their children; and Missouri can apply for a share of \$500 million in several discretionary programs.
- * **AFTERSCHOOL AND IN-SCHOOL "SAFE HAVENS" FOR AT-RISK CHILDREN** -- \$16 million for non-profit, community-based organizations in Missouri.
- * **DRUG TREATMENT IN PRISONS** -- \$5.5 million to treat up to an estimated 5,000 drug-addicted prisoners in Missouri prisons over the next 6 years.
- * **LOCAL CRIME PREVENTION BLOCK GRANT** -- \$7.6 million in direct grants to cities and towns for various programs, including:
 - ** **ANTI-GANG GRANTS** -- to give young people positive alternatives to gangs, such as academic and athletic after-school activities, mentoring programs and scout troops.
 - ** **MIDNIGHT SPORTS LEAGUES** -- to give at-risk youth nightly alternatives to the streets, and for the U.S. Olympic Committee to develop supervised sports and recreation programs in high-crime areas.
 - ** **BOYS AND GIRLS CLUBS** -- to establish clubs in low-income housing communities, and to encourage police officers to live in those communities.
 - ** **TRIAD** -- for partnerships between senior citizens groups, police chiefs and sheriffs to combat crimes against elderly Americans.
 - ** **POLICE PARTNERSHIPS FOR CHILDREN** -- for partnerships between law enforcement and social service agencies to fight crimes against children, and for the creation of youth councils to combat crime.
 - ** **VISITATION CENTERS** -- for supervised centers for divorced or separated parents to visit their children in "safe havens" when there is a history or risk of physical or sexual abuse.

- ** YOUTH DEVELOPMENT CENTERS -- to develop more effective education, training, research, prevention, diversion, treatment and rehabilitation programs for violent juveniles, including alternatives to school suspension and juvenile court diversion.**
- ** SAFE SENIORS CORRIDORS -- to provide older Americans with enhanced protection from crime by increasing police presence and crime prevention activities by community groups.**
- ** HOPE IN YOUTH -- to create Family Outreach Teams composed of youth, parents and school-parent organizers for mentoring, community organizing and peer counseling.**

*** DISCRETIONARY GRANTS -- State agencies and non-profit organizations may apply for a share of:**

- ** MODEL INTENSIVE GRANTS -- \$626 million for intensive, comprehensive and flexible aid to areas, urban and rural, hardest hit by crime and violence.**
- ** NATIONAL COMMUNITY ECONOMIC PARTNERSHIP -- \$270 million to extend lines of credit of up to \$2 million to community development corporations to provide small, low-interest loans to businesses in low-income neighborhoods.**
- ** GANG RESISTANCE EDUCATION AND TRAINING ("GREAT") -- \$45 million for school-based programs to teach children to resist peer pressure and understand the negative impact of gangs and drugs.**
- ** URBAN RECREATION AND AT-RISK YOUTH -- \$4.5 million to expand recreational facilities in high-crime areas.**

A Blueprint for Strategic Planning Needs

The St. Louis Drug Interdiction Project

Family Violence Council of St. Louis

Crime Summary - 1993

A BLUEPRINT FOR STRATEGIC PLANNING NEEDS

Colonel Clarence Harmon, Chief of Police, appointed a task force consisting of community leaders, government officials, business executives and police department personnel to determine the size, capital improvement needs and compensation requirements for the St. Louis Police Department into the 21st century. The task force was also charged with examining and recommending financing for the City of St. Louis in an effort to meet future public safety requirements.

All too often, public policy is formulated through a narrow viewpoint, or paradigm, with little regard for other governments impacted by their decisions. The responsibility of this task force was to have a broad-based understanding of how the police department impacts other local governments, and vice versa, before making any recommendations regarding those relationships. Thus, the task force's recommendations are a result of viewing the public safety function as an interdependent framework involving local and State governments.

Because strategic planning is always a difficult process, it is essential to have a group of individuals on the task force from various backgrounds and careers to ensure creative and diversified thinking. Discussion often led to stimulated debate on a number of major issues, and while we were not always in agreement, there was a common bond among the members: to identify and view problems facing St. Louis as challenges which can be turned into opportunities. While some of the information contained in the report paints a complex picture of St. Louis, the task force unanimously believes that there exists great potential for our city, through planning and vision, to stimulate a vitality and quality of life for its inhabitants, much like years past.

In beginning the process over five months ago, the task force first defined its mission statement:

1. To determine the size, capital improvement needs and compensation requirements for commissioned personnel of the St. Louis Police Department into the 21st century; and
2. To examine and recommend alternatives for financing for the City of St. Louis to meet public safety requirements into the 21st century.

To effectively fulfill its mission, the task force first focused its discussion on the transition of the community since 1970 - of how our population has decreased and how we have changed from a manufacturing based economy to a service-oriented employment community.

The task force then examined various data on population loss in the city, as well as the impact of this out-migration. Along with the population loss, the city experienced a major decrease in its manufacturing plants. As an example, in the decade from 1980 to 1990, the city lost 39,745 manufacturing positions. During the same period, jobs in services increased over 6%, and by 1990 service jobs outnumbered manufacturing jobs.

The task force focused on the social changes which have impacted St. Louis, and how citizens view the police. For example, racial tensions need to be replaced by the elements of community togetherness and a sense of mutual cooperation.

The task force addressed five specific governmental services which have a major impact on the city, both financially and organizationally. The five services are public safety, the courts, education, health care and fire protection. The task force concluded that, while they generally operate independently of each other, there is a need for them to work more closely together. An example of this is the existing dysfunctional condition that is a primary attribute of the criminal justice system.

The task force concluded that there does not exist a planning mentality in St. Louis and, instead of planning, the various services only react to those problems facing their particular element. Public policy does not think; it has a tendency to react on a crisis management basis. What is needed is a strong, coordinated, disciplined effort to prioritize our needs and initiate long range planning. The task force believes that those cities which excel towards excellence are those which have a sense of reality and a definitive vision of the future.

The task force examined the personnel strength levels of the police department. We found that the department has lost a third of its commissioned strength in the last 22 years, decreasing from 2220 officers in 1970 to 1504 at the end of 1992, a reduction of 716 officers. The manpower loss occurred even though violent crime has increased since 1970, and police are responding to more calls for police service, frequently resulting in a department extended beyond its capabilities.

The task force found that a number of improvements had been made within the police department since 1970 to improve efficiency and cope with reduced personnel levels, including the following:

- An expanded program for preparing police reports via phone instead of dispatching patrol units (more than 20,000 telephone reports are now taken annually).

- An improved five-watch patrol plan adopted in 1982 to deploy officers in better proportion to workload levels during the 24 hour day.

- Physical changes to buildings, including a reduction in the number of area stations from nine to three, with the re-assignment of more than 50 officers from administrative assignments to street duty. Other facilities include a new outdoor firearms range, communications building and fleet services facility.

- Improvements in communications have included adoption of a police department television station for training and improved information dissemination, a 911 system which handles all police, fire and ambulance calls, and a Computer-Aided-Dispatch system.

--Technological improvements have included the Police Incident Reporting System, the Automated Fingerprinting Identification System, the Automated Prisoner Booking System and many others.

--Enhancements in human resource development have included increases in the number of minority and female officers, stricter recruitment standards, an improved promotion policy, an expanded officer training program, and improvements in officer compensation (to include shift differential for night work, paid overtime and court time, improvements in the retirement plan, etc).

The department has also enlisted the public in the fight against crime by expanding its crime prevention efforts. Programs include Neighborhood Watch, Crime Stoppers, Combat Auto Theft, the "We Are Responsible" Program in which officers encourage children to avoid drug use, and many others.

Finally, the department is in the process of instituting a new Community-Oriented Problem Solving concept (COPS) to enable officers to work closely with the community in addressing crime and nuisance problems. The program is already in effect in several neighborhoods, and will be expanded to the entire city in the near future.

The police department now finds itself at a point where more is being done with less. The number of arrests has increased by 23% since 1970, even though the number of officers declined by almost one-third since then. Despite a population loss of 36.2% since 1970, there were 24,421 more calls for service dispatched in 1992 than in 1970, an increase of 6.5%. Some 484,005 officer work hours were devoted to the 400,521 calls handled in 1992, for an average of 1.2 hours per call (at least two officers were dispatched on 65% of the calls).

The police department needs to expand its public safety capabilities to service an increased call workload, expand crime prevention efforts and police future events. District officers need more time to work with their communities in resolving neighborhood problems and reducing crime. Many events coming in the near future will require police presence, including riverboat gambling, Metro-Link, the new convention center and Kiel Center, etc. Added personnel are needed to prevent the re-assignment of officers from our neighborhoods to police those functions. If the department is to meet these challenges, there is an urgency to increase the number of officers. If we as a city are to continue to strive for excellence to provide a positive quality of life for everyone, there is an urgency to ensure that its inhabitants are safe.

The task force report contains various recommendations for improvements in the St. Louis Police Department. The report primarily proposes an increase of 200 officers over a four-year period; it also recommends a general obligation bond for a new police headquarters/academy building and other capital improvements.

The addition of 200 officers over a 4-year period would increase the authorized commissioned strength from 1,550 to 1,750. A total of 50 officers would be added yearly over a four-year period. With normal attrition rates, it would be necessary to add approximately 511-615 new officers during the 4-year period. The replacement of one-third of the department's personnel within a four-year period will require a significant recruitment effort by the police department. The department is ready and willing to assume this challenge.

The addition of 176 officers to residential neighborhood duty would provide an estimated 262,535 additional officer hours annually for crime prevention and community oriented problem solving activities; this constitutes an increase of 54% in the hours devoted to those functions. In addition, the percentage of total district patrol officer time available for those duties would increase from 40% to 48.5%. Also, about 24 additional officers would be added to the downtown area to meet the increased security needs associated with riverboat gambling, the convention center expansion and many other planned improvements.

The financial impact of their recommendations was carefully examined by the task force. They first determined projected police department budget needs over the next seven years. For the purpose of comparison, three separate estimates were developed using varying officer salary levels. An estimate was then made of total city budget needs to fund the additional officers, assuming, for the sake of analysis, that the police department received 30% of total City revenue. Finally, they estimated the additional city revenue needed by subtracting projected city revenue (based on 1.4% traditional annual growth rate) from the projected city budget needs with the extra officers included.

NOTE: The task force realizes that the annual growth rate is not a constant figure and may be lower, or higher, in any given fiscal year.

A description of each of the three options for increasing the force by 200 officers appears below. Each of the options includes a salary increase for our commissioned personnel. Adequate compensation is necessary to attract and retain the quality personnel needed to perform the complex and demanding requirements of the police profession.

--Under Option A, officers would receive a 3% salary increase during each of the four years. The additional revenue required for this option would range from \$8,794,524 in the first year, to \$58,174,649 during the fourth year after the force has been increased by 200 officers. Complete details concerning this option are included in Table 6 on Page 39 of the task force report.

--Under Option B, officers would receive a 6% salary increase during each of four years. This option would require additional revenue of \$15,992,340 during the first year and \$93,989,253 during the fourth year after the employment of 200 additional officers. Table 7 on Page 40 of the task force report contains full details.

--Under Option C, officers would receive a \$1,750 salary increase the first year, followed by a 5% pay increase the next three years. This option requires additional revenue of \$15,982,573 the first year, with \$93,998,351 needed by the fourth year after the full strength increase of 200 officers. Table 8 on Page 41 of the task force report includes complete information.

NOTE: The cost estimates do not include the City pension contribution for retired officers (\$2,000,000 the first year and \$3,000,000 in subsequent years). Also, the estimates do not include the cost for potential improvements in pension benefits which may be authorized in the future by elected bodies, the cost of which would be substantial.

The task force also proposed a police department capital improvement project in the amount of \$19,481,125. The funds would be used for building improvements and the purchase of needed equipment over an 8-year period. The major item is the acquisition and renovation of a new headquarters/academy building. The present multi-story headquarters building is in need of extensive renovation and is no longer functional. Future plans do not provide for the housing of prisoners within the Headquarters Building; they would instead be transported directly to a city facility (our bond issue does not include any funds for expenses which may be needed by other city departments for building construction purposes). A newer, one- or two-story headquarters/academy building located in the general area of Downtown would provide a facility to meet future needs.

The task force realizes that their proposal for improvements in the police department will require difficult decisions, the setting of priorities and the raising of additional revenues for municipal operations. They understood that the city provides other crucial services, and it is not our intent to reduce funds needed for those services. They also realized that there have been recent reductions in revenue from the sales and property taxes. In addition, Federal revenue-sharing funds have long been discontinued.

The task force believes that there are some hopeful signs for economic growth in the downtown area, including potential revenue increases from riverboat gambling and expanded downtown employment. However, they realize that these sources, by themselves, will fall far short of meeting the need for financing the additional officers.

The task force has identified some potential solutions to the funding need. They propose adoption of a diversified financial package for increasing municipal revenue to meet public safety needs. First, they believe there should be a review of State assistance for public safety purposes. In addition, they believe consideration should be given to increases in the property and sales taxes, with the increased funds dedicated solely to public safety. Finally, the task force proposes establishment of a consistent financial relationship between city revenue and the portion of that revenue allocated to the police department. This action is necessary so that proper long-range planning may be accomplished by both the police department and the city.

Crime will only begin decreasing if a multi-faceted, long term concentrated approach leads to improved educational results, job creation, improvements in our court system and other changes. This shows the need for all elements of Federal, State and local government to work together to develop an overall, long-range coordinated plan for addressing problems.

THE ST. LOUIS DRUG INTERDICTION PROJECT

Statistics gathered by the Drug Enforcement Administration indicate that the amount of currency derived from the sale of illegal drugs and contraband being shipped by commercial modes of transportation or private delivery services is on the increase.

The City of St. Louis is served by an international airport, a major bus terminal, an Amtrack depot, four major interstate highways, two regional hubs for express parcel delivery service, numerous vehicle rental companies, a substantial number of travel agencies, a regional currency and communications wire service and twenty major hotels/motels. The existence of these facilities makes the City of St. Louis prone to illegal drug trafficking.

In 1993, an interdiction program was developed by the St. Louis Metropolitan Police Department to attempt to stop the flow of illegal drugs into and/or through the City of St. Louis. Through grant funding from the Missouri Department Public Safety, the Department established a drug interdiction unit. The unit initially focused its efforts on patrons of buses and trains, both passengers and freight shippers, who utilized these forms of transportation for illegal drug trafficking.

The Department extended its focus to businesses related to, as well as those who directly employ, the traditional transportation industries of the airlines, buses, trucking and trains.

Due to increased use of delivery services for illegal drug trafficking, the Interdiction Unit felt the need to communicate this potential problem to the management of the United Parcel Service and Federal Express (two major delivery services in the City of St. Louis). After an in depth research of the problem, the Interdiction Unit has requested permission to post informational posters which provide package profiling for service counter personnel. Additionally, authorization was sought to scan packages which fit the profile.

Another area of concern deals with the transportation of proceeds from illegal drug activity. Wire services may be used by drug traffickers to transfer large amounts of money. In response to this concern, the Interdiction Unit has contacted Western Union office managers and asked for cooperation in tracking large sums of currency which may have been deposited with them.

Different areas associated with the travel industry have also been notified by the Interdiction Unit.

First, travel agencies have been contacted and asked for cooperation in reporting individuals who frequently travel to source countries.

The next logical method of illegal drug trafficking through the travel industry is the vehicle rental agencies. Several vehicle rental companies have been contacted and made aware of the Interdiction Unit's goals. These companies have been asked to report any suspicious behavior known to be common to drug traffickers and to report vehicles which have been returned to their facility in a suspect way or condition.

Finally, the managers of major motels/hotels have been sent a letter explaining the interdiction project along with what to watch for and who to contact if a suspected drug trafficker is identified. A strong rapport has been established with hotel/motel personnel through follow up personal contacts. Additional training of security, housekeeping and desk personnel has been stressed.

A successful enhancement to the Drug Interdiction project was the acquisition of an Ion Mobility Spectrometer (IMS), namely, the Barringer Instruments' Ionscan. The Ionscan utilizes the IMS technology to detect and identify trace residues of illegal and dangerous drugs such as heroin, cocaine, methamphetamine and other newly designed substances. In fact, the Ionscan has the sensitivity to detect one billionth of a gram of an illicit drug from a person's clothing, skin, packages, etc. The Ionscan can be programmed to detect up to nine substances at one time. Furthermore, analysis time is less than five (5) seconds and it is easy to move from one location to another which allows for on-the spot analysis. Additionally, it is equipped with a remote sample collector, allowing samples to be collected from a variety of distant locations and then brought to the instrument for processing.

Identification of chemicals by IMS is made possible by a few basic principles:

- many chemical substances give off particles that are absorbed by or cling to the surface of the materials they come in contact with. These include clothing, luggage, skin, containers, paper and so forth;

- minute traces of these particles can be collected and converted into a vapor state (desorbed);

- these vapors can be ionized-converted to electrically charge molecules;

- when charged molecules "drift" in a controlled electric field, they move at different speeds, depending on their molecular structure and size. The characteristic speed at which ions move (ion mobility) provides a distinct "thumbprint" that identifies the original substance.

The Ionscan is proving to be a very valuable tool for the St. Louis Police Department's Drug Interdiction Program.

FAMILY VIOLENCE COUNCIL OF ST. LOUIS

Family violence does not occur as an isolated incident, but is part of an ongoing dynamic that adversely effects the entire family and indeed the entire nation. While there are multiple factors associated with violent behavior in the family, research has shown that the major contributing factor is a childhood history of abuse and neglect. Family violence is a learned behavior, passed on each generation, parent to child.

The costs of law enforcement, medical, social, mental health, educational and legal intervention associated with family violence are extremely high.

The St. Louis Police Department, along with other city and private agencies, realized and acknowledge that the cycle of violence confronting our community demanded a long term strategy to successfully impact this crisis.

The strategy devised was to develop a multi-discipline team of professionals, all of whom play a dominant role in the intervention of violence. This concept resulted in the formation of the Family Violence Council of St. Louis.

Simply stated, this council will coordinate a system of agencies and professions into an integrated resource. The collection of data and record keeping will improve to identify and address problems.

A coordinated approach toward funding, training, policy and future legislation will enhance the intervention strategies presently in operation. This holistic, integrated team approach will diminish the sometimes isolated and more parochial strategies that demand linkage for clarity and understanding.

The Family Violence Council of St. Louis will be incorporated under the laws of the State of Missouri and will consist of the following members:

Police Department	Circuit Attorney	Circuit Judge
Public Schools	Public Health	Mental Health
Probation/Parole	Private Business	Aldersperson
Mayor's Office	Medical Examiner	Child Abuse Victim Advocate
Elder Abuse Victim Advocate		Adult Abuse Victim Advocate

Adult Abuse Perpetrator Representative

The Family Violence Council of St. Louis will work to prevent family violence through informed discussion, education, advocacy, intervention and coordination of community resources. Further, it will promote a review by concerned agencies of current policies and protocols in order to establish an improved response to family violence.

METROPOLITAN POLICE DEPARTMENT CITY OF ST. LOUIS, MISSOURI

INDEX CRIME AND CALLS FOR SERVICE 1993 VS 1992: JANUARY THROUGH DECEMBER

	1992	1993	DIFFERENCE	PERCENT CHANGE

HEADLINE: Police put millions in little-known fund;
Treasurer's Account is unbudgeted and mostly unmonitored

BYLINE: KAREN DILLON; BOB LYNN, Staff Writers

BODY:

For years, the Kansas City Police Department has asked voters for higher taxes to put more officers on city streets and pay for other police programs.

At the same time, the city has given the department millions more in tax dollars to fight crime.

But there was one thing taxpayers and most city officials didn't know: All the time it was asking for more money, the Police Department was stockpiling millions of dollars in a little-known cache called the Treasurer's Account, or "T-account."

A 10-month investigation by The Kansas City Star reveals that the fund has grown into a virtual private checking account with a balance of \$ 7.7 million as of Dec. 31. That is above the \$ 91 million in budgeted funds the city provided the department.

Spending from the unbudgeted T-account – which has totaled more than \$ 16 million over the last two fiscal years – runs the gamut because it is practically unrestricted.

In numerous interviews, the Board of Police Commissioners and Police Chief Steven Bishop said the spending was justified.

The department uses the account, generated mostly by internal police services, to support police officers on the street as well as to pay for activities that appear to have only the slightest connection to fighting crime.

The Star found that the T-account has helped purchase patrol cars – as well as pay for retirement banquets complete with steak dinners and liquor that have cost \$ 20,000 or more each. It funds some salaries – as well as health club memberships and exercise equipment. It pays for computer operations – as well as trips to Las Vegas; Reno, Nev.; Orlando, Fla; Miami; Sun Valley, Idaho; San Francisco; and other destinations nationwide.

In eight years alone, the department spent more than \$ 115,000 from the T-account for coffee, fruit and flowers. Departmental picnics cost more than \$ 100,000. Souvenirs, such as coffee mugs and tie tacks, consumed \$ 56,000.

Spending from the fund over the last two years has averaged roughly 9 percent of all police expenditures.

Kansas City's five-member police board, appointed by the governor to oversee the Police Department and its money, defends its oversight of the T-account and all of its spending practices.

"I think the Board of Police Commissioners does an excellent job in allocating those funds," said board President Bailus Tate. "As long as we are spending it for the betterment of this community, then that's the charge that the board is given. "

But an officer who has worked in the department's financial division said T-account expenditures sometimes go beyond the community betterment Tate referred to.

"They use it for banquets, anything that is not budgeted," said the officer, who did not want his name used for fear of retribution. "If the chief wants a new chair for his office, he buys it. "

Another police officer who has worked in the financial division agreed.

"There's no doubt there was a lot of partying going on out of the fund," said the officer, who also asked not to be identified for the same reason. The officer said that has lessened in the last couple of years.

Bishop said picnics, banquets and other similar items bought through the T-account were necessary to promote "efficiency, loyalty and esprit de corps among department members. "

Even though the T-account is unbudgeted and the details of it are virtually unknown to more than a small number of people in or outside the Police Department, Bishop, Tate and Dale Close, the department's legal adviser, insist that the account is not secret.

"There's never been an attempt to not disclose it," Close said.

"It's absolutely, categorically incorrect that there's an attempt to hide it because it's all handled in open-meeting settings. "

Yet others disagree, including the police board's newest member, Dona Boley.

"I think there is a history of not talking about it," Boley said.

Minutes from meetings spanning several years reflect that the police board rarely specifically mentions the T-account when spending millions of dollars from it.

"For years it had been considered 'hush' when it comes to the T-account," acknowledged Maj. Gregory Mills, who was once the chief spokesman for Bishop and then Police Chief Larry Joiner.

When first asked about the T-account last summer, Mayor Emanuel Cleaver, an ex officio member of the police board, said he knew about its existence. But even Cleaver did not know its monthly balance or how much police spent from it.

Cleaver, however, issued a detailed statement at a police board meeting in September summarizing the T-account and lauding its use for "the community good" since the 1940s.

Other Kansas City mayors said they had no knowledge of the T-account. Richard L. Berkley and Charles B. Wheeler Jr., who also were members of the police board, said they were unaware of the T-account during their terms.

Another former mayor, Ilus W. Davis, who served on the police board from 1963 to 1971 and was appointed board president from 1973 to 1977, said he had never heard of the T-account.

Other elected officials said the secrecy of the T-account masks the department's true financial needs. It also siphons off tax dollars that could be spent on other city programs.

"That's the real sadness, that there is no accountability," said Kathryn Shields, a City Council member for eight years who in November was elected Jackson County executive.

Shields said she was unaware of the T-account's existence until a Star reporter told her a few months ago.

"We are funding them, so how do we make judgments on how much money they actually need if we don't know how much money they have?" Shields asked.

Where the money goes

Without question, Kansas Citians probably would approve much of what the police force has bought through the T-account.

The T-account gives the Police Department maximum flexibility to buy what it wants without city support. For example, when the city last year would not authorize \$ 300,000 to renovate the police training academy, the board reached into the T-account and paid for the work.

It also paid for improvements to the police firing range for \$ 71,000 and for installation of a modern security system at the city jail for \$ 133,000.

Of the more than \$ 800,000 the department spent for vehicles in the 1994 fiscal year, more than \$ 464,000 came from the T-account.

All are seemingly vital police programs and equipment, even if they don't show up in the city's budget documents.

But The Star's examination found millions of dollars in other purchases – some that seem to have little connection to fighting crime.

In eight years of spending examined by The Star , police tapped the T-account for:

\$ 1.2 million in travel and fees for conventions and seminars and college tuition. Police have spent about \$ 760,000 since 1992, including 101 trips to Orlando and 30 trips to Las Vegas and Reno.

And that amount is in addition to what the city already provides for travel.

More than \$ 430,000 for banquets, gifts, souvenirs, tickets and donations.

More than \$ 600,000 worth of furniture, including a \$ 1,500 Queen Anne sleeper-sofa and chairs for Bishop's office.

\$ 120,000 worth of health club memberships and exercise equipment.

In a written statement prepared by the police board's legal adviser, board members said:

"The outlay of funds for souvenir mugs, coasters, tie tacs, etc. is an inevitable cost of doing business in light of the international recognition of the Kansas City, Missouri Police Department. "

In a 1991 state audit of the Police Department, Auditor Margaret Kelly criticized the police board for spending public money for private purposes.

"Parties, retirement dinners and gifts, and flowers and fruit baskets could be more appropriately funded by the employees themselves or through a private employees' group or association not under the control of the (police board) and not involving the use of public funds," Kelly wrote.

The gifts to private groups, Kelly maintained, may violate the state constitution. The police board and its attorneys disagreed.

"All of the questioned expenditures were approved by senior management personnel," the board said in a response to Kelly. "The board and administration believe that it is the department's civic duty to be a part of the local events and to engage in 'community policing.' "

Spending priorities from the T-account seem to vary from police chief to police chief. Under Joiner, for instance, the department spent money for retirement banquets and numerous donations to private organizations such as the Boy Scouts. Under Bishop – who has done away with retirement banquets – travel, seminars and computer operations have been priorities for T-account spending.

Pendergast legacy

To understand the evolution of the T-account and Kansas City police finances, one must understand two things: city history and past political corruption.

Both have helped shape the unique way the department gets and spends its money.

Although half a century has passed since "Boss" Tom Pendergast died, his shadow still looms large over the Kansas City Police Department. In the 1930s, Pendergast used the department as his personal group of vigilantes whose basic purpose was to further his political ends. Corruption was rampant.

After Pendergast's indictment for income tax evasion, the state took control of the department in 1939. Gov. Lloyd C. Stark fired half the force, and the Missouri General Assembly forged a relationship that has endured to this day, unlike any other in America.

In both St. Louis and Kansas City, the city funds the police.

But the cities exercise little control over how their departments spend the money. That is the job of a Board of Police Commissioners appointed by and answerable to the governor.

By law, the cities must provide their police departments with at least 20 percent of their expected general fund revenue. The Kansas City Council in recent years has given even more. This fiscal year the council allocated an extra 14 percent a year to fight crime in a city now considered the fourth most violent in America, according to the most recent annual crime statistics compiled by the FBI.

"The 20 percent goes way back to the 1930s (and) we are so far beyond that," said Councilman Dan Cofran.

The current police budget is \$ 91 million for police operations.

The department is asking for \$ 94 million in fiscal 1995–96.

But that's where city involvement ends. Although some city officials receive reports from the police on where city money is spent, they have virtually no say over how that money is spent.

And they know even less about the T-account, which also emerged in 1939 after the state takeover. Then it took the form of a small petty cash account.

T-account records are only available since 1948. But they show that the account – which even then was unbudgeted – mainly supported the Police Department's baseball team and department picnics. For example, the picnic and recreation accounts amounted to nearly half the \$ 7,800 fund in 1948.

Today's T-account bears little resemblance to its ancestor. The balance from month to month averages \$ 7 million to \$ 9 million, with spending averaging \$ 750,000 a month, according to The Star's examination.

The newspaper was aided in its review by the accounting firm of Kennedy and Coe, a company based in Salina, Kan., that specializes in government audits. It was hired by The Star .

A part of the T-account money comes from government grants awarded to police for a variety of programs, including educating youths about drugs and gangs, combating drug trafficking, inspecting vehicles, and providing security for the Kansas City Housing Authority.

The rest is revenue from police activities such as providing computer services, selling unclaimed property, licensing private security officers, checking criminal backgrounds for employers, and charging citizens \$ 5 for accident reports.

All but one City Council member interviewed by The Star said they were unaware of the T-account and expressed surprise at how large it had become.

"Wow. How many officers would that hire? " said Judy Swope, 6th District councilwoman. "We don't know much of what goes on over there. It's been very hard to get information on the Police Department. "

Councilman Michael B. Hernandez agreed: "Access has never been a problem until budget time. Then a stone wall goes up. "

George Blackwood, chairman of the council's Finance Committee, was the only member aware of the fund, although he knew no spending details. He said he learned of the T-account through a department audit.

Verlyn Leiker, the former city finance director who was named deputy city manager last week, said the Finance Department is aware of the T-account and considers it when developing police budgets.

Leiker said, however, that he has never informed council members of it, saying, "that would (have to) come from the Police Department. "

Though a similar but smaller T-account exists in St. Louis, city officials know how much is in the fund because most of it is transferred to the city's general fund.

"Every six months we pay whatever is in the account to the city," said Joe Miklovic, director of budget and finance.

That amounts to about \$ 500,000 to \$ 600,000 annually, he said.

Members of Kansas City's police board contend the T-account money belongs to the Police Department.

"Because we have these funds coming from outside sources, it's not part of the budget that the city reviews," said Commissioner Jack Headley. "It's extra money, money that comes from other sources. You've got to remember we're a state agency and this is Police Department money. "

Board President Tate agreed.

"I don't see that the city has any special expertise that the police don't have as far as dealing with that account," Tate said, "so I would prefer that it stay right where it is. " Open and shut

If few people outside the police board know about the T-account, it's only because they aren't looking, board officials say.

"It's audited by the CPA firm that audits the department," said Close, the department's legal adviser. "It's audited by the state auditor, and the comments are public records. "

Tate added: "I'm not aware of it being held secret. I mean, you can go to the library every year since I've been a board member and the account is represented in there. "

Not exactly. On three occasions, reference librarians were unable to find the Police Department audits when contacted by telephone. In fact, during one call, the government documents librarian said she has never received the audits the department sends to the library.

When Star reporters tried to find the department audits for the last eight fiscal years, library employees directed them to three different floors before the audits finally were found – in the historical records section. Even then, some of the audits were missing. Two librarians said no one had ever asked to see them.

So what do the audits say? The 1993 Police Department audit in the library runs 15 pages, including a table of contents, an explanatory statement from the auditors and page after page of financial charts. It never mentions the T-account by name. It is difficult to distinguish the fund from city-budgeted money without previous knowledge of the account.

The department's annual report also is on file at the library, but the T-account is never mentioned in that 23-page document. In fact, the report contains a breakdown, complete with pie charts, on how the department receives and spends its money. T-account money is not included or even acknowledged.

Although Bishop allowed The Star, after a written request, to photocopy T-account records, some police board members have never seen as extensive a breakdown.

Many officers asked about the fund by The Star said they didn't know anything about it. Even a former high-ranking police official, who asked not to be identified, said he had only a vague knowledge of the fund.

"I'm not certain I know what the (Treasurer's) account is," he said. "There was a fund that money went into. We commonly referred to (it) as the education fund. It wasn't until my later years I learned this fund existed."

Adds Boley, the new police board member who has asked why the T-account has not been budgeted and discussed publicly: "I think it's just a long history of distrust between the Police Department and the City Council."

The city has repeatedly attempted to audit Police Department spending but has been rebuffed by police board concerns about city control.

"We have never tried to step away from an audit. We have tried to step away from the city taking control of the Police Department," Tate explained.

But City Auditor Mark Funkhouser maintains that his office reviews other agencies that receive city money and that are not managed or controlled by the city, such as Truman Medical Center and Metropolitan Ambulance Services Trust.

"I believe that having a police department that is accountable to the elected representatives of the citizens it serves is a reasonable idea," Funkhouser told the Citizens Budget Review Commission in 1993.

For at least 17 years various auditors have suggested that the T-account be budgeted. So far those suggestions have been ignored.

It began in 1977 when local businessman Frank Paxton Jr. became treasurer of the police board and discovered the T-account.

The fund, which Paxton said he was unaware of as a police board member until he became treasurer, contained a monthly balance of more than \$ 500,000 in the mid-'70s. He recalled it was a bookkeeper's nightmare, with many expenditures unaccounted for.

"I didn't feel comfortable taking that job as treasurer unless we had it looked over," said Paxton, who finally persuaded the police board and the department to allow then-state Auditor Thomas Keyes to review the T-account.

Paxton said police officials were worried about publicly disclosing the account's existence: "They thought the City Council would be critical, that they would say: 'You're getting money from other sources that doesn't show up in your accounting.' "

According to minutes from a 1978 board meeting, Keyes recommended the department "seriously consider combining" the city and T-account moneys in one formal budget.

Although T-account bookkeeping became a bit stricter, Paxton acknowledged the recommendation wasn't followed.

"I didn't need the criticism," Paxton explained. "Who needs criticism? So nobody said a word. "

Since then, state auditors and at times the department's own auditing firms have repeatedly suggested budgeting the T-account.

In 1991, a state audit again recommended that the police board "prepare budgets of revenues, resources and expenditures for the treasurer's funds. "

Tate wrote the board's response: "Agree. Budgets for T-accounts will be submitted to the board at the May meeting 1991. "

That, too, never was done.

Asked why, Tate said: "It's just that the board chose not to. I mean, you can either abide by it or not. "

But according to Kelly, the state auditor, the public should know how the Police Department is spending its money. Budgeting the T-account also would allow the city to better estimate how much money the department actually needs, she said.

"The city does budget a lot of its money to support the Police Department," Kelly said. "So the Police Department, in turn, needs to budget the treasurer's funds so that the city has an idea of what the additional needs will be. "

In response to the latest state audit in May, Tate again promised state auditors that the board would begin budgeting the T-account in fiscal year 1995-96.

But when the board met Nov. 22 and again Jan. 9 to discuss the department's budget proposal, the T-account wasn't on the agenda. A Jan. 3 memo to Bishop helped explain why. The memo said the department was having trouble projecting revenues and appropriations, making budgeting difficult.

It was not a new problem. The board has told the state auditor the same thing since 1991.

MISSOURI CRIME SUMMARY

**State
County
City**

**State of Missouri
Department of Public Safety**

Missouri State Highway Patrol
Post Office Box 568
Jefferson City, Missouri 65102

Prepared and issued by the
Missouri State Highway Patrol
Technical Services Bureau
Criminal Records and Identification Division

**1993
SUMMARY**

- Please Note -

Unfortunately we cannot state that all police agencies and sheriff departments within Missouri accurately record and submit crime statistics to the Missouri Crime Index; however, the statistics listed in this publication are based on the most accurate data currently available.

Attempts at comparison of crime figures between communities should not be made without first considering the individual crime factors present in each community. These crime influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that area.

Some crime factors which affect the volume and type of crime from place to place are:

- 1. Population density and size of locality and its surrounding area.**
- 2. Variations in composition of the population, particularly age structure.**
- 3. Stability of population with respect to residents' mobility and transient factors.**
- 4. Economic conditions, including job availability.**
- 5. Cultural conditions, such as educational, recreational, and religious characteristics.**
- 6. Climate.**
- 7. Effective strength of law enforcement agencies.**
- 8. Administrative and investigative emphasis of law enforcement.**
- 9. Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probation).**
- 10. Attitudes of citizenry toward crime.**
- 11. Crime reporting practices of citizenry.**

Domestic Violence Statistics

Section 479.261 RSMo. states in part:

The state highway patrol shall include in its voluntary system of reporting for compilation in the "Missouri Crime Index" all reported incidents of domestic violence, whether or not an arrest is made. All incidents shall be reported on forms provided by the highway patrol and in a manner prescribed by the patrol. For purposes of this subsection only, "domestic violence" shall be defined as any dispute arising between spouses, former spouses, persons related by blood or marriage, individuals who are presently residing together or have resided together in the past, and persons who have a child in common, regardless of whether they have been married or have resided together at any time.

ST.LOUIS: in Washington

All of this has been spurred by the sort of statistics and palpable sense of danger felt in communities big and small. From 1983-1993 in St. Louis, the percentage of aggravated assaults with firearms soared from 20.7 percent to 52.75 percent.

Bill George, a St. Louis crime technician, gestures to the scores of assault rifles leaning against the walls of his lab.

``Ten years ago we'd get one of those every four months. Now we get three or four a week,'' he said.

The consent-to-search forms are considered a powerful weapon. Risk said if a youngster is arrested with a gun, the officers will go to his home and those of his companions and try to conduct a search without the hassle of a warrant.

Risk claims 98 percent of the parents invite the officers in, and many are stunned when they find a gun under their kid's bed.

But experts raise questions about whether poor people really feel they have a choice when three uniformed officers, no matter how polite, show up at the door and ask to come in. And whether taking a gun away from a kid makes him a better person.

``It's one of those programs where it's so easy to do wrong, to create a coercive environment,'' Rosenfeld said.

Risk said his 20-member unit, which has an annual budget of \$833,873, seized 401 guns last year and a total of \$1.6 million in drugs, firearms and property.

In terms of pure numbers, that program pales in comparison with, for example, a four-week gun buy-back program in Toledo, Ohio, last year that cost less than \$33,000 and netted nearly 600 guns.

But research has shown that buy-back programs generally recover low-quality firearms usually turned in by law-abiding people not the kind of guns used in crimes.

Cities are desperately experimenting with aggressive and sometimes questionable alternatives to such programs, and nobody is sure yet what works.

``We need research,'' said criminologist Sherman. ``None of us has a very clear idea about how to stop crime.''

Some of the guns that the St. Louis Police Department has bought from citizens.

In St. Louis, Lining Up to Sell Guns to Police

By ISABEL WILKERSON

Special to The New York Times

ST. LOUIS, Oct. 21 — One by one, they show up at the front desk of police stations here: men, women, young fathers and great-grandmothers. Some are sharpshooters or gun dealers; some are ordinary citizens who can barely bring themselves to touch a gun.

Since Oct. 14, the St. Louis Police Department has been offering citizens money for their old rifles and revolvers, no questions asked. The response has surpassed the expectations of all. So far, the department has bought 5,111 guns in a selling frenzy that has at times created lines across police station parking lots and into the street. At one police station, officers had to direct

traffic because of the crowds. Similar programs in a handful of other cities have been successful, but not like this.

The idea is to offer a kind of amnesty program for gun owners, a chance to clear out gun cabinets, unload an unregistered gun or even get rid of a murder weapon. Indeed, some police officers say they do not want to know what the sellers might have done with the semiautomatic revolvers and sawed-off shotguns that are coming in.

Frustration and anger over a murder toll that has already surpassed the number of homicides for all of last year moved the department to call in citizen's arms. The guns will be melted down and used to create a sculpture in honor of Christopher Harris, a 9-year-old killed in a gunfight between two drug dealers. He was one of the 215 people killed so far this year. In 1990, 177 people were killed. Guns are used in about 70 percent of the city's homicides.

Citizens have rallied around the cause and are turning in weapons wrapped in blankets or stuffed in bowling bags with the sense that they are

In St. Louis, Lining Up to Sell Guns

Continued From Page A1

making the city a little safer.

"I want to get them off the street so the wrong people don't get hold of them," said a retired carpenter and target shooter, who refused to give his name and who brought in 10 small-caliber handguns. "I don't need these old clunkers."

Big Draw Is Money

But the primary lure for most people, the police and gun sellers say, is money. In the past week, the city has spent \$225,000 on the guns.

The program began by paying \$50 for any gun in any condition and quickly began to exhaust the money the department had originally set aside from the sale of property confiscated from drug dealers and from donations.

So, three days into the program, the department had to change the rules. It now buys guns only in working order and pays \$50 for handguns and \$25 for shotguns and rifles, which are considered to be less of a public threat because they are not easily concealed. Each station is limited to 75 purchases a day. Now the stations typically run out of money by noon.

The department has also limited to 10 the number of guns it will buy from one person at a time. Before the restriction, a few sellers believed to be gun dealers unloaded 100 or so guns, leaving with thousands of dollars each. The program is to end Nov. 13.

Glad to See It Go

Even with the changes, Joe Stanford, a 51-year-old custodian, walked away a happy man today, unable to hold back a grin as he inspected the \$25 voucher he got for an old single-gauge shotgun he hasn't picked up in years.

"I'm just glad to get it out of the house," he said.

Lena Hicks, a retired seamstress, crossed the Mississippi River from Illinois to sell a former boyfriend's semi-automatic pistol and a .22 caliber revolver she bought 20 years ago.

"I bought it to kill my husband," she said straight-faced and without emotion about the man she said beat her for years, "but God took him before I could. I don't need it now. I'll take Jesus to protect me."

Supporters see the program as a no-lose proposition. If it is not pulling in the automatic weapons favored by drug dealers, they argue, at least it is making a tiny dent in the number of guns on the street.

"You don't have the bad people turning in their 9-millimeter assault weapons for \$50 awards," said Sheldon Greenberg, associate director of the Police Executive Research Forum, a law enforcement research group in Washington. "But I say, show me an alternative. Imagine 5,000 guns off the street. That's better than any law we've got going."

Philadelphia and Pontiac, Mich., held similar programs in recent months, but yielded far fewer guns. San Francisco will begin buying citizen's guns on Wednesday.

Opponents say the program is easily corrupted by gun dealers selling old inventory at a profit, or by farmers from Illinois selling old shotguns, that have nothing to do with the shooting wave in the city. And they say it is, in effect, disarming law-abiding citizens who are most in need of protection.

Complaints From Some

"What is happening is a lot of people have gone out and bought old guns and sold them just so they could make money," said Dennis C. Eggers, regional director of the National Rifle Association. "I think we could do a lot more with the money."

General Laney, a Detroit gun dealer

Bill Stover for The New York Times

Raymond Prinzen, a St. Louis police officer, examining one of more than 5,000 firearms turned in during the city's program to buy guns.

The police round up more than 5,000 firearms with ease.

who is executive director of the Motor City Sportsman's Association, is one of those who unloaded a heap of guns in the Pontiac program.

"It's a good way to get rid of your junk," Mr. Laney said. "We made a killing off of them. We took in 50 pieces of junk. We used their money to promote our organization and train people on gun safety. No sane person would turn in a good gun. What's going to protect you best: 911 or a .38?"

Indeed, supporters fear that some of the sellers will do what Charles Hensley, a 28-year-old millwright, plans to do with the money: buy another gun. "I believe a man has a right to protect his family," Mr. Hensley said. "It's a shame that he has to."

That possibility is something the police say they have come to accept. They say they have bought guns from people they know are gun dealers or suspect are criminals. The department plans to research each gun's pedigree to determine if it can be tied to a crime, but officials say they know that, because the guns are being sold anonymously, they may be letting murderers and armed robbers walk away with \$50 and a promise that the smoking gun will be destroyed. One police officer said that

all they can do is "swallow hard and hand over the money."

The effects of these programs on homicides are unclear. Baltimore, which started one of the first and largest of such programs in 1974, collected more than 13,000 guns in three months, but, aside from a slight drop in shootings in the first few weeks that may have been attributable to anything from the publicity to coincidence, the program appeared to have little discernible effect on crime.

Advocates of gun control say that in a country where 3.7 million new guns go on sale to civilians every year, a direct drop in shootings may be too much to expect from cities that round up a few thousand guns.

"Clearly their heart is in the right place," said Bernard Horn, state legislative director for Handgun Control, an antigun lobbying group in Washington.

"The gesture may save somebody's life. But it is a gesture."

But many say that the program may at least mean that the guns turned in by law-abiding citizens cannot be used on them. "Now, nobody is going to steal grandma's gun," said Officer Raymond Prinzen, inspecting yet another gun from another anonymous seller.

"It is no longer stashed in the bottom drawer."

On a wider scale, the program is generating a sense of power in the powerless. "Community groups are coming alive in response to the Police Department," said Dr. Richard B. Rosenfeld, an assistant professor of criminology at the University of Missouri at St. Louis. "It is showing that you don't have to lie there and take it."

Office of Juvenile Justice and Delinquency Prevention

Missouri

MISSOURI

LOCATION: Kansas City, Missouri

PROJECT TITLE: Project Redirect

GRANTEE AGENCY: Missouri Department of Public Safety

PROJECT DURATION: 1992/1993

FUNDING AMOUNT: \$58,000

STATUS: Funds for this treatment program will be used for the comprehensive system of services for juvenile sex offenders for identification, assessment, referral and treatment. In addition funds will also be used to provide staff training, assessments, out-patient group treatment, individual and group counseling and parent education and support.

COMMENT FIELD: Comment: Existing program

POINT OF CONTACT: Mr. Robert Perry
13th Judicial Circuit
Juvenile Court Services
Boone County Court House
Columbia, Missouri 65201
(314) 886-4060

MISSOURI

LOCATION: St. Louis, Missouri

PROJECT TITLE: Y.O.U.R.S. Leadership Institute: A Rite Passage Concept to Male Adulthood

GRANTEE AGENCY: Missouri Department of Public Safety

PROJECT DURATION: Missouri Department of Public Safety

STATUS: The Walbridge Caring Communities is a collaborative effort of the Department of Education Secondary Education, Department of Social Services and the Department of Mental Health and is operated in the Walbridge School District. This prevention project proposes to address the needs of African-American youth at risk of gang involvement, criminal activity and out-of-home placement by providing them with education, support and alternative activities. Some of the project activities include: after school tutoring, counseling, youth assistants, self-awareness/inter-group skills development and athletic activities.

COMMENT FIELD: Excellent existing program
