CRIME AND PUNISHMENT: INCREASING ACCOUNTABILITY

INTRODUCTION

There is widespread consensus among criminologists, policy-makers and the general public that offenders should be "held accountable" for their crimes. In simple terms, accountability means that there should be some consequence or sanction (of unspecified severity) attached to a criminal act. According to classical criminological theory, sanctions should be imposed swiftly and consistently in order to deter criminal conduct. Sanctions ought to be proportional to the crime committed, and the certainty rather than the severity of the punishment is thought to be the key to deterrence.

There appears to be a perception that offenders are not being held accountable in today's criminal justice system. In overall terms, the belief that crime often goes unpunished is consistent with the available data. For example, there were over 900,000 reported crimes in Pennsylvania during 1992, and only about 35,000 combined commitments to jails and prisons (excluding parole violators). At the risk of oversimplifying this data, one could state that only about one crime in 25 results in incarceration.

Of course, courts impose punishments in many ways other than through incarceration: probation, fines, and intermediate punishments such as house arrest. But even if punishment is defined as the imposition of any formal sanction, the majority of crimes still go unpunished. Historically, efforts to make the criminal justice system more

A Justice Perspective is a new publication series designed to complement our *Justice Analyst* series. The *Justice Analyst* has been our primary vehicle to publicize original research or to provide criminal justice information and data which are not available elsewhere. *A Justice Perspective* will play a different role in that our intent is to develop a perspective on particular criminal justice topics by using information that is already widely available from various sources.

This first issue of *A Justice Perspective* focuses on offender accountability for their crimes. The principal author of this report is Dr. Henry Southemier of our Bureau of Statistics and Policy Research. We are interested in knowing your reactions to this report and would be pleased to answer any questions. Also, any suggestions of topics for future *Justice Perspective* reports are welcome. punitive generally focus on the "back end" of the system. Examples are mandatory sentences to ensure that more convicted offenders do time and longer prison sentences for those who are incarcerated. However, closer examination of the entire criminal justice process reveals that most crimes go unpunished due to problems at the "front end" of the system, specifically low crime reporting and crime clearance rates. The data presented in this article demonstrate that far more cases exit the criminal justice system due to lack of citizen involvement than to leniency on the part of the courts.

CRIME REPORTING

According to data from the National Crime Victimization Survey (NCVS), only 39% of all crimes which occurred in the U.S. during 1992 were reported to the police. Violent crimes were more likely to be reported than personal thefts (50% compared to 30%). Assuming that national reporting rates are representative of Pennsylvania, it is likely that the 953,462 "crimes reported to the police" in 1992 represent only about one third of all crimes which actually occurred in the state.

CRIME CLEARANCE

Even after a crime is reported to the police, the likelihood that it will be cleared, or solved, is only about 25% for all Part I crimes combined. The clearance rate for violent crimes (50%) is much higher than that for property crimes (22%), primarily because violent crime victims often see the offender face-to-face while victims of property crimes rarely see the crime occur. There are many other factors which influence the clearance rate; some of these are discussed later in this article.

Only after a crime has occurred, been reported and been cleared by arrest does a case proceed to the court processing stage. At this point, a decision is made to formally prosecute the case, divert it through the Accelerated Rehabilitative Disposition (ARD) process or to dismiss the case. Cases which are formally prosecuted may result in convictions (through trials or guilty pleas) or acquittals. Following a conviction, a judge orders a sentence which may be served in the community (generally probation or fines) or a sentence to incarceration at the county or state level.

THE FUNNEL EFFECT

The analogy of a funnel--wide at the top and narrow at the bottom--is often used to describe criminal justice processing. Thousands of "crimes occurring" enter the top of the funnel. Many crimes are screened out as cases proceed through the system, so that relatively few offenders exit the bottom of the funnel having received a sanction or punishment. However, it is important to examine exactly how and when cases exit the system. A schematic illustration of this funnel effect is presented in Figure 1, which depicts typical case processing of 1,000 reported crimes in Pennsylvania based on data from recent years.

The left side of Figure 1 shows case processing results for 1,000 reported Part I violent crimes. Half of the

reported violent crime cases are cleared by arrest, and just under half (49%) of the arrestees are formally prosecuted. Of the 244 formally processed cases, 214 (88%) result in convictions. The "incarceration rate" for Part I violent crimes is 84% (180 of the 214 convictions result in incarceration). Case processing patterns for Part I property crimes are quite different from those for violent crimes, beginning with a much lower clearance rate of 22%. Sixty-four percent of the property cases are formally prosecuted. Virtually all (98%) prosecuted cases result in a conviction, but only 52% of the convictions result in incarceration.

The "bottom line" interpretation of Figure 1 is that only 18% (180 of 1,000) of reported violent crimes and 7.2% (72 of 1,000) of reported property crimes result in incarceration. However, the likelihood of incarceration per crime committed is reduced even further if we factor in crime reporting rates. Assuming a 50% reporting rate, the ultimate likelihood of incarceration is reduced by half from the figures above: 9% for violent and 3.6% for property crimes.

COURT PROCESSING AND THE IMPOSITION OF PUNISHMENTS

Crime Reporting

Given that less than half of all crimes are even reported to police, unreported crime is the single most important cause of "unpunished crimes." According to the National Crime Victim Survey, the most common reason for not reporting crimes is that the offender was unsuccessful or that the object of the crime was recovered. Many other crimes are not reported because the victim felt that the police would not want to be bothered, the police were inefficient, ineffective or biased, or because reporting was too inconvenient or time-consuming.

Crime Clearance

After non-reporting, the biggest cause of unpunished crimes is uncleared or unsolved offenses. While Figure 1

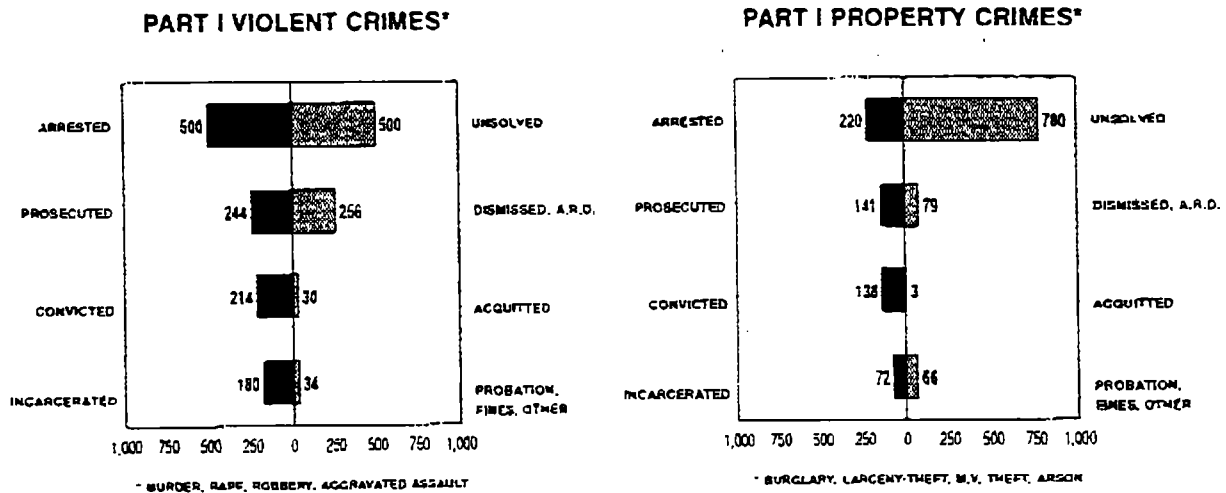

depicts clearance rates for the Violent Crime and Property Crime "indexes," a clearer pattern emerges when the Part I crimes are considered individually. This information is presented in Table 1, which was produced from the same data underlying Figure 1. Consider first the four offenses which comprise the Violent Crime index: murder, rape, robbery and aggravated assault. Murder is the most-often cleared crime at 80%. The clearance rates for rape and aggravated assault are about double the 32% rate for robbery. This variation is probably attributable to the fact that robbery is typically a crime among strangers while perpetrators of the other three offenses are often known to their victims. (In 1992, about 60% of all murder victims in Pennsylvania were related to or acquaintances of the offender.) The higher clearance rate for murders also probably reflects the very high priority which police assign to these cases.

Case processing data for two categories of property crime are included in Table 1: burglary and theft. The clearance rates for these two offense types are only 17% and 23%, respectively. Unlike violent crimes, property crime victims rarely see the offenders and the victim may not even realize a crime has been committed until hours or days have elapsed. Both these factors make property crimes more difficult to solve.

Court Processing: Prosecution

A fairly large proportion of cases exit the criminal justice system when a decision is made not to formally prosecute. About 10% of cases processed involving Part I crimes and about one fourth of cases involving Part II crimes result in dispositions of ARD, which is not a formal conviction. However, ARD cases should not be considered "unpunished crimes" since the disposition normally involves sanctions. An ARD disposition does not preclude formal prosecution at a later date if the defendant fails to conform to the specific conditions imposed.

 b. Defendants who receive Accelerated Rehabilitative Dispositions (ARD) agree to undergo a period of treatment and/or probation for up to two years. ARD defendants may also be required to pay court costs and/or restitution. ARD is rarely offered to defendants charged with Part I crimes, comprising less than 7% of all dispositions for every Part I crime except Theft (18% of processed cases result in ARD).

Sources: 1992 UCR data for arrest/clearance rates. 1991 AOPC data otherwise.

Other cases not formally prosecuted result in dismissals. Cases may be dismissed because the prosecutor deems the evidence too weak to sustain a conviction, as part of a plea bargain in which convictions are obtained on other offenses, or for other reasons. The wishes and behavior of the victim also influence decisions not to prosecute. Cases may be dismissed because the victim decides not to proceed further, or simply fails to attend one or more hearings. Among the four violent index crimes, the prosecution rate is lowest (40% of those arrested) for aggravated assault. Assault cases may be dismissed because some are fights among acquaintances who decide not to prosecute, or conversely because the victim fears that prosecution may provoke retaliation from the defendant (whether an acquaintance or stranger).

Between 50% and 60% of those arrested for rapes and robberies are prosecuted. The prosecution rate for homicide is 87%. About two thirds of those arrested for property index crimes are prosecuted.

Court Processing: Conviction and Sentencing

Conviction rates in Pennsylvania are high--the system is definitely tough on crime at this stage. Over 85% of the convictions for Part I crimes result from negotiated guilty pleas rather than from guilty verdicts at trial. About one fourth (23%) of all trials for Part I offenses result in acquittal. However, the acquittal rate is much higher for trials involving violent (36%) rather than property (13%) index crimes.

Sentencing decisions in Pennsylvania are governed by the state's sentencing guidelines, which consider both the nature of the offense and the offender's prior record in determining the appropriate sentence range. The "incarceration rate" is defined as the percent of convicted offenders sentenced to incarceration in either a state or county institution, regardless of the length of term imposed. The incarceration rate for all Part I crimes

is 59%. Not surprisingly, the incarceration rate is higher for violent (84%) than for property (52%) crimes.

INCREASING THE LIKELIHOOD OF PUNISHMENT

The information reviewed thus far reveals that the majority of cases which exit the system are lost near the front end due to non-reporting by victims or non-clearance by police. Once an arrest is made and the case moves to the court processing stage (the back end), the likelihood of conviction and punishment is high. The greatest potential for increasing offender accountability lies in the front end of the system. Increasing the clearance rate by 10% will have much more impact than increasing the conviction rate by 10%, for example. Crime prevention and community policing programs have the potential to impact on crime reporting and clearance rates. These programs rely heavily on citizen and victim involvement, and on changing how the police function in and are perceived by the community.

Crime Reporting

Reasons why many crimes go unreported were discussed earlier. A primary reason is that the crime was unsuccessful (e.g., an attempted robbery) or the object of the crime was recovered. While it is understandable that a person might choose not to report an incident in which no property loss or physical harm was sustained, attempted crimes carry virtually the same potential penalties as completed ones. Failures to report attempted crimes may contribute to other offenses, since it is likely that unsuccessful criminals will simply target other victims until they obtain the object of their criminal efforts. Reporting attempted crimes may provide police with information which helps them solve open cases and apprehend active offenders.

Other reasons for not reporting crimes relate to residents' perception of police (ineffective, biased, too busy) or the reporting process (too inconvenient).

These perceptions, if false, are probably correctable through public information programs. If these perceived problems do exist, they are also subject to corrective action. For example, the crime reporting process is facilitated by the use of decentralized police "mini-stations" which enable victims to report crimes without traveling to a centralized police headquarters.

Crime Clearance

As with crime reporting, victim (and witness) involvement and follow-up are crucial to the police investigative process. Victims and witnesses must be available to give statements and to attend line-ups and court hearings, among other things. Favorable perceptions of local police would tend to increase citizen participation in these activities, and thus increase clearance rates. Improving the image of police is a primary goal of many community policing programs. And it is well documented that residents of areas with community policing provide the police with valuable, and often unsolicited, information on neighborhood crime.

Crime prevention efforts can also contribute to higher crime clearance rates. Residents in many areas which have implemented community policing routinely note suspicious activities or persons in their neighborhood, sometimes even recording car license numbers. Information gathered in this manner may be valuable to police in the event that a crime is found to have occurred around the time and location of this "resident surveillance."

Resident efforts in the form of "target hardening" may also increase clearance rates, especially for property crimes. For example, a common crime prevention strategy advises people to engrave their social security number or other identifier on commonly-stolen household items such as electronic equipment. This practice could help solve more crimes, for instance by linking an offender found in possession of stolen items to the victim. Police departments are also adopting new

technologies which should strengthen their crime fighting capabilities. An example is the Automated Fingerprint Identification System (AFIS), which quickly compares latent fingerprints from a crime scene to fingerprints in a large, automated database.

SUMMARY

This article described the flow of cases through the criminal justice process, from the actual occurrence of a crime to the eventual punishment of a relatively small proportion of all offenders. Analysis of recent law enforcement and case processing data indicated that the likelihood of punishment is relatively high for crimes which are reported, cleared by arrest and referred to court. However, due to low crime reporting and clearance rates, the vast majority of offenses do not result in an arrest. Theories developed by criminologists over 100 years ago maintain that punishment must be certain, but not necessarily severe, in order to deter crime.

Ironically, recent efforts to make the criminal justice system more punitive have relied on the imposition of more

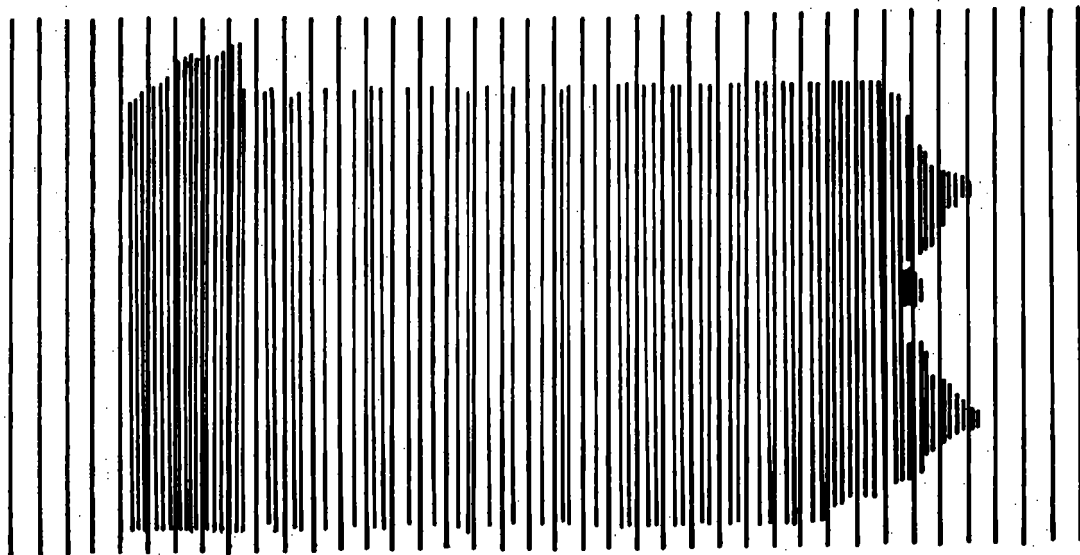

severe punishments for the small proportion of offenders who are caught and processed, rather than on increasing the proportion of offenders who are apprehended. Harsher punishments may keep some offenders off the streets and thus reduce their offending. But severe sanctions are not likely to deter the larger number of offenders who know from experience that their likelihood of arrest for a given crime is only about 10% (given prevailing crime reporting and clearance rates).

The data also show that there is much more potential to increase crime reporting and clearance rates, which are below 50%, than to increase conviction and incarceration rates, which are already near 90% for serious violent crimes. Since the decision to report a crime is a completely discretionary one on the part of the victim, there is theoretically no reason why the reporting rate could not approach 100%. The crime clearance rate is affected by many factors, notably police resources. But the clearance rate, like the reporting rate, could also be improved through greater involvement and vigilance on the part

of the civilian population. Many of the specific strategies for improvement discussed in this article fall under the areas of community policing and crime prevention.

The PCCD has supported and funded community policing and crime prevention programs for a number of years and is currently engaged in an effort to evaluate them. Preliminary reports from jurisdictions employing these strategies are positive. Police have established better relations with local residents, who in turn are more likely to report suspicious activity. When community policing is initiated in an area, levels of reported crime may well increase in the short run as residents gain confidence in the police. Such increases should be considered in a positive light, since they likely indicate more community involvement rather than an actual increase in crime. In the long run, an increased willingness to report crime will assist the police in their law enforcement role, increase the crime clearance rate and contribute to greater accountability throughout the criminal justice system.

This Annual Uniform Crime Report portrays the nature, volume and extent of crime in the Commonwealth of Pennsylvania during 1993. All statistics presented in this publication have been accumulated through direct report submission by each law enforcement agency participating in the Pennsylvania Uniform Crime Reporting Program. Many law enforcement agencies have taken advantage of existing computer technology to compile and submit crime data to our State Program. We encourage all agencies to utilize this proactive approach to make the State Program more efficient. In turn, our State Program has furnished data to the Federal Bureau of Investigation for tabulation of the national crime figures and inclusion in their annual publication, Crime in the United States.

The report will assist law enforcement officers in adjusting their efforts in crime control and prevention. It also provides valuable information for other interested agencies, both public and private, which have similar goals. We sincerely hope that it will also create an awareness within the general public that crime exists as a serious problem within our communities and requires attention from every segment of society. Criminal activity cannot be eliminated by law enforcement agencies acting alone, it requires the efforts of every law-abiding citizen as well.

Pennsylvania is working to implement the National Incident-Based Reporting System (NIBRS). NIBRS is the next generation of the Uniform Crime Report. This initiative will eventually address the need for greater detail and analysis in addressing the crime problem.

While criminal offenses and related clearances by individual jurisdictions are reported in the appendages of this report, these listings are not intended to show who investigates the crimes or clears the offenses. The purpose of these listings is to aid in the determination of those factors which are indicative of the particular crime problems of a given area.

This report has been made possible through the concerted efforts of the many law enforcement agencies of the Commonwealth who consistently submitted the essential data. Recognition is given to the Pennsylvania Chiefs of Police Association which has constantly advocated and supported the concept of a unified reporting program for our Commonwealth. Such effort and support is sincerely and deeply appreciated and it is on behalf of these dedicated public servants that this Annual Uniform Crime Report is presented.

Respectfully submitted,

INTRODUCTION

THE PROGRAM

The Pennsylvania Uniform Crime Reporting (UCR) Program was established as a result of the Uniform Criminal Statistics Act of 1970 (71 P.S. 307.8 and 307.9). Powers and duties concerning criminal statistics were given to the Office of Attorney General. In October 1973, the Uniform Crime Reporting duties set forth in the Act were transferred to the Commissioner of the Pennsylvania State Police by Reorganization Plan No. 7 of 1973 (71 P.S. 755-7).

The counterpart of the Pennsylvania UCR Program is the National UCR Program under the direction of the Federal Bureau of Investigation (FBI). This national program is the result of a need for nationwide and uniform compilation of law enforcement data. Uniform Crime Reports, developed by a committee of the International Association of Chiefs of Police (IACP), were first collected in 1930. The IACP continues to serve in an advisory capacity to the FBI in its operation of the National program. In our State program, the UCR Committee of the Pennsylvania Chiefs of Police Association was instrumental in the development of the program.

The primary objectives of the Pennsylvania UCR Program are to inform the Governor, Legislature, other governmental officials and the public as to the nature of the crime problem in Pennsylvania and to provide law enforcement administrators with criminal statistics for administrative and operational purposes.

The National UCR Program is evolving. A new program, the National Incident-Based Reporting System (NIBRS) is now being implemented. NIBRS is intended to overcome the inherent weaknesses of the current summary-based system. NIBRS involves the transmission of data on an incident-by-incident basis. This will yield a greater degree of detail in reporting and the ability to link different aspects of crimes. Determinations such as victim-offender relationships and the involvement of drugs or alcohol in crimes can then be made.

The Pennsylvania NIBRS Program is currently being implemented. In cooperation with the Pennsylvania Commission on Crime and Delinquency, the Pennsylvania UCR Program is assisting local law enforcement agencies in their efforts to automate their records to facilitate participation in NIBRS. The total conversion to NIBRS is still several years away. In the interim, data from agencies which choose to contribute in the NIBRS format will be merged with the summary system to produce the Crime in Pennsylvania report.

There are many factors which will affect the type and volume of crime that occurs from place to place. Some of these are listed in "Crime in the United States, Uniform Crime Reports, 1993" page V, and are reprinted on the following page.

CRIME FACTORS

Population density and degree of urbanization of locality and its surrounding area.
Variations in composition of the population, particularly youth concentration.
Stability of population with respect of residents' mobility, commuting patterns and transient factors.
Modes of transportation and highway system.
Economic conditions, including median income, destitution and job availability.
Cultural conditions, such as educational, recreational and religious characteristics.
Family conditions with respect to divorce and family cohesiveness.
Climate.
Effective strength of law enforcement agencies.
Administrative and investigative emphases of law enforcement.
Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional and probational).
Attitudes of citizenry toward crime.
Crime reporting practices of citizenry.

CLASSIFICATION OF OFFENSES

Uniformity in reporting under the Pennsylvania system is based upon the proper classifications of offenses by police. The adoption of the Federal system of reporting included the utilization of the offense classifications of that system. Law enforcement personnel in this State have made accurate application of those classifications in the reports submitted to the program.

In view of the need for compatibility with the Federal system, the categories of offense classification employed in this program remain the same as those employed on the national level. Care must be taken by police officers in classifying because of the conflicts between this system and the Pennsylvania Crimes Code.

Part I Offenses

Offense data consists of information that has been extracted from reports of crimes that have come to the attention of Pennsylvania law enforcement agencies. In general, Part I crimes are those serious crimes that are usually reported to law enforcement agencies. It consists of the following offenses:

(1) Criminal Homicide

- 1a. Murder and Nonnegligent Manslaughter - The unlawful, nonnegligent killing of a human being, by another.
General rule - Any death due to a fight, argument, quarrel, assault or commission of a crime.
- 1b. Manslaughter by Negligence - The accidental killing of a human being, by another.
General Rule - The killing may result from the

commission of an unlawful act or from a lawful act performed with gross negligence. Deaths resulting from traffic accidents are not included in this classification.

(2) Forcible Rape

- 2a. Rape by Force - The carnal knowledge of a female forcibly against her will.
General rule - Forcible rape of a female, but excluding statutory rape or other sex offenses
- 2b. Assault to Rape - Attempts - All assaults and attempts to rape.

(3) Robbery - The taking or attempting to take anything of value from the care, custody or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

- 3a. Firearm - Any firearm used as a weapon or employed as a means of force to threaten the victim or put him in fear.
- 3b. Knife or Cutting Instrument - Any knife, broken bottle, razor or other cutting instrument employed as a weapon or as a means of force to threaten the victim or put him in fear.
- 3c. Other Dangerous Weapon - Any club, acid, explosive, brass knuckles, or other dangerous weapon employed as a means of force to threaten the victim or put him in fear.
- 3d. Strong Arm - Mugging, yokings and similar offenses where no weapon is used, but strong-arm tactics are employed to deprive a victim of his property. This is limited to personal weapons such as hands, fists, feet, teeth, etc.

(4) Assault - An assault is an unlawful attack by one person upon another.
General rule - All assaults will be classified in the following categories, excluding assaults with intent to rob or rape.

- 4a. Gun - All assaults and attempted assaults involving the use of any type of firearm. (Revolvers, automatic pistols, shotguns, zip guns, rifles, pellet guns, etc.)
- 4b. Knife or Cutting Instrument - All assaults and attempted assaults involving the use of cutting or stabbing objects. (Knife, razor, hatchet, axe, cleaver, scissors, glass, broken bottle, dagger, ice pick, etc.)

CALCULATION OF RATES

The Uniform Crime Reporting Program provides data for police administrators to measure local problems, but to facilitate this function it is sometimes necessary to convert the data into rates or percentages. Simple formulas are presented to assist in these computations.

Crime Rates

One of the most useful crime statistics is the crime rate which is the number of offenses per 100,000 persons. This rate can be calculated regardless of the number of inhabitants in your jurisdiction. To compute rates, multiply the number of offenses by 100,000 then divide your jurisdiction's population into that answer.

Example:

$$\frac{182 \text{ robberies} \times 100,000}{50,000 \text{ population}} = \frac{18,200,000}{50,000} = 364$$

Your robbery rate would be 364 per 100,000 population.

Clearance Rates

The percentage of crimes cleared by arrest is obtained by dividing the number of offenses cleared by the number of actual offenses known. This answer is then multiplied by 100.

$$\frac{147 \text{ Robberies cleared}}{364 \text{ Robberies known}} = 0.404 \times 100 = 40.4\%$$

Your percentage of clearance for robbery is 40.4 percent.

Law Enforcement Employee Rates

These rates are conventionally expressed as the number of employees per 1,000 population. The rate is computed by multiplying the number of employees by 1,000 then dividing the population into that answer.

Example:

$$\frac{102 \text{ employees} \times 1,000}{50,000 \text{ population}} = \frac{102,000}{50,000} = 2.04$$

Your rate is 2.04 employees per 1,000 population.

SUMMARY OF CRIME IN PENNSYLVANIA, 1993

There were 929,908 actual crimes of all types reported to the UCR Program by Pennsylvania law enforcement agencies. This total represents a rate of 7,743.4 crimes per 100,000 estimated population, a decrease of 2.5 percent from last year's total of 953,462 actual crimes.

Crime Index offenses are considered to be both most serious and most likely to be reported and are used nationally as the standard base for comparisons. They include: murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft and arson. Manslaughter by negligence is a Part I crime, but is not considered as part of the Crime Index.

This year, 380,772 Crime Index offenses were reported and confirmed by Pennsylvania police after investigation. Actually, 388,047 Crime Index offenses were reported, but 1.9 percent or 7,275 were unfounded following investigation, ranging from 0.9 percent unfounded for robbery to 10.9 percent unfounded for rape. Crime Index offenses decreased by 3.3 percent from last year's total of 393,645 Crime Index offenses. The Crime Index rate this year was 3,170.7.

In addition, 549,094 Part II Offenses were reported with a rate of 4,572.4 per 100,000 population. This is a decrease of 1.9 percent from the 559,780 Part II Offenses reported the previous year. Part II Offenses include: other assaults, forgery and counterfeiting, fraud, embezzlement, stolen property, vandalism, weapons, prostitution, other sex offenses, drug abuse violations, gambling, offenses against the family, driving under the influence, liquor law violations, drunkenness, disorderly conduct, vagrancy and all other offenses.

This year, 45.3 percent of all offenses were cleared; 24.8 percent of the Crime Index offenses and 59.6 percent of all Part II Offenses.

The following table summarized the combined Part I and Part II Offense totals.

Crime Reported to Police, 1993

Offense Category	Offenses	Percent Distribution	Rate per 100,000 Population	Percent Change from 1992	Clearances	Percent Cleared
All Categories	929,908	100.0	7,743.5	-2.5	421,446	45.3
Part I Offenses (Crime Index Offenses)	380,814	41.0	3,171.1	-3.3	94,411	24.8

NOTE: In some tables of this report, individual percentages, rates, etc., may not equal totals because of rounding.

Pennsylvania is an urban state, with 85.2 percent of its population living within Metropolitan Statistical Areas (MSA).^{*} This year 91.3 percent of the Crime Index offenses and 87.6 percent of Part II Offenses occurred within MSA, as summarized in the following table:

Crimes Reported by Population Grouping, 1993

Population Group	Crime Index Offenses			Part II Offenses		
	Offenses	Rate per 100,000 Population	Percent Distribution	Offenses	Rate per 100,000 Population	Percent Distribution
State Total	380,772	3,170.7	100.0	549,094	4,572.4	100.0
Met. Stat. Areas (MSA)	(347,744)	(3,400.6)	(91.3)	(480,732)	(4,701.1)	(87.6)
MSA Core Cities	180,320	6,130.0	47.4	187,427	6,371.6	34.1
MSA Suburban Jurisdictions	167,424	2,298.4	44.0	293,305	4,026.5	53.4
Non-MSA Jurisdictions	17,203	2,376.2	4.5	40,279	5,563.7	7.3
Rural Jurisdictions	15,825	1,504.3	4.2	28,083	2,669.5	5.1

It should be noted that the crime rate of core city jurisdictions in MSA's continued to be much higher than the suburban jurisdictions. The volume of offenses was higher in suburban jurisdictions than in the core jurisdictions and was also the highest among all population groups.

NOTE: No attempt is made throughout this report to correct for the influx of seasonal, temporary residents and tourists during the year. Crime rates are based upon the permanent population.

* A Metropolitan Statistical Area is composed of an entire county or group of counties with at least one core city, with the whole area meeting criteria of certain metropolitan characteristics established by the United States Bureau of the Census.

ARRESTS

Arrests are primarily a measure of success in police investigation in relation to the criminal offenses taking place within a community. Arrest practices, policies and enforcement emphasis will vary from place to place and from time to time within a community. Arrests do, however, provide a useful indicator as to the age, sex and race of persons involved in criminal acts, especially for crimes which have high solution rates.

A total of 419,347 arrests were made in Pennsylvania, a 2.5 percent decrease from last year. As indicated in the table below, Part II Offense arrests totaled 326,635 or 77.9 percent of all arrests, a 2.6 percent decrease from last year. Part I Offense arrests numbered 92,712 or 22.1 percent of all arrests, decreasing by 2.2 percent.

Arrests by Offense Category, 1993

Offense Category	Arrests	Percent Distribution	Rate per 100,000 Population	Percent Change from 1992
All Categories	419,347	100.0	3,491.9	-2.5
Part I Offenses (Crime Index Offenses)	92,712 (92,629)	22.1 (22.1)	772.0 (771.3)	-2.2 (-2.2)
Part II Offenses	326,635	77.9	2,719.9	-2.6

As outlined in Tables 12, 13 and 14, 80.8 percent or 338,940 arrestees were male, and 19.2 percent or 80,407 arrestees were female. 72.3 percent or 303,213 were White, 27.4 percent or 114,715 were Black, and 0.3 percent or 1,419 were Other Races. 22.9 percent or 96,003 of the arrestees were under 18 years old, and 52.8 percent or 221,512 of the arrestees were under 25 years old. Male arrestees decreased by 2.8 percent and arrests of Whites decreased by 2.4 percent, while juvenile arrests increased by 0.1 percent.

Juvenile arrestees were disposed of as follows: 23.7 percent or 22,722 were handled within the police department and released; 39.7 percent or 38,142 were sent to Juvenile Court or the Juvenile Court Probation Officer; 0.7 percent or 678 were referred to welfare agencies; 0.6 percent or 567 were referred to other police agencies; and 35.3 percent or 33,894 were referred to criminal or adult court, usually the district magistrate for specified petty crimes as underage drinking, shoplifting, etc.

Adults arrested and counted for UCR purposes in Pennsylvania are those that are formally charged with a crime. Crime suspects who are questioned and released are not counted as arrested. A juvenile is counted as arrested when circumstances are such that if he or she were an adult an arrest would be tallied.

ETHNIC INTIMIDATION AND HATE CRIME DATA

Ethnic intimidation is defined by 18 Pa. C.S. 2710, as any crime against the person or an arson, criminal mischief and other property destruction (except institutional vandalism), criminal trespass or harassment by communication or address that is committed "...with malicious intention toward the race, color, religion or national origin of another...." Crimes of this type are required reporting for all law enforcement agencies in the Commonwealth. Additionally, the Federal Hate Crime Statistics Act of 1990 expands the data collection requirements beyond the parameters of the Ethnic Intimidation Act. Federal Hate Crime Statistics include sexual orientation as a bias motivation, which is not required by State law.

The following charts depict the distribution of reported ethnic intimidation and hate crime data by victim, offender, type of institution, weapon, injury, property damage, UCR classification, bias motivation and location.

CRIME INDEX OFFENSES

DEFINITION: Crime Index offenses are crimes that are considered by law enforcement to be the most serious crimes that readily come to the attention of police and occur with a frequency great enough to be reported as a separate category. Crime Index offenses are used nationally as a basis for comparison of criminal activity.

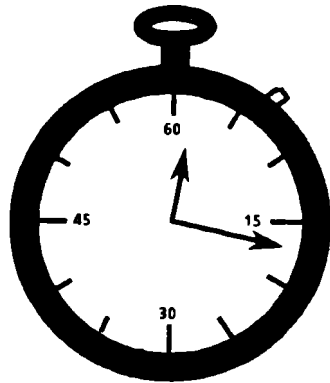

Crime Index Offenses	1989	1990	1991	1992	1993

SUMMARY

There were 380,772 Crime Index offenses reported to Pennsylvania police departments, an average of 1,043 each day or one every one minute and 23 seconds. This is a decrease of 3.3 percent from the 393,645 reported last year. The Crime Index rate was 3,170.7.

This year 94,369 or 24.8 percent of the Crime Index offenses were cleared, a decrease from the 25.4 percent clearance rate achieved last year. Murder had the highest clearance rate at 76.0 percent while motor vehicle theft with a 16.8 percent clearance rate was lowest.

CRIME INDEX DISTRIBUTION BY COMMON HUMAN SERVICE REGIONS

In 1967, the Governor's Office proclaimed six "Common Human Service Regions" (CHSR) in Pennsylvania, consisting of generally comparative counties in terms of interrelated needs and populations. See Figure D. Accordingly, the tables in this report are so organized, with the individual counties being identified alphabetically within the CHSRs.

These regions are considered "standardized" for Commonwealth planning and reporting purposes. They should not be confused with Metropolitan Statistical Areas (MSA), although the counties in the Southeast CHSR coincide with the Pennsylvania area of the Philadelphia MSA.

The following table summarizes the distribution of Crime Index offenses among these regions.

CRIME INDEX DISTRIBUTION BY METROPOLITAN STATISTICAL AREAS (MSA)

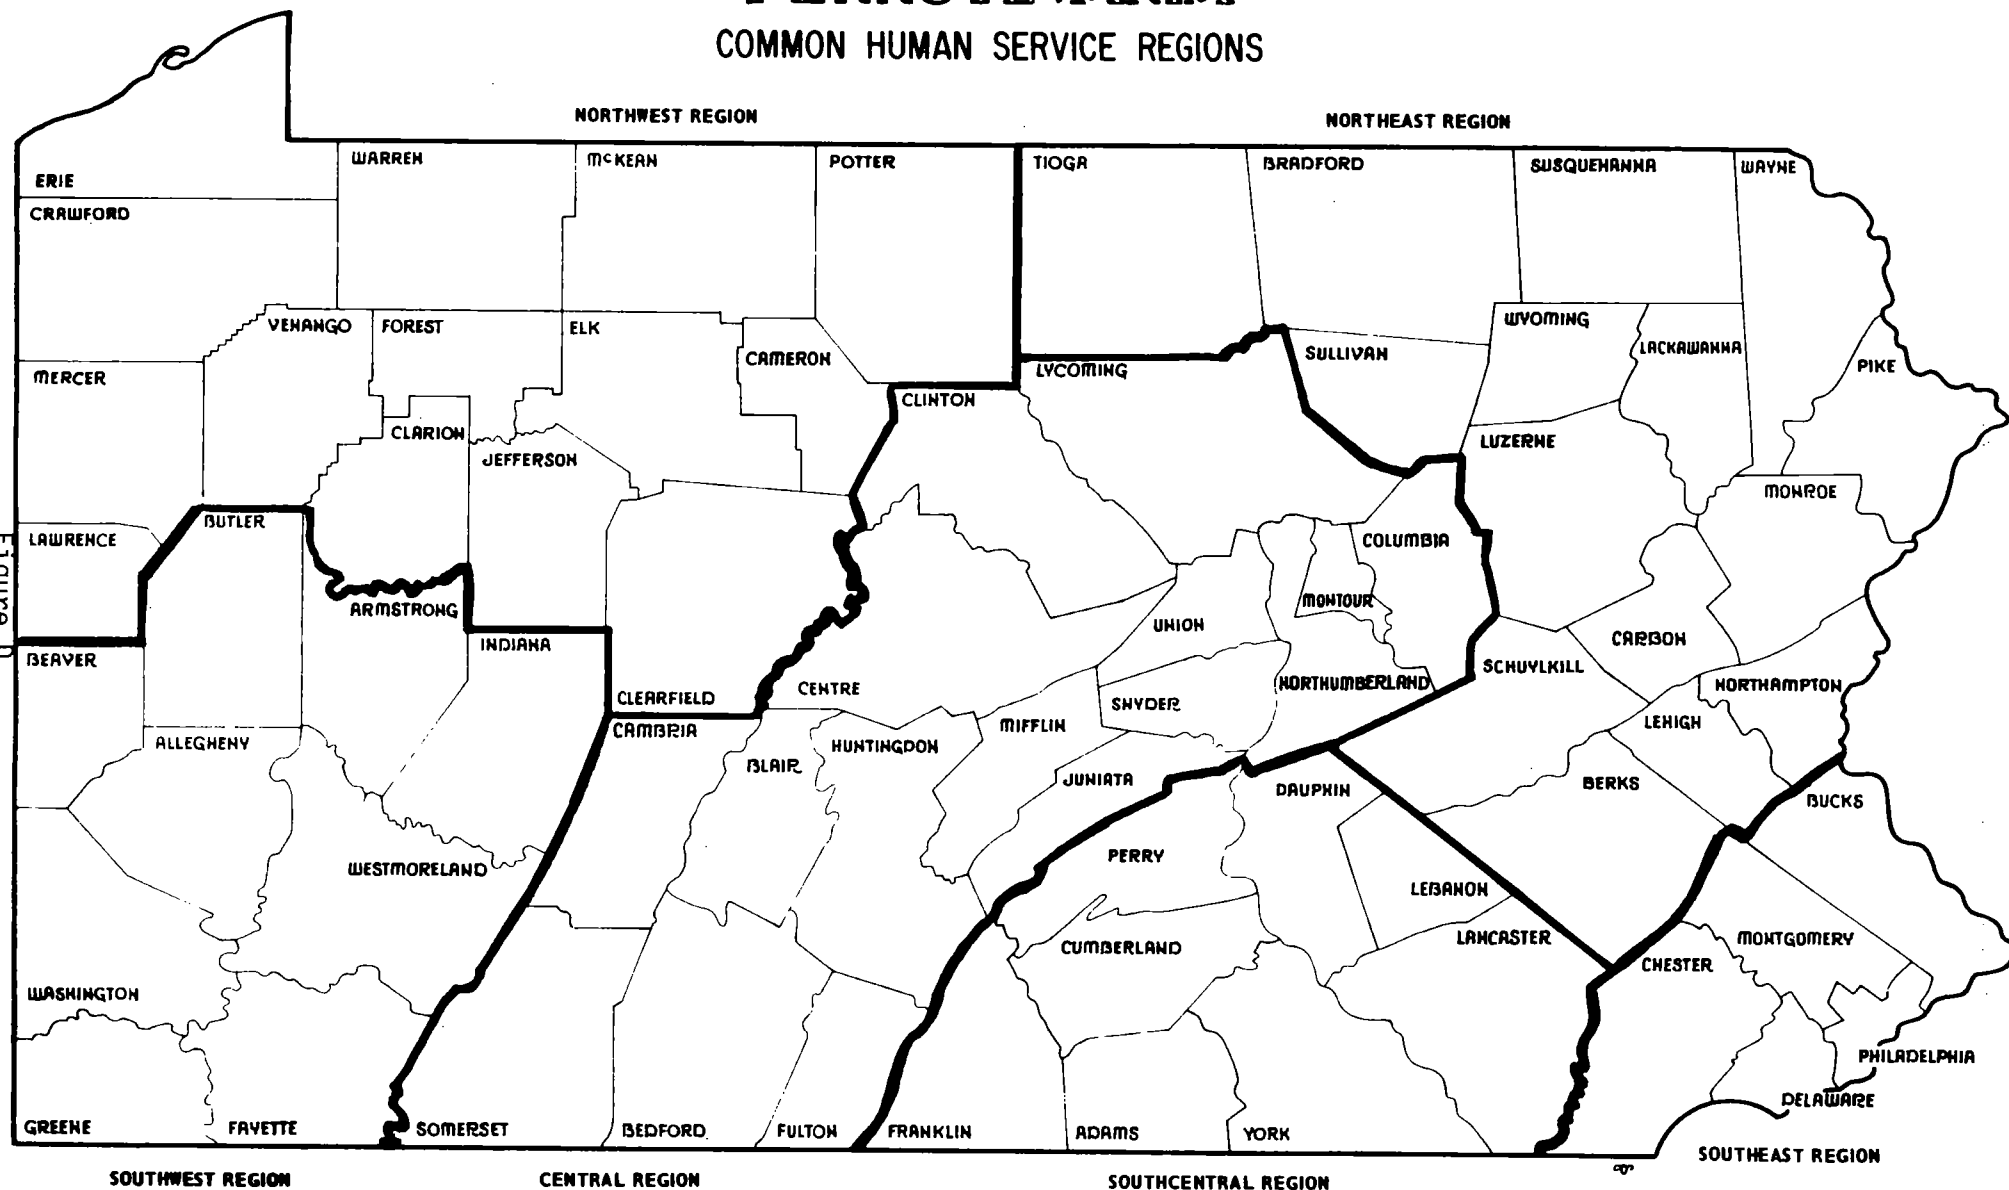

Table 4 summarizes the 15 MSAs in Pennsylvania and additionally includes Susquehanna County, which is a part of the Binghamton, New York MSA. A total of 34 counties are involved. Counties in New Jersey which are part of the Allentown-Bethlehem-Easton MSA and the Philadelphia MSA are not included in this report.

Highest Crime Index rates were produced by the Philadelphia MSA (4,230.1) and the Allentown-Bethlehem-Easton MSA (3,626.6). The lowest Crime Index rate occurred in the Johnstown MSA (1,473.9).

Of significance in this table are the high Crime Index rates shown by core cities of the MSAs in contrast to the rates in their suburbs. Some examples are: Harrisburg, 9,439.7 against a suburban rate of 2,669.3; Reading, 8,153.3 against 1,967.6; Lancaster, 8,041.5 against 2,032.2; Pittsburgh, 7,743.9 against 2,030.2 and Allentown, 7,103.4 against 2,430.0.

PENNSYLVANIA

COMMON HUMAN SERVICE REGIONS

Of core cities, Crime Index rates were generally double that of their suburbs. In fact, the Crime Index rate in Reading was over four times the rate of its suburbs; and in Lancaster, Pittsburgh and Harrisburg, more than three times.

Eleven MSAs showed decreases and four MSAs showed increases in Crime Index offenses. The highest rate of increase was reported for Altoona MSA, 13.9 percent, from 2,801 offenses last year to 3,191 offenses. State College MSA showed the largest decrease, 13.1 percent.

Pennsylvania MSA Crime Index offenses decreased by 3.3 percent. The MSA core city jurisdictions decreased by 1.6 percent; the MSA suburban jurisdictions decreased by 5.1 percent; rural jurisdictions increased by 0.6 percent; and non-MSA jurisdictions decreased by 5.7 percent.

VALUE OF PROPERTY STOLEN AND RECOVERED

The total value of property stolen this year in Pennsylvania was \$431,680,328 of which 42.7 percent or \$184,315,197 was recovered. The total value decreased by 8.9 percent from \$473,783,319 last year, and total recovered property decreased by 14.1 percent. Motor vehicles accounted for 57.5 percent of stolen property value and 90.1 percent of property recovered.

CRIME INDEX OFFENSES VIOLENT CRIME

DEFINITION: The Crime Index categories of murder and nonnegligent manslaughter, forcible rape, robbery and aggravated assault comprise the general category of "Violent Crime."

Percent Change from Previous Year		11.8	2.9	-6.0	-0.3
Percent Change from Base Year		11.8	15.0	8.1	7.8

SUMMARY

There were 49,182 violent crimes reported to Pennsylvania police departments this year, an average of 135 each day or one every 10 minutes and 41 seconds. This is a decrease of 0.3 percent from the 49,329 violent crimes last year. Violent crime represented 12.9 percent of the Crime Index. The violent crime rate was 409.5.

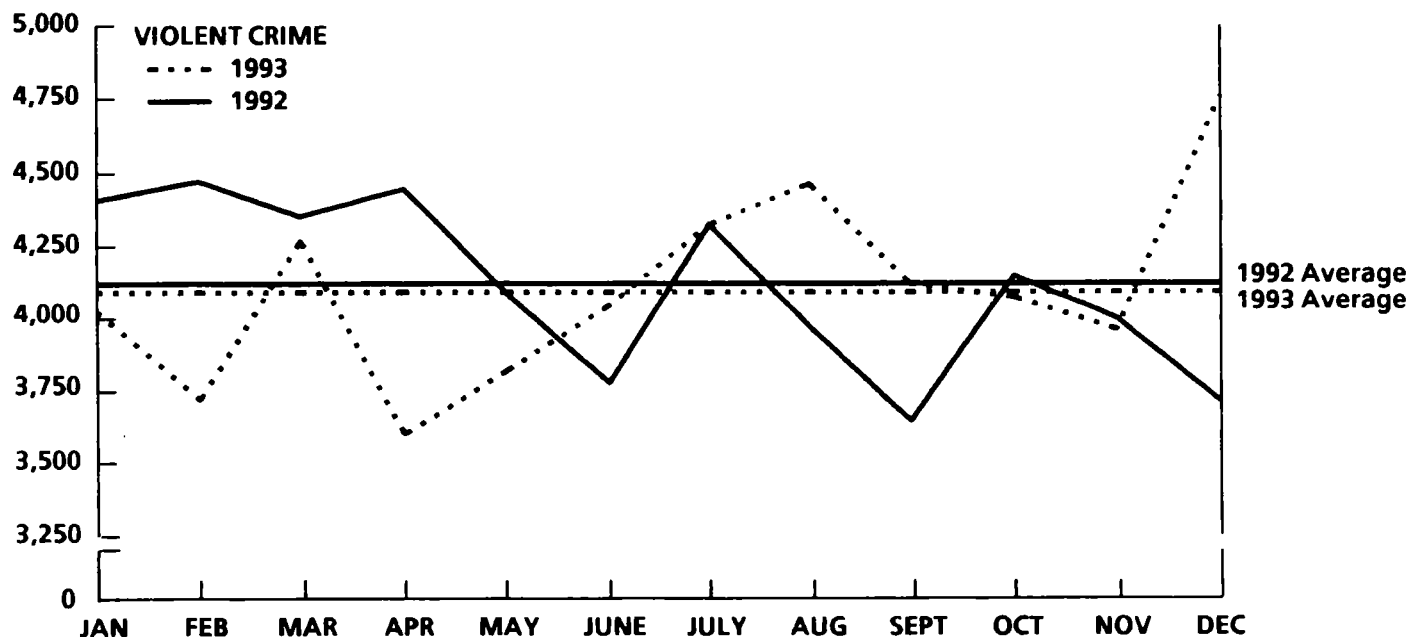

This year 49.6 percent or 24,415 violent crimes were cleared, a decrease from the 49.8 percent clearance rate last year. In general, clearances of violent crime are much higher than property crime, because they are committed more openly, have more witnesses and generate a higher degree of intensity in the way of police investigation.

This year 21.1 percent or 69,954 property crimes were cleared, a decrease in number. Clearances of property crime are low because these are crimes of stealth and generally lack witnesses.

CRIME INDEX OFFENSES
MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION: Murder and nonnegligent manslaughter is the unlawful killing of a human being by another. Murder and nonnegligent manslaughter is classified and scored on the basis of police investigation as opposed to any decision of a court, coroner, jury, or other judicial body. Manslaughters by negligence and justifiable homicides are not in this analysis.

Percent Change from Previous Year		7.4	-6.0	-2.7	11.9
Percent Change from Base Year		7.4	0.9	-1.7	9.9

SUMMARY

There were 821 murders reported to Pennsylvania police departments this year, an average of 2 each day or one every 10 hours and 40 minutes. Murder comprised 0.2 percent of all index crimes and 1.7 percent of all violent crimes. The murder rate was 6.8 per 100,000 population.

There was an increase of 87 murders or 11.9 percent from the 734 last year.

Of the 821 murders, 624 or 76.0 percent were cleared. This represents the highest clearance rate of any of the Crime Index offenses.

In addition to the 821 homicides reported, 48 "justifiable homicides" were reported by police agencies. Such homicides are killings of felons by police officers (25) or by private citizens (23). Justifiable homicides are omitted from analyses of homicides presented in this report.

HOMICIDE SITUATIONS

The 821 homicide victims were killed in a total of 837 homicide situations involving multiple or single victims and multiple or single known or unknown offenders, as indicated in the following table. 54.1 percent or 453 homicide situations involved a single victim and a single offender; 236 incidents or 28.2 percent involved 247 or 30.0 percent of the victims where the offenders were unknown; 98 of the victims were in multiple offender situations.

Multiple victims/multiple offenders	11	1.3	8	1.0
Multiple victims/unknown offender(s)	27	3.2	25	3.0

AGE, RACE AND SEX OF VICTIMS

Murder victims were predominately male, accounting for 78.1 percent of the total. Victim analysis by race discloses that 43.2 percent were White and 56.8 percent were Non-white. The largest number of victims were between the ages of 20 to 29 - 38.9 percent of the total. See Table 5.

AGE, RACE AND SEX OF KNOWN OFFENDERS

Reports on known offenders indicate that the major portion was male, 93.3 percent. Known offender analysis by race discloses that 37.6 percent were White and 62.4 percent were Non-white. The largest number of known offenders were between the ages of 15 and 24 - 52.6 percent of the total. See Table 6.

MURDER WEAPONS

As outlined in the following table and Figure H, firearms were predominately the weapons used in murder - 70.9 percent. Handguns alone accounted for 489 or 59.6 percent of murders. 87 or 10.6 percent resulted from stabbings.

RELATIONSHIP OF VICTIMS TO OFFENDERS

The fact that murder is primarily a problem of society, beyond control of the law enforcement community, is emphasized by the fact that over one half of the victims were related to or acquainted with their assailants. This is outlined in the table below and illustrated in Figure I.

CIRCUMSTANCES CAUSING MURDER

The table below and Figure J indicate that over one third of reported murders resulted from arguments and nearly one in every four murders resulted from a felonious act. Again, the majority of the circumstances are beyond control of the law enforcement community.

CRIME INDEX OFFENSES FORCIBLE RAPE

DEFINITION: Forcible rape is the carnal knowledge of a female through the use of force or the threat of force. Assaults or attempts to commit forcible rape are included; however, statutory rape (without force) is not counted. Crime counts in this category are limited to actual offenses of forcible rape or attempts, as established by police investigation.

Number of Offenses	2,938	3,130	3,342	3,223	3,101
Percent Change from Previous Year		6.5	6.8	-3.6	-3.8
Percent Change from Base Year		6.5	13.8	9.7	5.5

SUMMARY

There were 3,101 forcible rape offenses reported to Pennsylvania police departments, an average of 8 each day or one reported every 2 hours and 49 minutes. This is a decrease of 3.8 percent from the 3,223 reported last year. Forcible rape represented 0.8 percent of the Crime Index and 6.3 percent of the Violent Crime Index. While the forcible rape rate this year was 25.8, the rate per 100,000 estimated females in Pennsylvania was 49.6 which places the index in its proper perspective as a victim rate, since it equates the number of crimes per unit of related population. There were 2,681 or 86.5 percent actual rapes and 420 or 13.5 percent attempted rapes.

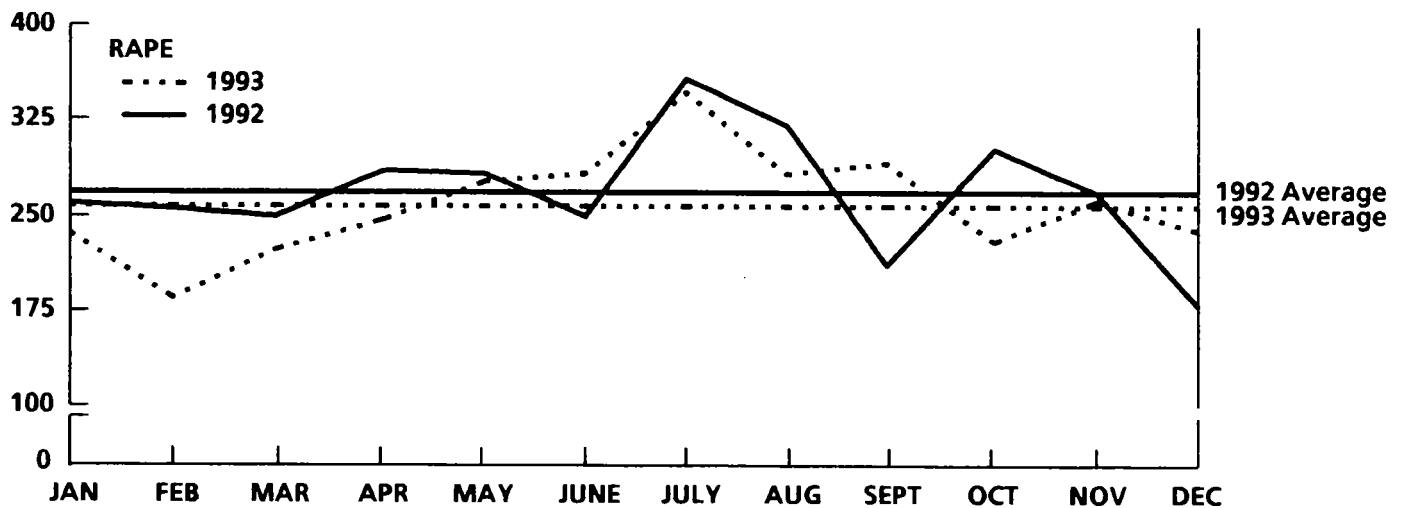

Of all the Crime Index offenses, law enforcement officials recognize rape as one of the most underreported crimes, primarily because of fear and/or embarrassment on the part of the victim. This year 379 additional cases were reported unfounded by police investigation.

Offenses decreased for nine categories and increased for nine categories, for a net decrease in Part II Offenses of 1.9 percent. The Part II Offense rate per 100,000 was 4,572.4. Over half (59.0 percent) of all crimes reported were Part II Offenses.

*Less than 0.1 percent.

This year 327,035 or 59.6 percent of Part II Offenses were cleared, resulting in a decrease in offenses from last year. However, the percent cleared remained unchanged from the previous year.

Extremely high clearance rates (over 95 percent) were achieved for two Part II Offenses: driving under the influence and drunkenness.

On the other hand, a very low clearance rate of 14.1 percent was attained for vandalism, the largest Part II Offense by volume.

In general, the Part II Offenses with the highest clearance rates were those which are usually observed at the time of commission.

EIGHT LEADING PART II OFFENSES

While there are eighteen distinct Part II Offense categories, over 90 percent of the offenses reported were in only eight categories. These eight offenses, summarized in the following table, can be considered to be the "leaders" among Part II Offenses in volume and rate per 100,000 population.

PERSONS CHARGED AND DISPOSITIONS

The collection of data of persons arrested and formally charged, plus the subsequent dispositions, is an important tool in the records-keeping process for the modern police administrator. This collection offers an insight into the effectiveness of a department with regard to the quality of police investigation, case preparation, and court presentation toward the successful prosecution of the criminal element.

PERSONS CHARGED

There were 395,380 persons arrested and charged with criminal offenses this year. Physical arrests resulted in charges against 201,450 persons or 51.0 percent. Criminal citations were issued to 193,930 persons or 49.0 percent.

Of the 89,637 persons charged with Crime Index offenses, 67,410 or 75.2 percent were arrested and arraigned, while 22,142 or 24.8 percent received citations. A total of 24,561 violent crime offenders were charged this year. Physical arrests of violent crime offenders totaled 22,585 or 92.0 percent, and citations were issued to 1,976 violent crime offenders or 8.0 percent. Property crime offenders were charged in 64,991 incidents. Physical arrests of Property crime offenders occurred in 44,825 cases or 69.0 percent, and citations were issued to 20,166 Property crime offenders or 31.0 percent. This latter group was composed primarily of larceny-theft offenders, arrested for "summary offenses," such as shoplifting.

Part II offenders charged amounted to 305,743 persons. Physical arrests and arraignments took place in 133,965 cases or 43.8 percent, and citations were issued to 171,778 individuals or 56.2 percent. A review indicates that citations were issued to 87.4 percent of persons charged with liquor law violations and to the majority of persons charged with fraud, vandalism, drunkenness, disorderly conduct, vagrancy, and all other offenses.

DISPOSITIONS

The 242,533 dispositions represent 61.3 percent of the 395,380 persons charged this year. This difference is partly due to dispositions of charges from prior years and pending dispositions from persons charged this year.

Overall, 145,177 persons or 59.9 percent were found guilty of the offense charged; 15,209 or 6.3 percent, guilty of a lesser offense; 44,005 or 18.1 percent acquitted or dismissed; and 38,142 or 15.7 percent, referred to Juvenile Court.

Dispositions of Crime Index offenders were distributed as follows: 24,835 or 37.8 percent were guilty as charged; 6,367 or 9.7 percent, guilty of a lesser offense; 15,683 or 23.8 percent, acquitted or dismissed; 18,874 or 28.7 percent, referred to Juvenile Court. However, 53.0 percent of adults prosecuted for Crime Index offenses were found guilty of the offense charged, and 13.6 percent were found guilty of a lesser offense.

Murder - 60.7 percent and larceny-theft - 50.3 percent had the highest rates of conviction among the Crime Index offenses. Aggravated Assault - 38.7 percent and robbery - 30.0 percent had the highest rates of acquittals or dismissals among Crime Index offenses. High rates among Crime Index offenses for juveniles referred to Juvenile Court were reported for motor vehicle theft - 63.9 percent, arson - 54.3 percent and burglary - 32.0 percent. Of note, the acquittal-dismissal rate for violent crime was 36.8 percent as opposed to a 17.2 percent acquittal-dismissal rate for property crime.

The dispositions of persons charged with Part II Offenses were distributed as follows: 120,309 or 68.1 percent were guilty as charged; 8,831 or 5.0 percent were guilty of a lesser offense; 28,308 or 16.0 percent, acquitted or dismissed; 19,258 or 10.9 percent, referred to Juvenile Court.

The highest conviction rates for persons charged with Part II Offenses were reported for driving under the influence - 88.0 percent and liquor law violations - 79.1 percent. High dismissal rates were reported for other assaults - 35.0 percent, sex offenses - 19.5 percent, weapons - 19.0 percent and fraud - 18.3 percent. Drunkenness acquittal rates are influenced by the practice in some areas of apprehending individuals for drunkenness for their own safety and releasing them when they have regained sobriety.

JUVENILES

In addition to the 38,142 or 9.6 percent juveniles charged and subsequently referred to Juvenile Court, 33,894 or 8.6 percent were charged as adults, even though they were under 18 years old. This latter group represents youths apprehended generally for summary offenses, such as shoplifting, teenage drinking, vandalism or disorderly conduct. Included in the category of persons charged and involved in criminal judicial proceedings this year were 72,036 juveniles, 18.2 percent of the total.

CRIME VICTIMS

The Pennsylvania UCR Program collects information on the characteristics of victims of crimes in Pennsylvania. This is in addition to the homicide victim reporting system already in place, the results of which are presented on pages 34-39. Approximately percent of the reporting agencies in the State provided statistics on age, sex and race of crime victims by offense classification. This information is summarized in the table below and on the facing page.

Almost two-thirds of the reported crime victims were involved in three offense categories: larceny-theft, - 30.4 percent; vandalism - 19.4 percent; and other assaults - 11.8 percent.

The largest number of crime victims, accounting for 13.8 percent of those reported, were between the ages of 20 and 24.

SUMMARY

There were 24,270 full-time law enforcement employees in Pennsylvania this year, including the State Police. This is a decrease of 4.3 percent from last year.

The number of full-time police officers decreased by 3.3 percent. The number of civilian employees decreased by 10.6 percent this year.

Full-time police officers made up 86.7 percent of police departments and civilian employees 13.3 percent. There were 2.02 full-time employees, 1.75 officers and 0.27 civilians per 1,000 population.

The 905 local police jurisdictions (State total less Pennsylvania State Police and Pennsylvania Bureau of Narcotics Investigation and Drug Control) accounted for 18,237 full-time law enforcement employees, or 75.1 percent of the State total. 93.0 percent or 16,962 of these 18,237 local police agency employees were full-time officers and 1,275 or 7.0 percent were civilians.

Almost half of the police departments reporting to the Pennsylvania UCR Program (429 out of 907) employed more than five full-time officers (See following table). 91.6 percent (831) of the departments reported 25 or fewer full-time officers; while at the other end of the scale, only 4 departments - less than 1 percent of the total - employed more than 200.

Northwest CHSR	1,391	5.9	1.44	1,230	5.9	1.27

The Northwest CHSR employed the fewest law enforcement employees 1,391 or 5.9 percent of the total, followed closely by the Central CHSR, with 1,461 employees, or 6.2 percent of the total (Table above and Table 16). The Central CHSR reported the lowest number of personnel and police officers per 1,000 population, 1.35 and 1.19 respectively.

*Pennsylvania State Police Administration personnel and Liquor Control Enforcement personnel are not included.

The Southeast CHSR reported the largest number of employees, 10,619, or 45.1 percent of the total, and the highest number of personnel and police officers per 1,000 population, 2.82 and 2.48 respectively. However, excluding Philadelphia County, which employs approximately 70 percent of the law enforcement personnel in the Southeast CHSR, there were 1.62 total employees and 1.39 officers per 1,000 for the remaining population.

The Southwest CHSR, the second largest law enforcement employer, had 1.21 total employees and 1.08 officers per 1,000 population, if Allegheny County was excluded. Allegheny County, which includes the City of Pittsburgh, accounts for over 65 percent of the law enforcement employees in the Southwest CHSR.

The Pennsylvania State Police (PSP) made up only 5 percent of the police officers in the Southeast and 15 percent of the officers in the Southwest CHSR, compared to 26-51 percent of the police officers in the remaining four more rural CHSRs. In these CHSRs, full-time police officers would average one officer or less per 1,000 population without PSP protection.

DISTRIBUTION OF LAW ENFORCEMENT EMPLOYEES BY SEX

84.6 percent of the reported 23,542 full-time personnel were males, and 15.4 percent were females. Only 8.7 percent of police officers were women. However, during the past six years female full-time officers have increased by 34.4 percent while their male counterparts have increased by 6.4 percent. Women have filled at least half of civilian positions for the past seventeen years. This year 65.9 percent of civilians were women.

Local police departments in Philadelphia and Allegheny counties employed the largest numbers of female officers, 1,047 and 301, respectively (Table 16). The Southeast and the Southwest CHSRs reported the highest percentages of female officers in local police departments, 12.7 and 9.9 percent, while the Northeast CHSR had the lowest percentage, 3.5 percent.

LAW ENFORCEMENT EMPLOYEES IN THE FIFTEEN LARGEST LOCAL POLICE DEPARTMENTS

The 15 local police departments with the greatest number of full-time law enforcement employees are identified in the following table. In the aggregate, these 15 departments contributed 57.1 percent of the full-time law enforcement employees and 54.7 percent of the full-time police officers employed by the 905 local police departments in the Pennsylvania UCR System.

SUMMARY

This year, there were four Pennsylvania law enforcement officers feloniously killed while performing their official duties. However, over the ten year period, 1984-1993 inclusive, twenty Pennsylvania police officers have been murdered in the line of duty.

There were 2,285 assaults on police officers this year (Table 17), a decrease of 13.6 percent from last year. The assault rate per 100 officers was 11.0, down from a rate of 12.3 last year.

This year 2,127 assaults, 93.1 percent, were cleared. Last year there were 2,481 clearances, for a clearance rate of 93.8 percent.

This year Pittsburgh experienced the highest assault rate, 24.3. Statewide, two of the nine population groups had higher rates than last year.

GENERAL DISCUSSION

Injuries were sustained by 34.9 percent of the law enforcement officers assaulted this year. There were 797 assaults with injury reported, for an assault with injury rate of 3.8 per 100 full-time officers, down from last year. Municipalities 25,000 - 50,000 had the highest assault with injury rate, 7.0 percent and Sheriffs and other County police departments had the lowest rate, 0.7 per 100 full-time officers.

Statewide, 93.1 percent of the assaults on police officers were cleared by arrests. Three of the nine population groups had clearance rates of 95 percent or above (Table 17), and clearance rates of 95 percent or more were reported for assaults in three of the eleven categories of police activity (Table 21).

Personal weapons (hands, fists, feet, etc.) were employed in 83.9 percent of the assaults on Pennsylvania police officers this year (Table 18, figure M). 8.8 percent of the assaults were committed with dangerous weapons other than firearms or cutting instruments, while assaults with firearms and knives or other cutting instruments accounted for 5.4 and 1.9 percent of attacks, respectively.

Assaults with dangerous weapons other than firearms or cutting instruments produced the highest rate of personal injury; 39.3 percent of the officers attacked with these weapons were injured (Table 19).

Thirty-nine percent of the assaults happened while officers were responding to disturbance calls (Table 20). This category of police activity, together with officers attempting other arrests,* officers investigating suspicious persons or circumstances and officers engaged in traffic pursuits and stops, accounted for 80 percent of all assaults.

Personal weapons, predominantly, were employed in the assaults which took place during most types of police activity (Table 22). Eighty-five percent of the police officers were assigned to vehicle patrols at the time of assaults (Table 23). Forty-two percent of the assaults on officers assigned to two-men vehicles happened while the officers were responding to disturbance calls (Table 24). Officers assigned to one-man vehicles received almost two-thirds of the attacks while they were either responding to disturbance calls or attempting other arrests.

Thirty-three percent of assaults on officers or detectives on special assignment took place while they were attempting other arrests, and thirty-eight percent of assaults on officers on other assignments occurred when they were miscellaneous assignments.

- * At the time of assaults, the officer was making or attempting to make an arrest for an offense other than disturbance call, burglary, robbery, civil disorder or traffic.

More assaults, 275, occurred in December than in any other month (Figure O). Assaults were least frequent in the month of February, when 149 were reported.

Almost half of the reported assaults on police officers were committed between the hours of 8:01 p.m. and 2:00 a.m. (Table 25). Almost one-third occurred during the four-hour period of 10:01 p.m. and 2:00 a.m. while the fewest assaults were reported between 6:01 a.m. and 8:00 a.m.

CRIME BILL -- DOLLARS FOR PENNSYLVANIA, 1995 - 2000

(Revised 8/22/94)

LAW ENFORCEMENT

- * **100,000 POLICE** -- Guaranteed minimum of \$44 million -- more than 500 police officers at \$75,000 per officer.
 - ** Given Pennsylvania's share of the population and the additional \$6.5 billion in discretionary dollars, Pennsylvania should expect a total of about \$370 million over the next 6 years.
 - ** Of the total, up to 85% can be used to hire about 4,200 police officers. At least 15% -- \$55 million -- can be used to help pay the training, overtime and administrative costs of implementing community policing in Pennsylvania.
- * **PRISONS & BOOT CAMPS** -- \$110 million for prison grants, including military-style boot camp prisons. An additional estimated \$110 million is possible if Pennsylvania meets the "Truth in Sentencing" target of second-time violent offenders serving 85% of their sentences.
- * **BYRNE ENFORCEMENT GRANTS** -- \$1 billion in the Trust Fund will help continue full funding for these grants, including Pennsylvania's \$18 million annual share.
- * **RURAL LAW ENFORCEMENT GRANTS** -- \$4.2 million for drug and crime enforcement in Pennsylvania's rural areas.
- * **DISCRETIONARY GRANTS** -- Pennsylvania's law enforcement agencies and courts may apply for:
 - ** \$1,000,000,000 -- Drug Court programs (treatment backed up by drug testing and certain punishment for non-violent offenders currently on probation.) Estimated \$48 million for Pennsylvania -- enough for about 23,800 offenders over six years.
 - ** \$320,000,000 -- Criminal record systems (Brady Law), communications equipment, and DNA testing; and
 - ** \$200,000,000 -- Judges, prosecutors and public defenders (estimated \$10 million for Pennsylvania).

PREVENTION PROGRAMS

- * **LOCAL PARTNERSHIP ACT** -- \$63 million in direct grants to cities and towns in Pennsylvania. Wide discretion permits local governments to use the dollars for education, drug treatment, and jobs programs.
- * **VIOLENCE AGAINST WOMEN ACT** -- \$36 million in grants for police, prosecutors and victims services; \$15 million in grants for shelters for battered women and their children; and Pennsylvania can apply for a share of \$500 million in several discretionary programs.
- * **AFTERSCHOOL AND IN-SCHOOL "SAFE HAVENS" FOR AT-RISK CHILDREN** -- \$30 million for non-profit, community-based organizations in Pennsylvania.
- * **DRUG TREATMENT IN PRISONS** -- \$8 million to treat up to an estimated 7,200 drug-addicted prisoners in Pennsylvania prisons over the next 6 years.

Shoot or Be Shot? Most Say Shoot

PHILADELPHIA (AP) He shot a man young enough to be his son and left him for dead in a heap on the sidewalk, a bullet in his head. Then he paused to calm his pounding heart, walked a block or so to his car and drove home.

He scanned the newspapers for anything about the shooting, but never saw any mention of it.

Finally, he wrote an anonymous letter to a radio talk show host, telling her the young man had a gun, his companion had a knife, they were going to rob him.

The telephone lines lit up.

"He should be congratulated," one caller said. "He did the right thing," said another. "He should have shot them both," several said.

Of 23 callers to the "Susan Bray Show" on WWDB on Wednesday, 21 said the middle-age man should, by no means, confess to police or regret what he did.

"They were very vitriolic," Bray said. "They were fed up with crime, fed up with the legal system. They thought it was skewed toward the rights of the perpetrators. ... They were fed up with not being able to go places, with being frightened."

No one, not even the two callers who advised the man to confess, said they thought he was the criminal.

According to his letter, the man was pushing 50, self-employed, and had an appointment in the neighborhood at night to give an estimate on some kind of job. He had a license to carry a gun because he'd been robbed before.

He crossed the street when he saw the two young men. They crossed, too. Only when they verbally threatened him did he react, he said.

He didn't call police because he feared he'd be the one punished.

"I do not want to spend half my retirement savings and get ripped apart in court" by a lawyer for the shooting victim, he wrote. "I never felt any remorse about taking his life."

The man gave no details on when and where the shooting took place. Police said they were unable to pinpoint the attack.

"It's a real scary sign of the times, that people are so fearful they leave behind fundamental good sense," said Temple University professor John Goldkamp, who teaches criminal justice. "They believe the law isn't going to help them and they have to do it on their own."

But Goldkamp said: "There's no acceptable rationale I can think of, if it was legitimate, to walk away from someone shot in the head and not call police. You are allowed to defend yourself and your property."

Homicide Capt. John Apeldorn also found the man's fear groundless. "If he did what he had to do he shouldn't be afraid to hide anything," Apeldorn said.

Apeldorn questioned whether Bray's listeners were representative of the public at large.

Bray said several of the callers were police officers.

"They said the system is rotten. He could be judged as a murderer, and it would ruin him financially," Bray said. "The point was made over and over that he was fortunate to be alive. They not only might take his money but might kill him because he can identify them."

The only other topic that ever generated as much vitriol, said

Bray, a 13-year veteran of Philadelphia radio, was unkindness to animals.
