NOTES:

* Less than \$50 million.

H.R. 2015 as passed by the Senate does not include mental health parity. H.R. 2014 as passed by the Senate includes such a provision. If H.R. 2014 were enacted after H.R. 2015, however, the children's health provisions of H.R. 2014 would not take effect, except that the amounts provided by H.R. 2015 would be increased by the amounts that would have been provided by H.R. 2014.
