**Abstract:** The 21st Century Learning Centers for Learning Communities (LC-LC) initiative is a collaborative effort of the Office of Youth Development and four middle schools in San Francisco. The collaboration addresses the achievement gap for African American and Latino students whose test scores, graduation rates and grades lag behind the district and national averages. LC-LC provides safe and stimulating after school, summer and weekend programming with a youth development orientation. Implementation strategies include after school learning academies in literature and mathematics, youth and adult technology classes, mentoring, parent and family skills and leadership, and social skills development. Over 800 youth and their families will take advantage of the opportunities and supports provided by LC-LC. The outcomes we expect these positive environments to produce are improved student achievement and self-esteem. Youth and adult knowledge in the use of technology will increase, as will parent participation in educational opportunities and school-based activities.

**Serving Grade Levels:** Grades 6 through 8  
Grades 9 through 12

**Times of Service:** After school  
Weekends  
Summer

**No. Students Served:** 478  
**Estimated Total Funding:** \$785,859.00

**Types of Community:** Urban  
**Free/Reduced Lunch:** 64.5%

**EZ/EC:** No

### After School Learning and Safe Neighborhoods Partnerships Program Overview

The After School Learning and Safe Neighborhoods Partnerships Program was established by three bills during the 1998 legislative session (Senate Bill 1756/Assembly Bill 1428/Assembly Bill 566). These statutes fund the establishment of local after school educational and enrichment programs. Schools and communities will develop partnerships to provide academic and literacy support and safe, constructive alternatives for students in grades kindergarten through nine. Programs will operate at elementary, middle and junior high school campuses with large numbers of children and youth from low income families.

Applicants may include:

- Local education agencies (LEAs) which include school districts, county offices of education, and charter schools that have elected the new block grant funding model (AB 1115, 1999).
- Cities, counties, or nonprofit organizations in partnership with, and with the approval of, an LEA or LEAs.

Each partnership must plan its program through a collaborative process. The partnership must include parents, youth, and representatives of participating school sites, governmental agencies (such as cities and counties, parks and recreation departments), community organizations including after school programs on the school campus and in the community, and the private sector. The fiscal agent of each partnership must be a city, county, or LEA.

| <b>Brief Program Description (including purpose):</b><br><p>The After School Learning and Safe Neighborhoods Partnerships Program was established to fund school partnerships with city, county and community organizations to improve student performance in school and to provide a safe environment after school for students in grades K-9. Each partnership must include parents, youth and representatives of participating school sites, governmental agencies, community organizations, and the private sector. To achieve the program goals, each local program must include two components that balance and complement each other and together provide an integrated, age-appropriate After School Program. The two components are:</p> <p><u>Education / Literacy:</u></p> <p>Each program must include an educational and literacy component to provide tutoring or homework assistance in one or more of the following areas: language arts, mathematics, history, social science or science. This educational component should support the school's core curriculum, and the district and/or state standards, and be developed in close collaboration with school staff.</p> <p><u>Enrichment</u></p> <p>Each program must also include an enrichment component, which may include recreation and prevention activities. Such activities might involve the arts, music, sports, recreation, career preparation activities, teen pregnancy and substance abuse prevention services, gang awareness activities, conflict resolution training, community service-learning, and other youth development activities based on student needs and interests.</p> |                                                                                                                                                                                                                                                                      |                                                                                                             |
| <b>Total Program Funding Amount:</b><br>1999-2000 \$50 million (awarded)<br><br>2000-2001 \$35 million (expansion funds available for this grant cycle)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <b>Program amount(s) that can be requested:</b><br><br>Elementary school: \$75,000 to \$195,000<br><br>Middle/Junior High School: \$100,000 to \$260,000<br><br>Determined by formulas in Education Code Section 8483.7(b), and based on \$5.00 per day per student. | <b>Funding Period:</b><br><br>Three-year renewable incentive grant.                                         |

Other Comments:

This program was designed for children who do not have other options available for them after school. This is not a drop-in program. Legislation requires that the program operates from 3:00 to 6:00 p.m., and that children attend three hours per day, five days a week. Programs operate during the school year and, at local option, during intersession and summer vacation.

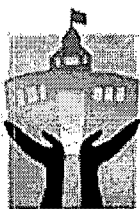

This program is not included in the State Charter School "In Lieu" categorical block grant funding model established by Education Code Section 47634 (AB 1115, 1999 Statutes, Chapter 78). As a result, charter schools may apply for funding for this program. Applications are either through the district or directly, based upon the process selected by the charter school. (See cover memo, paragraphs four and five.)

Welcome to California's Comprehensive School Reform Demonstration (CSRD) Program, a federal initiative for schoolwide reform based on effective research models and strategies. Incorporated into California's Public Schools Accountability Act (PSAA), CSRD grantees are the first implementation schools selected under the Immediate Intervention/Underperforming Schools Program (II/USP).

For the 1999-2000 school year, II/USP provides for the participation of 430 schools scoring in the bottom half of the statewide distribution of the Standardized Testing and Reporting (STAR) Program in both 1998 and 1999. II/USP is comprised of 78 implementation schools funded by CSRD and 353 planning schools supported with state funds.

### News & Announcements

#### New! Reform Models

Information on reform models is available from WestEd's CSRD Web site at [www.wested.org/csrd](http://www.wested.org/csrd).

#### csrdweb.net

The Regional Education Laboratory network has established a site for CSRD projects to help schools gain and share information and to help build national capacity in school reform. Visit [csrdweb.net](http://csrdweb.net) to learn more.

#### Clearinghouse on School Reform

The George Washington University, in partnership with the Council for Basic Education and the Institute for Educational Leadership, has been awarded a five-year contract from the U.S. Department of Education to operate the National Clearinghouse on Comprehensive School Reform. Visit [NCCSR](#) for more information.

#### CSRD Schools/LEAs Approved

In its September 1999 meeting, the California State Board of Education approved the 77 [II/USP implementation schools](#) that were successful in the competitive application process pursuant to the CSRD Program.

#### IAS Conference

All CSRD grantees in California and in the western region are invited to the IAS Conference sponsored by the U.S. Department of Education. It will be held Nov. 8-10, 1999, in Salt Lake City, Utah. See the [conference Web site](#).

#### National Database of CSRD Awards

The Southwest Educational Development Laboratory (SEDL) in Austin, Texas, maintains a national database of schools

### Technical Assistance

Visit California's network of technical assistance for CSRD grantees including staff from the Department, Comprehensive Assistance Centers, Regional School Support and Improvement Centers, and WestEd.

### Frequently Asked Questions

### California Resources

**SBE**, information about standards and other policies from the California State Board of Education

**Conferences**, events and Web sites of educational organizations

**Federal Programs**, information about implementing reforms for special needs students

**Resources**, staff at the Department in programs for special needs students

in Austin, Texas, maintains a national database of schools that have received CSRD awards. You can search the database of approximately 1,431 schools, by grade level and reform model(s) being implemented. Visit [SEDL](#).

### Models for English Learners

The Southwest Comprehensive Center in New Mexico has published a [guide](#) to research-based school reform models that address the needs of English learners. The guide contains information about national and locally developed models.

### Reform in Urban Schools

Paul Hill's research on urban schools indicates that single reform efforts, whether school design, standards-based, charter, or whatever, can **not** change a system by itself. There must also be performance incentives, investments in schools and people who teach, and policies defining a school's freedom of action. For more information, see the [Brookings Institution](#).

### II/USP Teleconference

On September 10, 1999, the Department hosted a live, satellite teleconference that included an overview of II/USP and the role of the external evaluator. Visit the [teleconference](#) page for planned follow-up activities.

### [Back to Top](#)

## Background

The CSRD Program is a school reform initiative administered by the U.S. Department of Education (USDE). The USDE Web site contains extensive information about the program including the USDE Guidance (March 12, 1998) that the Department used to prepare the RFA that was sent to eligible LEAs in California. (For a definition of LEA, see the [ESEA statute](#), Section 14101[18].)

**Funding.** Approximately \$145 million was appropriated nationwide for the first year of the program, \$120 million of which came from **Title I** (Demonstrations of Innovative Practices), and \$25 million from **Title X** (Fund for the Improvement of Education). For the first year, approximately \$15.5 million was made available for California applicants, \$12.7 million from Title I and \$2.8 million from Title X. See [Title I in California](#) for information about local programs.

Competitive grants were awarded to successful LEAs in an amount up to \$200 per student enrolled in each funded school, with a minimum allocation of \$50,000 per school site. Grants are renewable for two additional years, contingent on federal funding and substantial progress toward meeting the grantee's goals and benchmarks.

**Obligating CSRD Funds.** CSRD funds for FY98 became available on July 1, 1998, and remain available for obligation by LEAs and states until September 30, 2000. FY99 funds, approved in the federal budget in October, can be obligated from July 1, 1999 through September 30, 2001. USDE's definition of the activities that constitute "obligating" funds is provided in the Education Department General Administrative Regulations (EDGAR) at 34 CFR 76.707.

**Eligibility.** Eligibility for CSRD in California responds to the requirements of the state's Public Schools Accountability Act

of 1999. LEAs were eligible to apply for CSRD funds as follows:

**Title I:** LEAs were eligible to apply for CSRD funds supported by Title I only for those Title I schools (a) identified by the LEA for Program Improvement (PI) pursuant to the Department's June 30, 1997 or July 20, 1998 memos on standards-based accountability; (b) included on the Department's certified PI list; and (c) identified in the bottom half of the statewide distribution on both the 1998 and 1999 Standardized Testing and Reporting (STAR) program achievement tests.

**Title X:** Any LEA was eligible to apply for CSRD funds supported by Title X on behalf of any school that meets the criteria in (c) above.

Questions about Program Improvement should be addressed to staff in the Department's Local Accountability Assistance Office at (916) 657-3745.

**Purpose.** According to the USDE Guidance, the purpose of the CSRD Program is to "provide financial incentives for schools that need to substantially improve student achievement, particularly Title I schools, to implement comprehensive school reform programs that are based on reliable research and effective practices, and include an emphasis on basic academics and parental involvement."

The CSRD Program is designed to enable all children, particularly those enrolled in low-performing schools, to meet content standards adopted by the State Board of Education. The USDE Guidance encourages the Department to "target CSRD Title I funds on Title I schools that have been identified as in need of improvement under section 1116(c)" of Title I. In California, these schools are referred to as Program Improvement (PI) schools.

The legislative basis for the CSRD Program is contained in the U.S. Congress Conference Report (P.L. 105-78, H. Rept. 105-390). The legislation is often cited as "Porter-Obey" after its co-sponsors, John Porter and David Obey, Members, U.S. Congress. The legislative citation is Public Law 105-78.

## **Comprehensive Research-Based Reform**

According to USDE Guidance, a CSRD program is one that "integrates, in a coherent manner, all nine of the components" in Table 1 below. Although the following nine components are listed separately, the nine exist as interdependent parts of a whole school reform effort. The activities in one component reinforce activities implemented in another.

**Table 1**

| <b>CSRD Components</b>                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Innovative strategies and proven methods for student learning, teaching, and school management that are based on reliable research and effective practices, and have been replicated successfully in schools with diverse characteristics;                                                                                                                                                                                                                   |
| 2. Comprehensive design for effective school functioning, including instruction, assessment, classroom management, professional development, parental involvement, and school management, that aligns the school's curriculum, technology, professional development into a schoolwide reform plan designed to enable all students to meet challenging state content and performance standards and addresses needs identified through a school needs assessment; |
| 3. High-quality and continuous teacher and staff professional development and training;                                                                                                                                                                                                                                                                                                                                                                         |
| 4. Measurable goals for student performance and benchmarks for meeting those goals;                                                                                                                                                                                                                                                                                                                                                                             |
| 5. Support from school faculty, administrators and staff;                                                                                                                                                                                                                                                                                                                                                                                                       |
| 6. Meaningful involvement of parents and the local community in planning and implementing school improvement activities;                                                                                                                                                                                                                                                                                                                                        |
| 7. High-quality external technical support and assistance from a comprehensive school reform entity (may be a university) with experience or expertise in schoolwide reform and improvement;                                                                                                                                                                                                                                                                    |
| 8. Plan for the evaluation of the implementation of school reforms and the student results achieved; and                                                                                                                                                                                                                                                                                                                                                        |
| 9. Other resources (federal, state, local, private) available to the school for coordinating services to support and sustain the reform effort.                                                                                                                                                                                                                                                                                                                 |

## Research-Based Models

Substantial research on school reform is available for designing a CSRD program that responds to the needs of students and the school-community context in which the program will be implemented. The elements shown in Table 2, drawn from the USDE Guidance, should be considered in selecting and developing an effective research-based model(s) that supports the CSRD program.

The most effective models are those that can provide the strongest evidence for each of the four elements. Models vary in the extent to which they contain all nine components in Table 1.

Table 2

| Elements of Effective Research-Based Models                                                                                                                                                                                                           |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1. Theoretical or research foundation for the program:</b> Theory or research findings explain why a comprehensive model and the practices included in the model work together to produce gains in student performance.                            |
| <b>2. Evaluation-based evidence of improvements in student achievement:</b> Evidence of educationally significant improvement is shown through reliable measures of student achievement in major subject areas before and after model implementation. |
| <b>3. Evidence of effective implementation:</b> Implementation is a description of what it takes to make the model fully operational in schools.                                                                                                      |
| <b>4. Evidence of replicability:</b> Replicability means that the program has been implemented in more than one school.                                                                                                                               |

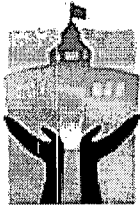

Research-based models appear as **examples** in the U.S. Congress Conference Report. CSRD applicants were not required to use these models to design their CSRD programs, and competitive preference were **not** given to applications that proposed these or any particular model.

The Northwest Regional Educational Laboratory (NWREL), at the request of the U.S. Department of Education, compiled a *Catalog of School Reform Models* that describes the examples from the U.S. Congress Conference Report, along with nine additional entire-school models and 18 skill- and content-based models. According to NWREL:

"... this listing is neither a set of recommended models nor a set of models approved for CSRD funding. There is no such list of 'approved' models, and NWREL strongly discourages states, districts, or others from using the listing to limit the choice of research-based, effective models by schools that apply for funding under the CSRD program."

Another source of information about research-based models is *An Educator's Guide to Schoolwide Reform*, a report of an examination of 24 schoolwide reform approaches completed by the American Institutes for Research in February 1999. The report was sponsored by the American Association of School Administrators, American Federation of Teachers, and others.

A useful guide to school reform was published by USDE in May, 1998. Entitled *Turning Around Low-Performing Schools*, it contains extensive information about improving schools. For additional links, see the resources in the right column.

## II/USP Implementation Schools for 1999-2000

### Comprehensive School Reform Demonstration in California

The following table displays the 78 schools selected to participate as **implementation schools** in the Immediate Intervention/Underperforming Schools Program (II/USP) for 1999-2000. The schools and their districts were successful grantees in the competitive application process conducted pursuant to the federal Comprehensive School Reform Demonstration (CSRD) Program.

The first year of implementation is the 1999-2000 school year. Grants will be renewable for two additional years, contingent on federal funding and the grantee's making substantial progress toward achieving its program objectives. Schools are listed in alphabetical order by their county, district, and school.

| County       | District                                 | School                               |
|--------------|------------------------------------------|--------------------------------------|
| Alameda      | Emery Unified School District            | Anna Yates Elementary School         |
| Alameda      | Emery Unified School District            | Emery High School                    |
| Alameda      | Emery Unified School District            | Emery Middle School                  |
| Alameda      | Fremont Unified School District          | Cabrillo Elementary School           |
| Alameda      | Oakland Unified School District          | Webster Academy                      |
| Contra Costa | West Contra Costa School District        | Downer Elementary School             |
| Contra Costa | West Contra Costa School District        | J.O. Ford Elementary School          |
| Humboldt     | Klamath-Trinity Joint School District    | Hoopa Valley Elementary School       |
| Imperial     | Calexico Unified School District         | De Anza Junior High School           |
