Dear Lady Ford,

Regards on your TV interview — charming, refreshing! What courage you have for not doing the usual and pretending that certain issues simply do not exist. None of your answers were in "poor taste". By bringing taboo subjects out in the open, you may promote understanding and willingness to face problems that were previously unmentionable. As the first Lady, what you do can greatly influence women. You have cut down on deaths from breast cancer and now you may make it fashionable to speak the truth, in a tactful way, and to open the mind to understanding of one another!

Sincerely yours,

Mrs. Dorothy Tabate
