

9/10/57

Don Shannon of the Los Angeles Times called.

They are making a survey of officials in Washington to see how many of them have been innoculated against Asiatic flu.

Told him quite sure RN had not been innoculated yet, and did not know if he had any plans to be innoculated in the future.

He asked about the staff, and I told him that as far as I know, no one on the staff has been innoculated.
