Dear Madam:-

The American Government is undertaking to remove the bodies of its soldiers who died in the late war to such places as the relatives may desire, and accordingly you are requested to advise whether you wish the body of your late son, Wagoner Theodore Carro, United States Army, to remain buried in France, in the care and custody of the United States, or delivered to you for reburial in Italy, or returned to the United States and placed in the Ntiao Cemetery at Arlington, Virginia, where the grave is assured constant care by the American Government. This Government bears all expense in connection with the transfer of the body.

In the event you desire the removal of the body of the late soldier to Italy, it is suggested that you communicate your wishes direct to the Chief, American Graves Registration Service, G.M.C. in Europe, 8 Avenue d'Iena, Paris, France, who will gladly comply with your request, if found practicable to do so, or advise you in the event he is forced to deny it, through the operation of health regulations or sanitation laws of countries through which the body may have to pass.

Envelopes for use in making reply are enclosed herewith.

The Department wishes to convey to you its assurance of sympathy in your bereavement.

List any personal effects, letters, money-order receipts, and the like found on body or in grave. Give any and all information which it is thought might be of use in identifying the body, other than that tabulated under Item No. 6.
6. Give all information as to body description and dental chart as nearly correctly as the condition of the body will allow. Items (e) and (f) under the body description are very important and should be very complete. The dental chart is also very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspid (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found.

MISSING TEETH	All teeth missing through previous extraction (not those fractured or displaced by recent wounds) should be scratched out, thus:	 <p>TOOTH MISSING TOOTH MISSING</p>
CROWNED TEETH	Block in solid the crown of tooth (label gold, porcelain, or gold and porcelain), thus:	 <p>GOLD CROWN PORCELAIN CROWN GOLD CROWN</p>
BRIDGE WORK	Block in solid the crown of tooth (label gold bridge, gold and porcelain bridge), thus:	 <p>GOLD AND PORCELAIN BRIDGE GOLD BRIDGE</p>
FILLINGS	Draw filling on tooth accurately as possible (block in and label gold, silver, cement), thus:	 <p>SILVER FILLING GOLD FILLING GOLD FILLING GOLD FILLING</p>
CARIES (CAVITIES)	Outline location and size of cavity, shade in thus:	 <p>CAVITY DECAYED DECAYED DECAYED</p>

DENTURES (PLATES)..... Draw diagram of relative size and shape of plate, block in teeth attached and indicate retaining clasps on natural teeth with the word "clasp."
