STATUS OF WAR CONSTRUCTION

REPORT NO. 8

APRIL 1, 1943

~~CONFIDENTIAL~~

This report is prepared solely for the technical or administrative information of the staffs of the divisions of the Executive Office of the President. It contains information affecting the defense of the United States within the meaning of the Espionage Act, 50 U.S.C. 32. The information contained herein is to be held in strict confidence and its transmission or the exposure of its contents is prohibited by law.

FEDERAL PROGRAM SECTION

EXECUTIVE OFFICE OF THE PRESIDENT

NATIONAL RESOURCES PLANNING BOARD

WASHINGTON, D.C.

EXPLANATORY NOTE

This Report No. 8, *Status of War Construction*, presents war facilities projects that have been programmed by the War Department, Navy Department, Maritime Commission and Defense Plant Corporation since June, 1940. The stage of completion of the individual projects is presented as of February 1, 1943, except for projects of the United States Coast Guard for which the status is given as of January 1, 1943.

For Army Ground Force, Air Force, and Services of Supply facilities, only major projects—those costing over \$500,000—are listed in this report. Furthermore, Army facilities are listed only for the continental United States. Under Army Air Force facilities, the reporting of airport projects is restricted to strictly Army jobs; airport projects being built by the Army for the Civil Aeronautics Administration are not included.

For Navy construction, all jobs are included regardless of cost, except for Navy industrial, shipbuilding and ship repair facilities where jobs costing under \$10,000 are not listed, and Coast Guard facilities where jobs under \$25,000 are excluded. Navy jobs are listed for Alaska and our island possessions as well as for the continental United States. For the Coast Guard, only structural work being built for wartime use is listed; projects for aids to navigation, buoys, etc., and post-war building projects are not included.

For industrial facilities construction, projects costing under \$10,000 are not listed.

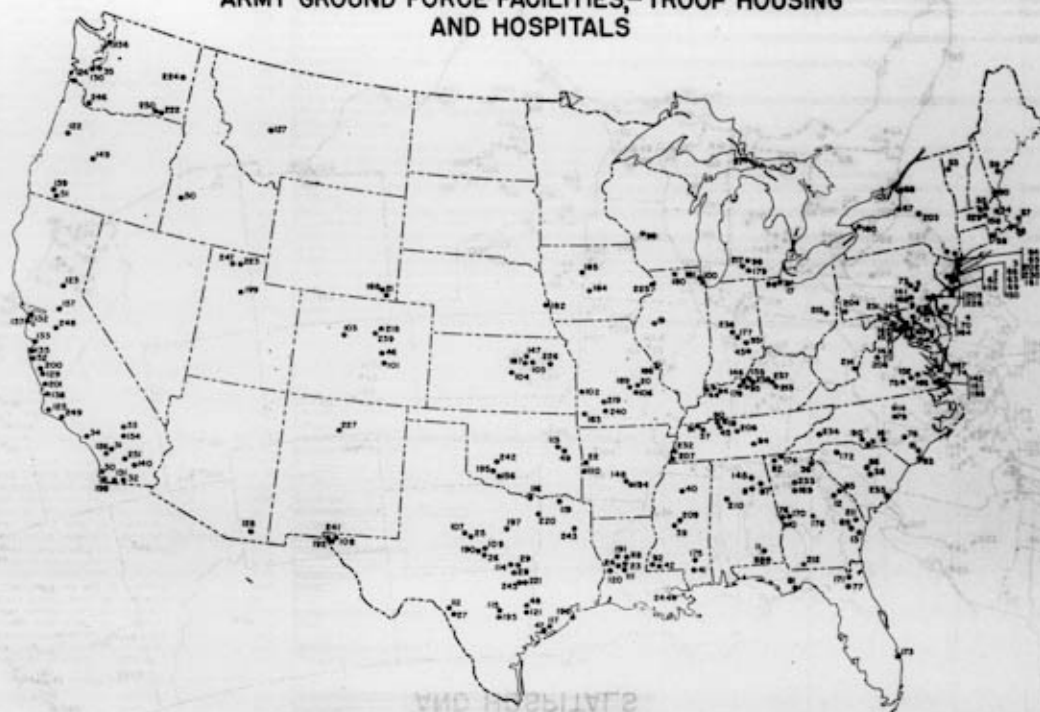

This report does not include war construction of an auxiliary nature, such as the War Housing Program of the National Housing Agency, War Public Works built by the Federal Works Agency, civil airports being built by or for the Civil Aeronautics Administration, access and strategic roads or flight strips under supervision of the Public Roads Administration, or miscellaneous Federal civil works, such as hydroelectric power and flood control projects of importance to the war effort. The report does, however, offer a substantially complete coverage of the construction status of primary war facilities.

The war construction program is presented on the following 19 charts. For greater usefulness, projects within each chart are grouped into subtypes and further grouped into classes according to their stage of completion, such as less than 90 percent completed, over 90 percent completed, etc.

INDEX OF CHARTS

CHART NO.	PAGE
1. Army Ground Force Facilities - troop housing and hospitals	1
2. Army Ground Force Facilities - staging areas, internment facilities, and special installations.	4
3. Army Air Force Facilities - schools and tactical units.	5
4. Army Air Force Facilities - depots, repair facilities, and special installations	9
5. Army Storage and Shipping Facilities.	10
6. Army Industrial Facilities - explosive and chemical warfare service	12
7. Army Industrial Facilities - ordnance and miscellaneous	14
8. Army Airplane Manufacturing Facilities.	18
9. Structures for Naval Personnel, Navy Hospitals, and Marine Corps Facilities	22
10. Navy Shipbuilding and Ship Repair Facilities.	24
11. Navy Fleet Facilities	28
12. Navy Air Stations and Bases	29
13. Navy Ordnance and General Storage Facilities.	30
14. Navy Ordnance Manufacturing Facilities.	32
15. Navy Airplane Manufacturing Facilities.	35
16. Navy Section Base, Radio, and Miscellaneous Facilities.	37
17. Coast Guard Facilities.	40
18. Mercantile Shipbuilding and Ship Repair Facilities.	41
19. Industrial Facilities Sponsored by War Agencies other than War Department, Navy Department, or Maritime Commission.	42

STATUS AS OF FEB. 1, 1943

1. The Army Ground Force (AGF) was established on 15 May 1942, as a result of the reorganization of the Army Department. It was the first of three major components of the Army, the others being the Army Air Force and the Army Service Forces. The AGF was responsible for the development, production, and distribution of ground force equipment, and for the training and support of ground force units. It was the largest of the three components, and its activities were the most visible to the public. The AGF was the primary source of ground force equipment, and it was responsible for the training and support of ground force units. It was the largest of the three components, and its activities were the most visible to the public.

2. The AGF was the primary source of ground force equipment, and it was responsible for the training and support of ground force units. It was the largest of the three components, and its activities were the most visible to the public. The AGF was the primary source of ground force equipment, and it was responsible for the training and support of ground force units. It was the largest of the three components, and its activities were the most visible to the public. The AGF was the primary source of ground force equipment, and it was responsible for the training and support of ground force units. It was the largest of the three components, and its activities were the most visible to the public.

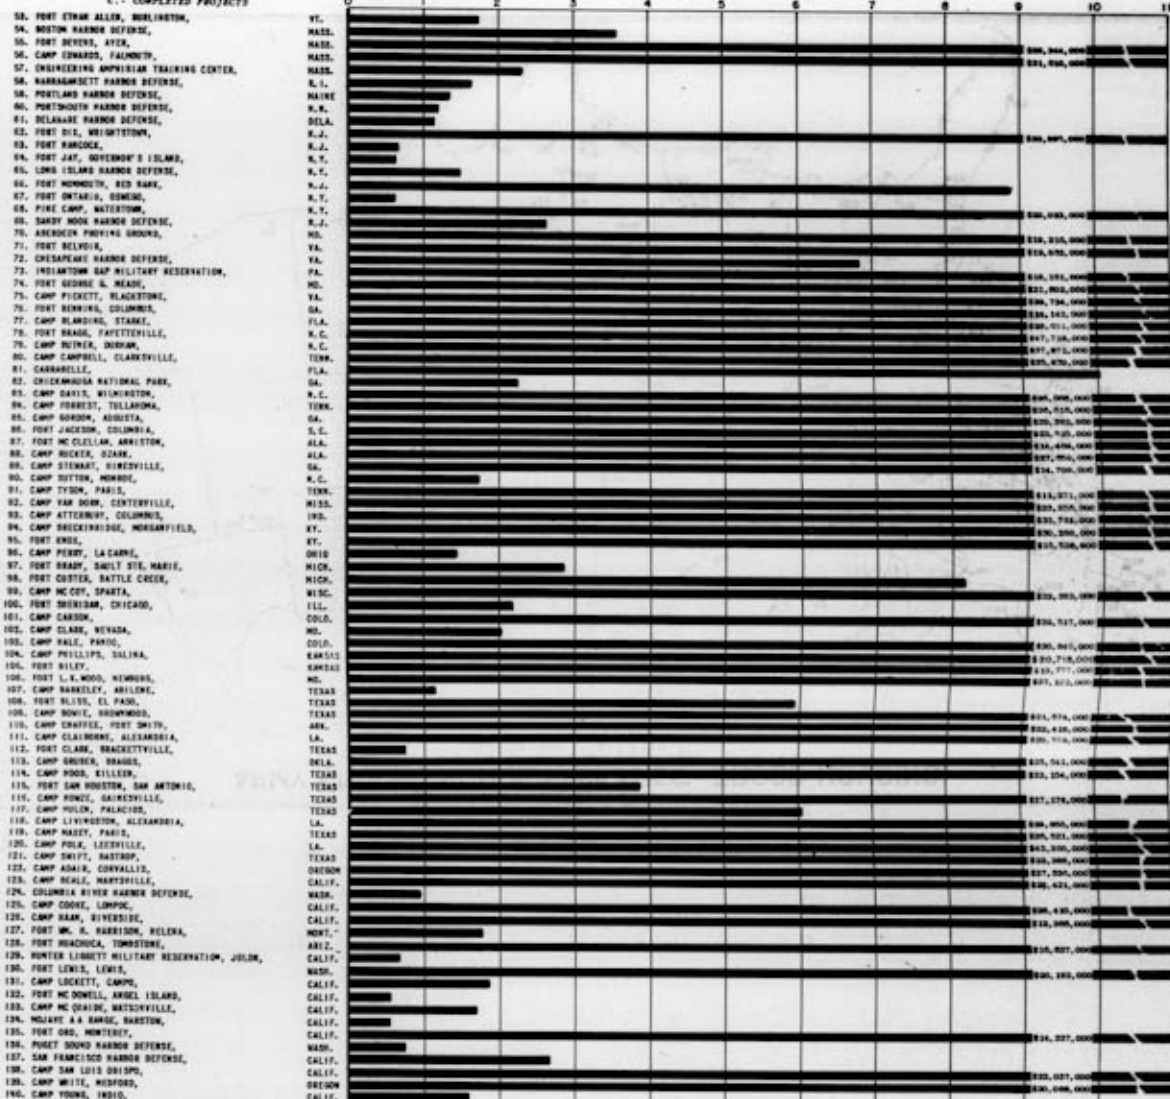

3. The AGF was the primary source of ground force equipment, and it was responsible for the training and support of ground force units. It was the largest of the three components, and its activities were the most visible to the public. The AGF was the primary source of ground force equipment, and it was responsible for the training and support of ground force units. It was the largest of the three components, and its activities were the most visible to the public. The AGF was the primary source of ground force equipment, and it was responsible for the training and support of ground force units. It was the largest of the three components, and its activities were the most visible to the public.

MEMORANDUM for The President:

On April 24 and May 26 I sent you copies of confidential maps showing expansion of manufacturing facilities for defense. Our industrial location staff has revised these maps as of May 15, and I am attaching a set for your information.

Frederic A. Delano
Chairman
