No. 2883 December 23, 1942

Darlan has cabled Boisson to use rate of seven five Francs to dollar and three hundred Francs to pound in French West Africa pending conclusion of discussions with US on question of rate of exchange for all the areas. (Signed Eisenhower from Marshall from Murphy and Bernstein for AGWAR State and Treasury repeat USFOR for British Chiefs of Staff). Reference your R-four four three two, Glassford will be informed. In view of agreement covering French West Africa cannot understand reason for your suggestion that I issue statement as to rate of exchange in West Africa. We assume his mission has instructions for opening account with Bank of West Africa.

From: Freedom Algiers (13/2305Z)
To: AGMAR

No. 1876, December 13, 1942.

After weeks of discussion by US with French Treasury and Bank of Algeria officials (to AGMAR from Freedom Algiers) some of whom are sticky in their habits and not well informed on many basic elements of international exchange French Authorities are issuing for Algeria Morocco and West Africa and later for Tunisia instructions relative to cashing of checks, letters of credit, drafts and remittances by army and civilian officials and soldiers. Copies of instructions are being airmailed, Signed Eisenhower from Bernstein for Fiscal Division; All conversions will be made at the rate of seventy five francs to the dollar and three hundred francs to the pound. We have made no commitments to the French as to their proper technical procedure, however we urge that the Treasury Dept issue such freezing control license and take such other appropriate steps as will facilitate carrying out the transaction referred to in the instructions with a minimum of expense and delay. Advise Treasury of foregoing and also ask it to airmail to Lt Col Bernstein as promptly as possible twelve copies of each of pamphlets containing Foreign funds documents. Proclaimed list and booklet on administration of financial and property controls and also two copies of instructions etc issued to and by censorship in relation to freezing control problems.
