No # 7 August 1943

Commander Coleridge spoke with Dr Coleman (who is organizing conference for Prime Minister) (security reference a proposed importation of approximately 175 Canadian and United States Press Representatives. Dr Coleman agreed it was highly undesirable to bring all these people to Quebec. His only information was to the effect that he was likely to receive instructions to reserve 150 rooms in another hotel for press men. Coleman will represent to appropriate Canadian authorities a possible bad press resulting from 175 disgruntled press men sitting in Quebec and receiving little or no news. He would be grateful if you would put this point to OWI and suggest to them that they, after consultation with War Information Board Canada, warn US Press that they will in all probability be wasting the time of any press men they send to Quebec. It would of course be possible for OWI and WIB to give adequate warning if "Head men" decide to give press conference. Please show to Redman.

WASHINGTON, D. C.

July 30, 1943.

MEMORANDUM FOR Lieutenant Colonel Hammond,
Map Room,
White House.

1. The following suggested method for numbering radio messages between your office and radio station WTE and between the White House Telegraph Office and radio station WTE during the proposed trip beginning at 310230Z is furnished for your approval.

a. The messages from the Map Room: White followed by message number.

b. The messages to the Map Room: Black followed by message number.

c. Messages from White House Telegraph Office: Gray followed by message number.

d. Messages to White House Telegraph Office: Blue followed by message number.

2. It is further suggested that the above identification symbols and numbers be included in the text of the message in cipher. It is important, however, that these identifying symbols and numbers not appear in the same place in all messages. For example: In White number one if the identifying symbol and number appears at the beginning of the message, the same symbol and next number should appear at the end of the text in White number two, or these symbols and numbers may be placed anywhere in the text of the message in parenthesis provided they do not appear in the same place in two consecutive messages.
