MEMORANDUM FOR

THE PRESIDENT

Subject: Ice Conditions in Bering Sea.

1. Except in bays and sheltered places the ice consists of detached fields, floes and cakes continually in motion. At no time is the sea one continuous sheet of ice.

2. The general southern limit of the ice is from Bristol Bay to the west end of St. George's Island (southern one of the Pribilofs) and thence about WNW to the Siberian shore. As a rule no heavy ice will be encountered south of the Pribilofs.

3. Extremes: In a heavy winter, ice jams have blocked False Bay (between Unimak Island and tip of Alaskan Peninsula). In a mild winter U.S.C.G. CHULAN has made trip from Unalaska to Pribilofs and return without encountering ice, during February.

J.R. BEARDALL,
Captain, U.S. Navy,
Naval Aide to the President.
