ANGLO AMERICAN

CONSOLIDATED STATEMENT

REGRADED UNCLASSIFIED
FEB 14 1972

[REDACTED]

OFFICES OF THE WAR CABINET
GREAT GEORGE STREET, S.W.1

1st. September, 1941.

Dear Mr. Stacy May,

With reference to the revised Admiralty figures for 1942 which have been incorporated in the Consolidated Statement, the following are certain notes of general character which have not been put in the Statement, to which I should like to draw your attention.

1. Naval guns other than A.A.

Reduction of output in this category is due to later ships of existing and projected programmes being armed with combined HA/LA armaments, the guns for such ships being shown under AA weapons. Productive capacity thus released has been transferred to manufacture of AA guns and also Army Coast Defence guns.

2. Naval Ammunition other than A.A. over 20 mm.

Reduction in output in this category due to higher proportion of A.A. guns being manufactured. Productive capacity thus released has been transferred to manufacture of A.A. ammunition.

3. Depth Charges.

Reduction in output is due to stocks having been largely built up in 1941. These figures may be expected to vary as manufacture is adjusted to meet expenditure. Surplus capacity is transferred to manufacture of other munitions.

All the other notes are included in the Statement itself.

Yours sincerely,

Stacy May, Esq.,
United States Embassy,
Grosvenor Place,
W.1.

TO BE KEPT UNDER LOCK AND KEY.
It is requested that special care may be taken to
ensure the  of this document.
