HOW TO MAKE A SEEDLING PLANTER

1. Get a sheet of newspaper.

2. Fold the newspaper the long way.

3. Roll the folded paper around an empty tin can. Place the can about in the middle of the paper. The open end of the can should be UP.

4. Roll the paper around the can.

5. Tuck the top of the newspaper inside the open end of the can.

6. Gently remove the rolled paper from the can.

6. Push down the newspaper inside the planter to make a flat bottom. The planter will be able to stand.

6. Fill with potting soil and seeds. Once the seedlings grow, this planter can be transplanted directly into an outdoor garden.

These husk cherries were grown in newspaper planters and transplanted!

HOW TO MAKE A SEED BOMB

1. Use a small piece of air dry clay.

2. Flatten the clay into a pancake.

3. Add a small amount of wildflower seeds onto the pancake.

4. Roll the clay into a ball.

5. Roll the seed bomb into more seed.

6. Make as many as your class can make.

7. Let the seed bombs dry for a few days, and then throw them into a sad, neglected place.
