Are you an educator looking for helpful resources and/or looking to meet and connect with other like-minded educators who love science and the outdoors?! Come join us **Saturday, January 28th from 2pm to sunset** at Crystal State Park.

To reserve a space, please email alison.nsta@gmail.com

Come meet your local NSTA Representative, Alison Thalmann; CREEC Coordinator, Helen de la Maza; and, Crystal Cove State Park's Interpretative Naturalist, Winter Bonnin, who will share about resources and services to offer you as teachers. After, we will walk about a $\frac{1}{2}$ mile along the sand to learn about the tide pools, and provide you snacks.
**NSTA’s National Conference will be in LA**

**March 30 - April 2, 2017**

Through bringing a community of teachers together who have a passion for environmental literacy, we hope to create forums that we can continue our discussions in, share resources, collections, and best practices. Success for all, takes us all. Hope to see you there!

The park is located off Pacific Coast Highway between Corona del Mar and Laguna Beach, California with easy access from I-5, 405 and 73. Crystal Cove State Park is located just north of Laguna Beach, California and just south of Corona Del Mar, California.

Meet at the Bern’s Amphitheater (Pacific Coast Highway, inland at stoplight School-State Park, and follow the signs towards the campground).

*Parking fee waived for participants. Please let the park aide at the entrance kiosk know that you are at the park for the NSTA Teacher Training. Thank you.*

For more information on the impact of school groups visiting the tide pools in Orange County, please go to “Between a Rock and a Hard Place” at http://www.ports.parks.ca.gov/?page_id=23927
