Science Sleuths
Volume 1:
The Mysteries of the Blob and the Exploding Lawnmower

IN A NUTSHELL

This is the first of a two-volume series of mysteries that combine life, earth and physical science concepts with a variety of problem solving techniques. The mysteries are real-life puzzles involving biological, chemical, physical and ecological principles. Each mystery has six different solutions that become more intricate as students progress. Students record and edit information in their electronic notebook, then print reports for assessment by a teacher. Solution times vary from twenty minutes to several class periods. The material exists in CD-ROM or laserdisc and includes video interviews, stills, graphs, tables, maps, charts, an electronic notebook and interactive on-screen tools. Materials also include challenge worksheets, glossary, encyclopedia and crossword puzzles.

*Note: Materials available in Macintosh-CD or Windows-CD.

“Very effective problem-solving strategies! Strongly presents science exploration in a very interesting format.”

“Uses many tools students may be unfamiliar with - like melting a substance to test it... More scientifically based but the two mysteries are environmental problems.”

“Materials are clearly written and highly motivational.”
