

BP-10-27

Shot Blaster

The BP-10-27 ride-on self-contained shot blasting system is the perfect solution for medium-to-large jobs and eliminates the need of a generator or electric power.

The rounded housing and the Hammer Head reversible dovetail blade system incorporated into the paddle wheel design are innovations which result in superior performance.

The BP-10-27 features a compact design that allows it to pass through a 36" doorway, and has an onboard pulse style dust collector.

The BP-10-27 rider is the ideal system for jobs such as airport runways, warehouse floors, parking decks, highways and bridge decks.

SPECIFICATIONS

Production Capacity:	*Up to 1500 ft ² /hr
Blast Pattern:	10"
Travel Speed:	Variable up to 200 ft/min
Motor:	25hp Kohler
Fuel:	LP Vapor
Dimensions (L x W x H):	78" x 34" x 57"
Weight:	1525 lbs
Work Lights:	12VDC LED
Optional:	Blast pattern reduction plates

FEATURES AND BENEFITS

- Electronic Fuel Injection
- On-board tool box
- High visibility operator position
- Adjustable operator's seat
- Easily accessible maintenance points
- Intuitive operation

*Production rates will vary between material being removed and from job-to-job. This production rate represents production values under ideal conditions.
