

## It's also about money!

Instead of throwing your money away to have your waste removed you can invest in a machine that will save you 30% or more and last a lifetime. Food residuals, horse manures and sewage sludge – anything organic - can all be turned into valuable compost without a permit automatically – without odor. From backyard composting to Municipalities, Sun State Organic Products can make your composting payoff with quality compost, produced in just days!

An articulated, fully automatic, aerated composter that can convert organic matter into compost in days. Our patent pending composters last a lifetime and come with truly unique features such as:

### Unique Features:

- The composter tilts downward and unloads by itself.
- The composter tilts up to allow for easy filling.
- The composter is fully programmable
- The composter is fully aerated
- The composter is portable
- The composter has 8 mixing paddles to fully mix the ingredients.
- The composter has a warning light and klaxon for operator safety.

### "The Colt" Model 3696

3-foot diameter and 8-feet long, 1.5 cubic yard capacity, HDPE & Stainless Steel construction and insulated throughout. With all the features of our larger Rotary composter, this is perfect for both the serious home composter, or for schools or research.

### "The Mustang" Model 48120

4-foot diameter and 10-feet long, 3.2 cubic yard capacity. HDPE & Stainless steel construction and insulated throughout. This is perfect for both the small horse breeder, or for Colleges and Restaurants.

### "The Stallion" Model 48240

4-foot diameter and 20-feet long, 6.5 cubic yard capacity. HDPE & Stainless Steel construction and insulated throughout. This is perfect for both the mid sized horse breeder, commercial generators or for Parks and Hotels.

## Features of our Rotary Composters

- Heavy Duty HDPE Pipe rated for 75 years of use.
- Stainless Steel Composting Chamber rated for 100 years of use.
- 2' Box Steel channel undercarriage.
- A powerful 24" linear actuator for tilting up and down.
- Heavy duty 1 HP motor with a 60:1 reduction gearbox – forward and reverse.
- Programmable logic controller, for air and rotation.
- Variable air supply, pumping air through the entire composter.
- All manual functions are controlled with simple toggle switches.
- 4 Swivel Jacks making leveling simple.

If you think being green is all about the environment

you're wrong.....
