

To all signatory contractors of LU 613:

We are most certainly living under new circumstances at least for the time being. Our members and partners health and safety is always number one. With these uncertain times I am urging all of us to be diligent and disciplined in taking steps to reduce the spread of COVID-19.

World leaders, along with the major health organizations have declared this a worldwide pandemic. Just last night our President of the United States declared a national emergency.

Business Manager Kenny Mullins, in an effort to get in front of this has put in precautionary measures at the Hall to limit our members contact with the virus.

We are asking you the contractor to work with us in this effort to reduce the risk and spread of COVID-19. Along with taking recommended steps from authorities like OSHA and the CDC to reduce exposure we are asking you to please communicate with us the following information:

- Employees that are sent home due to possible exposure of COVID-19
- Employees who become ill due to COVID-19

As we know construction sites are often not the most sanitary places. We have all seen the pictures or actually came in contact with the nasty toilets and broken hand wash stations. We are urging you to please get with your GC's and take a serious look at each jobsite toilet wash station area. Please ensure that all hand wash stations have adequate water and soap. If a site does not have a hand wash stations PLEASE work to get one. It is vital to our members to follow the steps to prevent the spread of COVID-19.

I look forward to working together with you and please contact myself or anyone on staff to assist you in any way that we can.

Best Regards,

Mike Bell

Assistant Business Manager/Safety Director
IBEW Local Union 613
