CHEMICAL IRRITANTS (CIs), commonly known as tear gas or pepper spray, are used for crowd control during law enforcement operations. They are often referred to as chemical weapons, as they are a form of chemical weapon under the Chemical Weapons Convention (1993). The Convention prohibits the production, acquisition, and transfer of chemical weapons, and their use is prohibited in armed conflicts.

HISTORY

The term “chemical irritant” was coined in 1916 by AMA President Dr. George E. Warren. The term was later adopted by the Chemical Weapons Convention (1993). Since then, CIs have been used in various conflicts and protests around the world.

CHEMICAL IRRITANTS (CIs)
