

Network Threat Assessments for Today's Aggressive and Ever-Changing Threat Landscape

Today's workplaces have changed — workers are mobile, want around-the-clock access to networks from a myriad of devices of their choosing from locations around the world. This evolution has changed the way businesses need to think about and administer network security.

Cisco® ASA with FirePOWER™ Services is the industry's first adaptive, threat-focused next-generation firewall (NGFW) designed for a new era of threat and advanced malware protection. It delivers an integrated threat defense across the entire attack continuum — before, during, and after an attack.

Service Overview

Both small and mid-sized businesses as well as distributed enterprises have advanced threat protection needs. Cisco ASA with FirePOWER Services combines the proven security benefits of the ASA 5500-X firewall with the industry-leading FirePOWER next-generation intrusion protection system and advanced malware prevention system from Sourcefire in a single device.

Ingram Micro's FirePOWER Network Threat Assessment helps identify and validate the Proof of Value you can receive through Cisco's ASA 5500-X NGFW using FirePOWER.

Deliverable

Be more proactive in helping your clients and their unique business needs. Help validate proof of value for your clients:

- **Mentored Assessment & Report** - Participate in all steps of the engagement by providing a certified engineer to "shadow" an Ingram Micro expert. Project final report provides customer with real data from their environment to validate the investment of the appliance.

Reseller Benefits

- Increase sales of next-generation firewalls designed for a new era of threat and advanced malware protection
- Build "trusted advisor" relationship with customer by identifying risks before it becomes a problem
- Unbiased, third-party assistance designed to achieve the best possible outcome for the customer
- Increased margins through an expanded services portfolio
- Fixed price services eliminates surprises and provides predictable costs
