

Power Seat Belt Presenters

Component Location Index

NOTE:

- The illustration shows the driver's power seat belt presenter.
- The passenger's power seat belt presenter is similar to the driver's power seat belt presenter.

DRIVER'S DOOR SWITCH
Test, page [23-201](#)

Description

When the door is closed, the door latch switch is opened and the power seat belt presenter motor rotates the belt so the seat belt lower anchor swings forward to place the seat belt within easy reach. When the door is opened, the door latch switch is closed and the power seat belt presenter motor reverses the belt so the seat lower anchor swings rearward to allow easy exit or entry.
