

Fan Control Unit

Replacement

1. Remove the right door sill molding
2. Remove the small cover on the right kick panel.
3. Pull the carpet back to expose the *ECM or PCM.
4. Remove the four nuts and ECM or PCM bracket, then disconnect the fan control unit connector.

5. Remove the fan control unit from *ECM or PCM bracket.

6. Install the fan control unit in the reverse order of removal.

*ECM for M/T
PCM for A/T

Defroster Door

Adjustment

Adjust the mode control motor rod so the linkage looks like this in the Defrost position.
