

Skin Parasites

REGIMEN

1. Begin by bathing and exfoliating with **All Stop™ Medicated Body Wash**, rinse thoroughly and dry off. Do not leave Body Wash on the skin any longer than five minutes. Avoid applying the **Body Wash** to any sensitive areas such as your face and genitals. If you have sensitive skin, first test the **Body Wash** before applying it to your entire body. Call our customer service representatives at 1.866.314.8917 (Toll Free) to discuss any issues with the products. **AVOID DIRECT SUNLIGHT or SUNBATHING** while exfoliating with our **Medicated Body Wash**.

NOTE: Women, children and others with very sensitive skin should consider using our **All Stop™ Healing & Protection Spray** instead of the **Medicated Body Wash** (the strong active in the **All Stop™ Medicated Body Wash** can be too harsh for sensitive skin). Our antimicrobial **All Stop™ Medicated Body Wash** sterilizes, heals, and reduces itching. It also preps the infested areas for the next step by dehydrating eggs, larvae, and parasites.

2. Apply the **All Stop™ Healing & Protection Spray** twice a day to sensitive infected skin. This will ease the itch and help to heal the active areas. (Safe for face and genital areas)
3. 30 minutes later or longer, apply **All Stop™ Mitactin™ Skin Spray** from the head down (the first day only). **Mitactin™ Skin Spray** can also be used on the face with a cotton ball soaked with **Mitactin™**. Avoid eye contact. Requires no rinsing. Repeat this process 2 times a day for the first week as needed on the areas that are itching and “active”.
4. Apply **Medicated Skin Cream** once a day to heal sores, rashes and eliminate parasites.

Sanitation is extremely critical to successful control of Skin Parasites. We suggest you follow the suggestions listed below to prevent reinfestation:

Your mattress is the primary reason most people get reinfested. The Parasites leave your skin while you are lying in bed and venture into the mattress to breed and lay eggs. EVERY NIGHT wash and dry bed sheets and pillowcases in hot water with detergent to kill any Parasites or Eggs on them. All non-washable bedding (spreads, comforters, pillows, etc) should be tumbled in the dryer on high heat EVERY NIGHT before putting them back on the bed. (140 degrees Fahrenheit will kill the Parasites and Eggs in 20 to 30 minutes). Immediately encase mattress with an **All Stop™ Mattress Cover or All Stop Paravinyl Encasement**, this is critical to eliminate reinfestation.

Never use the same bath towels or wear the same clothes twice without washing and drying them using the same methods as your bedding (washed in hot water with detergent, and dried on 140 degrees Fahrenheit for at least 20 minutes). All soiled clothes and towels should be placed in plastic bags until they can be laundered. Clean laundry should be stored in large plastic bags away from any dirty laundry during the cleaning process.

Using the **All Stop™ Professional Steam Cleaner**, steam clean the carpets in your home, car seats, chairs, sofas, and anywhere else extended periods of time may be spent.

If you experience Parasites on your feet or lower leg sections, you may be getting infested from your shoes or floorboard mats in your car. Spray **PuraCleenRx™ Disinfectant Spray** in your shoes daily and use a hairdryer to dry them. To eliminate Parasites and Eggs from your car, use the **Professional Steam Cleaner** to steam the carpets, mats and seats. If your vehicle has leather seats, spray them daily with **Disinfectant Spray**. If your car has cloth seats, we suggest putting a plastic sheet over the seat and then a blanket or towel over the vinyl sheet. Throw the blanket or towel in the dryer each night on high heat for 20 minutes.

Vacuum vigorously and often to remove as many Skin Parasites and Eggs as possible and discard the bag each time to prevent spreading. If available, use a dry sauna for 15 to 20 minutes each day. Apply **All Stop™ Mitactin™ Spray** from head to toe prior to going into the sauna. The **Mitactin™** along with the heat helps to speed up the eradication of the Parasites on the body.

Use our hospital grade **PuraCleenRx™ Disinfectant Spray** on all cracks, crevices, around windows, curtains, furniture, and door frames daily for several days. The non-toxic, non-staining spray is safe to spray on all surfaces: carpet, bedding, walls, eating areas and floors. It will disinfect your home against any Parasites, Eggs, Bacteria, Mold, Fungus, and Viruses that can make you sick.

If you do not experience major results within 4 to 5 days, contact one of our customer service representatives in order to customize a regimen especially for you. These products work, and they work quickly! Our guarantee is contingent to you phoning one of our customer service representatives in 4 to 5 days to change your regimen if it is not working for you.

About Q-Based Solutions

Q-Based Solutions is a global trusted leader in the healthcare industry. Building off of years of experience developing skin parasite treatments, we are dedicated to effectively treating you and your environment. For more information, please visit www.QBased.com.
