7. THE CREMATION PROCESS (SEE #8 ON REVERSE SIDE)

5. PACEMAKERS, IMPLANTS, AND PROSTHESES

Pacemakers, radioactive implants, other implanted battery-powered devices, or certain prostheses may create a hazardous condition when placed in the cremation chamber and subjected to heat. Examples of these devices include, but are not limited to the following:

- Pacemakers
- Implantable Cardioverter Defibrillators (ICDs)
- Cardiac Resynchronization Therapy Devices (CRTDs)
- Implantable Drug Pumps
- Neurostimulators (including for pain and functional electrical stimulation)
- Bone Growth Stimulators
- Hydrocephalus Programmable Shunts
- Fixion Nails
- Dental Mercury Amalgam
- Radioactive Seeds (Brachytherapy)
- Any other battery powered implant

As Authorizing Agent, I have listed in #5 on the reverse side all devices which may have been implanted in or attached to the Decedent. If radioactive implants have been used in the procedure known as seed brachytherapy within one year of the time of death, cremation may not be performed.

6. CASKET OR ALTERNATIVE CONTAINER

The remains are to be cremated in a combustible casket or alternative container that is capable of being completely closed, is resistant to leakage or spillage, is sufficiently rigid to be handled easily, and provides protection for the health and safety of Crematory and Funeral Home personnel. The Crematory is authorized to inspect the casket or alternative container, including opening it if necessary. In the event that the casket or container does not meet the above requirements, the Crematory will notify the Authorizing Agent. Many caskets that are comprised primarily of combustible material also contain some exterior parts (decorative handles or rails) that are not combustible and that may cause damage to the cremation equipment. As Authorizing Agent, I authorize the Crematory, in its discretion, to remove and discard the non-combustible materials. I understand that some crematories will not accept metal or fiberglass caskets. I further understand that the casket or alternative container will be consumed as part of the cremation process.

7. THE CREMATION PROCESS

The cremation of the Decedent's remains may take place before or after ceremonies to memorialize the Decedent. Cremation is performed to prepare the remains of the Decedent for final disposition. It is carried out by placing the Decedent's remains in the casket or alternative container, which is then placed into a cremation chamber or retort where they are subjected to intense heat and flame. All cremations are performed individually. During the cremation process, it may be necessary to open the cremation chamber and reposition the remains of the Decedent in order to facilitate a complete and thorough cremation. Through the use of suitable fuel, the incineration of the container and its contents is accomplished and all substances are consumed or driven off, except bone fragments (calcium compounds) and metal (including dental gold and silver and other non-human materials) as the temperature is not sufficient to consume them.

Due to the nature of the cremation process, any personal possessions or valuable materials, such as dental gold or jewelry (as well as any body prostheses or dental bridgework) that are left with the remains and not removed from the casket or container prior to cremation may be destroyed or if not destroyed, will be disposed of by the Crematory. The Authorizing Agent understands that arrangements must be made with the Funeral Home to remove any such possessions or valuables prior to the time that the remains of the Decedent are transported to the Crematory.

Following a cooling period, the cremated remains, which will normally weigh several pounds in the case of an average-size adult, are then swept or raked from the cremation chamber. Although the Crematory will take reasonable efforts to remove all of the cremated remains from the cremation chamber, it is impossible to remove all of them, as some dust and other residue from the process will be left behind. In addition, while every effort will be made to avoid commingling, inadvertent and incidental commingling of minute particles of cremated remains from the residues of previous cremations is a possibility, and the Authorizing Agent understands and accepts this fact.

After the cremated remains are removed from the cremation chamber, all non-combustible material (insofar as possible) such as dental bridgework and hinges, latches, and nails from the container will be separated and removed from the human bone fragments by visible or magnetic selection. The Crematory is authorized to dispose of these materials with similar materials from other cremations in a non-recoverable manner, so that only human bone fragments will remain.

When the cremated remains are removed from the cremation chamber, the skeletal remains often will contain recognizable bone fragments. Unless otherwise specified, after the bone fragments have been separated from the other material, they will be mechanically pulverized. The process of crushing or grinding may cause incidental commingling of the remains with the residue from the processing of previously cremated remains. These granulated particles of unidentifiable dimensions, which are virtually unrecognizable as human remains, will then be placed into a designated container.

8. AUTHORIZATION TO CREMATE, PROCESS AND PULVERIZE

As Authorizing Agent, I have received the description of the cremation process contained in # 8 on the reverse side and authorize the cremation, processing and pulverization of the remains of the Decedent. I further authorize the Funeral Home to deliver the Decedent's remains to the Crematory for the purpose of the cremation.

9. URN OR TEMPORARY CONTAINER

After the cremated remains have been processed, they will be placed in the urn listed on reverse side or, if an urn is not provided to the Crematory, in a temporary container provided by the Crematory. The Authorizing Agent acknowledges that it is impossible to recover all of the dust and residue from the cremation and processing.

In the case of an adult, it is recommended that the urn or temporary container be a minimum size of 200 cubic inches. In the event the urn or temporary container is insufficient to accommodate all of the cremated remains, the excess will be placed by the Crematory in a secondary container. This secondary container will be kept with the urn or the temporary container and handled according to the final disposition instruction set forth in Section 11 below; provided, however, that the secondary container may not be designed for shipping. All urns or containers provided to the Funeral Home or Crematory must be appropriate for shipping. The Authorizing Agent directs the Crematory to use the specified urn or container listed in #10 on the reverse side.

10. FINAL DISPOSITION

Following the cremation, the Authorizing Agent directs the Crematory and/or Funeral Home to undertake the actions set forth on the reverse side to arrange the final disposition of the cremated remains of the Decedent. If the cremated remains are shipped at any time, the Authorizing Agent directs that the Crematory or Funeral Home utilize Priority Express Service with a return receipt through the U.S. Postal Service. **In selecting shipment by the U.S. Postal Service, the Authorizing Agent acknowledges and assumes the risk that the cremated remains may be lost or damaged during shipment and releases the Funeral Home and the Crematory from any liability therefor.**

The Authorizing Agent understands that if no arrangements for the final disposition, release or shipment of the cremated remains are made in this Authorization, the Crematory and/or the Funeral Home shall hold the cremated remains for _____ (____) days after cremation. If during that _____ (____) day period the cremated remains are not retrieved by the person designated above to receive them or by the Authorizing Agent, or if arrangements for their final disposition are not made, then the Funeral Home may return the cremated remains to the Authorizing Agent at the address listed in Section #3. In the alternative, if no arrangements for the final disposition of the cremated remains have been made within _____ (____) days after the cremation and if the Authorizing Agent has not taken delivery of or caused the delivery of the cremated remains, or in the event the arrangements of the final disposition have not been carried out within the _____ (____) day period because of the inaction of a party other than the Crematory or Funeral Home, then the Crematory or Funeral Home may dispose of the cremated remains as Virginia law permits.
