

Rosslare AxTraxNG™ Server v27.5.7.8

Access Control and Automation Software Overview

Supports both A and B Panel Hardware Platforms

Up to 10 AxTraxNG™ Client Workstations

- Rosslare's AxTraxNG™ Server 27.5.7.8 Client/Server software features support for A and B panels with hardware management tools including firmware update. The release focuses on increased stability and performance, thorough bug resolution, and an increased feature set. AxTraxNG includes Microsoft SQL database (Express) with powerful identity management, access control, 'if/then' automation, database tools, and a report engine for a powerful solution for your security needs. It is easily scalable up to 40 PC workstations, 1023 control panels, and 2048 readers over LAN and WAN to protect local and remote assets. Select from software licensing levels and a full range of controllers to meet your business targets for small to large-scale projects.

- **New Features:**

Email Notification: Based on SMTP protocol, you can set up event-based email notifications

Hikvision and Dahua: Lets you see video pop-ups and save snapshots with NVR support

Support for A and B panels: Supports Rosslare's A and B panels – AC-825IP, AC-425x-B, AC-225x-B, AC-215x-B – and the related expansion modules

Significant Performance Upgrade: Access control that works even when a panel is receiving new configuration

Scaleability Update: Up to 900 readers and updated MAC address UDP panel discovery

- **Order Models**

AxTraxNG™ Free* Edition: Up to 256 readers

AxTraxNG™ Licensed Editions: Over 256 readers

Built-in support of 26 languages: including English, French, Spanish, German, Italian, Chinese, Portuguese, Russian, Korean, Japanese, Arabic

- **Versions:**
