

## *TA Instruments* *What's New in* *SA+ Software*

### **What's New in SA+ Software v15\_20110930**

- The four experiment programs Isotherm, Organics, TempRH and HiRes are all run from a single main menu window.
- The configuration programs have been consolidated into one program that is also run from the main menu window.
- This code is compatible with the SA+ balance.
- All four programs may be used with an optional GIGE camera to take pictures of the sample during experiments.

Note: There are temperature and solvent restrictions when the camera is installed.
