

Teak Isle Mfg. and Marine Digital Integrators collaborate to offer new custom electrical management assemblies

Ocoee, Fla. - Oct. 2, 2016 - Teak Isle Mfg. and Marine Digital Integrators, or MDI, have partnered together to bring customers new custom electrical management assemblies at the IBEX show Oct. 4-6.

Teak Isle will be introducing several storage options for electrical management assemblies used to house digital switching systems developed by MDI.

By working with MDI, the experts in digital switching solutions, Teak Isle is regularly called upon to design electrical enclosures to fit specific equipment needs and space constraints. This collaboration allows MDI the ability to hold and organize their AC and DC systems as well as their advanced battery management systems.

Teak Isle Mfg. also supplies MDI with a variety of additional engraved panels for other battery management solutions.

Parts can be constructed from either King Starboard or acrylic and are custom designed to each boat model's space and equipment needs.

For more information, visit the Teak Isle website at www.teakisle.com or visit booth 521 at the IBEX show.

###

Teak Isle Mfg.

Teak Isle Mfg. is the trusted source for CNC cut OEM plastic and wood component parts for over 200 boat builders. Products include cabin entry doors, laminated cabinetry, Corian countertops, access doors, bent acrylic sliding doors and King Starboard HDPE parts. In addition to offering complete OEM sliding door and screen door assemblies, Teak Isle offers replacement roller wheels assemblies and tracks on our new retail website www.boatoutfitters.com.

Marine Digital Integrators

MDI designs, develops, and produces custom integrated digital switching solutions for the OEM Boatbuilder. This includes complete AC and DC electrical systems and advanced battery management.
