

1. To open VMware Player, click the Start button, then find the VMware folder, then click VMware Player.

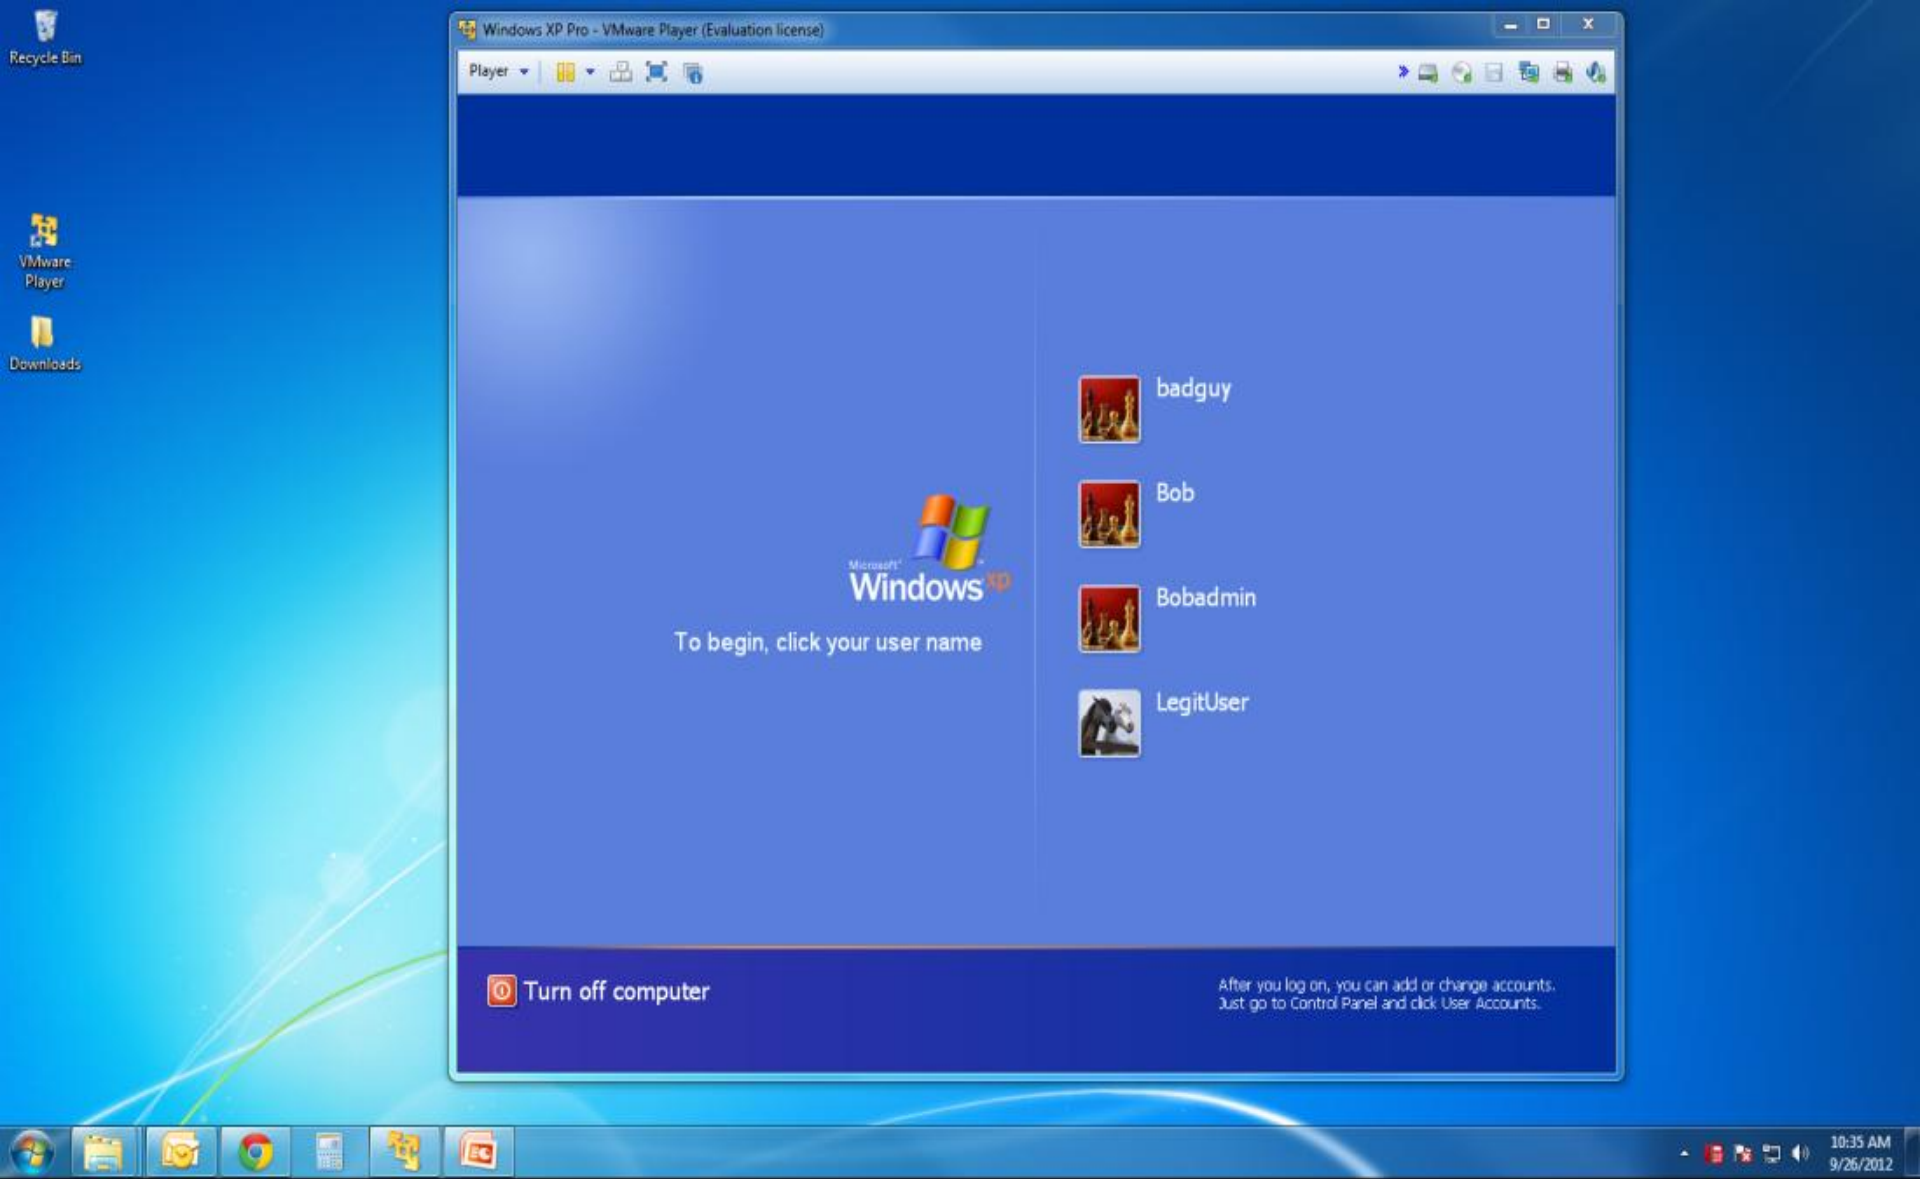

2. In the VMware Player window, select "Open a Virtual Machine."

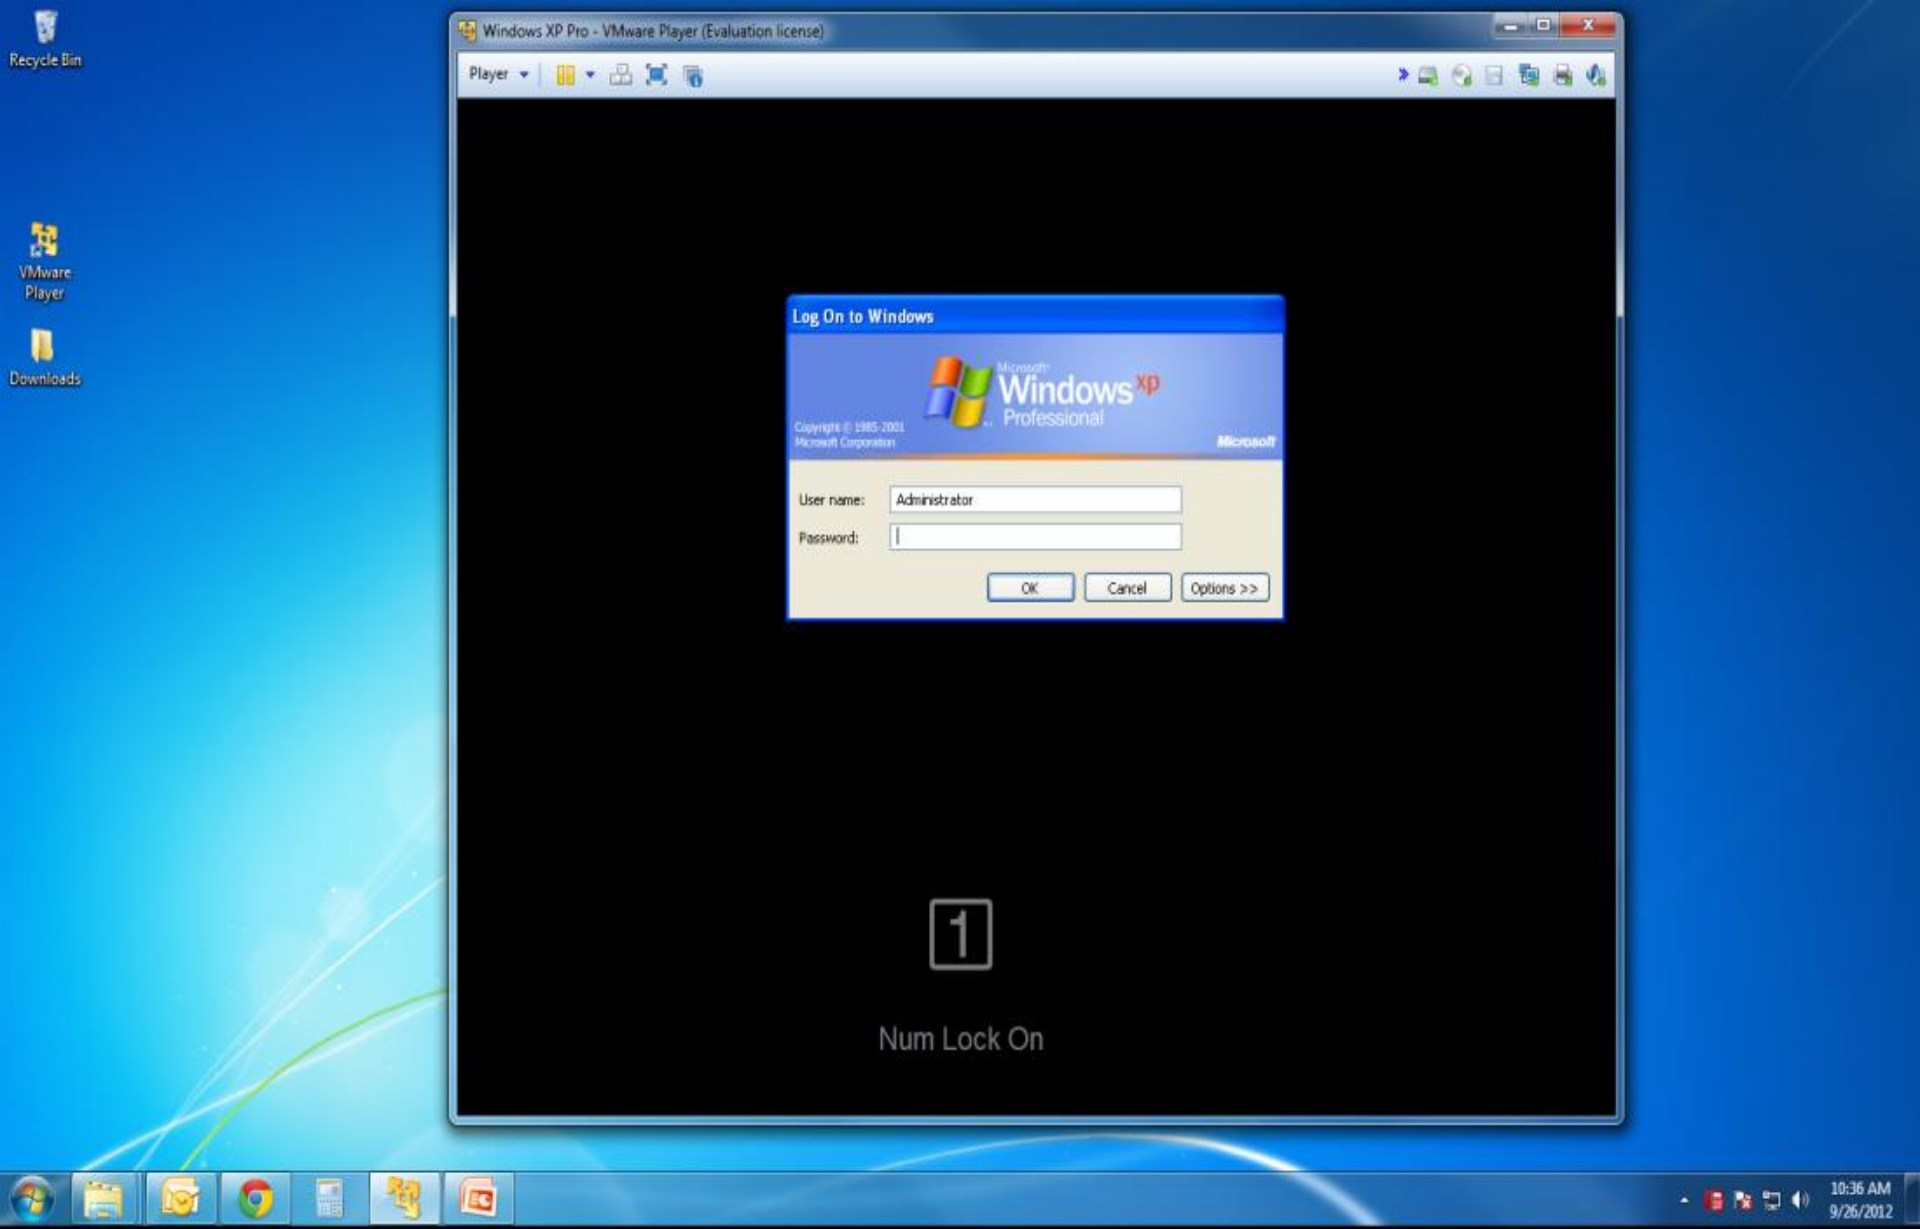

3. Locate the image files that you decompressed. Select the appropriate .vmx file and select Open  
Note: If you're having trouble finding the files you decompressed, try searching for \*.vmx.

4. Click “Play virtual machine.”

5. Log in as Administrator. If the Administrator account does not appear, you may have to hit Alt+Ctrl+Insert and manually enter Administrator as the user name (see next slide).

If the Administrator account does not appear at the log-in screen, hit Alt+Ctrl+Insert and enter “Administrator”

6. Once you reach the desktop of the virtual image, set your team ID by double-clicking “Shortcut to CyberPatriot Set Team.” Enter your Team Hash.
