Summary
This report summarizes the results of 10 anti-poaching patrols of the Oban Division of Cross River National Park (CRNP) conducted from October to December 2019 and supervised by Wildlife Conservation Society (WCS). The patrols lasted for 67 patrol-days (449 person-days) and covered a total distance of 497.8 kilometers. Nine poachers were arrested this quarter and 3,269 wire snares and 4 hunting camps were destroyed. Other signs of hunting observed include 3 gunshots and 443 expended shotgun cartridges. Primates sighted this period include Mona monkey Cercopithecus mona (sighted 10 times), putty-nosed monkey Cercopithecus nictitans (sighted 5 times), drill Mandrillus leucophaeus and chimpanzee Pan troglodytes ellioti (sighted 3 times).

Introduction
The Cross River National Park (CRNP), created in 1991 from existing forest reserves, is the most extensive area of tropical rainforest remaining in Nigeria today. Cross River National Park consists of two separate divisions: Oban and Okwangwo. The Oban Division covers an area of roughly 3,000 km² and is contiguous with Korup National Park in Cameroon. Oban is recognized internationally as a biodiversity hotspot with high levels of species richness and endemism and is a particularly significant site for rare and threatened primate species including Preuss's red colobus Piliocolobus preussi, drill Mandrillus leucophaeus and Nigeria-Cameroon chimpanzee Pan troglodytes ellioti. Oban faces a huge threat from hunting to supply the lucrative bushmeat trade and deforestation from commercial plantation agriculture. This report covers law enforcement activities supported by WCS in Oban during the period from October to December 2019.

Methods
Each month four teams comprising six CRNP rangers and a WCS staff patrolled different areas of the park. Patrols were planned based on information received from village informants and data from previous patrols. Data was collected using CyberTracker on hand-held mobile devices and analysed using SMART software.

Results
Patrol effort
Nine offenders were arrested this quarter and handed over to Cross River National Park management for prosecution. During the period, 10 patrols were completed over 67 patrol days (449 person-days). The patrols covered a total distance of 497.8 kilometers (Figure 1). A total of 3,269 wire snares and
4 hunting camps were destroyed. Three gunshots were heard and a total of 443 expended shotgun cartridges were encountered.

Wildlife Observations

Primate

During this quarter, there were sighting of Mona monkey, putty-nosed monkey, Drill and the Nigerian-Cameroon chimpanzee were recorded. Also, vocalization and feeding signs were observed.

Other Wildlife

Other wildlife recorded during the period include African forest elephant, buffalo, red river hog, blue duiker, and bay duiker (Appendix I).
Acknowledgments

Funding for this project was provided by the African Elephant Fund and the Mohamed bin Zayed Species Conservation Fund. We have also enjoyed donations, continuous support, and collaboration from the North Carolina Zoo on this project since inception. WCS appreciates the support and collaboration of the Cross River National Park. WCS is formally registered in Nigeria through an agreement with the Ministry of Budget and National Planning of the Federal Republic.
