Resistored Anode Rod

Counters aggressive water to prolong the lifespan of the storage water heater

Components Secured with 5-Bolt Flange

Allows for easy access to internal components during regular maintenance

Water Inlet with Whirl Flow Diffuser

Helps regulate incoming water flow to optimise heating and provide more hot water

High Density Polyurethane Insulation

Promotes better heat retention, which saves more energy and reduces heating time

Blue Diamond Enamel Coating

Provides protection for inner tank to resist corrosion and ensures long-lasting performance

Incoloy Heating Element

Withstands high temperatures and resists dry firing while ensuring fast heating

LEFT MOUNTED

RIGHT MOUNTED

Thermal Cut Off

Ensures prevention of overheating or scalding from occurring

Universal Service Panel

Provides flexibility during installation and easier maintenance

Universal Mounting Bracket

Allows for simple and easy mounting and installation

ELCB (optional)

Helps provide protection against electrical shock

EHG Smart WiFi Storage Water Heater Series

Download 'Rheem SEA' mobile application free below

INTUITIVE, VERSATILE AND SOPHISTICATED

Elevate your shower experience and enjoy greater convenience

Elevate your shower experience by utilising the EHG Smart WiFi's smart heating capabilities, heating schedule options and temperature adjustment functions, which can be controlled seamlessly and effortlessly through your mobile phone.

Simply download the Rheem SEA mobile application to unlock all the benefits the EHG Smart WiFi series has to offer. With its simple and intuitive interface, you can easily navigate through the different modes available and make quick and easy adjustments to suit your shower preferences and needs.

Eco Smart Mode

Optimise your water heater by enabling 'Eco Smart Mode' and letting your water heater learn your shower habits to operate more efficiently

Timer Mode

Use the timer mode to set your desired start and end heating time for your water heater

STD Mode

Use the STD mode to choose your desired heating temperature from 30°C to 75°C

Power Status Notifications

Receive real-time notifications on your phone whenever your water heater power status has changed
