YMCA Innovations, Initiatives, & Ideas that have impacted Culture and Society

re-compiled by Craig Seibert with Mission Focus based on original version by YMCA of the USA © www.ymcamission.org
In the book, Built to Last, authors Jim Collins and Jerry Porras share that great organizations know how “preserve the core” while “stimulating progress”. The “core” can be found in the YMCA Mission Statement – “to put Christian principles into practice through programs that build spirit, mind, and body for all.” The “core” here is the focus on putting “Christian principles into practice”. The “stimulating progress” is the applying of Christian principles to innovative programs and initiatives. And of course, the “for all” part of the mission statement is the audience we serve. That is, as we go about putting “Christian principles into practice” we do it in such a way that it is welcoming to all.

The “stimulating progress” part of the equation can be seen in all the innovative ways the YMCA has impacted local communities over the years. As YMCA staff and volunteers have served people in their communities, they have been on the front lines of developing programs and initiatives that have in turn impacted the world all while helping to advance the mission of the Y and maintain its relevance and effectiveness.

This document summarizes briefly some of the highlights and accomplishments of the YMCA movement in America. The reason to look at what YMCAs did in the past is to remember by God’s grace the great things YMCA staff and volunteers were inspired to develop and try and then to keep the challenge before us today to continue to believe God for the same spirit of innovation, courage and effectiveness.

A final thought for those who lead in the YMCA either through position or influence, is to strive to have a working knowledge of the contents of this document. This will greatly increase your effectiveness as a YMCA spokesperson within your branch or association or in the community at large. History is important. Remembering what has been accomplished gives a vision for what we can do in God’s strength in the future. Giants of spiritual and cultural leadership have served in YMCAs over the years, and the calling today is that such leaders would come forth to lead a new generation of YMCA workers.

We challenge you to reflect on these YMCA innovations and pray that you might also have a vision for what might best serve your community.

This document is divided into seven sections that are outlined on the following page.

Enjoy this walk down YMCA history lane.

Mission Focus
www.ymcamission.org
Table of Contents

**YMCA Sports**
- Basketball (1891)
- Professional Football (1895)
- Volleyball (1895)
- Racquetball (1950)
- Softball (1926)

**YMCA Programs**
- Camping (1860s)
- Body Building (1881)
- Swimming and aquatics (1885)
- The Ragger Society (1914)
- Group Child Care & Gang Prevention (1960s)

**Organizations influenced by YMCAs**
- Association Press (1907)
- Boy Scouts of America (1910)
- Camp Fire Girls (1910)
- The United Service Organizations (1940)
- The Peace Corps (1961)

**Organizations started at YMCAs**
- Gideon's International (1899)
- Toastmasters International (1903)
- The First African-American Baseball League (1920)
- The National Model Railroad Association (1935)
- Famous “Head of Christ” Painting by Warner Sallaman (1940s)
- Jazzercise®, (1969)

**YMCA and Minorities**
- African-American YMCAs (1853)
- YMCAs and Women (1860s)
- Asian-American YMCAs (1875)
- U.S. Indian YMCAs (1879)

**YMCA and the Military**
- Civil War (1861—1865)
- Spanish American War (1898)
- World War I (1914-1918)
- World War II (1939-1945)

**YMCA’s Influence on Society**
- YMCA Training Schools (1890)
- Residences
- Global Influence

**Closing Thoughts**
YMCA Sports

Millions of people have been introduced to sports at YMCAs. Many of the sports people play were introduced at YMCAs, too.

Basketball (1891)
It was at the International YMCA Training School in December 1891 that James Naismith invented the game of basketball, doing so at the demand of Luther Gulick, the director of the school. Gulick needed a game to occupy a "class of incorrigibles" -- 18 future YMCA directors who, more interested in rugby and football, didn't care for leapfrog, tumbling and other activities they were forced to do during the winter. Gulick, obviously out of patience with the group, gave Naismith two weeks to come up with a game to occupy them.

Naismith decided that the new game had to be physically active and simple to understand. It could not be rough, so no contact could be allowed. The ball could be passed but not carried. Goals at each end of the court would lend a degree of difficulty and give skill and science a role. Elevating the goal would eliminate rushes that could injure players, a problem in football and rugby.

Introducing the game of "basket ball" at the next gym class (Naismith did meet Gulick's deadline), Naismith posted 13 rules on the wall and taught the game to the incorrigibles. The men loved it and proceeded to introduce "basket ball" to their home towns over Christmas break. Naismith's invention spread like wildfire.

Not only was basketball invented by a YMCA institution, but the game's first professional team came from a Y. The Trenton YMCA (N.J.) had fielded a basketball team since 1892, and in 1896 its team claimed to be the national champions after beating various other YMCA and college teams. The team then severed its ties with the Y. It played the 1896-97 season out of a local Masonic temple, charging for admission and keeping the proceeds.

Professional Football (1895)
History shows that Professional football has its possible origins at a YMCA. In 1895, in Latrobe, Pa., John Brailler was paid $10 plus expenses by the local YMCA to replace the injured quarterback on their team. Years later, however, Pudge Heffelfinger claimed that he was secretly paid to play for the Allegheny Athletic Association in 1892. The National Football League elected to go with Pudge's version of events.

Volleyball (1895)
Volleyball was invented at the Holyoke YMCA (Mass.) in 1895 by William Morgan, an instructor at the Y who felt that basketball was too strenuous for businessmen. Morgan blended elements of basketball, tennis and handball into the game and called it "mintonette." The name "volleyball" was first used in 1896 during an exhibition at the International YMCA Training School in Springfield, Mass., to better describe how the ball went back and forth over the net. In 1922, YMCAs held their first national championship in the game. This became the U.S. Open in 1924, when non-YMCA teams were permitted to compete.
Racquetball (1950)
Racquetball was invented in 1950 at the Greenwich YMCA (Conn.) by Joe Sobeck, a member who couldn't find other squash players of his caliber and who did not care for handball. He tried paddleball and platform tennis and came up with the idea of using a strung racquet similar to a platform tennis paddle (not a sawed-off tennis racquet, as some say) to allow a greater variety of shots. After drawing up rules for the game, Sobeck went to nearby Ys for approval from other players and, at the same time, formed them into the Paddle Rackets Association to promote the sport. The original balls Sobeck used were half blue and half red. When he needed replacements, Sobeck asked Spalding, the original manufacturer, to make the balls all blue so they wouldn’t mark the Y’s courts.

Softball (1926)
Softball was given its name by motion of Walter Hakanson of the Denver YMCA in 1926 at a meeting of the Colorado Amateur Softball Association (CASA), itself a result of YMCA staff efforts. Softball had been played for many years prior to 1926, under such names as kittenball, softball and even sissyball. In 1926, however, the YMCA state secretary, Homer Hoisington, noticed both the sport’s popularity and its need for standardized rules.

After a gathering of interested parties, the CASA was formed and Hakanson moved to settle on the name softball for the game. The motion carried, and the name softball became accepted nationwide. Shortly thereafter, the Denver YMCA adopted a declaration of principles for softball, adhering to non-commercialized recreation open to all ages and races and demanding good sportsmanship. When the Amateur Softball Association of America was formed in 1933, the Denver YMCA team represented Colorado in its first national tournament, held in Chicago.

YMCA Programs
YMCA run programs of all types, from activities for older adults to water aerobics. Some of the biggest are camping, swimming and child care. Here are some stories of their development.

Camping (1860s)
Camping has been a part of YMCA programming for more than a century. The claim for a YMCA "first" in camping, however, must be worded carefully, since the YMCA did not invent camping in 1885, and Sumner Dudley did not lead the first YMCA camping program. What YMCAs can claim is having founded the first continuously used camp. The first school camp was started in 1861 by William Gunn, and "Gunn camps" became well known. A camp for "weakly" boys was organized in 1876 by Dr. Joseph Trimble Rothrock. The first
church camp for boys was started in 1880, and in 1881 the first private camp to meet special educational needs was established. None of these camps was a YMCA camp, and none of them survives today.

YMCAs became involved in camping in the 1860s, with the earliest reference being that of the Vermont Y’s "boys missionary" (who would now be the youth director) taking a group of boys to Lake Champlain for a "summer encampment." In 1881, the Brooklyn YMCA (N.Y.) reported taking 30 boys on a "camping out." Many other YMCAs had camp experiences for youth as well, and in 1882 national records started recording camping programs under "outings and excursions."

The oldest camp, now known as Camp Dudley, began in 1886. Sumner Dudley, long active in both the New York and New Jersey YMCA movements, was asked in 1884 to take "young honor YMCA members" camping. In 1885, he took seven boys for a week’s encampment at Orange Lake, N. J. The next year Dudley moved the site to Twin Islands, Lake Wawayanda, N.J. Ultimately, the camp settled on Lake Champlain, N.Y., in 1908. Dudley referred to the first camp as Camp Baldhead. After Dudley’s death in 1897, the camp was renamed Camp Dudley.

Body Building (1881)
The term "bodybuilding" was first used in 1881 by Robert Roberts, a member of the staff at the Boston YMCA. He also developed the exercise classes that led to today’s fitness workouts.

Swimming and aquatics (1885)
Swimming and aquatics have long been associated with the YMCA, and tens of millions of people across the country learned how to swim at the YMCA. It was not always this way, however, and for many years swimming was seen as a distraction from legitimate physical development.

The first reported YMCA "swimming bath" was built at the Brooklyn Central YMCA (N.Y.) in 1885. By the end of the year, it was reported that 17 Ys had pools. Pools then bore scant resemblance to the pools of today: The Brooklyn Central pool was 14 feet by 45 feet and 5 feet deep. Early pools, in addition to being small, had no filters or recirculation systems. The water in the pool just got dirtier and dirtier until the pool was drained and cleaned, which some Ys did on a weekly basis. No wonder the medical community saw them as a threat to health.

Two developments helped change YMCA staff attitudes towards pools. The first was the development of mass swim lessons in 1907 by George Corsan at the Detroit YMCA. What Corsan did was to teach swimming strokes on land, starting...
with the crawl stroke first, as a confidence builder. Prior to Corsan’s methods, strokes were only taught in the pool, and the crawl was not taught until later. Corsan also came up with the ideas of the learn-to-swim campaign and using bronze buttons as rewards for swimming proficiency. He gave a button to boys who swam 50 feet. Corsan’s learn-to-swim campaigns resulted in 1909 in the first campaign to teach every boy in the U.S. and Canada how to swim.

Perhaps Corsan’s land drills for swimming came about because of the way swimming had been taught. Early YMCA staff viewed swimming as a distraction from the real job of physical development, which meant exercise and gymnastics. Boys in San Francisco, for example, could not use the pool until after they had passed a proficiency test in gymnastics. In the 1890s, swimming was taught by using a rope and pulley system.

The second development was the use of filtration systems for keeping the water clean. Ray L. Rayburn, a founder of what was the Building Bureau (now Building and Furnishing Services), came up with the ideas of building pools with roll-out rims and water recirculation systems. Recirculation meant that the water could be filtered and impurities removed. The first roll-out rim was installed in 1909 in the Kansas City, Mo., pool. In 1910, a filtration system was added to the Kansas City pool. No more would pools be considered health menaces.

The combination of these developments, Corsan’s mass-teaching techniques and Rayburn’s filtration systems came together to popularize swimming and swim instruction at YMCAs.

A Springfield College student, George Goss, wrote the first American book on lifesaving in 1913 as a thesis. It was a YMCA national board member (then the YMCA International Committee), William Ball, who in the early 1900s encouraged the Red Cross to include lifesaving instruction in its disaster and wartime services programs. The YMCA Swimming and Lifesaving Manual, published in 1919, was one of the earliest works on the subject.

Even the military used YMCA swim instruction techniques. In World War I, the Army used mass land drills to teach doughboys. In 1943, Dr. Thomas K. Cureton, chairman of the YMCA National Aquatic Committee, published Warfare Aquatics, which was widely used by the armed forces (and YMCAs!) during the conflict and after.

The Council for National Cooperation in Aquatics, formed in 1951, was created as a result of the efforts of the YMCA. A group of 20 national agencies, the council was organized to expand cooperation in the field of aquatics.

The first mobile swimming pool was invented at the Eastern Union YMCA (N.J.) in 1961, enabling the Y to take instruction and swimming programs to people who could not go to the Y.

It is hard to overestimate the effect the YMCA movement has had on swimming and aquatics in general. In 1932, there were more than a million swimmers a year at YMCAs. In 1956, the national learn-to-swim campaigns became Learn to Swim Month. In 1984, it was reported that YMCAs collectively were the largest operator of swimming pools in the world.
The Ragger Society (1914)
The forerunner of today's Rags and Leather Program, was started in 1914 at Camp Loma Mar in California. It started because a camp director wanted to award athletic ability. Other camp leaders objected, noting that a handicapped boy would then never be able to win. They settled on a program of personal counseling and seeking God's will for oneself. The hymn, "I Would Be True," written in 1917 by Howard A. Walker, was inspired by the program's creed. Walker himself later went to India and performed YMCA work there.

Gang Prevention & Group Child Care (1960s)
Group Child Care & Gang Prevention (1960s) was not started at a YMCA, but Ys moved swiftly to meet the needs of a changed and changing society. Rosie the Riveter went back home after World War II, but her daughter left and didn't look back. Today's YMCA movement is the largest not-for-profit provider of child care and is larger than any for-profit chain in the country.

No one could have predicted that in the beginning. The origins of group child care are obscure, and we will probably never know who had the first group care program. A strong possibility, however, is that group care grew out of gang prevention and teen intervention programs in the 1960s.

The Chicago YMCA had a strong youth outreach program in the 1960s (Ys had been working with youth gangs in one way or another since the 1880s). Workers noticed, however, that youths attending the program often brought their younger siblings along because they were providing care while their parents worked. Child care was organized so that the older kids could attend these programs without concern or distraction.

In the 1990s, about half a million children received care at a YMCA each year.

Organizations influenced by YMCAs

The influence of YMCAs on others extends far beyond individuals in their programs. Here are some organizations that drew on YMCA experience or assistance during their formative years.

Association Press (1907)
Association Press, first established in 1907 as the YMCA Press, was created as the publishing arm of the YMCA movement, producing technical works, Bible study courses, and other works suitable for building character and leadership skills, and was a pioneer in publishing books on sex education. It was also the leading publisher of evangelistic materials used by YMCAs, including the popular "everyday life series" of
devotionals written by Harry Emerson Fosdick between 1910 and 1920. Association Press also printed the text first used by Dale Carnegie in teaching public speaking: *Public Speaking, a Practical Course for Business Men.*

**Paris Press** has a connection with the **Association Press** of the U.S. YMCA connection. It was started in Prague in 1920 by Julius Hecker, a World Service worker, who wanted to publish works in Russian for those fleeing the revolution and the civil war. Since many books didn't fit in with Communist ideology, they couldn't be printed under Communist rule. Hecker's efforts helped the refugees sustain their culture and community in the face of great upheaval. One of the most important works put out by the Paris Press was the Russian edition of Alexandr Solzhenitsyn's *The Gulag Archipelago.*

**Boy Scouts of America (1910)**

YMCA staff members played a key role in the development of the **Boy Scouts of America**. After Lord S.S. Baden-Powell and others started scouting in 1897 in Britain, it spread to America, and many YMCAs here had Boy Scout programs around the turn of the century. YMCA and scout leaders realized that scouting in the U.S. needed to be a separate movement, but that it would benefit from YMCA nurturing, too.

Soon it was decided by the Boy Scouts that they needed their own national organization, and in June 1910 a temporary national headquarters for the Boy Scouts was housed in a YMCA office in New York City. The first National Council office of the Boy Scouts of America was opened in New York City in 1911.

Ties to the YMCA continued for some time after 1910. That year, Lord Baden-Powell and others held the first training conference for scout leaders, the Scout Master's Training School, at the Silver Bay association (N.Y.), which was well known for hosting retreats and meetings for the leaders of the YMCA movement (the YWCA and other organizations also used Silver Bay for similar purposes). These Scout Master's Training Schools continued for some years.

In 1985, on the occasion of their 75th anniversary, a plaque first given in 1947 was rededicated at Silver Bay by the Boy Scouts of America, in honor of its role in founding of scouting in America.

**Camp Fire Girls (1910)**

The **Camp Fire Girls** (now Camp Fire Boys and Girls) was founded in 1910 through the joint efforts of Luther Gulick and his wife, Charlotte. Gulick was already well known for his work in the YMCA, his understanding of the whole person leading to his design of the YMCA’s inverted triangle, one side each for spirit, mind and body. Busy with his existing commitments, Gulick did not...
want to take on the task of forming another organization. He did, however, advise others on the organization of the Thetford Girls, the forerunner of the Camp Fire Girls. Mrs. Gulick by then had become interested in the Thetford Girls and was inspired to name their first camp, at Sebago Lake, Maine, Camp WoHeLo, from the first two letters of the words work, health and love. She saw them as forming an upright triangle, which she pictured superimposed over the Y’s symbol to make a star.

The United Service Organizations (1940)
The United Service Organizations, better known as the USO, was created in October 1940 as a joint effort by the YMCA, YWCA, National Catholic Community Service, National Jewish Welfare Board, Traveler’s Aid Association and the Salvation Army. These organizations, like the YMCA, had long histories of helping servicemen and noncombatants in the nation’s wars, but the scale of mobilization needed as America prepared for World War II was far beyond the scope of any one organization.

The only way to deal effectively with the needs of the hundreds of thousands of young men being drafted was to combine and coordinate efforts. In January 1941, USO leaders met with President Roosevelt and various military leaders. In settling a dispute between which areas of the USO’s activities would be controlled by the military and which by the civilians, Roosevelt ordered that the private organizations would handle the recreation services and the government would put up the buildings and put the USO name on the outside.

The Peace Corps (1961)
The Peace Corps, founded in 1961 by order of President Kennedy, was patterned after the YMCA’s program of World Service Workers, which had started in the 1880s. The student Ys of that era included as members John R. Mott and Robert Wilder, who founded the Student Volunteer Movement in 1888. The volunteers pledged themselves to overseas missionary work after graduation from college. The YMCA was given the opportunity to organize the corps, but turned it down due to the burden of its other activities.

Organizations Started at YMCAs

YMCAs have long been places where things happened. Here are some of the organizations and events that first took place at a YMCA.

Gideons International (1899)
Gideons International was formed on July 1, 1899, at the YMCA in Janesville, Wis., by three men (Nicholson, Hill and Knights) who had come up with the idea a few months earlier. The Gideons were a group of “Christian commercial travelers” who were to evangelize as they went around the country on business. To that end, Gideons would leave Bibles in the rooms in which they had stayed. While their
meeting was at the YMCA, they were not Y staff or volunteers or members. Nor were they taking part in a YMCA program.

**Toastmasters International (1903)**

Toastmasters International was invented in 1903 as an older youth public speaking program by Ralph C. Smedley, education director of the Bloomington YMCA (Ill.). Smedley realized that older boys visiting the Y needed training in communication skills. He arrived at the name "The Toastmasters Club" because meetings resembled a series of banquet toasts. At each YMCA Smedley transferred to, he would start a new club. Viewed as a personal idiosyncrasy of Smedley by other YMCA secretaries, the Toastmasters Clubs he started were by and large not successful until he began working at the Santa Ana YMCA (Calif.). After the first Toastmasters Club meeting there on October 22, 1924, the idea took hold and spread, and a federation of Toastmasters Clubs was soon created. The federation of clubs incorporated in 1932, and by 1941 Toastmasters needed Smedley’s full attention, so he resigned from the YMCA to devote himself to his creation.

**Father’s Day (1910)**

Father’s Day in its present form was created at a meeting on June 6, 1910, at the Spokane, Wash., YMCA when Louise Smart Dodd petitioned the Spokane Ministerial Alliance to recognize and support Father’s Day. They swiftly endorsed the idea and helped it spread, holding the first Father’s Day celebration on June 19, 1910. President Wilson officially recognized Father’s Day in 1916, President Coolidge recommended it in 1924, and in 1971 President Nixon and Congress issued proclamations and endorsements of Father’s Day as a national tradition.

**The First African-American Baseball League (1920)**

The Negro National League, the first black baseball league to last a full season, was formed at a meeting at the Paseo YMCA in Kansas City, Mo., in 1920.

**The National Model Railroad Association (1935)**

The National Model Railroad Association was started in 1935 at the Y on 4th Street in Milwaukee, selected because the Model Railroad Club of Milwaukee had a layout there. By setting size and compatibility standards, the NMRA sparked the development of model railroading as a hobby of universal appeal. Before then, hobbyists could not trade or mix equipment and trains; all the manufacturers had their own designs and specifications. Today, model railroading has about a quarter-million enthusiasts in the U.S. alone, and the NMRA has approximately 24,000 members worldwide.
“Head of Christ” Painting by Warner Sallaman (1940s)

Some lists of YMCA firsts state that Warner Sallman painted "Head of Christ" in the reading room of the Central YMCA in Chicago in 1940. Unfortunately, there’s no evidence to support that claim. According to Valparaiso University’s Art Department, Sallman made a charcoal sketch of “Head of Christ” at his studio at 5412 North Spaulding, Chicago, in 1924 as cover art for a magazine called The Covenant.

In 1940, he was asked to create a color version and created the oil painting that has been reproduced approximately 500 million times, making it one of the most popular works of art in history. The oil version was probably created at his studio.

The idea that Sallman originally painted “Head of Christ” in a YMCA probably got started as a result of Sallman’s “chalk talks.” Sallman, a devout Christian, held some 500 chalk talks, many at YMCAs, where he would make a charcoal sketch of “Head of Christ” while giving a testimonial about Jesus. At the conclusion of his talk he would give the sketch to the Y or other organization sponsoring the session. Sallman did make additional oil paintings of Head of Christ, some of which may have been made in YMCAs during talks, or on commission.

One YMCA has confirmed that, in 1949, Sallman countersigned an oil copy of “Head of Christ” that is still at the YMCA. Another Y has one of the charcoal sketches Sallman made during a chalk talk at a Y-sponsored breakfast prayer meeting in the early 1950s. Sallman himself related that he had made the original 1924 charcoal sketch in his studio one night.

YMCAs and Minorities

YMCAs have interpreted their Christian mission in a practical way, including in their programs and outreach missions to many groups excluded by others at the time. For example, long before the phrase “cultural diversity” was used, YMCAs were at work in the Great Plains with both the U.S. Cavalry and the Sioux Indians.

African-American YMCAs (1853)

YMCAs in the African-American community have a long and varied history. The first YMCA for blacks was founded in 1853 by Anthony Bowen, a freed slave, in Washington, D.C. It was the first non-church black institution in America, predating Lincoln University in Oxford, Pa., by a year. In 1888, William Hunton became the first full-time black secretary in the YMCA movement, and in 1900 the first conference of black secretaries was held. In 1896, there were 60 active colored Ys, 41 of which were student Ys at colleges (the first black student YMCA was formed in 1869 at Howard University, Washington, D.C.). By 1924, there were 160 Negro Ys with 28,000 members.

Twenty-five black YMCAs were built in 23 cities (there were three in New York City) as a result of a challenge grant program announced by Julius Rosenwald in 1910. Rosenwald promised $25,000 towards the construction of YMCAs in black communities if the community raised $75,000 over a five-year period. Adjusting for inflation, Rosenwald’s grants would total about $10 million today. The effect
of these "Rosenwald Ys" was keenly felt in the 1950s and '60s: YMCAs, being integral parts of the black community, played important roles in the struggle for civil rights.

In 1932, the student YMCAs voted to not hold meetings in states with Jim Crow laws. Eugene E. Barnett, head of the national YMCA organization during the 1940s, was a strong advocate of integrating YMCAs and full civil rights for minorities.

While YMCAs provided proud firsts on racial matters in the 19th and early 20th centuries, they also provided some sad lasts later on. In the 1960s, some 300 YMCAs were still racially segregated, and a few left the movement rather than comply with the national organization's directive to integrate.

The YMCA also had a role in the creation of modern black historiography. Carter G. Woodson, Ph.D., a historian and the second African-American to receive a doctorate in history from Harvard University, stayed at the Wabash Area YMCA in Chicago when he visited the city during the 1910s. During that era, formal and informal segregation limited blacks to only certain areas of the city. As a result, the Wabash Area Y became a major institution in serving the black neighborhood known as Bronzeville.

It was there that Woodson and four friends met in 1915 to found the Association for the Study of Negro Life and History. The men felt that if whites learned more about blacks, race relations would improve. The association, and Woodson's later scholarship, were important vehicles in establishing the study of African-American history as an accepted academic pursuit at all major colleges and universities. Woodson was also a practical man in addition to being a scholar: he knew that demonstrating the talents and accomplishments of blacks in America would help increase white regard for blacks. In 1926, he organized the first Negro History Week, held in Washington, D.C. In the 1960s, it grew into Black History Month and is celebrated throughout the country.

In the 1970s, Bronzeville ran down, the Wabash YMCA was closed and the building was nearly torn down. Now the neighborhood is improving and the building is on the National Register of Historic Places.

It would be misleading, though, to think of Ys in the black community only as centers of civil rights planning and wellsprings of academic study. In the late summer of 1951, a young African-American musician nicknamed "Blues Boy" recorded the song "Three O'Clock Blues" at the Abe Scharff YMCA in Memphis, Tenn. It became his first national hit, and for B.B. King, the rest is history.

YMCAs and Women (1860s)
The early history of women in the YMCA is not well documented, although it is believed that the first female member of a YMCA joined in Brooklyn, N.Y., in the late 1850s. This is based on a statement by one observer in 1869 that Brooklyn had had women as members for "half of its existence." The Brooklyn YMCA was founded in 1853. There were several female members, at least unofficially, by the 1860s. The Albany (N.Y.) convention of 1866 went so far as to refuse to seat several women delegates, holding that representation at the convention had to be based on male membership. Ellen Brown, who was not only the first female employee of a YMCA but also the first boys work secretary in the movement, was hired in 1886. By 1946, women accounted for
12 percent of the membership.

This is not to say that women were not active in YMCAs before the 1860s. Almost immediately after the founding of the YMCA in America, women taught classes, raised funds and functioned as a "ladies aid" society would in church. These committees of women were largely informal, and official Ladies Auxiliaries were not widely found until the 1880s. The earliest known auxiliary was started in Charleston, S.C., in 1858. There is record of "lady members" using YMCA gyms in 1881.

**Asian-American YMCAs (1875)**

U.S. YMCAs serving Asians were first established in San Francisco to serve the large Chinese population there in 1875, although the YMCA in Portland, Ore., had opened a mission school and engaged a Chinese man to distribute religious tracts five years earlier. The Chinese were subjected to violent racism at this time, as witnessed by the Chinese Exclusion Act of 1882. The secretaries of these Chinese Ys were natives of China who converted to Christianity. A Japanese YMCA was founded in San Francisco in 1917.

**U.S. Indian YMCAs (1879)**

U.S. Indian Ys first started in 1879 with the founding of a YMCA by Thomas Wakeman, a Dakota Indian, in Flandreau, S.D. The Dakota Indian associations were formally received into the state organization in 1885. By 1886, there were 10 Indian associations with a total of 156 members. By 1898, there were about 40 Indian associations, including several student YMCAs. The student department’s interest in Indian work was fueled by James A. Garvie’s presentation to the convention of 1886: Garvie, a Sioux, had translated the model college constitution of a student Y into the Sioux language.

The first Y employee hired to do Indian work full time was Dr. Charles Eastman, a Sioux hired in 1895. Prior to that, however, the Kansas state association had engaged a native Indian missionary to work among his own people. In 1920, Indian efforts were overseen by the student department. By 1926, the number of Indian YMCAs was too small to include separately in the annual report. The General Convention of Sioux YMCAs in Dupree, S.D., and the Mission Valley YMCA Family Center in Ronan, Mont., are the last YMCAs on reservations.

**YMCAs and the Military**

George Stuart, founder of the Philadelphia YMCA and head of the Y’s efforts in the Civil War, said that there is "a good deal of religion in a warm shirt and a good beefsteak." YMCAs, to meet the needs of those in the armed forces, responded with care, imagination and skill. Here is an overview of the YMCA and the military.

**YMCAs and the military** have enjoyed a relationship that predates the Civil War. Ys have always sought out young men to assist, and the fact that men went into the military simply meant that the YMCA followed them there. Before the Civil War, there is record that the Portsmouth YMCA (Va.) supplied a library in 1856 to a Navy port and later held meetings aboard a training ship. In 1859, the Boston YMCA made similar efforts.
Civil War (1861-1865)
Ys first participated in American wars in May 1861 with the formation of the Army Committee by the New York association during the Civil War. Several YMCAs, notably the New York and Chicago associations, raised troops, including New York's 176th, the "Ironsides Regiment." In Chicago, it was reported that the Chicago YMCA raised five companies of troops and "could have raised five more."

The New York association's Army Committee and similar efforts by several other Ys were merged into the Christian Commission, responsible for directing Union YMCAs' relief efforts. The Christian Commission oversaw approximately 4,850 volunteers, one of the most famous of whom was the poet Walt Whitman, who served as a nurse. Through the Christian Commission, YMCAs supported hospitals and supplied nurses and aides to tens of thousands of casualties and prisoners of war throughout the hostilities, on both sides of the conflict. YMCAs were also active in distributing tracts and Bibles throughout the Union and the Confederacy. The Chicago Y held devotional services for the soldiers and later helped maintain a home for men in transit, the sick and the wounded.

Not only did YMCAs help raise military units, but military units started YMCAs. Southern units were more active than Northern ones in this regard, and about 30 such Ys left records. The federal POW camp at Johnson's Island, Ohio, organized a YMCA, the chief functions of which were looking after the prison hospital and holding weekly lecture meetings. In the winter of 1863-64, the YMCA of one Mississippi brigade organized a one-day-a-week fast among its members and sent the saved rations to the poor in Richmond.

The Civil War generally devastated YMCA membership in both the North and South. The work of the YMCA during the war, however, made it popular with the troops, and the movement recovered swiftly.

In the period between the Civil War and the Spanish-American War, YMCA work with the military consisted mainly of providing a regimental writing tent for the men during the summer and holding Bible studies. Annapolis had a functioning YMCA among the midshipmen by 1879, and West Point reported a cadet branch in 1885. Finally, a YMCA was given permanent quarters in Fort Monroe, Va., in 1889. Things moved onto a more official footing when the 1895 YMCA Convention authorized greater efforts. Little was done before the Spanish-American War to implement this directive.

Spanish American War (1898)
The outbreak of war with Spain saw a repeat of YMCA efforts during the Civil War. Ys raised military units and followed the flag to the Philippines and Cuba, attending to the needs of servicemen, prisoners of war and noncombatants.

The experiences of the YMCA movement showed that helping servicemen would
require full-time resources, and in September 1898 an Armed Services department was established. In 1902, Congress authorized the erection of permanent YMCA facilities on military bases, and in 1903, special training was available for secretaries heading Army and Navy Ys.

World War I (1914-1918)

By 1914, there were 31 military YMCAs and 180 traveling libraries. Almost a quarter of a million men stayed in their dormitories. The YMCA had an extensive presence in the military during the period before World War I.

Almost 26,000 YMCA staff and volunteers performed YMCA work during the first World War, some of it years before America entered the war. American secretaries, under the sponsorship of the World Alliance in Geneva, were sent to Europe at the beginning of the war to care for prisoners held by both sides. While firm figures are not available, it is safe to say that YMCA efforts directly helped hundreds of thousands of POWs, and indirectly helped most of the four million POWs of that war.

With its more than 1,500 canteens and post exchanges, the YMCA fed and entertained more troops during World War I than did any other welfare organization, including the Knights of Columbus and the Salvation Army. It was common for Catholics and Jews to use Y buildings for religious services. In all, the YMCA performed more than 90 percent of the welfare work of the time, mostly in the form of running canteens and post exchanges. The canteens and post exchanges the YMCA ran in France were released from minimum price laws in effect in America, its "history and reputation" being sufficient guarantees against abuse.

The Y’s efforts during WWI even inspired music. One song about the Y was written by Irving Berlin, who was stationed at Fort Yaphank in 1918. Berlin wrote “I Can Always Find A Little Sunshine in the Y.M.C.A.,” which was performed in a revue he wrote titled “Yip, Yip, Yaphank.” Another, “The Meaning of Y.M.C.A. (You Must Come Across),” written by Ed Rose and Abe Olman in 1918, had the lyric: “They’ve done their bit and more/To help us win the war....The Y is right there on the firing line.”

World War II (1939 – 1945)

World War II saw a continuation of YMCA services for the military and displaced persons. The scale of the YMCA’s efforts during WWII is seen not only in its USO work, but also in the number of prisoners of war assisted through YMCA efforts. It is believed that between 1939 and 1945, YMCAs worked with, or supplied the bulk of the financing for working with, some six million POWs in more than 36 countries.

YMCA also worked with the 10 internment camps set up in 1942 to hold the 110,000 Japanese-Americans held during the war. The bulk of the Y’s work consisted of clubs and camping for boys in the camps. In the words of David M. Tatsuno, an internee and former member of the Japanese Y in San Francisco: “The Y never forgot us.”
YMCAs’ other influence on society

Many times YMCAs influenced society simply by coming up with creative solutions to their own problems, such as a need for trained YMCA employees. These solutions then spread throughout our society because they met the needs of others.

Colleges and Universities (1890)

Many of the practices of colleges and universities in America -- in fact, several colleges and universities themselves -- can be traced back to YMCA involvement in higher education. Ys in the 19th and early 20th centuries placed much more emphasis on formal and informal classes and teaching than they do now. This stemmed in part from the fact that free public education was not as widespread as it is today. That meant that there were large numbers of working teens who needed classes and instruction if they were to avoid the traps and pitfalls that George Williams so keenly observed in London decades earlier. YMCA classes and instruction also stemmed from the need for properly trained staff to run local Ys and carry on its programs.

The YMCA movement played a large role in the development of higher education. By 1916, there were approximately 83,000 students taking more than 200 YMCA courses. In 1946, approximately 130,000 students were taking courses through Ys. In all there were 20 YMCA colleges in 1950, ranging from Fenn College in Cleveland to Springfield College. Beginning in the 1930s, as the colleges became free-standing institutions of higher learning and not just training centers for YMCA staff, it made sense for them to break free of the YMCA movement altogether. Only Springfield College and the George Williams College of Aurora University retain close ties with the movement.

Another aspect of YMCA involvement in higher education was the work of student YMCAs at many colleges and universities. Student Ys offered counseling and services to students on an ecumenical basis, an approach that heavily influenced and ultimately changed the way church and college staff conducted their own campus outreach programs. Student work was so important to the movement that, in 1922, the movement authorized the organization of a national student council, complete with its own statement of purpose.

Residences

Residences at YMCAs play a vital part in both the movement and in American society. Dormitories were seen as giving young men a place of refuge from the evils of the world. In 1898, Young Men’s Era, a Y publication, declared that dorms were more in keeping with the YMCA mission than other money-making devices.

The first known Y dormitory was noted in 1867, when the Chicago YMCA had a 42-room dormitory in Farwell Hall. By 1910, 281 Ys had about 9,000 rooms available, and in 1916 the Chicago YMCA Hotel opened with 1,821 rooms. By 1922, Ys had approximately 55,000 rooms, and in 1940 there were about 100,000 rooms at YMCAs. No hotel chain had more rooms.
Global Influence

John R. Mott was awarded The Nobel Peace Prize in 1946 for the YMCAs humanitarian efforts around the world and for his working with others for the betterment of mankind. Mott himself was a product of the student YMCA movement and was a major influence on the Y’s missionary movement that spread the YMCA globally in the 1920s and 1930s.

In 1993, the Jerusalem International YMCA, the only international Y owned by YMCA of the USA, was nominated for the Nobel Peace Prize for its work for promoting peace in the Middle East.

Closing Thoughts

The YMCA has an incredible history of global impact. Today there are over 2600 YMCA Branches and Member Associations. Over 20 million people are served by YMCAs throughout the USA. Over 550,000 volunteers serve in YMCAs and communities across the land by giving of their time and talents to be “difference makers” in their communities. Over 500,000 children are impacted through YMCA childcare each year.

Additionally, each year, YMCAs partner with numerous local organizations to develop and implement effective, collaborative programs and community-based solutions. When this is taken into consideration, the nation’s YMCAs collectively represent the largest collaborative organization in the country.

Furthermore, YMCAs Internationally are now serving more than 45 million people in 120 countries. YMCAs in the U.S. can have worldwide impact by providing guidance and support, building strong local leadership, and improving the health of families and communities across the globe.

People in today’s world are looking for answers, leadership, and meaning in life as much as ever before. Parallel to this, there is a fresh breeze of spiritual renewal blowing within the Y as courageous Y leaders are looking for ways to impact the whole person – spirit, mind, and body.

Local YMCA branches are positioned better than ever to “preserve the core” and to “stimulate progress” – to step out and pioneer new solutions that put “Christian principles into practice through programs that build healthy spirit, mind, and body for all”.

We commend this history of cultural impact to your reflection and care. As you lead in the YMCA, you will be well served to know the significant history of this great organization.

Who knows that it might be your faithfulness in doing your YMCA work as a staff person or volunteer that could change the world. Can you serve others, do the best you can at your work, and trust God for the results? We hope so and we will join you in this quest.

Mission Focus Team

This document is based on an article called “First and Foremosts” that was produced by the YMCA of the USA. This edited and recompiled version has added some historical pictures as well as some mission related questions as it relates to these YMCA accomplishments. This information was compiled from individuals, other organizations, professors, current and retired YMCA employees and particularly the YMCA of the USA archives department.
